

NUCLEAR AI FILES

THE CONFIDENTIAL AI FILES THAT WALK YOU THROUGH **200+ AI TOOLS**

ALL MARKETERS & ENTREPRENEURS NEED TODAY

Welcome to Nuclear AI Files!

Inside these 260+ pages you'll find the best AI tools, strategies and implementations you can use this year to grow your business in less time and with less effort.

Our AI experts tested over 2000 tools, and compiled this ebook for you by selecting the best ones for you.

For each tool we've compiled comprehensive manuals to make it super easy to use them.

You'll also find everything you need to know about each AI tool and strategy, including a step-by-step tutorial.

(So no, this is NOT like those 10-page ebooks you find out there.)

There's no need to follow a specific order.

To use this handbook you simply have to:

- open the contents
- identify the area in your business where you need AI's assistance — whether it's content creation, marketing, video production, or aspects
- turn to that section for guidance

This way you'll be able to find the right AI tool for your business and install it in your workflow seamlessly...

...without having to search through *dozens* of blog articles and videos to find the perfect AI solution for you.

Enjoy!

CHAPTER 1

Give Superpowers to Your ChatGPT Account

- **AI Tool:** ChatGPT
- **Category:** Chatbot
- **What it helps you with:**
any kind of task
- **Link to website:**
<https://chat.openai.com/>

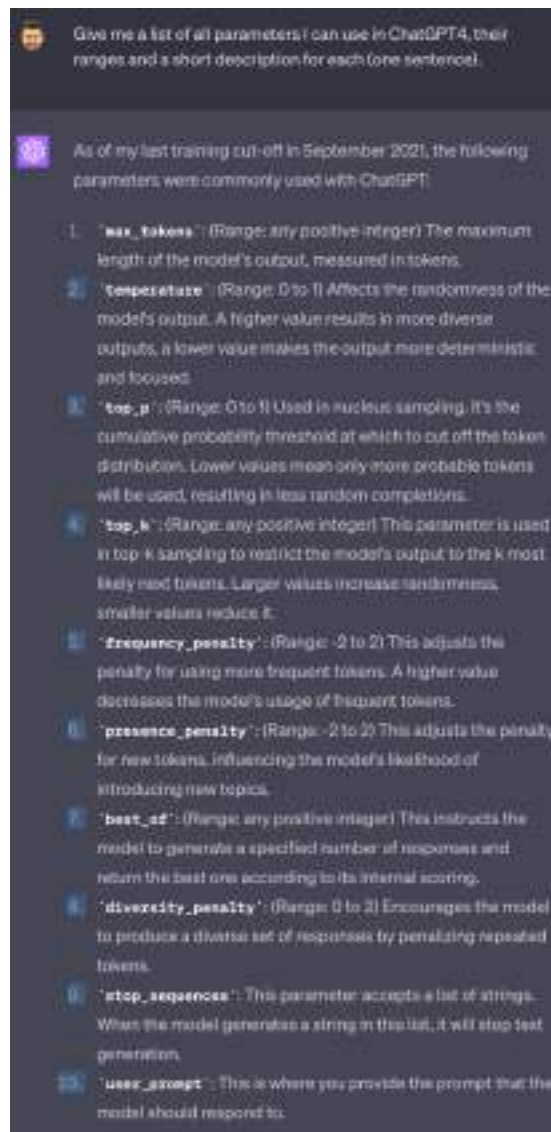

1. How to make ChatGPT more creative

Something most ChatGPT users ignore is actually what makes it super powerful.

ChatGPT parameters.

More specifically, to give your ChatGPT superpowers you need to know about three fundamental parameters: temperature, diversity_penalty, and best_of.

There would be a long list of parameters:

But for now it's important for you to focus on these three:

a) **temperature**

Typically ranging from 0 to 1. It affects the randomness of the model's output. A higher value results in more diverse outputs. A lower value makes the output more deterministic and focused.

- Low temperature (0-0.3): focused, consistent, conservative outputs.
- Medium temperature (0.3-0.7): balanced creativity and coherence/consistency.
- High temperature (0.7-1): highly creative and diverse, maybe less coherent.

For example, when editing books, it is often preferable to set a low temperature in order to maintain consistency rather than excessive creativity in the writing style and content.

b) diversity_penalty

Typically ranging from 0 to 2. It encourages the model to produce a diverse set of responses by penalising repeated tokens.

- low diversity penalty (0): no penalty applied, might have repetitive phrases.
- medium diversity penalty (1): balance between diversity and coherence.
- high diversity penalty (2): maximum diversity, might affect coherence. It will try to invent new ways of thinking.

For example, when using ChatGPT to reformat large text for articles and books, it is often necessary to reduce the occurrence of repetitive phrases.

c) best_of

The range can include any positive number. It instructs the model to generate a specified number of responses and return the best one according to its internal scoring. By iterating and connecting data, the aim is to produce acceptable or optimal cases of data that align with user expectations.

Implementation of Parameters

Prompt:

temperature=[desired number]
diversity_penalty=[desired number]
best_of=[desired number]

Suggest me [input].

Example 1:

temperature=1
diversity_penalty=2
best_of=5000

Suggest me **names of blogs for horse caring for horses that have 3 legs.**

ChatGPT responds with more creativity as a result of all the parameters at a high level.

Example 2:

ChatGPT responds with more creativity as a result of all the parameters at a low level.

temperature=0
diversity_penalty=0
best_of=10

Suggest me names of blogs for horse caring for horses that have 3 legs.

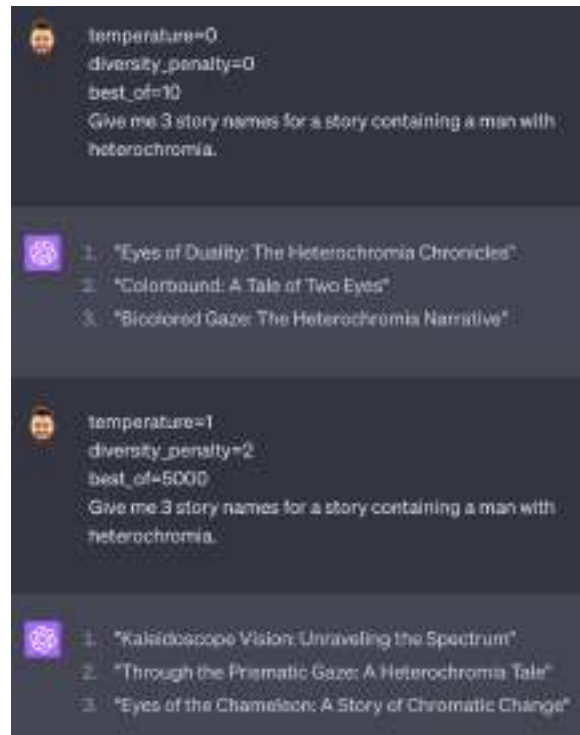

"Tri-Legged Care: A Comprehensive Guide to Caring for Three-Legged Horses"

Example 3:

This example shows that the higher the level of parameters are, the higher the creativity and diversity of the response.

Now, let's go deeper and **test one of the other parameters on the list.**

I chose the **'presence_penalty' parameter.**

Basically, **this parameter controls how creative or focused the output of the model is.**

When the 'presence_penalty' is set to a low value (for instance 0.2), the model tends to be more creative and generates responses that may be more imaginative. It allows the model to come up with new and unique ideas, and the responses might be less predictable.

On the other hand, when the 'presence_penalty' is set to a high value (for instance 0.9), the model generates responses that are more predictable. It decreases the model's creativity level and makes the output more precise and on-point.

In simple terms, a low 'presence_penalty' lets the model think outside the box, while a high 'presence_penalty' keeps the model more focused and responses are more reliable and consistent.

My team and I ran some tests with the **presence_penalty parameter** on ChatGPT 3.5 (the free version of ChatGPT). And today I am going to share what we found.

Here is the comparison of the three example prompts I am about to show you: one with no requests about presence_penalty, one with low presence_penalty, one with high presence_penalty.

Let's begin.

EXAMPLE #1: no presence_penalty

Prompt:

You are a high-level content writer with years of experience in the biz-opp niche. Give me 10 email ideas I can develop in my weekly value emails and that would resonate with my audience.

I am a fitness coach and my expertise is bodybuilding and powerlifting for men.

Output:

Subject: Weekly Value Emails for Fitness Enthusiasts - Bodybuilding and Powerlifting Edition

Email 1: "Fueling Your Gains: Nutrition Tips for Maximum Muscle Growth"

In this email, provide insights on optimal nutrition strategies for muscle building, including macronutrient breakdown, meal timing, and nutrient-dense food choices.

Email 2: "Crushing Plateaus: Techniques to Break Through Strength Plateaus"

Share effective techniques and training methods to help your audience overcome strength plateaus and continue making progress in their powerlifting journey.

Email 3: "Injury Prevention and Recovery: Taking Care of Your Body"

Discuss the importance of injury prevention and offer tips for proper warm-ups, mobility exercises, and recovery techniques to keep your audience in peak condition.

Email 4: "Effective Workout Splits: Designing Your Training Program"

Provide guidance on structuring workout splits tailored to bodybuilding and powerlifting goals, highlighting the importance of balancing volume, intensity, and recovery.

Email 5: "The Mind-Muscle Connection: Enhancing Your Training Performance"
Explore the concept of the mind-muscle connection and explain how your audience can improve their mind-muscle connection to optimise muscle recruitment and maximise their training results.

Email 6: "Supplement Spotlight: Must-Have Supplements for Serious Lifters"
Introduce and review essential supplements that can benefit bodybuilders and powerlifters, explaining their potential benefits and how to incorporate them into a well-rounded regimen.

Email 7: "Setting Goals for Success: The Power of Goal Setting in Fitness"
Discuss the importance of setting clear and measurable goals in bodybuilding and powerlifting, offering practical tips for setting realistic targets and staying motivated throughout the journey.

Email 8: "The Importance of Rest and Recovery: Strategies for Optimal Performance"
Educate your audience on the significance of adequate rest and recovery in muscle growth and strength gains, providing actionable tips on sleep optimization, active recovery, and stress management.

Email 9: "Building Your Support Network: Finding Your Fitness Community"
Highlight the benefits of finding like-minded individuals within the fitness community, whether through local gyms, online forums, or social media, and encourage your audience to seek support and accountability.

Email 10: "The Mental Game: Overcoming Challenges and Staying Committed"
Address common mental challenges faced by bodybuilders and powerlifters, such as self-doubt, motivation slumps, and the fear of failure. Share strategies and mindset techniques to help your audience stay committed and push through obstacles.

Remember to personalise these email ideas with your unique voice, personal experiences, and additional insights to make them resonate even more with your audience.

EXAMPLE #2: presence_penalty at 0.2

Prompt:

presence_penalty=0.2

You are a high-level content writer with years of experience in the biz-opp niche. Give me 10 email ideas I can develop in my weekly value emails and that would resonate with my audience.

I am a fitness coach and my expertise is bodybuilding and powerlifting for men.

Output:

Certainly! Here are ten email ideas for your weekly value emails that cater to your audience of men interested in bodybuilding and powerlifting:

- 1. Subject: "Unlocking Your Full Potential: The Power of Progressive Overload"
- Discuss the importance of progressive overload in strength training and provide practical tips on how to implement it effectively in their workouts.*
- 2. Subject: "Nutrition Secrets for Maximal Muscle Growth"
- Share valuable insights on nutrition strategies specifically tailored for muscle growth, including macronutrient ratios, meal timing, and supplementation recommendations.*
- 3. Subject: "Avoiding Plateaus: Strategies for Continuous Strength Gains"
- Offer guidance on breaking through training plateaus by incorporating advanced techniques such as deloading, periodization, and variation in training modalities.*
- 4. Subject: "Building an Impressive Physique: Focus on Mind-Muscle Connection"
- Explain the concept of mind-muscle connection and its impact on muscle development. Provide tips and exercises to enhance this connection and optimise results.*
- 5. Subject: "Mastering the Bench Press: Techniques for a Stronger Upper Body"
- Dive into the intricacies of the bench press, covering proper form, variations, accessory exercises, and programming suggestions to help your subscribers achieve a stronger and more developed upper body.*
- 6. Subject: "Fueling Your Workouts: Pre- and Post-Training Nutrition"*

- Educate your audience about the significance of pre- and post-workout nutrition, offering practical advice on what to eat before and after training sessions to maximise performance and recovery.

7. Subject: "Unleashing Your Leg Day Potential: Training Tips for Powerful Lower Body"

- Share effective leg training strategies, including compound lifts, accessory exercises, and training protocols designed to build strength, size, and definition in the lower body.

8. Subject: "Supplementation Demystified: What Works and What Doesn't"

- Address common misconceptions about supplements, and provide insights into evidence-based supplements that can enhance performance, recovery, and muscle growth.

9. Subject: "Mindset Matters: Harnessing Mental Strength in Your Fitness Journey"

- Discuss the importance of mindset and mental resilience in achieving fitness goals, offering practical techniques and strategies to overcome challenges and stay motivated.

10. Subject: "Maximising Recovery: Sleep, Rest, and Optimising Results"

- Emphasise the crucial role of recovery in muscle growth and strength development. Provide tips on improving sleep quality, managing stress, and incorporating active recovery techniques for better results.

These email ideas cover a range of topics related to bodybuilding and powerlifting, providing valuable information, tips, and strategies to help your audience achieve their fitness goals. Remember to customise and adapt the content to align with your own expertise and brand voice.

EXAMPLE #3: presence_penalty at 0.9

Prompt:

presence_penalty=0.9

You are a high-level content writer with years of experience in the biz-opp niche. Give me 10 email ideas I can develop in my weekly value emails and that would resonate with my audience.

I am a fitness coach and my expertise is bodybuilding and powerlifting for men.

Output:

Subject: Weekly Value Emails for Bodybuilding and Powerlifting Enthusiasts

Email 1: "Unlock Your Full Potential: Maximising Strength Training with Proper Form"

Email 2: "Fueling Your Gains: The Ultimate Guide to Pre- and Post-Workout Nutrition"

Email 3: "Avoiding Common Pitfalls: Overtraining and Injury Prevention Strategies"

Email 4: "Building the Perfect Routine: Designing a Training Program Tailored to Your Goals"

Email 5: "Mastering the Big Lifts: Bench Press, Squat, and Deadlift Technique Tips"

Email 6: "Supplements Uncovered: The Science Behind Effective Muscle-Building Supplements"

Email 7: "Breaking Through Plateaus: Strategies for Overcoming Training Stagnation"

Email 8: "The Mind-Muscle Connection: Unleashing the Power of Mental Focus in Your Workouts"

Email 9: "Achieving Aesthetic Balance: Sculpting Your Physique through Targeted Training"

Email 10: "The Power of Recovery: Optimising Rest and Sleep for Muscle Growth"

These email ideas focus on providing valuable content that resonates with bodybuilding and powerlifting enthusiasts. They cover a range of topics, including training techniques, nutrition, injury prevention, supplementation, overcoming plateaus, and the importance of recovery. Each email can provide practical tips, evidence-based strategies, and motivational insights to keep your audience engaged and motivated on their fitness journey. Remember to customise the content to fit your unique voice and style, ensuring that it resonates with your specific audience.

So... who won?

It's pretty clear that output #1 and #2 (no presence_penalty and presence_penalty at 0.2) are more creative and high-quality compared to output #3 (presence_penalty at 0.9).

The quality and creativity between #1 and #2 is not that different, though. There *is* a difference, but is not game-changing (in this example, at least).

So **the takeaway here** is that the best thing to do is probably to keep this parameter in your toolbox when you use ChatGPT, especially when writing a normal prompt doesn't deliver a satisfying output.

Sometimes including this parameter in your prompts can help you substantially with a better output, while sometimes you will get just a very good answer from ChatGPT.

2. Rarely used ChatGPT functions

In this section I want to give insights about some cool ChatGPT tricks that are rarely used, but that will improve your results.

I want to walk you through **4 rarely used ChatGPT functions and implementations** that you can use starting today in any task. I'll also give you examples for practical situations.

Let's begin! 😎

Let's start with number 1:

1. MAX TOKENS

The 'max tokens' parameter limits the length of the response by specifying the maximum number of tokens it can generate. This is very useful especially in copy and content. When we want a catchy line or a summary that fits within a specific word count, we can set the maximum tokens to ensure responses hit the mark.

Why can't we use 'words'? GPT doesn't really understand word count, but thinks more in terms of tokens, which is just a different measurement.

Here are some practical examples (apply them after giving a good amount of context to ChatGPT):

- Social Media Posts:
Prompt: "Generate a captivating social media caption for our new product image. Keep it within 50 tokens"
- Ad Copy:
Prompt: "Craft a compelling tagline for my ad. Keep it within 10 tokens for

maximum impact."

- Chatbot Response:

Prompt: "Provide a concise answer to the customer's query about our shipping policy. Keep it to 30 tokens or less."

And in case you are wondering, token length doesn't count the same as words, but you don't have to do any hard work to convert them! Open AI provided us with a simple [tokenizer](#):

Tokenizer

The GPT family of models process text using **tokens**, which are common sequences of characters found in text. The models understand the statistical relationships between these tokens, and excel at producing the next token in a sequence of tokens.

You can use the tool below to understand how a piece of text would be tokenized by the API, and the total count of tokens in that piece of text.

GPT-3 Code

The "max tokens" parameter limits the length of the response by specifying the maximum number of tokens it can generate. This is very useful in copy and content. When we want a catchy slogan or a summary that fits within a specific word count, we can set the maximum tokens to ensure responses hit the mark.

Clear Show example

Tokens	Characters
64	307

This way you will know what to ask ChatGPT for in your token limit.

2. TEXT COMPLETION

Text completion is another cool feature. It's like having a writing buddy who knows just what to say to complete our sentences or fill in the missing parts. We can use it to generate engaging blog intros, complete dialogue, or assist with writing a

compelling email body.

It's very handy when we are writing our own copy and we get stuck in some sentences and can't keep going forward.

If you're up to it, you can also train a ChatGPT chat about your company values, offers and branding, so that when you write emails, posts, etc. you will let it autocomplete many parts.

All you have to do is write inside your prompt: [AI completes the text].
And it will do the rest.

3. MULTI-TURN CONVERSATIONS

Want to know a secret principle about ChatGPT and AI?
Treat it like an assistant, not like a Google search.

What I mean by that is have a conversation, providing feedback on the answers it gives.

This is effective because the more you structure your AI work in conversations, the more ChatGPT will learn and improve.

This brings me to talking about multi-turn conversations, which can be mostly useful for brainstorming ideas and finding solutions to problems you wouldn't think of.

Multi-turn conversations simply means to maintain context with a conversation, not just writing one single prompt, but a series of questions, comments and feedback on the answers it gives you. This way your conversation becomes an interactive dialogue.

Here's a practical example for a lead generation coaching business:

"I'm a lead generation coach and I want to expand my services. What are some

potential areas I can focus on?"

AI: "That's exciting! Let's brainstorm together. Can you tell me more about your current services and target audience?"

"Currently, I offer lead generation strategies for B2B companies targeting the technology sector."

AI: "Great! Building on that, have you considered offering specialised lead generation workshops or webinars tailored specifically for SaaS companies? This could help you establish a niche expertise and attract a highly targeted audience."

"That's an interesting idea! What other areas do you think I could explore?"

AI: "Another potential area to explore is providing lead nurturing and conversion optimization services. Many businesses struggle with converting leads into customers, so offering guidance on optimising sales funnels and lead nurturing campaigns could be a valuable addition to your services."

"I like that suggestion! What about incorporating LinkedIn lead generation strategies into my coaching?"

AI: "Absolutely! LinkedIn is a powerful platform for B2B lead generation. You could offer personalised coaching on optimising LinkedIn profiles, prospecting strategies, and effective outreach techniques to help your clients generate high-quality leads through this platform."

It can go on as much as you want.

4. SALES CALLS ANALYSIS & IMPROVEMENT

ChatGPT can be a valuable tool for analysing sales calls, in multiple ways. First off, through sales calls transcription analysis.

If you train the model to analyse conversation dynamics, identify sales techniques, and extract valuable insights, you will create your personal AI sales coach, which tells you how to improve and optimise conversion rates.

For instance, you can prompt the AI with sales call transcriptions (you can use [one of](#)

[these tools](#) to transcribe sales calls) and ask it to highlight all the objections raised by customers and suggest effective ways to overcome those.

But it doesn't end here.

You can also improve by simulating sales calls with ChatGPT.

Here is the first prompt you can use to start the simulation:

I am a sales rep for a [niche] business. Today I will simulate a sales call with you. Pretend you are a customer. In this simulation use a colloquial language and act like a [target audience].

Example:

I am a sales rep for a lead generation coaching business. Today I will simulate a sales call with you. Pretend you are a customer. In this simulation use a colloquial language and act like a male business owner over 35.

3. Bland output from ChatGPT? Do THIS

How many times were you unhappy with the output you got from ChatGPT because of the tone and style it used? 😞

Like in anything with ChatGPT, we have to give specific instructions. If we don't tell AI *how* to write the output, we will get just generic and bland copy/content.

Plus, it will be *clearly* written by AI. No good!

The solution is using **tone modifiers**.

But wait, what are tone modifiers? After a lot of testing, we saw that when you add a combo of specific adjectives to your input you can manipulate the output.

So all you have to do is add this sentence at the end of your prompt:

Please write the output with a [enter the tone combo] tone.

Now, let's see what these tone combos are, shall we? Down below you will find a list of situations where tone modifiers can really help you out.

1. Formal communications

When it comes to formal communication, such as business emails, formal reports, and legal documents, the **"professional + straightforward"** tone combo is the best choice. With this combo you establish yourself as a reliable and authoritative voice.

2. Engaging Sales and Marketing Copy

If you want to write compelling sales emails, persuasive marketing campaigns, and customer service messages you will have to be engaging, yet professional at the same time. That's where the **"friendly + professional"** tone combo comes into play. This combo allows you to connect with your audience on a deeper level, building trust and nurturing long-lasting relationships.

When it comes specifically to sales copy, there are also two more tone modifiers to keep in mind: **“persuasive, informal, conversational”** and **“emotionally compelling”**. These are the adjectives that ChatGPT uses to describe good sales copy, so keep them in mind.

3. Expert opinions

You have to write a thought leadership article or an industry report? The **"authoritative + informative"** and **"authoritative + expert"** combos are there to help you. With these combinations your text will help you position you as a go-to resource in your niche.

Of course, depending on the situation you can adjust them. For instance, if you have to speak in a formal presentation, then you may also use the **“authoritative + professional”** combo.

4. Urgent communications

For limited-time offers, promotional campaigns, and time-sensitive announcements, the **"urgent + persuasive"** combo will give you great results. By leveraging this tone, your message becomes more compelling to take immediate action.

5. Social media, blog content and conversations

Everyone's tone of voice on blogs and social media is different, but many brands will use a **"casual + conversational"** tone. Unleash your creativity, ignite discussions, and form authentic connections with your audience.

If your goal is to get more engagement, then you can opt for the **“casual + funny”** combo, or even the **“humorous + informal”** combo.

6. Business proposals and instilling trust

There are some situations where you need the other person to trust you. Business

proposals, investor pitches, conversations with clients... even in sales copy, when your goal is to instill trust. In those cases the **"professional + trustworthy"** tone combo is your golden ticket, because it will help you present your ideas with professionalism and create trust.

7. Sensitive communications

Some conversations are very hard. When we don't know what to say to address sensitive topics, crisis communications, or customer service matters, the **"serious + empathetic"** combo really saves the day. It will help you communicate in the best way possible and demonstrate compassion and sincerity, ensuring the other person feels heard and supported.

8. Motivational speeches

Business owners and team managers need to know how to motivate and inspire other people, whether they are clients or team mates. You can help them in their path to success with the **"positive + enthusiastic"** tone. This tone modifier infuses your message with optimism and infectious energy, I'm sure many of you will find it useful!

Test these tone modifiers with ChatGPT and see the magic happen.

One last suggestion: do your tests with your tone of voice and find the best combos for you. What I just showed you are the general combos that work on ChatGPT, but your tone of voice is unique, so you will have to find what tone modifiers work best for your messaging, copy and content.

4. Stop wasting time on ChatGPT

One of the things ChatGPT is here to help us with is **saving more time**.

So if you are using it you are probably already saving a handful of hours every week.

What if we could stop wasting valuable time and make the process even faster?

Seems impossible? Read this section to find the truth. 🔍👤

What you will find out today is 4 ways **you can work better and more organised inside ChatGPT**, so you optimise even more your productivity.

Let's begin! 👤

1. CREATE YOUR TRAINED AI ASSISTANTS

If you start a new conversation with ChatGPT every single time you log in to work... you are wasting valuable time.

Because instead of creating new conversations and having to train them each time, you can just continue the convos you already started. The language model will be already trained on that topic or task, and the initial output will be much better.

So **the first step is to ask yourself: what are the 3-10 most recurring tasks you work on every week?**

Once you know that, you can create one conversation for each topic/task. Convo after convo you will have created a trained AI assistant that knows how you write, what you need and what is the best way to respond.

Let's make an example.

Maybe you are an entrepreneur and you often work on these tasks: strategy, product innovation and speaking to events.

In this case you could create 3-10 convos on ChatGPT, which could be:

1. Company strategy
2. Innovating product A

- 
3. Innovating product B
 4. Innovating product C
 5. Presentation on topic A
 6. Presentation on topic B

These AI conversations will function as your AI team that learns from you prompt after prompt.

By doing this you won't have to write a long initial prompt every single time to train the language model about your company and who you are, because you already did it once... so why should you do it twice?

2. USE THE FAST LANE OF PROMPTS

Another way to save time while working on ChatGPT is to be able to write the prompts you write most frequently... faster.

How? There is a tool called [Text Blaze](#) that allows you to create shortcuts for anything you want.

Let's say you are a web developer, and you often use ChatGPT to find bugs inside code.

Instead of writing a prompt like:

*I want to find the bug inside a piece of code. Here is the code you need to analyse:
[insert code here]*

You could set up a shortcut where you just have to write:

/bug

And the whole prompt will appear in front of your eyes.

You'd still have to edit, but you'd save the time it takes to do something repetitive, which is writing the actual prompt.

It's even faster than copying and pasting, as you don't have to switch between windows or files.

You can download the Chrome extension from the [Text Balze website](#) or directly from the [Chrome Web Store](#).

3. FIND WHAT YOU ARE LOOKING FOR IN CONVOS

Has this ever happened to you?

You are working on a task or project.

You remember when ChatGPT gave you a great output on that exact topic some time ago.

You start digging to find it.

You end up wasting 30 minutes trying to find that.

That's a waste of time. It's time to avoid this.

How? With yet another Chrome Extension! [This amazing Chrome extension called ChatGPT Conversation History Search](#).

[This video](#) explains it very well, but in short this Chrome extension allows you to put in keywords and search in your chat history, so that you can easily find what you are looking for.

4. DON'T LOSE HOURS OF WORK

It already happened in the last few months, it may happen again.

Open AI could encounter glitches or bugs that disable the chat history function, and you may lose all the work you have done. Yes, all at once.

So do yourself a favour and export your chats. You can copy and paste the outputs you prefer into a Google Doc or Word file, but if you want to create the back-up file in just one click, it's pretty easy to do in ChatGPT.

Here is what you have to do:

1. Click on your account in the bottom left corner of the page
2. Click on 'Settings'
3. Click on 'Show', near 'Data Controls'
4. Click on Export Data at the bottom
5. Confirm the export

If you need more find more info, here is the OpenAI tutorial on how to export the conversations:

<https://help.openai.com/en/articles/7260999-how-do-i-export-my-chatgpt-history-and-data>

5. The fastest way to grow a company through ChatGPT

There are many things that need to be in place for maximum growth...

But **feedback from your audience** after a launch is one of the *fastest* ways to do it - yet, one of the most overlooked ones. 🚀

And today we will see a 5-step process where you can leverage AI to grow consistently after all your launches.

Ready?

Then let's start with number 1...

1. DIVE INTO BUYER INSIGHTS

First things first, let's get inside the minds of your amazing buyers.

Reach out to them and find out what made them whip out their credit card and say, 'This is it!'

This is your opportunity to have meaningful conversations with your customers and understand the key factors that influenced their decision to purchase from you.

Ask them to share 1-3 reasons that resonated with them the most and give them something for free in exchange. These insights will be pure gold, and they'll be revealing the secret sauce that makes your product or service irresistible to your target audience.

If you don't feel like coming up with a nice email to write, make ChatGPT write it. You can use this prompt:

Hi ChatGPT, I want to email my customers and ask them what are the 1-3 reasons why they bought [name of the product].

If they answer honestly in exchange I will give them [insert the name and explanation of what you will give them].

Can you please write it for me? Make it [adjectives of your tone of voice]

2. UNRAVEL THE MYSTERY BEHIND NON-BUYERS

Now, let's talk about the folks who *didn't* hit that "Buy Now" button.

Connect with non-buyers and dig deep.

Ask them what stopped you from jumping on board, what doubts or hesitations held them back. And give them something for free in exchange for this info.

This feedback is invaluable as it provides insights into the barriers and objections that prevented conversions. Remember, every objection presents an opportunity for growth.

Want AI to write the email to send? No problem:

Hi ChatGPT, I want to email my customers and ask them what are the 1-3 reasons why they didn't buy [name of the product].

If they answer honestly in exchange I will give them [insert the name and explanation of what you will give them].

Can you please write it for me? Make it [adjectives of your tone of voice]

3. **BRING IT ALL TOGETHER**

Time to consolidate your findings, my friend!

Copy and paste all those juicy answers (from both buyers and non-buyers) right from your inbox into a Google Doc.

This centralised hub will become your treasure of customer insights.

4. **SUPERCARGE WITH CHATGPT**

Now it's time to leverage AI and make ChatGPT summarise the key takeaways from all that valuable feedback. Positive or negative, you'll get a bird's-eye view of what your audience loves and where they need a little extra love.

Here is a prompt you can use:

Context: I asked my audience (buyers and non buyers) why they did or didn't buy my [product or service] called [name of the product or service].

Here are the answers:

[paste from the Google Doc]

Now please summarise all the positive and negative things they said about this product.

Put the insights in a table with two columns: on the left you put the reasons why customers bought, on the right the reasons why people didn't buy.

5. **ROCK THE FAQs**

Now that you have this table (you can paste it into a spreadsheet or Google Doc) you can put those insights into action, my friend!

You can ask ChatGPT to generate a list of FAQs based on the buyer motivations and barriers that stopped people from buying.

These FAQs will become your secret weapon, because these are all angles you can use in your landing pages, email sequences, product pages, and so on.

Anticipate those burning questions, address concerns upfront, and watch those sales soar! 🎉

This is how you grow consistently with your audience.

CHAPTER 2

Get a Team of AI Marketers to Work For You

1. Test your way to marketing success

- **AI Tool:** multiple
- **Category:** marketing
- **What it helps you with:**
get more ideas and materials to test new things

When it comes to copywriting and marketing, we all have a good friend on our side: split tests (or tests in general).

It's kind of fun, right? You test a new version against the best performer, then when you have the new best performer time to test a new version.

Yes, it's fun, except the fact that when things don't convert, you're leaving money on the table 📉 But what if you could optimise all (or a big part) of your marketing assets and test more copy for your promotions?

You would be able to increase your conversion rates, and decrease your cost of acquisition.

How does that sound? 🤖

With AI it's possible, and I'll show you how.

1. TEST NEW COPY VERSIONS

Let's start from ChatGPT.

Something in your funnel is not working? Could be the ad hook, could be the body

copy, or maybe the CTA?. Or who knows, maybe the problem lies in the landing page copy.

In these cases the first thing to do would be to test more headlines (in the ad and on the landing page) and CTAs.

Here's a prompt you can use:

Hi ChatGPT, my sales funnel is not converting well, and I need to run some tests to get a higher conversion rate.

Context:

Here is the current [ad/landing page headline/CTA]:

[paste your current ad/landing page headline or CTA]

Examples:

Here are some [ad/landing page headlines/CTAs] that worked for this product previously that I want you to take as example:

[paste some examples you want to imitate]

Instructions:

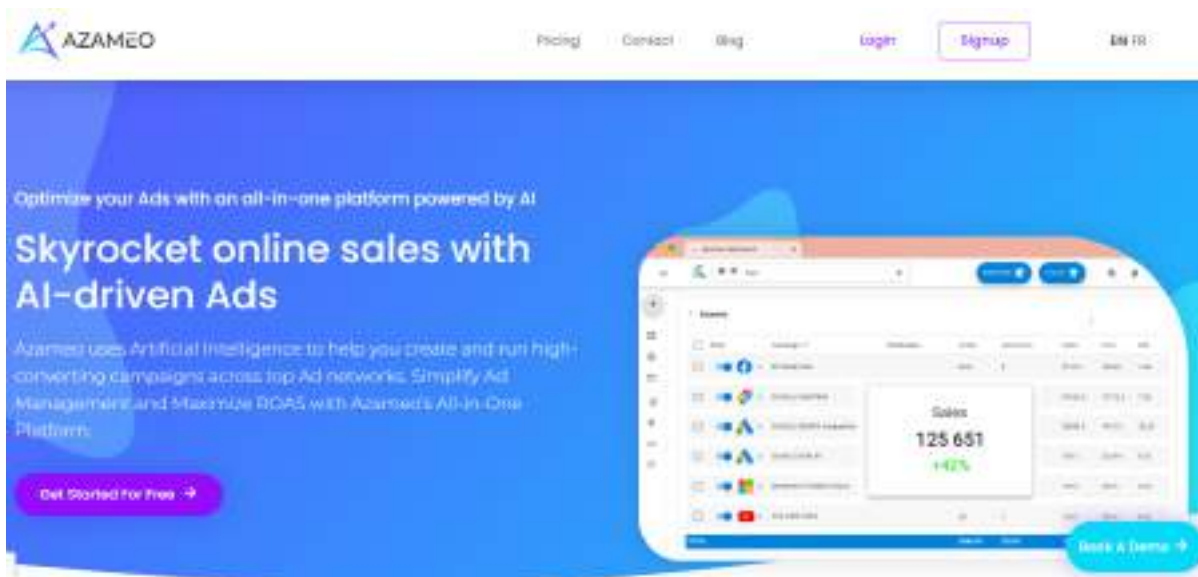

Create 20 new versions of the current headline. Make them more compelling

2. OPTIMISE YOUR ROAS

There's a great tool you can use to optimise your ROAS: it's called [Azameo](#).

This tool used ChatGPT to create ad creatives and receive recommendations for optimization.

Azameo will help you simplify ad management (as it's all-in-one platform) and increase your ROAS.

3. GET SUGGESTIONS ABOUT YOUR WEBSITE BASED ON PERFORMANCE

Create new high-converting landing pages without a developer? Yup, with [Permar](#).

With this tool, all you need is one prompt, and you get a landing page that is optimised based on thousands of high-converting landing pages.

Permar also analyses your performance, gives you suggestions for improvements and automatically implements those changes.

And if you like getting suggestions about your website to make it high-converting, you can also try [Webyn](#).

It's 100% no code, and all suggestions are data-based.

It's pretty expensive, but you can [try it for free](#).

4. CREATE AND TEST NEW LEAD MAGNETS

Testing new lead magnets is a great way to find the best vehicle to get new leads into your email list... and AI is here to help you just with that, because it allows you to take something you have already done and turn it into a new lead magnet.

Here is what you can do:

- choose a topic
- gather the most performing pieces of content you have created on that topic (both long-form and short-form)
- feed ChatGPT with your content multiple times
- edit the final text
- put the text into a Canva template

The first prompt could be:

You are a high-level marketer specialised in creating lead magnets. I run a business that sells [products or services you offer]. Today I want to create a new lead magnet with the content I already created.

Here is a [type of content] I created: [insert content]

Rewrite it so that I can use it as a lead magnet

The following prompts will contain more pieces of content to feed ChatGPT:

Here is [type of content] I created: [insert content]

Add the content to the lead magnet you are writing

This way you can easily create new lead magnets to test every week! 🚀

3. AI for affiliate mastery: your new toolkit

- **AI Tool:** multiple
- **Category:** affiliate marketing
- **What it helps you with:** streamline your affiliate activities and campaigns

Let's dive into the exciting world of AI for affiliate marketing.

Over the past few years, affiliate marketing has become a great income source for people and a great lead source for businesses... and AI now plays a big role in streamlining processes.

It's getting better at finding potential customers, making ads work great, and even predicting what customers might do next.

So, what's all the fuss about AI in affiliate marketing?

Well, imagine having AI as your secret weapon. It can help you make your marketing campaigns work better, find out what kind of content people like, and help you make smarter choices.

Now, picking the right AI tool is important. Once you find the perfect match, your marketing game will be on fire!

In this section we'll see both sides of the affiliate marketing 'coin': from the perspective of who IS an affiliate and from the perspective of who manages affiliates.

PART 1: IF YOU ARE AN AFFILIATE

There's a great tool to help you get your affiliate marketing to the next level.

[Super Affiliate A.I.](#) it's like your content genie – it quickly checks out your website, comes up with catchy campaign names and titles, and with just a few clicks, you're creating Facebook ads, blog posts, YouTube Ads, and even Google Ads.

Sure, ChatGPT is cool, but it's not the best at knowing the specific rules for each social media platform.

Super Affiliate A.I. gathers everything up in one place, so all you need is a quick login and a couple of clicks, and you're set to rock!

Creating your affiliate campaign is a lot easier, it just takes you 3 steps:

Step 1: Select Your Campaign Industry

Begin by choosing your specific niche or industry. Define your intended audience and tailor the tone of your content accordingly.

Step 2: Create Your Campaign Instantly

Hit the 'Build' button, and Super Affiliate A.I. will make the campaign in a matter of seconds. It generates landing page text, email sequences for follow-ups, and even Facebook ad content.

Step 3: Launch Your Campaigns

Once the campaign is generated, you can effortlessly copy and paste the content wherever you wish to kickstart the campaign.

In simpler words:

1. Choose your niche
2. Define your audience and set the tone for your content.
3. Hit 'Build' to get landing page text, email sequences, and ads.
4. Copy-paste content and ignite your campaigns.
5. Launch with Confidence 🚀

As you can see, AI is changing the game in affiliate marketing, making things easier, faster, and more awesome!
Cool, right?

PART 2: IF YOU MANAGE AFFILIATES

If you use affiliates to generate leads for your business, that's another game.

When you manage affiliates, you're onto a performance-based strategy – spending where it matters, and getting results that truly count.

The more high-quality affiliates you have, the more your business grows. Focusing on the right affiliates also helps you save money on marketing. And if you can streamline the managing process, it's easier to see how your affiliate marketing strategy is performing.

The good news is that you can make managing affiliates super easy with an AI tool called [Trackdesk](#)!

What Can Trackdesk Do?

Imagine handling all your affiliate stuff in one place – that's what Trackdesk does! It helps you take care of affiliates, referrals, and partners, all in one go.

Plus, it gives you really useful info, lets you change things easily, and helps you grow.

Trackdesk also lets you make groups for different affiliates. This way, everything stays neat and tidy, and your partnerships get even better.

Also, connecting Trackdesk with other tools you use is easy. And if you're not sure what to do, no problem! There's a team ready to help you get started.

3-simple steps: Start, Launch, Succeed!

Set-up the affiliate tracking and kickstart your affiliate program.

To recap, here's what you can do with Trackdesk:

1. Group Affiliates 🌐
2. Organise your affiliates for better management.
3. Integration Made Simple 🔗
4. Connect Trackdesk seamlessly with your favourite tools.
5. Expert Support 💬

4. Build your website with these 3 AI tools

- **AI Tool:** multiple
- **Category:** website building
- **What it helps you with:** build your website in one day

Here are 3 tools you can use right away to create your website:

1. Build a website within 30 seconds

[Durable.co](https://durable.co/) is a new AI tool that allows you to create an entire website with images and copy in 30 seconds 🤖

You can edit the final product without code, and then use AI copywriting, SEO, analytics and a simple CRM to market your website.

So, the next time that you need a website, consider doing it within 30 seconds using this tool 😊

<https://durable.co/>

2. Create videos from text

[Gen-2](#) is the first AI tool that can generate completely new videos with text, images, or video clips, all from text descriptions.

The AI is still very experimental, but you can start playing with it [here](#).

For now, you can use it to create simple videos like animated text that can help you turn static images into engaging reels or high-converting ads.

Watch the incredible launch video [here](#), it will give you a better sense of how revolutionary Gen-2 is!

3. Generate scripts for website content

If you feel creating a video script is hard and tedious, Script AI is here to make it 10 times faster.

This AI allows you to create a short video script for TikTok, YouTube shorts, and Instagram Reels in less than 1 minute.

If you are using short form video content to grow organically, this tool will come in handy. Try it for free here: <https://scripai.com/>

5. Get a new AI marketing assistant

- **AI Tool:** multiple
- **Category:** marketing
- **What it helps you with:** streamline your marketing activities

The 3 tools I am going to show you here will operate as your new AI marketing assistant.

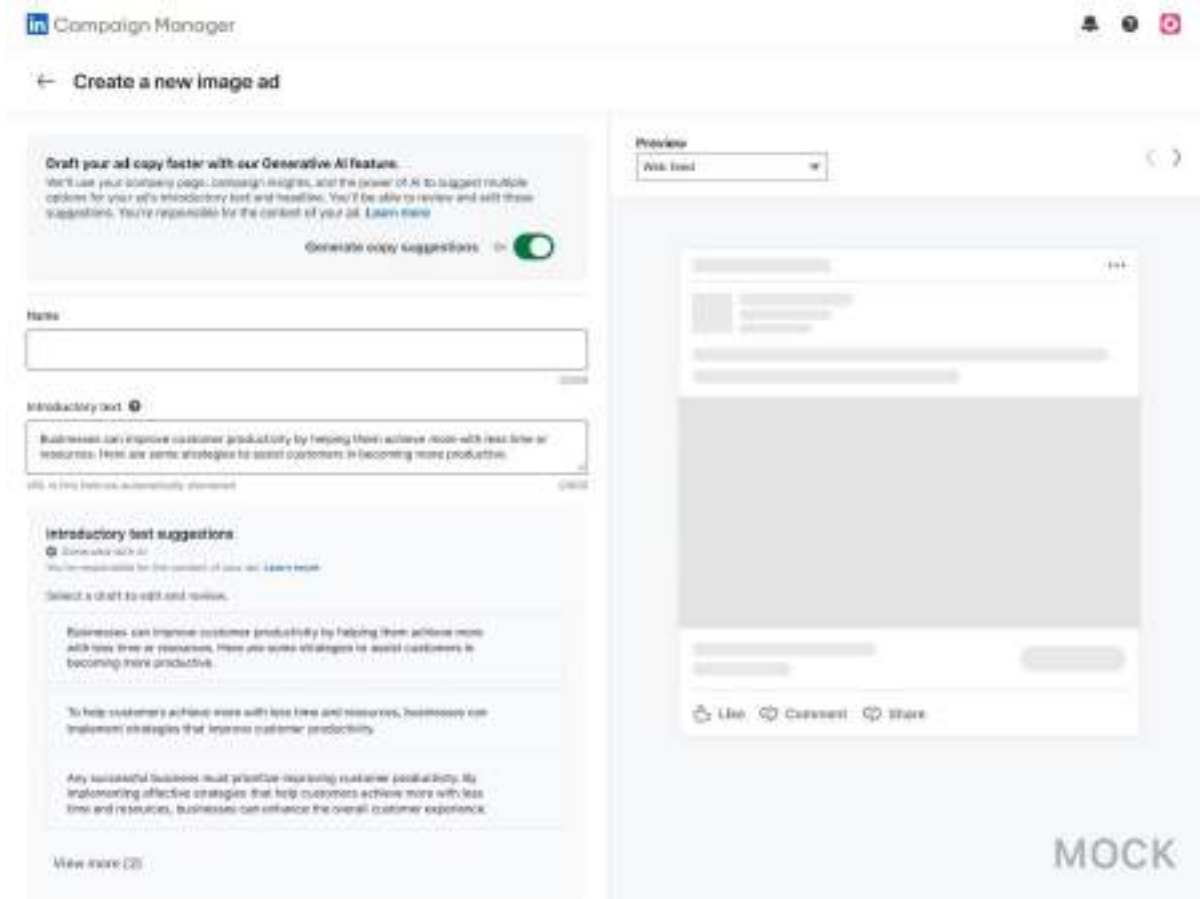

They are very simple to use, and they will help you create more and better marketing assets for your business.

1. MAKE BETTER AD COPY ON LINKEDIN

Crafting the perfect ad copy can be a real challenge, right? Well, LinkedIn has your back with its brand new AI-driven tool.

This tool takes data from your LinkedIn page and Campaign Manager settings, including your objectives, target criteria, and audience, and suggests different versions of your ad's introductory text. And they're using the power of OpenAI models to make it happen.

Here's how it works: let's say you're creating an ad campaign on LinkedIn. You simply input your copy into the "introductory text" box within the Campaign Manager. Then, when you toggle on the "Generate copy suggestions" feature, you'll unlock a treasure trove of alternative suggestions for your text. Cool, right?

Currently, this feature is available to a select group of customers in North America. But fear not, because LinkedIn is working to expand its functionalities, rolling it out to new regions, and adding support for more languages in the coming months.

But wait, that's not all.

Did you know that LinkedIn has been leveraging the power of generative AI in other areas too? Yup. Back in March, they introduced a 'conversation starter' tool that uses AI to craft engaging post introductions.

They also rolled out generative AI tools for writing compelling profile bios and recruitment posts.

If you are already using LinkedIn for your brand, I would give these new tools a chance.

If you aren't using LinkedIn for your brand, maybe this is the right time to start ;)

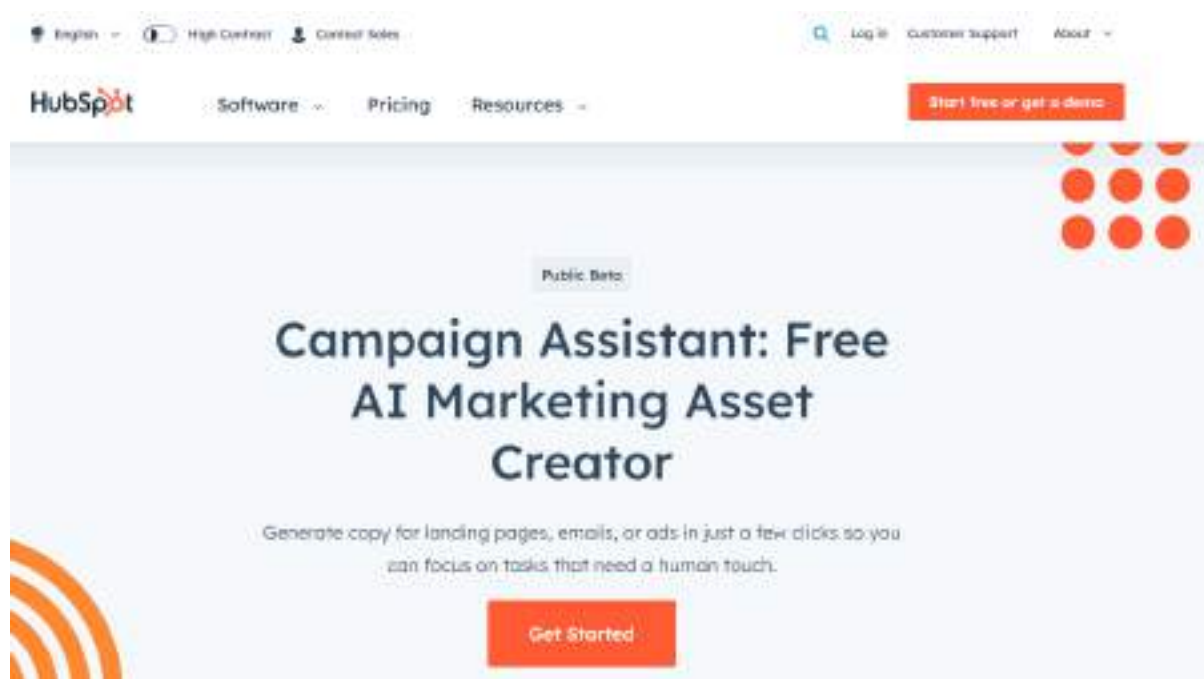

2. GET A CAMPAIGN ASSISTANT ON HUBSPOT

HubSpot helped many marketers with automation, now it has your back with an amazing AI-powered tool called [Campaign Assistant](#).

With Campaign Assistant, you can churn out landing page copy, marketing email content, and ad copy for your upcoming campaigns in minutes.

You just need to provide information about your campaign, choose a tone of voice that aligns with your brand, and select the type of asset you want to generate, whether it's a landing page, email, or ad.

Then, boom! You have your new copy assets.

Whether you are writing your own copy or your copy team needs new ideas, this tool could really help you generate more leads and sales.

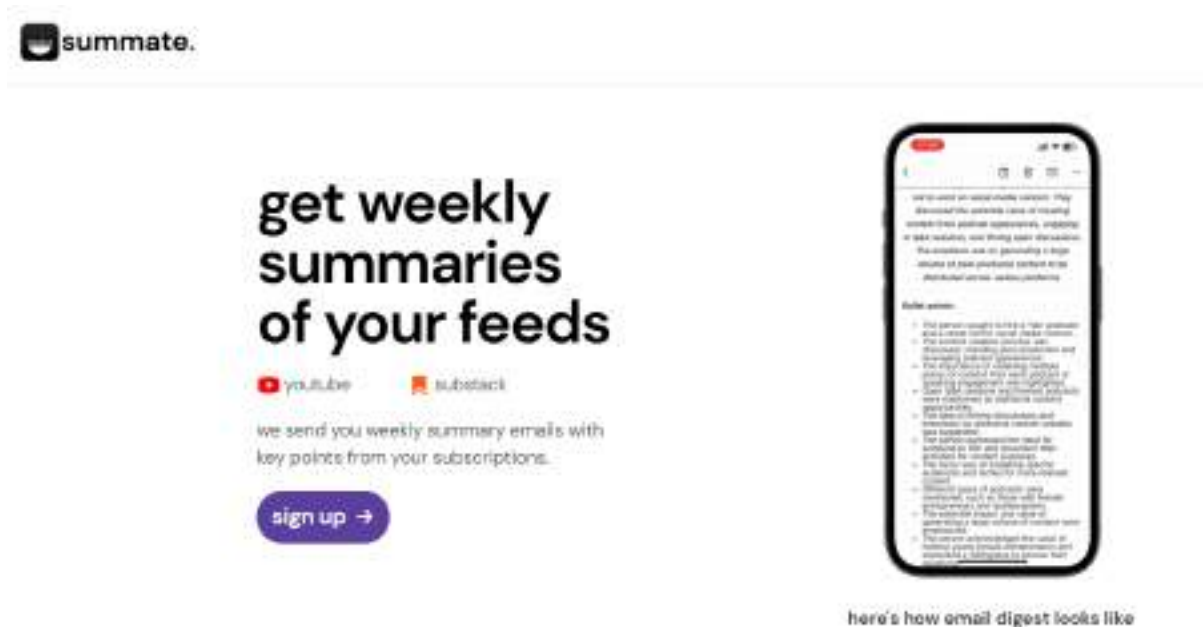

The best part? Campaign Assistant is absolutely free to use! All you need to do is create a HubSpot account or log in to your existing one, and you're in.

3. USE YOUR FEED TO GET NEW IDEAS FOR CONTENT AND COPY

Ever heard of [Summate](#)?

No? Then you're missing out on something that will save you a lot of time.
This AI tool sends you weekly email summary of your YouTube and Substack feeds.

And this is great not just for your learning, but also because you can find many hooks, concepts and topics you can use in your copy and content.

All you need to do is identify the topics and concepts you think would work great for your audience and ask ChatGPT to tie that concept into your brand or product.

Here is a prompt you can use:

*Hi ChatGPT! Today I want to write a new [type of content] based on this concept:
[paste the concept you found in the summary]*

*Write a [type of content] keeping in mind that my company sells [type of products],
my audience is [target audience], and their main problem is [problem].*

This is a great way to create new assets from the content you already follow.

CHAPTER 3

Create Your Monthly Content in 3 Hours a Week

1. Transform ideas into professional designs with Canva

- **AI Tool:** Canva
- **Category:** Design and image generation
- **What it helps you with:** visuals and pictures
- **Link to website:** <https://www.canva.com/>

Feeling uninspired staring at a blank canvas?

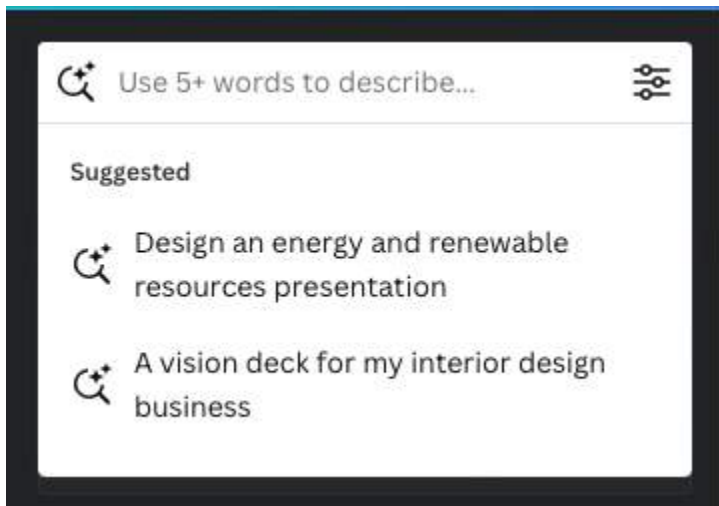

Canva added cool AI tools and they can transform your design process into a magical experience!

Magic Studio is here to transform your ideas into professional designs in a matter of seconds.

In this section I'll walk you through each of the AI tools that you can start using in Canva one by one.

- **MAGIC DESIGN** 🎲

What can you do with Magic Design: With Magic Design, you can create a presentation within seconds. Just type your idea, and a variety of templates will appear for you to pick from.

How to Use Magic Design:

1. Access Magic Design from Canva's homepage or within the editor.
2. Describe the presentation you want to create in the search bar.
3. Add images by clicking "Media" and selecting from your uploads or uploading new images.
4. Click "See results" to generate a presentation or design.
5. Customise the results to match your brand's style.

Why is it interesting?

You can create presentations from text prompts in seconds and customise the results to match your brand's style.

- **MAGIC SWITCH**

What can you do with Magic Switch: Magic Switch allows you to transform and repurpose your designs into different formats and even auto-translate content. You can create summaries, blog posts, email drafts, and presentations with a few clicks.

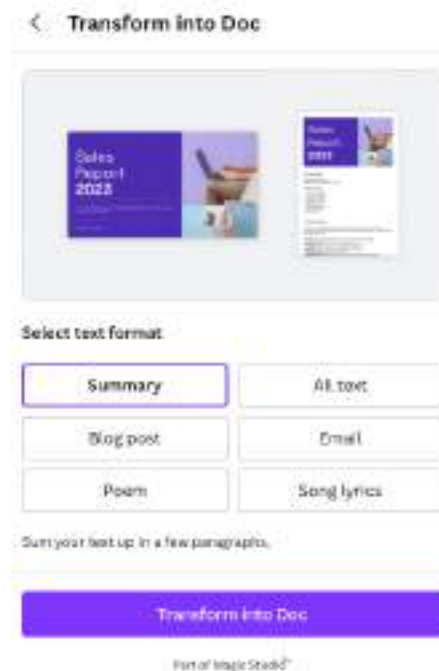

How to use Magic Switch:

1. Click on the toolbar and select the desired option.
2. Select "Transform into Doc" to convert designs and their content into various formats.
3. Edit the new document.

For example, if you pick the "Summary" option, the AI will read the text on each slide and make a short summary of it in just a few paragraphs.

If you select the "Blog Post" style, the AI will use each slide to make a blog post that can include things like pie charts and data uploads.

There's more!

Inside this tool there are multiple options and functions.

- **MAGIC EXPAND** 📷

What can you do with Magic Expand: This option allows you to turn vertical photos horizontal and fix framing in seconds.

How to Use Magic Expand:

1. Choose the photo you wish to edit.
2. Click "Edit photo" on the editor toolbar.
3. In the "Effects" tab, pick "Magic Expand."
4. Select your preferred size option or drag a crop handle to expand the image beyond its original borders.
5. Click the "Magic Expand" button and give it a moment to process your image.

Magic Expand does not work with images inside frames, grids, or page backgrounds.

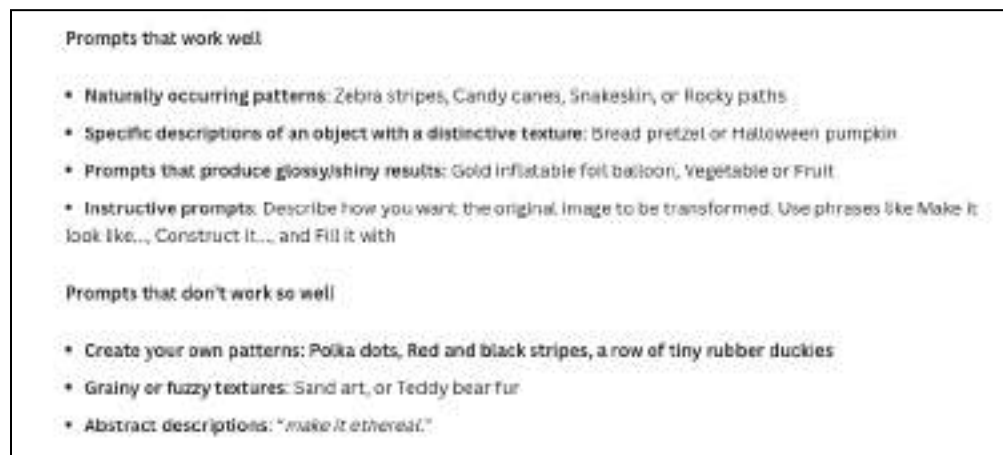

- **MAGIC MORPH** 🌟

What can you do with Magic Morph: Add special effects to text and images with simple prompts.

How to Use Magic Morph:

1. Start or open any design.
2. In the editor's side panel, click on "Apps."
3. Type "Magic Morph" in the search toolbar and select the Magic Morph option. Choose an element in your design, such as text, a simple graphic, or a shape.
4. Describe how you want the chosen element to look. The more details you provide, like objects, colours, location, or surroundings, the better the result.
5. Click the "Magic Morph" button and wait for the tool to process the image.
6. To include the generated image in your design, simply click on it.

According to Canva, these are the most effective type of prompts:

- **MAGIC GRAB** 📷

What can you do with Magic Grab: Easily edit, resize, and move the subject of your photos.

How to Use Magic Grab:

1. Select the photo you want to edit.
2. Click "Edit Photo" on the editor toolbar and choose "Magic Grab".
3. Drag the subject of the image to your desired position and resize it.

What's the difference?

- **Magic Grab:** You can move the subject of the photo while keeping the background.
- **Background Remover:** This tool removes the background, so you only see the main thing in the picture.
- **Magic Eraser:** You can use it to get rid of anything you don't like in your photo.

- **MAGIC EDIT** 🎨

What can you do with Magic Edit: You can quickly get rid of things that bother you or add new things in your photos. Simply brush over the parts you want to change and describe what you want to add.

How to Use Magic Edit:

1. Select the photo you want to edit.
2. Click "Edit Photo" on the editor toolbar and choose "Magic Edit".
3. Use your cursor to brush over the part of the photo you wish to modify.
4. Describe the changes you want to make and click "Generate".
5. Select from the results.

- **MAGIC MEDIA**

What can you do with Magic Media: Create images and short videos from text prompts.

How to Use Magic Media:

- **For Text to Image:**

1. Open the editor's side panel, click on "Apps," and select "Magic Media."
2. Describe the image you want, choose a style and aspect ratio, and click "Create your image."
3. To include the image you've created in your design, simply click on it.

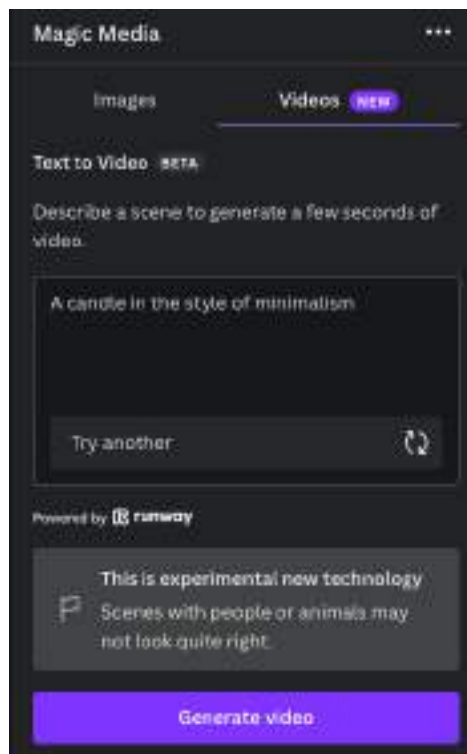

Why is it interesting?

You have plenty of styles to choose from!

- Photo
- Vibrant
- Minimalist
- Neon
- Filmic
- Playful
- 3D
- Retrovapor
- Psychedelic
- 3D Model
- Concept art
- Gradient
- Dreamy
- Anime
- Watercolor
- Color pencil
- Stained glass
- Ink print

- **For Text to Video:**

1. Open the editor's side panel, click on "Apps" and select "Magic Media".
2. Describe the video you want, then click "Generate video."
3. To include the video you've created in your design, simply click on it.

- **MAGIC ANIMATE** ✨

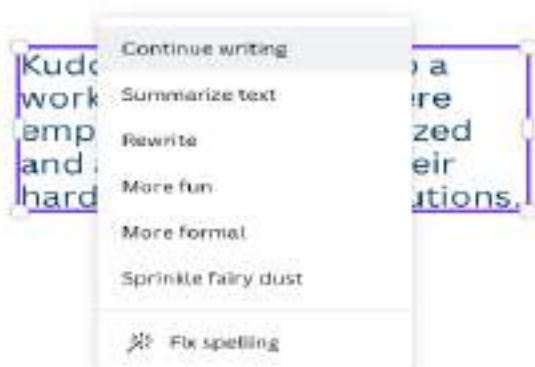

What can you do with Magic Animate: Bring your designs to life with cool animations!

How to Use Magic Animate:

1. On the toolbar above the editor, click on "Animate".
2. Choose "Magic Animate".
3. Select your preferred animation style.

- **MAGIC WRITE** ✍️

What can you do with Magic Write: Get help with writing, rewriting, and summarising text. You can use it for a wide range of purposes like social media posts, business plans, websites, blogs, poems, personal journaling, creative writing, and much more.

How to Use Magic Write:

- **To create text:**

1. Open a design or start a new one.
2. Find the Magic button at the bottom-right of the page or use the shortcut by typing / to open Canva Assistant.
3. From the options, select "Magic Write".
4. Enter your text.

- **To generate text from existing content:**

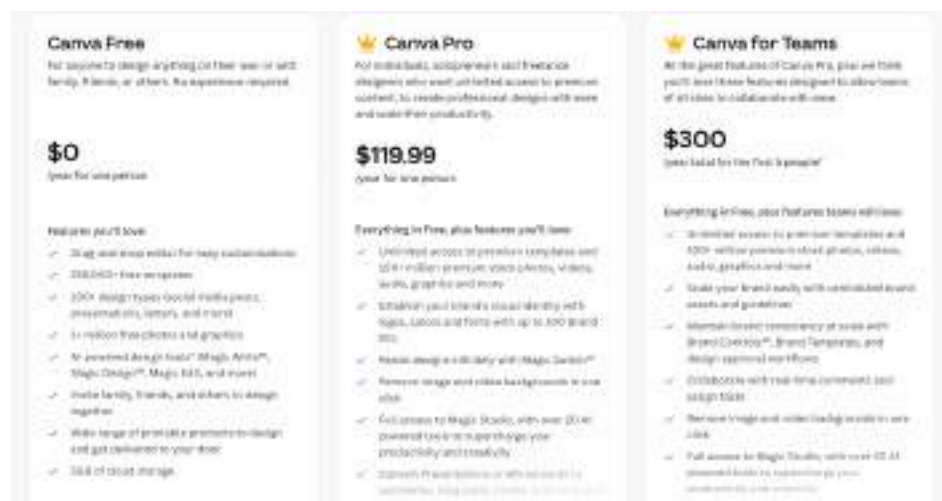

1. Choose the text you want to work with.
2. Click the Magic Write button on the toolbar that appears.
3. Select your preferred action from the dropdown options.
4. Wait for the tool to process your text, and you can choose to continue writing, summarise, rewrite, or apply other editing options.

The cool part? It supports over 15 languages, including Arabic, Korean or Malay.

Now that we went over these cool functions...

💰 **Wondering about pricing?**

In Magic Studio, you have access to free tools, some that fall under the "freemium" category, allowing you to try them before upgrading, and a few that are exclusively available with a **Canva Pro** upgrade.

I think these features in Canva's Magic Studio can really take your design game to the next level and help you save a lot of time.

2. Create any image you can think of

- **AI Tool:** Midjourney
- **Category:** Image generation
- **What it helps you with:** visuals and pictures
- **Link to website:** <https://www.midjourney.com/>

40 seconds.

That's all it took to generate this image using AI:

The program is called [Midjourney](https://www.midjourney.com/), and the prompt I used was "A samurai riding a horse in a fluorescent forest."

This image is 100% original and can be used in marketing materials.

And that's only the beginning...

[Midjourney](https://www.midjourney.com/) processes very long and detailed prompts that can generate amazing results.

Here's one example:

Prompt:

"A summer full of happiness, shining sun, two tigers facing each other, pixar style bengala tigers, big bright eyes. Wear white gloves on paws, smile happy, delicate and fine, samurai tale, incredibly high detailed, Pixar style, bright colour, Natural light, Simple background with pure color,5 and Octane Render, trending on artstation, Gorgeous,ultra wide angle, 8K,hd realistic, 8K Hd glacier --v 4 --ar 3:2 --upbeta --q 0.5 --v 4"

Result:

When you know how to create high-quality prompts (known as prompt engineering), AI can truly become a partner in your tasks.

Let's analyse the prompt I used some more:

"A summer full of happiness, shining sun"

👉 AI cannot process emotions, so we need to feed it with the emotional vibe that we are looking for.

"two tigers facing each other, pixar style bengala tigers, big bright eyes. Wear white gloves on paws, smile happy, delicate and fine, samurai tale"

👉 Always assume AI is the smartest EXECUTOR (not thinker) in the world. Give it as many precise directions as possible.

"Incredibly high detailed, Pixar style, bright color, Natural light, Simple background with pure color, 5 and Octane Render, trending on artstation, Gorgeous, ultra wide angle, 8K,hd realistic, 8K Hd glacier --v 4 --ar 3:2 --upbeta --q 0.5 --v 4"

👉 These are all prompts about the quality of the image and also the setting in which it is created. It is like putting every single detail that's in your head into paper, so the AI can provide the exact result you're looking for.

And while Midjourney is not the most user-friendly platform yet, we have already used it to generate creatives for our ads!

Give it a try here→ <https://www.midjourney.com/app/>

3. The best alternative to Midjourney

- **AI Tool:** NightCafe Studio
- **Category:** Image generation
- **What it helps you with:** visuals and pictures
- **Link to website:** <https://creator.nightcafe.studio/>

If you're a digital artist, you might want to try this art generator. 🤖

With **NightCafe Studio** you can easily create stunning images from text prompts.

The platform offers various models and styles, including oil paintings, anime-like art, cinematic, and more.

It may not be as versatile as other popular text-to-image generators like Midjourney or Leonardo.ai, but it's definitely worth exploring.

🤖 How to use NightCafe Studio:

1. Sign up and select "Create";
2. Choose a model (DALL -E 3, Stable Video Diffusion, DreamShaper XL, Lightning, or Creative Upscaler);
3. Pick a style (cinematic, dark fantasy, 3D game, artistic portrait, etc.);
4. Provide a text prompt;
5. Adjust settings if desired (select the number of images from 1 to 16);
6. Generate the image.

🎨 Here are the prompts that I've used:

PROMPT 1: smiling girl, pastel pink hair, selfie, portrait photography, trendy

PROMPT 2: cat looking up, Van Gogh's Starry Night background, color painting

PROMPT 3: surrealist photography, modern, young woman sitting on a giant abstract chair, hair blonde, she is wearing a golden dress, large collar, very detailed

You can duplicate any image, allowing you to regenerate it after tweaking the prompt or changing the settings.

Additionally, there's an option to animate your images.

While you can try this out for free, usually this feature is included with their paid PRO plan.

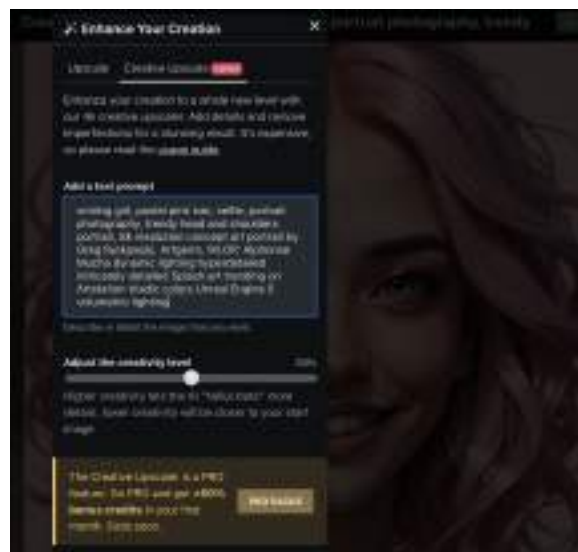

Therefore, it's important to choose the image carefully and consider whether you really want to animate it, as you might run out of credits.

You can also upscale the model and the size.

An upgrade to this feature is their paid “Creative Upscale” option where you can adjust the creativity level and generate more impressive images.

For example, they transformed a basic prompt that I gave (*smiling girl, pastel pink hair, selfie, portrait photography, trendy*) into this:

PROMPT 4: smiling girl, pastel pink hair, selfie, portrait photography, trendy head and shoulders portrait, 8k resolution concept art portrait by Greg Rutkowski, Artgerm, WLOP, Alphonse Mucha dynamic lighting hyperdetailed intricately detailed Splash art trending on Artstation triadic colors Unreal Engine 5 volumetric lighting

If you want to create a new image, just select **“RESET”**.

/

NightCafe offers up to **10 free Pro image generations (5 credits)**, allowing users to explore the platform's capabilities before committing to a subscription.

They offer both monthly and quarterly subscription plans, starting from **\$5.99/month for 100 credits**.

AS 100 CREDITS	AS 200 CREDITS	AS 500 CREDITS	AS 1400 CREDITS

1 year free upgrade Access 1000 credits Advanced plan available	1 year free upgrade Access 2000 credits Advanced plan available	1 year free upgrade Access 5000 credits Advanced plan available	1 year free upgrade Access 14000 credits Advanced plan available
See community for testimonials Access the Developer License Go to	See community for testimonials Access the Developer License Go to	See community for testimonials Access the Developer License Go to	See community for testimonials Access the Developer License Go to
Click to get our 1000 credits Advanced plan option	Click to get our 2000 credits Advanced plan option	Click to get our 5000 credits Advanced plan option	Click to get our 14000 credits Advanced plan option

Users can also purchase additional credits as needed, and any credits left unused will roll over to the next month.

That's pretty cool, as many AI tools simply reset the number of credits at the beginning of the month, regardless of how many you have left.

4. Create presentations in seconds

- **AI Tool:** Tome
- **Category:** Presentations and design
- **What it helps you with:** visuals and presentations
- **Link to website:** <https://tome.app/>

Let's talk about PowerPoint presentations... and conveying ideas in general.

There are already some AI tools that can help you optimise your time when creating presentations. Just to name the obvious ones: you can write the slide text with ChatGPT, and create the slide images with Midjourney.

But what if I told you there is an AI tool that helps you create visual presentations in just seconds.

There is: it's called [Tome](#).

In this section I'd like to walk you through this amazing software that a lot of people around the world are using. It will help you communicate your ideas faster without jumping through PowerPoints and Pdfs.

Let's get started!

1. WHAT IS TOME?

[Tome](#) is an AI software that allows you to create presentations with text and images in seconds with just one prompt through GPT 3.5 and DALL-E 2.

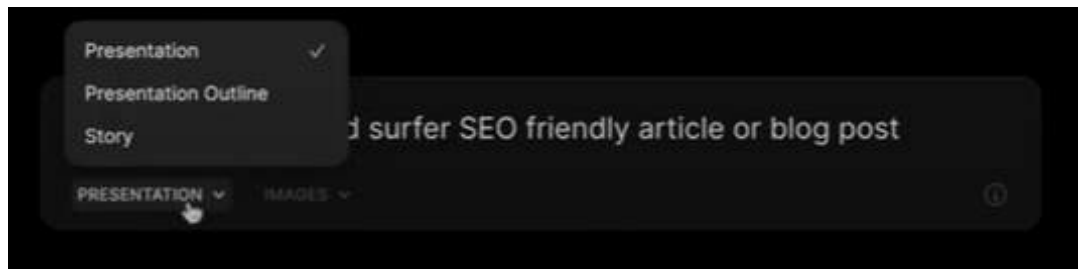

You can either use templates or create presentations from scratch. Templates will help you with:

- sales pitches
- fundraising pitches
- portfolios
- photo albums
- a lot of other things

But most probably what you'll enjoy the most is creating a presentation from scratch. Once you log into the app, on the screen you'll have to click on the 'Create' button at the top right corner.

From there you have to tell Tome about your needs. You can ask [Tome](#) to create a presentation, just the presentation outline or even a story with images.

You can also give instructions about the style of the pictures you want to put inside the presentation.

Then all you have to do is prompt it with what you need, like *'Create a presentation about why AI is fundamental to keep up with competitors in 2023'*.

In just a few moments it will create a simple presentation of 7-10 slides, with text and images (or a story divided in slides, or a presentation outline, depending on what were your settings).

2. QUALITY OF THE OUTPUT

[Tome](#) presentations are quite simple, with a wall of text and one image. Without editing, the output is pretty basic.

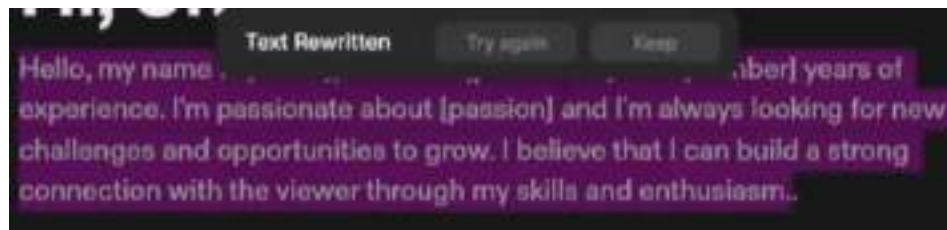

But as always with AI, we're not looking for the miraculous tool that replaces human

beings, but for a tool that supports us and helps us save a good chunk of our time. And [Tome](#) does exactly that.

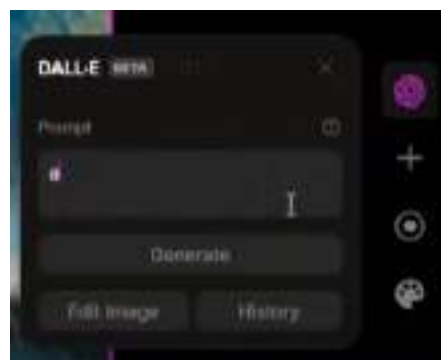

In fact, the great thing about this tool is that **it can rewrite or adjust text on the fly**. So in case you're not satisfied about the result you just have to select the text and click on 'AI edit' on the right:

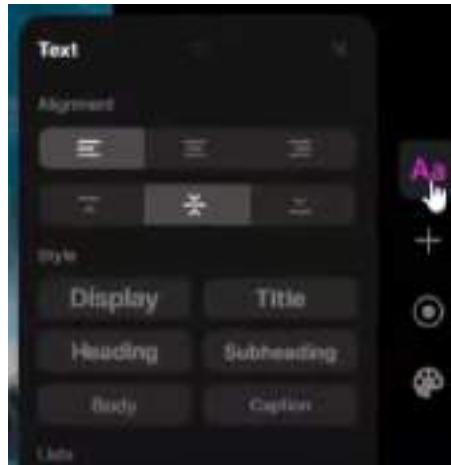

You can also prompt it to adjust the tone used in that text. And once it has rewritten or adjusted the text you can keep it or ask it to try again.

You can do the same for images. When you select an image and click on the OpenAI icon on the side bar, you can write a prompt to get a new image through DALL-E.

Of course, you can always edit the text inside the box and change the format by clicking on the text option on the side bar.

3. USE IT LIKE LOOM

The presentations you create on Tome are also pretty much like Loom... meaning you can share them with other people, leave comments on slides, and create video and audio recordings to attach to the slides.

At the top right corner you can write the email address of the people who can access that presentation.

When you click on the circle icon on the side bar, you get the chance to record audio or video files.

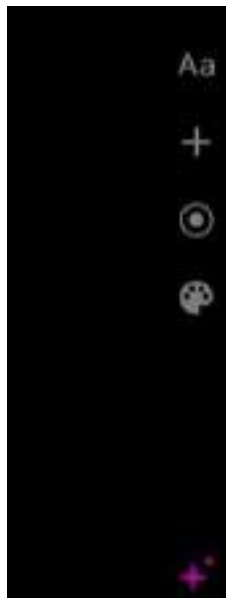

Very useful for remote teams and when you don't show presentations in person.

4. CREATE PRESENTATIONS FROM WEBSITES OR DOCUMENTS

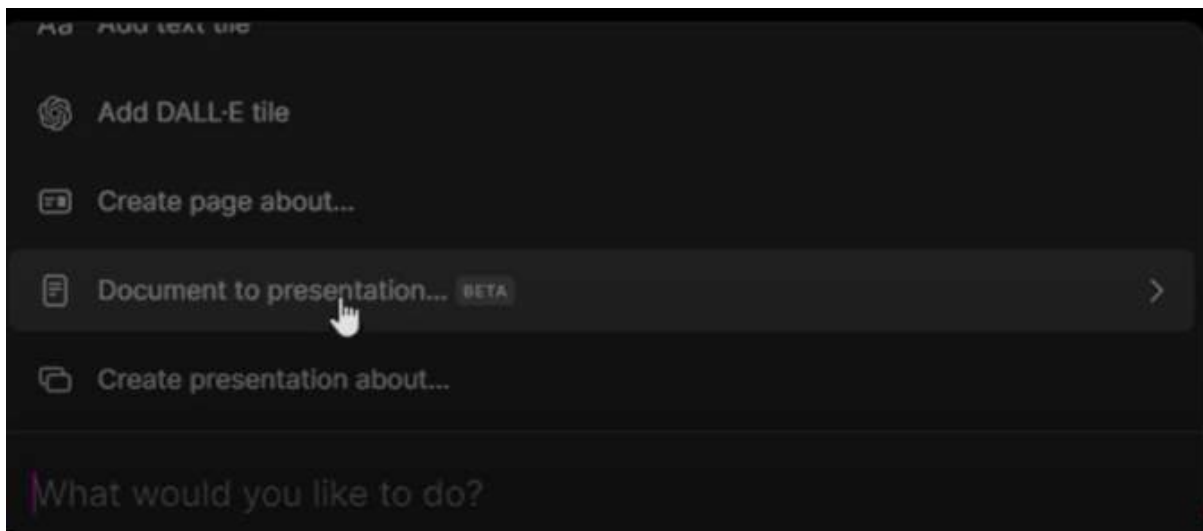

You'll love this one.

If you don't want to create presentations from scratch and want to explain concepts that are already written on documents or even websites, you can ask Tome to convert them into presentations.

Let's start from documents. You just have to click on the star icon at the bottom of the side bar:

And after that you'll have the chance to select 'Document to presentation'.

In that same section you can also select 'Website to presentation'. Just paste the link and the magic will happen.

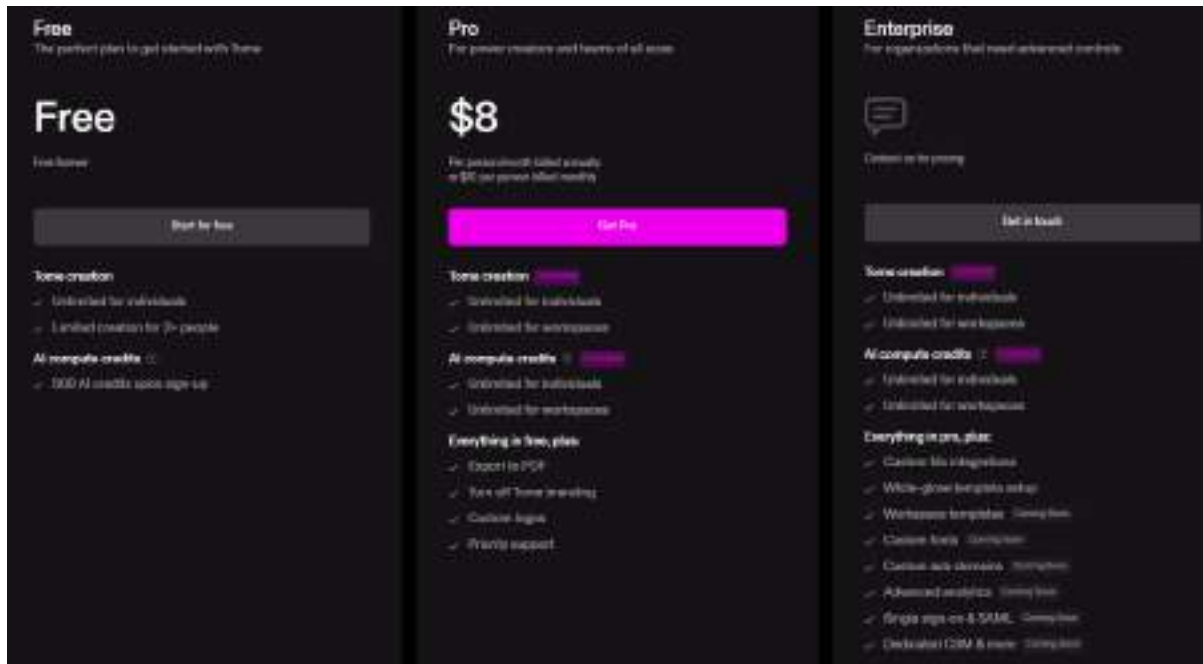

5. PRICING

If you do a lot of presentations, I'd suggest you buy the Pro version of Tome... it's just \$8.

Sure, the free version has a lot of perks, but your 'AI compute credits' are capped, and you'd have to send your referral link to get more credits. It's doable, but not convenient in my opinion.

But make your choice on [Tome's website](#):

You can use this AI tool to enhance your content, create awesome images, or search on the web the kind of image you would like to use in your project.

Moreover, you can transform your existing text documents into more dynamic narratives, complete with relevant images.

Whether you need a one-pager, a presentation, or a mood board, **Tome AI** is here to transform your ideas into captivating stories.

It's very versatile and it's designed to boost your content creation process. Just type a prompt, and watch the magic unfold!

Whether you need an engaging presentation, or a creative mood board, this AI tool simplifies the task by generating outlines and suggestions based on your prompts.

Key features:

- **Tone and Phrasing:** It assists you in finding the right tone and phrasing for your content, ensuring effective communication with your audience.

- **Content Analysis:** Tome AI employs advanced Natural Language Processing (NLP) algorithms to analyse your content. It provides suggestions for improving sentence structure, readability, and overall quality.
- **Keyword Research:** Discover high-value keywords to maximise your SEO efforts and attract more website traffic.
- **Performance Tracking:** Gain insights into how your content is performing and use analytics to refine your content strategy.
- **Image Generation:** Tome AI can quickly generate AI-generated images, saving you time and effort in your projects.

How to use it

It's very simple:

1. Sign up for an account;
2. Choose a topic;
3. Insert your content;
4. Optimise your content;
5. Publish and track.

- **LET'S TAKE A LOOK AT SOME EXAMPLES**

- 1. Presentations:**

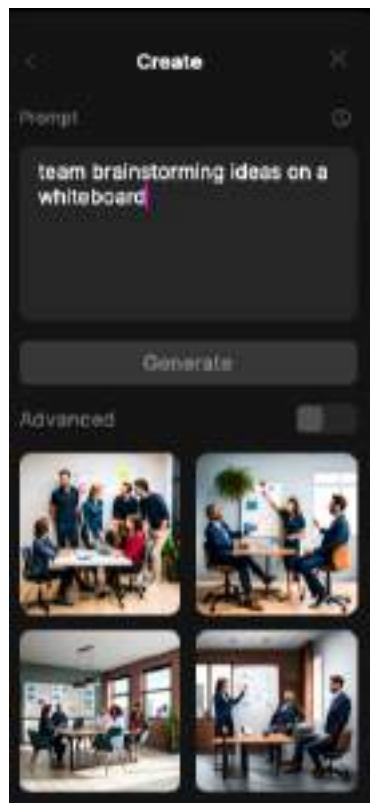

PROMPT: Create a presentation about the key principles and strategies for effective leadership in the modern business environment. Share examples of successful leaders.

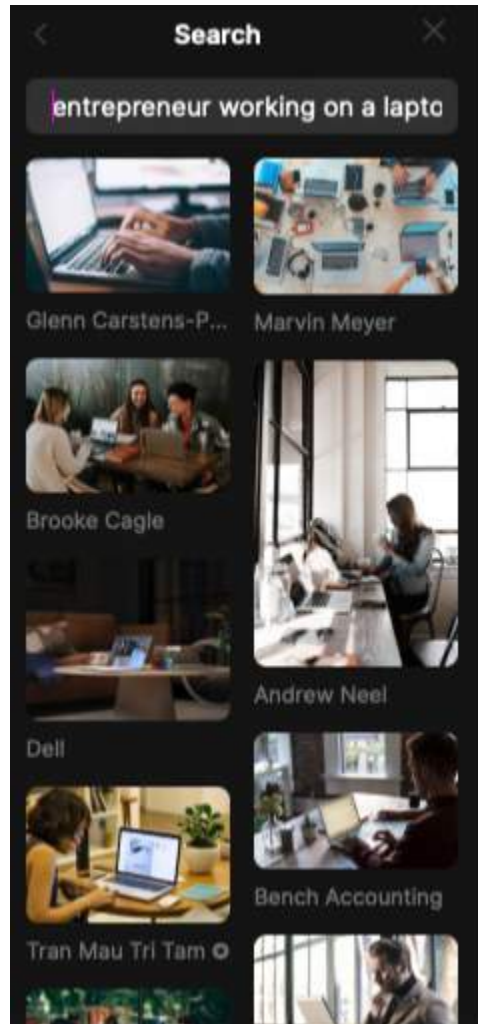

2. Create images

PROMPT: *team brainstorming ideas on a whiteboard*

3. Search images on the web (from platforms like Unsplash)

PROMPT: *entrepreneur working on a laptop*

4. Improve your content

You can refine your content with the **AI edit** option.

Simply highlight the text you wish to enhance, then right-click and choose AI edit.

Explore options like *Rewrite*, *Adjust tone* and *Fix spelling & grammar*.

5. Repurpose your content with these AI tools

- **AI Tool:** multiple
- **Category:** content creation
- **What it helps you with:** creating short-form videos from long-form videos

Use THESE tools to repurpose your content and scale your content strategy 

The first tool I want to give you is called [Lately](#), which is an AI-powered social media tool that can help you turn long-form content, like podcasts or blog posts, into hundreds of assets, including short-form video for social media content.

With [Lately](#), you can easily create social media posts from your longer content, and even schedule them to go live at the best times for your audience.

Lately uses AI to analyse your content and determine the best quotes, hashtags, and visuals that your audience likes and uses them in your social media posts. This saves you time and allows you to reach a wider audience with your content.

Basically, it allows you to always be sure what to post on social media leveraging your long-form content.

[Munch](#), [2short](#), [Clips AI](#), [Pictory](#) and [Vidyo](#) work in a similar way too.

Now, let's compare the most diverse ones, which are Pictory, Munch, 2short and Clips AI.

• THE DIFFERENCES BETWEEN THESE CONTENT REPURPOSING AI TOOLS

[Clips AI](#):

- **Save Time & Money:** Clips AI accelerates the editing process, allowing you to produce engaging video content efficiently. By automating mundane tasks, it reduces editing time and costs by a lot!

- 
- Boost Productivity: Marketers can leverage Clips AI to automate many aspects of clip creation
 - Simplify Repurposing: Clips AI makes sure that the most compelling moments are highlighted for maximum audience engagement.. Marketers can effortlessly transform long-form videos into shareable clips.
 - You have an Ai assistant: CAI, your AI Assistant identifies captivating video moments and segments within minutes.
 - Ready-Made Titles: With AI-generated, share-ready titles, marketers can save valuable time that would otherwise be spent brainstorming titles.
 - Interactive Transcript Editor: inside Clips AI you have an intuitive transcript editor that allows you to trim clips with precision. Knowing exactly which sections to refine allows for perfect cuts and polished content.
 - Upcoming Integrations: there are some interesting upcoming integrations with Google Drive and Dropbox, which will streamline the content management process even more, because it will make uploading and exporting content easier.

If you're spending a lot of time on finding the right snippets and you want to scale your short-form content game, Clips AI is perfect for you.

2short:

- This tool is specific for YouTube shorts. Very similar to Clips AI, it finds the most engaging parts of your content and uses it for your shorts, so that you can extend your reach, get more subscribers and grow your YouTube channel faster.
- Advanced AI features: the interesting part about this AI tool is that it offers advanced features such as facial tracking, one-click animated subtitles, unlimited high-quality exports, versatile aspect ratios, and more.

This tool is great for people who use a lot of YouTube and want to grow fast.

Munch:

- The main difference about this tool is that it's an all-in-one Platform: Munch provides you with automatic editing, auto-caption generation, post-content creation, and publishing, all within a single, user-friendly tool.
- Ride the Trends: Marketers can leverage Munch's trend analysis, which helps identify clips with the highest potential to trend on social media platforms, thereby increasing content visibility. Munch leverages advanced AI

capabilities such as GPT, OCR, and NLP to analyse content and align it with social and marketing trends.

- AI-Driven Editing: Munch uses AI to keep the most important content at the centre of each video. This ensures that marketers can create high-impact clips.
- Distil The Context from your Long-form Content: Munch seems very good at extracting nuggets from lengthy content, providing you with coherent, shareable clips to marketers.

If you're looking for a tool that helps you with all the aspects of content in only one place, Munch is the best choice.

Pictory:

- Besides the video editing features we already saw in other tools (cutting engaging parts, captions, titles and so on), Pictory can turn also text, like [scripts](#) and [blog articles](#), into videos. You just have to copy and paste your text, edit it and in minutes you'll get an insane output.
- Extract video snippets from sources like Zoom, Teams, and webinars.
- You can build your custom branding by giving a new look to your videos
- Everything runs in the cloud and runs on any computer

If you are a “writer” person, meaning you like writing scripts, blogs, etc., or you have a lot of written material that you want to use for your video content, Pictory is the perfect tool for you.

Of course, each of these tools has a specific price point, that's something you will have to consider in your choice. You can find everything you need to know on their websites.

I hope this little overview will help you in your lead generation journey!

BONUS SECTION 🎁

Do you have endless amount of audio content? Do THIS

Many marketers use podcasting and interviews as vehicles for grabbing attention. Is there a way to leverage that? With [Flowjin](#) you can turn audio files into dynamic short videos, and with [Woofier](#) you can turn them into blog articles in minutes.

6. Create stunning videos in seconds!

- **AI Tool:** VEED.io
- **Category:** video generation
- **What it helps you with:** create videos with avatars
- **Link to website:** <https://www.veed.io>

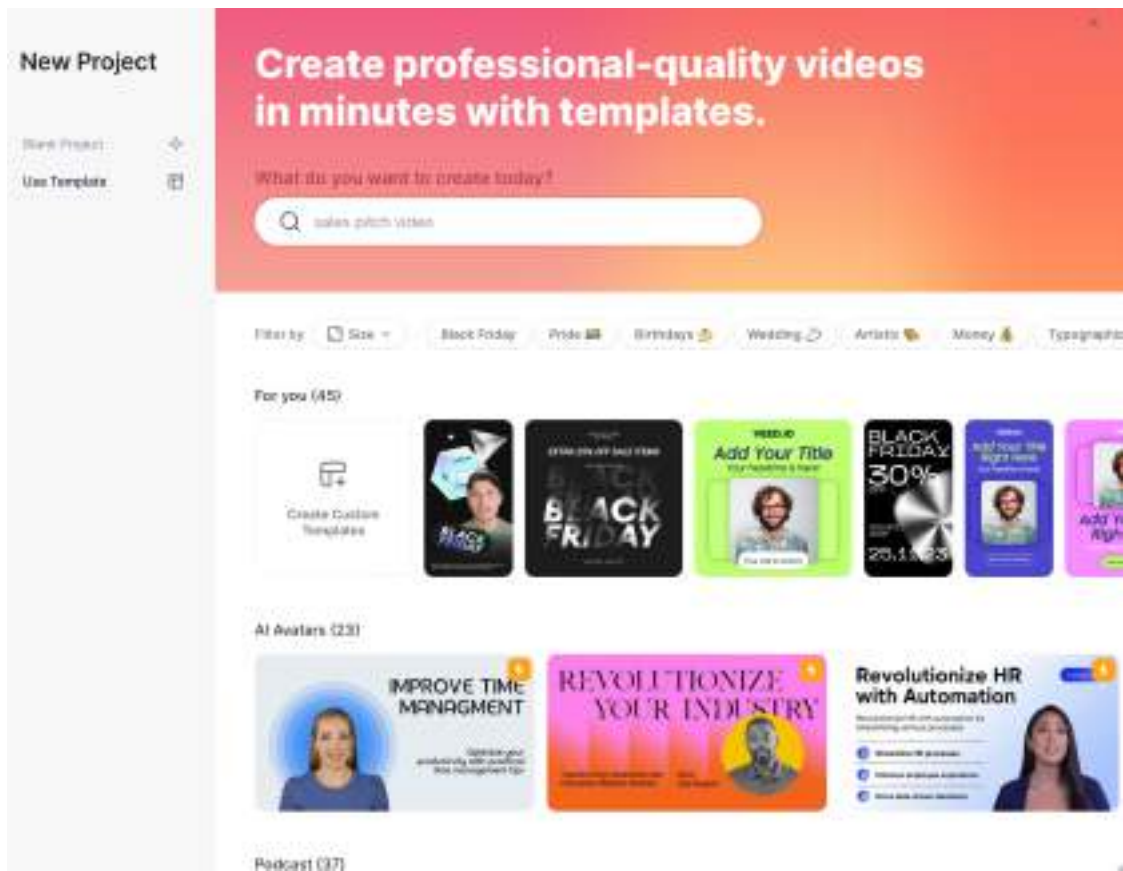

Question: can you create high- quality videos that get your community engaged, while editing them fast and easy? 🤔

Editing videos can be VERY time consuming and creativity-killing, especially when you don't know which one to choose.

VEED.io combines all the necessary features on one platform, designed for easy navigation and high-quality video creation.

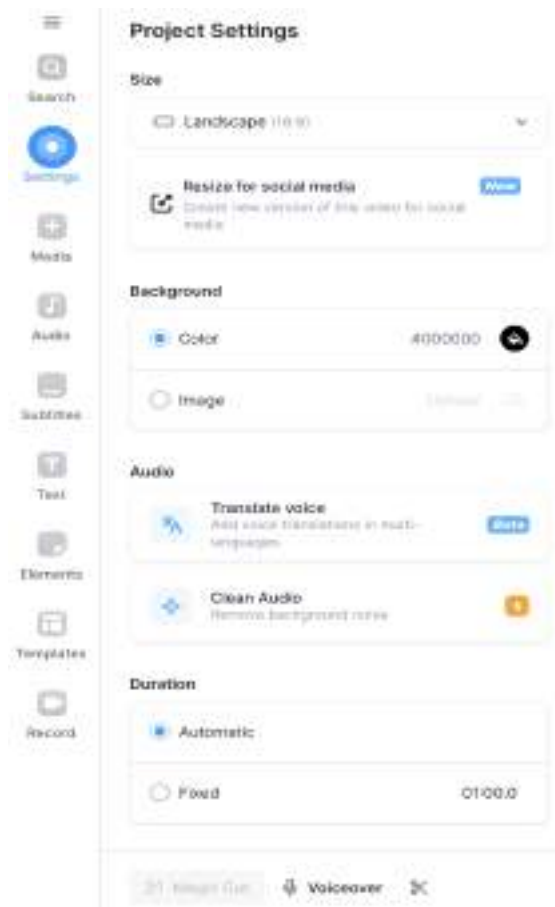

With **VEED.io** you can efficiently create professional-looking videos for marketing, training, or education without spending a lot of time.

The platform offers a variety of templates for you to explore.

They have an easy-to-navigate interface, allowing you to experiment with *Settings*, *Media*, *Audio*, *Subtitles*, *Text* and *Elements*.

Plus, a huge library of stock videos and royalty-free audio, providing you with great resources for your video creations.

⚠ The next features are what set [VEED.io](https://veed.io) apart from other AI video editing tools:

#1. Voice Cloning 🤖

In veed.io you can use the **Text-to-Speech** feature to create a voice that sounds exactly like yours!

1. Open your project and go to **Audio**;
2. Choose **Voice Clone**;
3. **Add New**;
4. **Record**.

In order to create a clone from your voice, record yourself reading a paragraph of text out loud.

Alternatively, you can choose from their selection of over 30 voices with various tones and speeds:

1. Open your project and go to **Audio**;
2. Select **Text To Speech**;
3. Add your text;
4. Choose the **voice, tone** (normal, casual, shouting) and **speed** (0.75x, 1.25x, custom);
5. **Generate**.

#2. Avatars 🧑

Generate your animated talking avatar with realistic facial expressions in seconds!

They have many presets you can choose from, but if you want something truly unique, contact their [sales team](#) and they can help you create a custom avatar based on your profile image!

After choosing your avatar, you can easily generate talking head videos for your business using their **Text To Speech** tool.

AI Avatar

Online avator generator. Choose an avator, select a voice, and animate!

Create your avator!

Easily create custom talking avatars |

Generate Avator

#3. Eye Contact AI 🧐

With this AI tool you can read your scripts unnoticeably!

VEED's eye-tracking software makes it seem like you're always looking at the camera, even when reading a script.

With this hack, you'll look more confident and professional in all your videos.

Eye Tracking Software

An instant eye tracker to help direct your eye movements to the camera using AI. Read scripts unnoticeably!

Correct eye movements with AI

Eye Contact

Beyond this, they offer other cool features such as removing background noise, AI Image generation and voice dubbing.

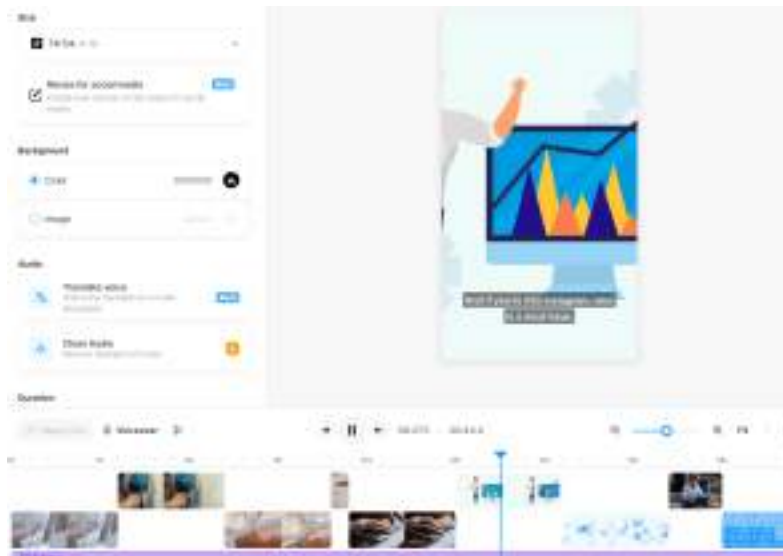

Tools				
Video Editor	Subtitles & Transcription	Toolkit	AI Tools	More
Add Image to Video	Add Subtitles to Video	Video Trimmer	AI Avatars	Audio Editor
Add Music to Video	Audio to Text	Video Manger	AI Image Generator	Instagram Downloader
Add Text to Video	Auto Subtitle Generator	Crop Video	AI Video	Tiktok Downloader
Music Visualizer	Video Caption Generator	Loop Video	AI Voice Generator	Video Compressor
Remove Background Noise from Audio	Video to Text	Resize Video	Eye Contact AI	Video Converter
Remove Background Noise from Video	Video Transcription	Rotate Video	Video Background Remover	Teleprompter
	Video Translator		Voice Dubber	Webcam Recorder
Text to Speech Video				

From some testing, I found the following there are some very cool features that can be particularly useful:

#1. Text to Video

- You can create an entire video with a text prompt. For example: *"Share and review tools to help people schedule posts"*.
- In about 1-2 minutes, it creates a video that can be further edited and tweaked.

- Lastly, you can remove the watermark and export your video.

They also provide a cool article with [Text to Video prompts ideas](#).

#2. Subtitles 📄

Adding subtitles is a must in 2023, and VEED.io offers two options:

- **Subtitle** → Automatically generate captions;
- **Translate** → Subtitle your video in a new language.

#3. Record and edit in one place 🖋️

One of their recent updates includes the ability to edit directly on the canvas, which is a game-changer!

Instead of having to change some of the elements from the side panels, you can now click on them and edit them thanks to a contextual taskbar that appears just below it.

With this feature, you can spend more time on creativity and less on technical details.

They provide very useful [Resources](#) on their website, such as tutorials, guides and videos with tips and VEED basics.

Regarding **pricing**, the great part is that you can try this tool for free for 30 minutes without even creating an account.

The screenshot displays the pricing page for a video editing tool. It features four main plans in a row, each with a 'Go' button, and an Enterprise plan below them. The Pro plan is highlighted with an orange border.

Plan	Price	Key Features
Free	€0	Essential editing, Subtitles 30 min/mo, 1GB upload limit
Basic	€13	Remove watermark, Full HD 1080p Exports, Export videos up to 25 minutes, Subtitles 720 min/yr
Pro	€22	Stock Audio & Video Library, Subtitles 1440 min/yr, Translate to 50+ Languages, Clean Audio, Eye Contact
Business	€58	For up to 5 people, Subtitles 8,000 min/yr, AI Avatars 240 min/yr, Customizable Video Templates, Video Call-to-action, Video Analytics
Enterprise	Custom pricing	Branded video templates, Personalized avatars, Brand fonts, logo, colors, Video translation and localization, Multiple team spaces, Org controls, security & SSO

7. Video, audio and image generation all in ONE tool!

- **AI Tool:** Runway
- **Category:** content creation
- **What it helps you with:** create video, audio and images
- **Link to website:** <https://runwayml.com>

It's time to talk about an incredible AI tool that helps you create and edit your content in just a few seconds! 🤖

It's called [Runway](#), and it generates videos, audio and images with one single prompt.

#1. Videos 📺

The first function is to generate videos, and with [Runway](#), you can generate videos using text, images or both. Let's break them down.

- Text

PROMPT: *a man in a cloak disappearing into a sandstorm on a dessert-like planet at sunset in the style of cinematic*

- Image

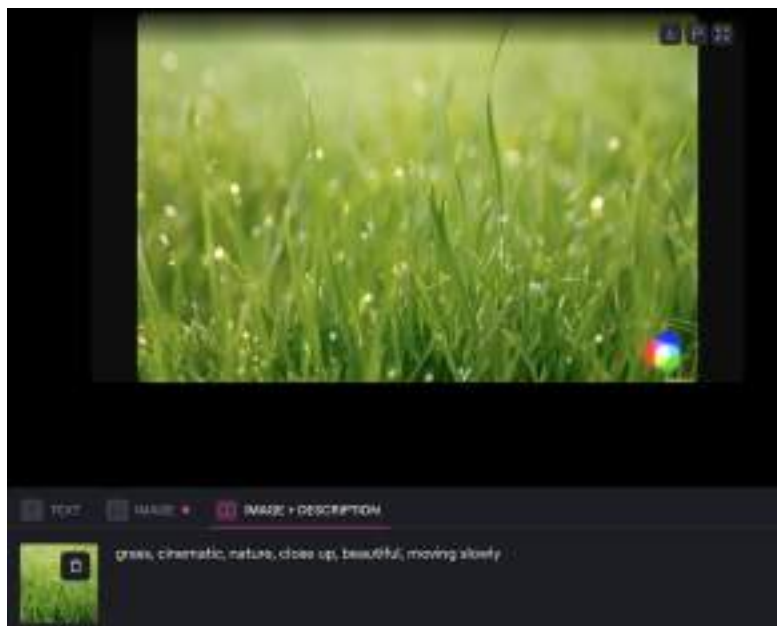

I uploaded this picture:

And it generated me a dynamic video with subtle motion.

- Image + Description

With Runway **you can also edit videos very easily.**

Runway not only offers essential functions like *Remove Background* and *Inpainting* but also advanced features like *Motion Tracking*.

- Remove Background
- Inpainting
- Color Grade
- **Super-Slow Motion**
- **Blur Faces**
- **Depth of Field**
- **Scene Detection**

- 
- Extract Depth
 - **Motion Tracking**

#2. Audio 🎧

🚀 This AI tool provides features like:

- Text to Speech
- Clean Audio
- Remove Silence
- Transcript
- Subtitles

So, it has everything you might need when it comes to audio!

#3. Images 🖼️

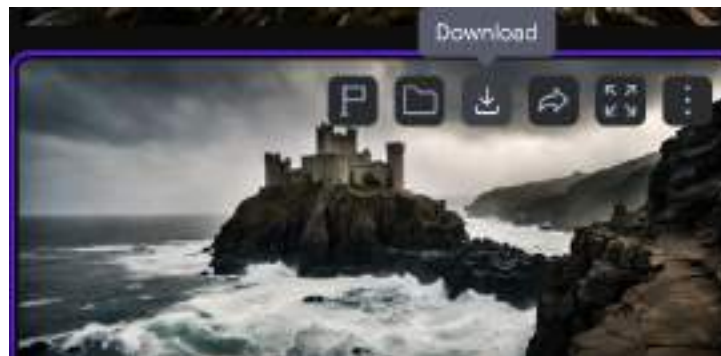

With Runway you can both create and edit images. If you want to generate a new image you can start from text or from another image.

- Text to Image

PROMPT: *a castle, ancient, towering, perched on a rugged cliff, with waves crashing, relentless and foamy, against the sheer, weather-beaten rocks below*

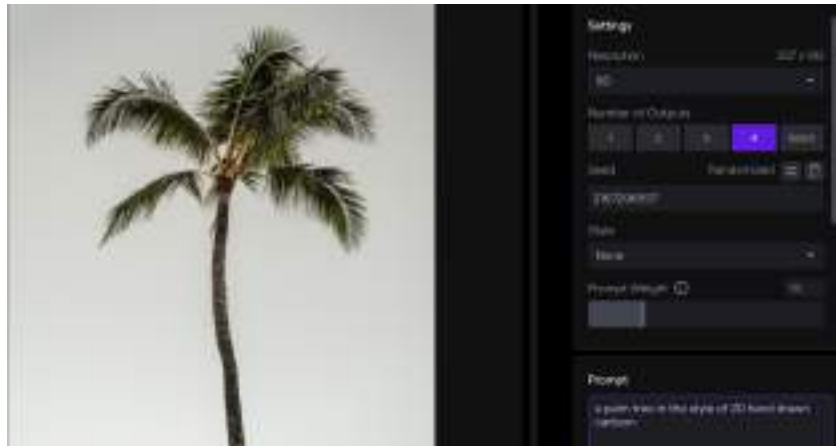

Choose from a grid of four images, then **Download**, **Save to Assets**, **Share** or **Expand**.

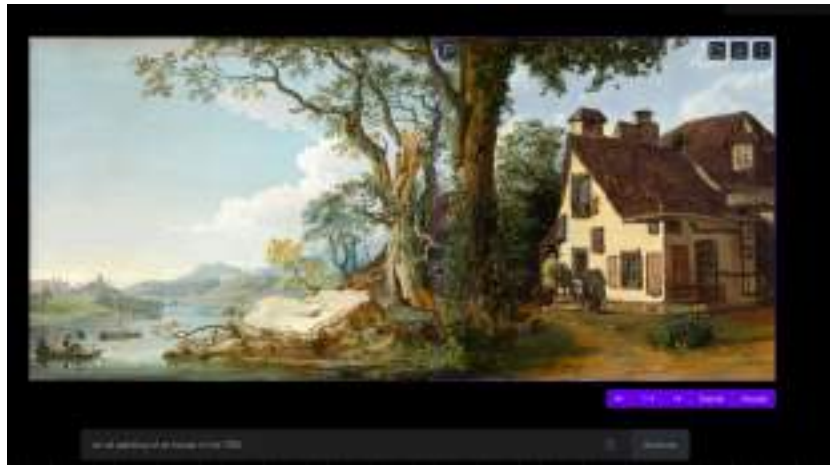

- Image to Image

PROMPT: *a palm tree in the style of 2D hand drawn cartoon*

- **Train your own Generator** → with this advanced feature, you can train your own custom AI model and turn it into anything you want!
- **Infinite Image** → you can expand an image with **Text to Image** generation.

I uploaded an oil painting and then added a “*house in the 1700s*” as a prompt, and it expanded the original picture, offering me 4 options to choose from.

- **Image Variation** -> with this function you can generate new variations of an image.

A. Edit images

When it comes to editing your images, you'll discover a set of basic tools, similar to what you would find in Canva's Magic Studio, including:

- Expand Image
- Frame Interpolation
- Erase and Replace
- Backdrop Remix
- Image Variation
- Add color
- Upscale Image

Now let's talk pricing \$

You can start using [Runway](#) for **FREE**, but if you want to publish videos without a watermark, you should upgrade to their paid plan.

Basic	Standard	Pro	Unlimited	Enterprise

8. Take your videos and podcasts to the next level

- **AI Tool:** Descript
- **Category:** content creation
- **What it helps you with:** write, record, transcribe, and edit your content
- **Link to website:** <https://www.descript.com>

Whether you're an entrepreneur, a freelancer or an influencer, podcasts are a great way to create a lot of content and engage with your audience.

So let's explore how to take your videos and podcasts to the next level!

If you're looking to save your precious time, you should consider using this all-in-one AI tool for writing, recording, transcribing and editing your content called [Descript](#) 😊

- ✅ Easily correct your mistakes and remove stuttering to improve your content.
- ✅ Integrate sound effects into your video for a more professional, high-quality video.
- ✅ Use templates to create videos with aspect ratios that suit various social media platforms.
- ✅ Add video-effects and green screen layers.
- ✅ Create AI voices and use text-to-speech to refine your content.

🔒 Key features:

1. Video editing 🖥️

- Recordings are automatically transcribed; easily edit them like a document.
- Arrange visuals like you would on a slide.

2. Podcasting 🎧

- Achieve studio quality sound, without an actual studio;
- Remove unwanted words with a single click;
- Create an AI clone of your voice, then modify or add audio just by typing what you need.

3. Transcription 🎤

- Fast and accurate transcriptions;
- Supports audio in 22 languages;
- **Cloud sync**, with full version history;
- Comes with automatic speaker detection.

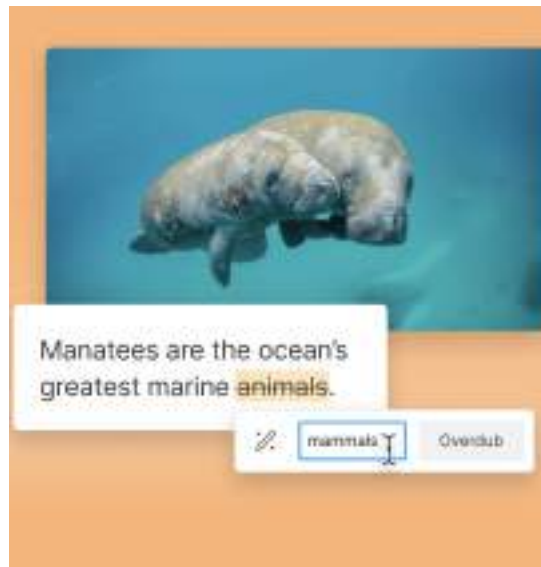

Automatic speaker labels

Add speaker labels in seconds with our AI-powered Speaker Detective.

4. AI voices 🗣️

- Clone your voice and fix mistakes by generating new audio;

- Choose from their AI voices with different tones, emotions and accents.

With an user-friendly interface, [Descript](#) allows you to export your work in different formats.

But wait, there's more!

AI tools inside the AI tool:

- **YouTube Shorts Maker** → Turn longer videos into YouTube Shorts.
- **Podcast Script Generator** → Generate outlines, interview questions and full scripts with the help of AI.
- **Video Volume Booster** → Boost the volume of a video or audio, without compromising the quality.
- **Video Background Changer** → Remove and change the background of a video without a green screen.
- **Instagram Video Editor** → Convert projects into Instagram reels.

To recap, create and edit content like a PRO with these features:

- ⚡ Studio-quality sound in one click;
- ⚡ Edit video by editing text;
- ⚡ Remove filler words;
- ⚡ AI voice cloning;
- ⚡ Green screen effect
- ⚡ Eye contact;

... and much more.

💰 HOW MUCH DOES IT COST?

You can get started with [Descript](#) for **FREE**, no credit card required.

Paid plans start at \$12 per month.

9. All you need for an AI video is here!

- **AI Tool:** Fliki
- **Category:** video creation
- **What it helps you with:** create videos from text, voice and AI avatars
- **Link to website:** <https://fliki.ai/>

I'm going to walk you through an interesting AI tool that can help you take your video creation to the next level.

It's called [Fliki](https://fliki.ai/).

It's an AI video generator that can transform your ideas into stunning visuals, and it's perfect for marketing, social media, and ecommerce.

[Fliki](https://fliki.ai/) offers a rich library of royalty-free images, clips, and music.

This is a great way to add visuals and audio to your videos without having to worry about any copyright issues.

Best of all, everything you need is integrated into one platform: templates, a translator supporting 75+ languages, AI-generated voices, voice cloning, and more.

Let's take a closer look at its features!

Text to Video:

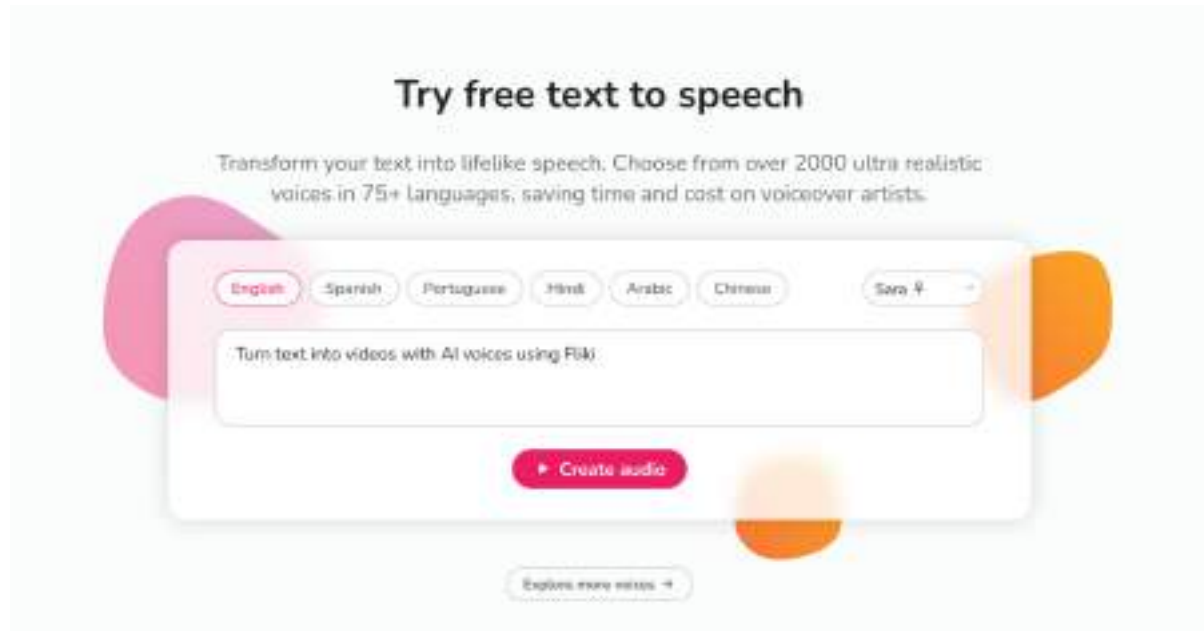

1. Enter your text.
2. Choose a personalised AI voice from a selection of 2000 voices in 75 languages.
3. Explore their library or let the AI select appropriate media to make your script shine.
4. Review and export the video once you're satisfied with the result.

Text to Speech:

Create captivating videos without spending hours recording voiceovers. 

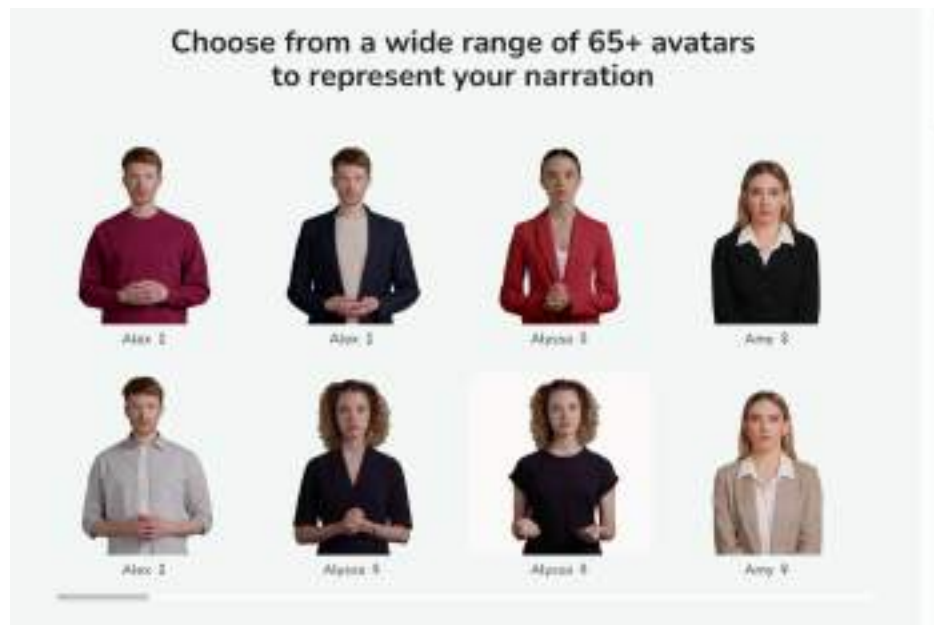

Simply input your text, choose your preferred AI voice and captivate your audience's attention with Fliki's realistic voices.

You also have the option to customise the audio by adding pauses in your speech, selecting from various styles ranging from cheerful to serious, and controlling the pitch.

AI Avatar:

Choose from over 65 avatars to make your videos more appealing! 😎

The process is just as simple:

Input your text, choose your AI voice, select your avatar, and you're ready to share your fantastic content on social media!

 **Voice Cloning** is another interesting feature that allows you to generate a realistic clone of your own voice.

How to clone your voice in 3 simple steps:

1. Record a 2 minute sample of your voice.
2. Add your script and select your voice from the list of AI voices.
3. Preview and export your audio.

Another interesting feature is that you have the option to convert your blog posts, presentations, tweets, or photos into video.

For example, simply provide a link to one of your blog articles, and Fliki will generate the audio for you. You can then personalise the video by adding various elements and experimenting with colours and fonts to make the video more engaging.

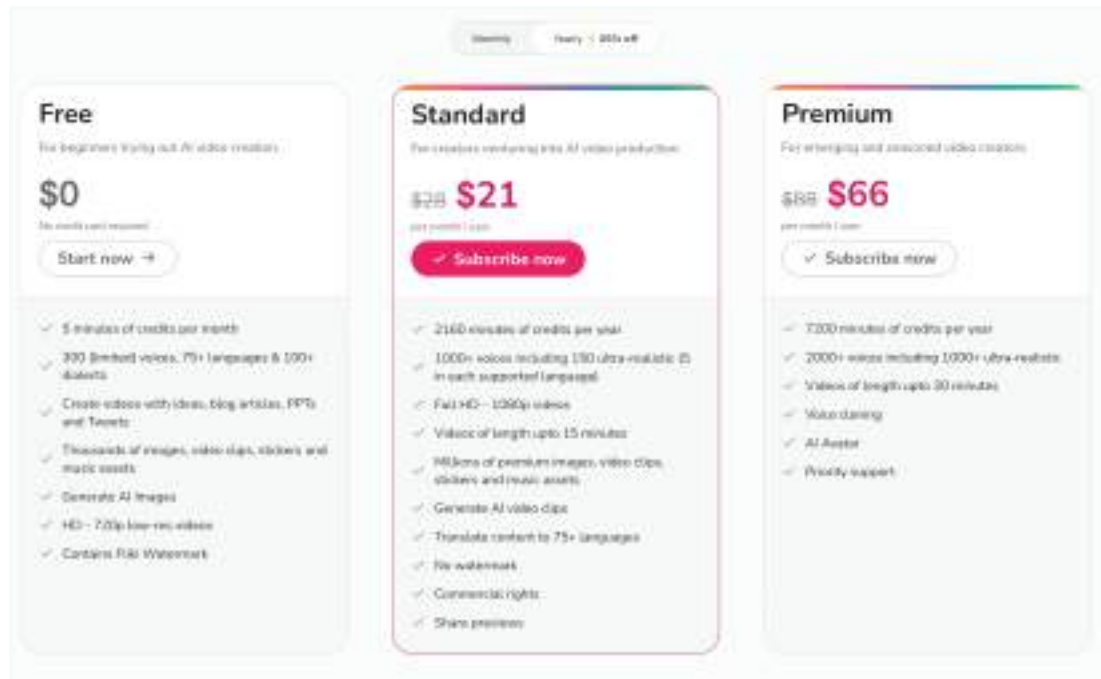

Alternatively, by pasting the link to your tweet, you can transform it into a captivating video with motion graphics and appealing visuals. 

That's pretty cool especially considering that many AI video generators don't provide anything similar!

🔄 Some alternatives to Fliki are:

- D-ID, which specialises in cost-effective talking head videos
- HeyGen, which offers a wide range of features for creating professional-looking videos with AI-generated avatars
- Descript, which excels at editing audio and video files.

\$ When it comes to pricing, [Fliki](#) provides a Free option with 5 minutes of credits per month, which might seem limited, but it's enough if you just want to test out the tool.

For those looking for more features, the Standard subscription starts at \$28 per month. With this plan, you'll get 180 minutes of credits monthly. Additionally, you'll gain access to 150 ultra-realistic AI voices, and there won't be any watermarks on your videos.

10. High-quality videos 10x times faster ⚡

- **AI Tool:** OpusClip
- **Category:** short video creation
- **What it helps you with:** create short videos from long videos
- **Link to website:** <https://www.opus.pro>

Whether you're a content creator or a marketer, this AI tool is designed to help you save time and effort.

OpusClip helps you repurpose your long videos into viral shorts, increasing reach and engagement on your social media platforms. 📈

The AI picks the highlighting moments of your video, rearranges them into a viral short, adds dynamic captions, AI-relayout, smooth transitions and finishes with a call-to-action.

The process is simple: upload one long video, and get 10 engaging short clips. 🔥

Let's start from the beginning. **What types of videos can you upload?**

- Video podcasts
- Educational videos
- Commentary videos
- Product reviews
- Motivational speeches
- and more

For the sake of this ebook, I chose one of my recent YouTube videos, a 57-minute video, and opted to create short clips ranging from 30 to 60 seconds each. It took about 30 minutes for the entire process.

Key Features of OpusClip 🔑

#1. AI Curation

OpusClip analyses your video to identify compelling hooks, extracts relevant highlights, and rearranges them into short videos with a potential of going viral.

#2. AI Virality Score

This AI tool generates a score indicating the virality potential of each short clip based on AI analysis on thousands of viral videos.

#3 Unlocking Success: Finding Your Sweet Spot for a Winning Offer

The video effectively hooks viewers by introducing the idea of understanding the market and one's capabilities. It maintains coherence by consistently discussing the ikigai principle and its importance. The content is complete with a clear introduction, body, and conclusion. It offers valuable advice and connects with viewers seeking guidance on their career paths. Additionally, it addresses the popular trend topic of personal and professional development. Improvement could be made by including a call to action for viewers.

99
SCORE

Like understanding what's happening in the market currently was happening within you and what you're passionate about what you're passionate about and what you're passionate about.

#18 The Secret to Monetizing Your Skills and Building a Successful Side Hustle

The video could benefit from a stronger hook sentence to immediately grab the viewer's attention. The topics discussed could be more organized and connected, but the speaker's personal experiences create a valuable and relatable connection. It would be helpful to offer a clear conclusion or takeaway for viewers. Additionally, the examples given may not be as trendy or relevant to a wide range of viewers.

80
SCORE

So then again I sort of like identify that particular service skill that I had and I then monetized that you know like you really want to for a side hustle you want to really pick something that you know something that you're good at like I first looked at my skills and I thought okay

#3. AI Co-Pilot

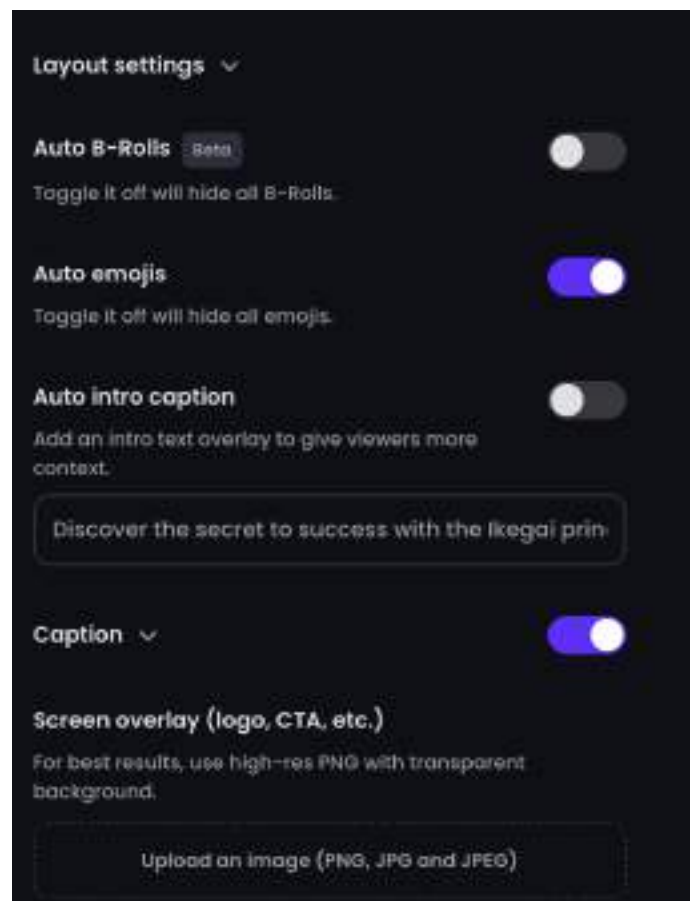

This function allows you to choose a specific timeframe for clipping and search for sections based on keywords.

#4. AI B-roll

You can add relevant B-rolls to enhance storytelling.

#5. AI Dynamic Layout

With this you can automatically transition between full-screen, two-person, three-person, and screenshare to enhance the visual impact.

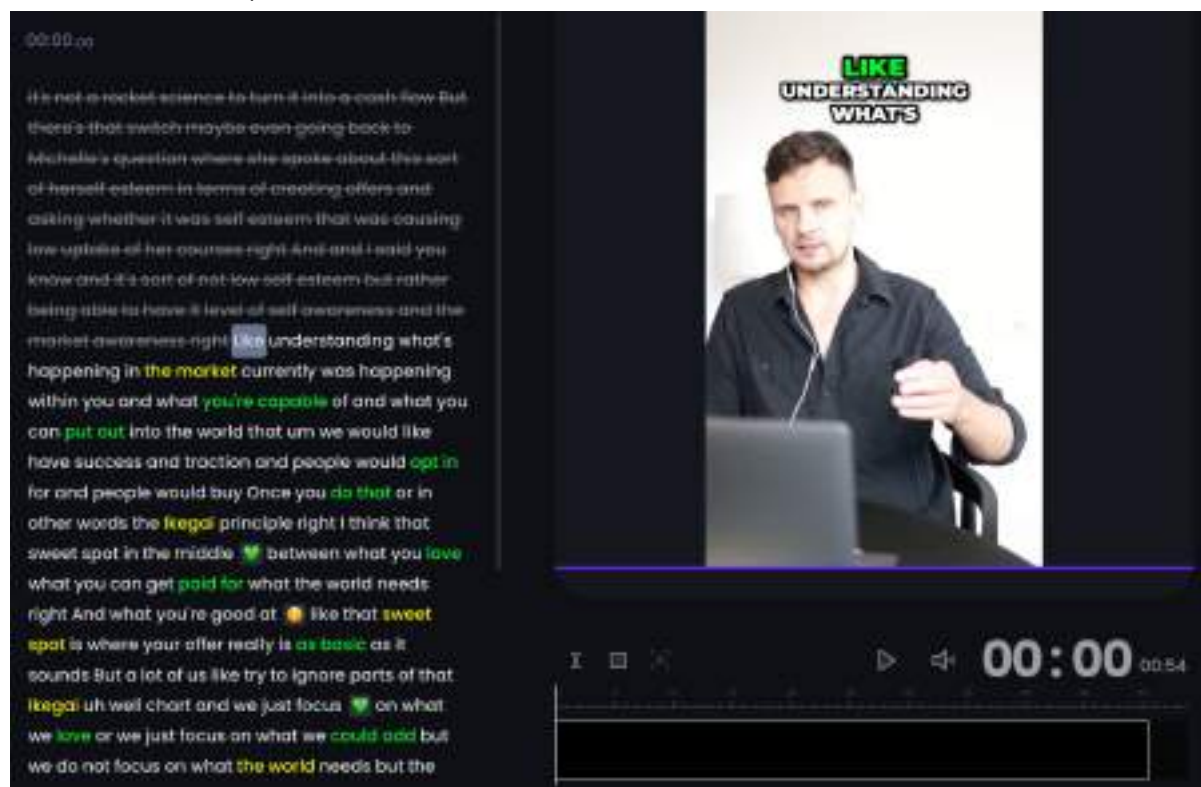

And if you don't like the emojis, you can toggle them off.

#6. Active Speaker Detection

Yes, OpusClip can analyse moving faces, and ensures your face remains centred within the video frame.

[OpusClip](#) has an easy-to-use interface, which allows you to effortlessly edit your clips for additional improvements.

🔑 Other features inside the tool:

- Caption animation;
- Trim & extend clips;
- Filler word removal;
- Zoom link;
- 1080p resolution;
- Multi-language;
- Trendy templates;
- Caption Translation.

☀️ And if you're up for it, the **Pro Plan** offers additional **features** like:

- Team Workspace;
- Social media scheduler;
- Export to Adobe Premiere Pro;

- Various aspect ratios;
- Multiple brand templates;
- Custom fonts and music (Coming soon).

OpusClip supports a **wide range of languages**, including German, Portuguese, Dutch, Russian, Romanian, Slovak, Finnish and more to come.

The tool is intuitive and efficient, producing high-quality clips optimised for social media platforms like YouTube Shorts, TikTok and Reels. It works best with videos that have a clear structure and narrative.

Now let's talk pricing 💰

You can use [OpusClip](#) for **free**, enjoying 60 minutes of processing time refreshed monthly.

New users get a **7-days free trial on the Pro Plan**, which gives you 90 minutes of video processing time.

Pro	Starter	Free
For professional creators, marketers, and teams	For individual creators	Free forever

11. Convert articles into videos easily

- **AI Tool:** Lumen5
- **Category:** video creation
- **What it helps you with:** create videos from text
- **Link to website:** <https://lumen5.com/>

Today let's discover a tool that can transform your written content into professional-looking videos. 😊

Lumen5 can convert written articles into captivating videos. So if you're a blogger or a content creator, it could be worth trying out.

Lumen5 offers an easy to navigate interface, making it simple for users to navigate and find the features they need.

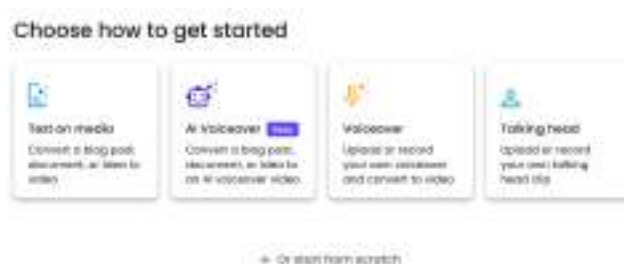

The left-hand menu provides access to all the functionalities, such as uploading videos, managing projects, analytics, and more. Users can also create folders to organise their videos and projects.

More than that, they offer a variety of ready to use templates you can choose from.

How to get started:

To begin, just click on "New video", from your dashboard.

Then, you'll see 4 options:

1. **Text on media:** Convert a blog post or a document into a video.
2. **AI Voiceover:** Convert a blog post or a document to an AI voiceover video.

For both **Text on media** and **AI Voiceover**, you'll have to provide some details, such as:

- *What will your video be about?*
- *What is your video for?*
- *Outline what to reference in your script*

Then, paste or write the text you want to convert into a video script. Or simply paste the URL of your article.

Finally, select “Compose script”.

Now comes the most interesting part:

They have an **AI Script Composer** that generates multiple scripts based on your content.

You can choose the one that you prefer and aligns best with your video.

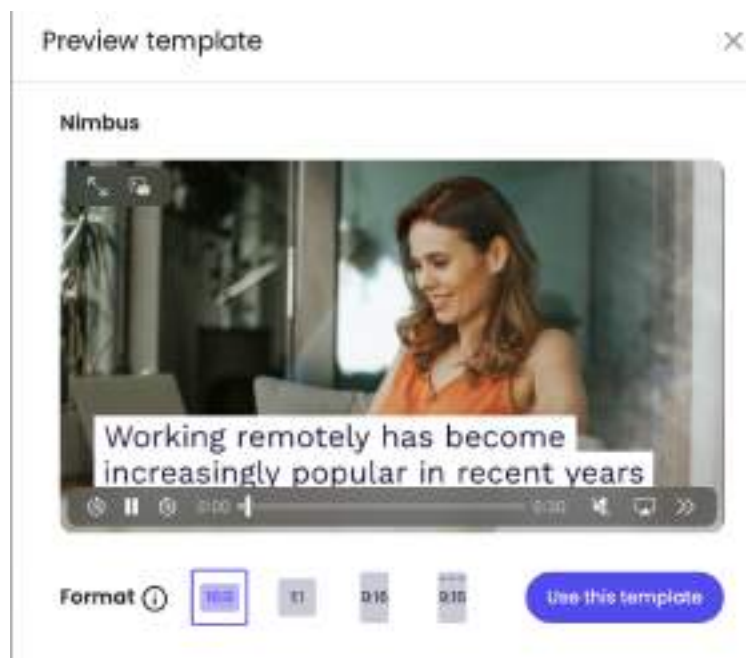

Afterwards, you can customise and edit your video by selecting a background image, adjusting text size and alignment, or adding music from Lumen5's library of royalty-free songs.

3. **Voiceover:** Upload or record your own voiceover and convert to video.
4. **Talking head:** Upload or record your own talking head clip.

For **Voiceover** and creating **Talking heads**, all you have to do is upload a voiceover file of someone speaking clearly or use your microphone to record your own voiceover clip.

A standout feature is [Lumen5](#)'s **Caption Video** option, which automates the captioning process for your voiceovers. While the tool may lack advanced editing capabilities, the captioning accuracy is quite impressive!

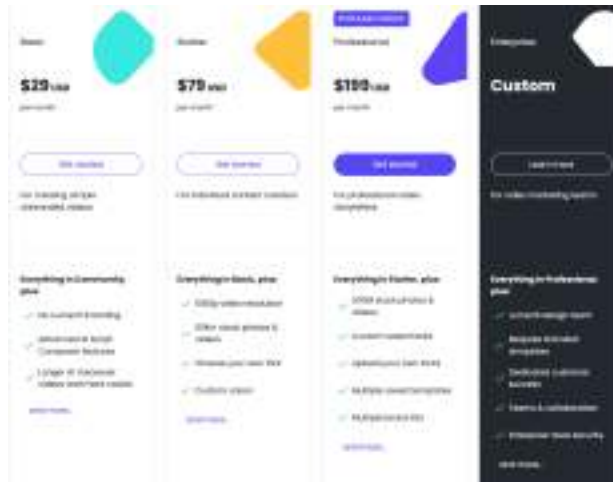

Another key feature of Lumen5 is its ability to **personalise videos** with custom themes, watermarks, fonts, and brand colours.

Users can easily customise their videos to match their brand identity, maintaining consistency in all their content.

And if you're wondering about the price... 💰

/

So if you have a small business, the free plan could probably already do the job for you!

While there are some limitations, such as the lack of advanced editing tools and limited editing capabilities, Lumen5 is a good solution for businesses and content creators looking to create video content from text or voiceover and engage with their audience.

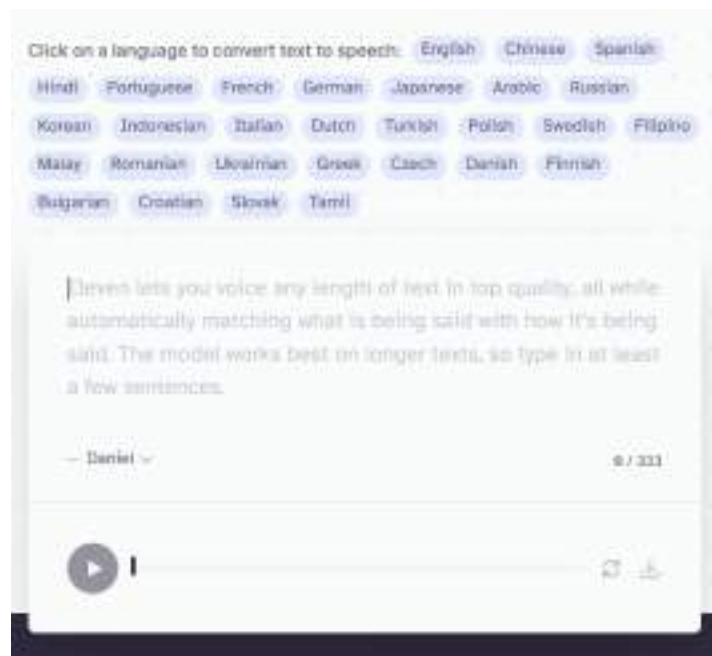

12. Convert text to speech for free 🗣️

- **AI Tool:** ElevenLabs
- **Category:** text to speech
- **What it helps you with:** create realistic voices for your content
- **Link to website:** <https://elevenlabs.io>

In this section we're talking about creating unique synthetic voices to use in video, podcasts, and audiobooks!

This tool is a must have for video creators and businesses. 🤖

It's called [ElevenLabs](https://elevenlabs.io) and is an advanced text to speech AI tool, making it easy to create realistic voices in a wide range of languages.

🤖 What is text to speech?

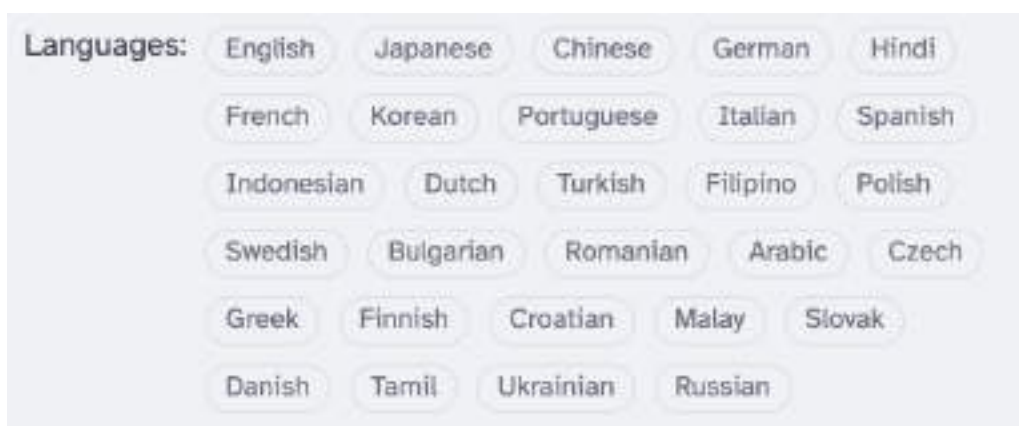

Text to speech, also known as speech synthesis or TTS, is a **technology** that transforms written text into spoken audio.

🤔 What is an AI voice generator?

An AI voice generator is a tool that converts text into spoken audio, replicating a natural human voice with authentic intonation and accents.

🚀 Why choose ElevenLabs?

✅ It works in **29 Languages**, including Arabic, Filipino, Tamil, Malay, Indonesian, Slovak, Greek, and more.

✅ **120 Voices:** Realistic AI voices with emotive capabilities.

✅ **Intuitive Interface:** Easy to navigate platform.

✓ **Online Text Reader:** Save time with an AI tool that can read any text, such as emails or PDFs.

Use cases:

-  Videos;
-  Audiobooks;
-  Gaming;
-  AI Chatbots.

With [ElevenLabs](#), you can easily create characters and stunning audio experiences in minutes.

Now, let's see how to generate Text to Speech.

How to get started:

Step 1: Select a voice and adjust “*Settings*”.

Step 2: Input your text.

Step 3: Click “*Generate*” to convert your text into audio.

Step 4: Make any necessary adjustments.

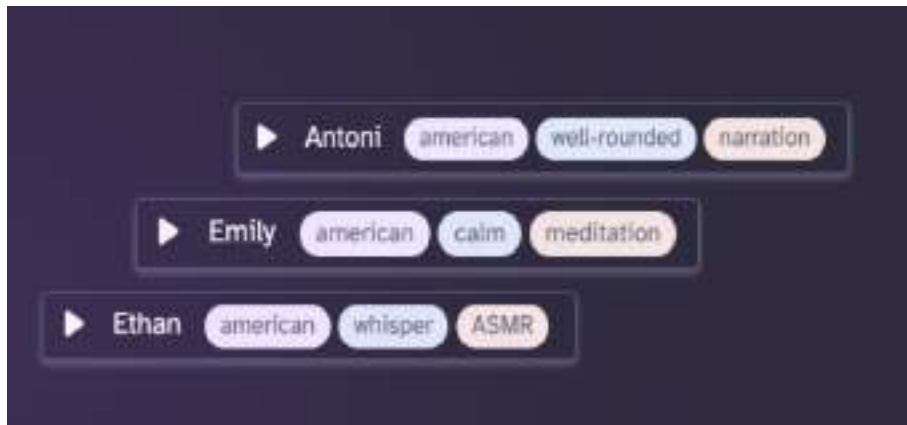

Step 5: Download the audio.

 With ElevenLabs, you can also generate **Speech to Speech!**

Just upload an audio file, play around with “*Settings*”, and follow the same easy steps as when turning **Text into Speech**.

 You can also **generate tailored AI Voices!**

1. **Clone your voice:** Create a voice that sounds like a real human.
2. **Create New Voices:** Generate high-quality audio content, tailored to your needs.

3. **Find Voices:** Share and discover voices within the ElevenLabs community.

🧐 Long-form video generation with Projects

(PS: In order to use Projects, you need to be subscribed to at least the **Creator tier**).

With this feature, you can easily edit your video and have complete control over the creative process. It's used for audiobooks, long-form video and web content.

1. **Conversion of whole books:** Import books in various formats (.epub, .txt, .pdf).
2. **Text-inputted pauses:** Adjust the length of pauses between speech segments.
3. **Multiple languages and voices:** Choose from a wide range of languages.
4. **Regenerate selected fragments:** Recreate specific audio fragments if you're not satisfied with the output.
5. **Save progress:** Save project progress and return to it at any time.

Learn more about **Projects**: <https://elevenlabs.io/docs/projects/overview>

💰 HOW MUCH DOES IT COST?

You can start for **FREE**, and enjoy a monthly reset benefit.

Free Plan: 10.000 characters monthly, up to 3 voices, Voice Design, speech generation in 29 languages.

Starter Plan: \$5/month, 30.000 characters, up to 10 voices.

You can also explore other plans like **Creator**, **Independent Publisher**, **Growing Business** and **Enterprise**, with various features.

Whether you're a podcaster, a content creator, or you have a business, [this AI tool](#) allows you to generate authentic AI voices in seconds, saving you time and effort.

13. Create high-quality audio content in minutes 🕒

- **AI Tool:** Lovo.ai
- **Category:** voice generator
- **What it helps you with:** create audio content for your courses, videos, and voiceovers
- **Link to website:** <http://Lovo.ai>

Whether you're a content creator, marketer, or educator, Lovo.ai can help you create high-quality and engaging audio content in minutes!

You can use it for video games, e-learning courses, podcasts, or films.

Lovo.ai simplifies the process of creating voiceovers by offering a user-friendly platform with extensive customisation options.

You can easily adjust parameters such as pitch, emphasis, pronunciation, and pauses to create the perfect voice! 🗣️

Lovo.ai offers various editing functions, including clipping, splicing, and adding background music.

You can export your audio files in different formats such as MP3, WAV, and AAC.

One advantage is that the platform provides tutorials and resources to help users get started.

How to get started:

1. Register on the lovo.ai website.
2. Select a voice from the library.
3. Type or paste your text into their text editor.
4. Click the "Generate" button to produce the audio content.
5. Edit and export your audio files.

🚀 Key features:

 **AI Voice generator:** Create realistic voiceover with Lovo's text-to-speech feature.

You can choose from 500+ voices and 100+ languages and accents.

1. Type or paste your text.
2. Hit "Generate".
3. Export and download your audio!

 **Auto Subtitle Generator:** Add engaging subtitles to your videos.

Generate dynamic subtitles that make your videos stand out in 3 simple steps:

1. Upload your video and select "Auto Subtitles".
2. Personalise and animate them! Change colour, font and background.
3. Export and download your video!

 **Voice Cloning:** Create custom voices and integrate them into your projects.

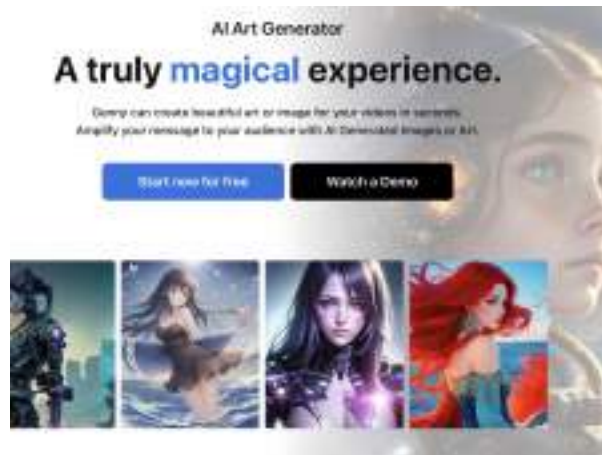

1. Open a project and click on "Voice Cloning", on the left side of the screen.
2. Record one minute or upload your voice.
3. Click on "Add voice" to complete the voice cloning process.

You can even create a library with your cloned voices and access them anytime!

 **AI Art Generator:** Create images for your videos.

1. Describe the image you want to generate.
2. Choose a style (painting, photorealistic, anime, etc).
3. Generate your image.
4. After generation, you will get 3 variations.
5. Download the images and add them to your video.

Turn your imagination into reality

👉 **AI Writer:** Turn your ideas into compelling scripts with their AI, **Genny Write**.

You can choose from different tones: friendly, funny, informative, etc.

And if you provide the length of the video you want to generate, Genny will write a script for you with the perfect word count.

 Now let's take a look at Love.ai's **Pros** and **Cons**:**Pros:**

- Simple interface;
- Highly realistic voices;
- Extensive customisation options;
- Wide range of AI voices and languages;
- Voice cloning feature.

Cons:

- Lack of integrations;
- May encounter occasional pronunciation or inflection challenges.

Lovo.ai offers a free plan with limited features, which essentially serves as a 14 days trial of their Pro plan.

The pricing for premium plans varies, beginning at **\$29 for their Basic plan** (which includes 500+ AI voices in 100+ languages, 5 Voice Clones, and 2 hours of voice generation), and **\$48 for the Pro plan** (offering unlimited voice cloning, 5 hours of voice generation, and AI-powered script and image creation).

They also have a Pro+ plan which gives you access to 20 hours of voice generation, 400GB storage, and the ability to collaborate with team members.

And if you're curious... what are the alternatives? 

Murf AI: Offers realistic AI voiceovers and **integrations with Canva and Google Slides**.

Synthesys: Provides a wide range of languages and **AI avatars** for voiceovers and **AI art** generation.

Speechify: User-friendly platform with text-to-speech capabilities and additional features like **video translation and transcription**.

14. All-in-one AI tool for your content 🤖

- **AI Tool:** Simplified
- **Category:** content marketing
- **What it helps you with:** create, design and plan your content
- **Link to website:** <https://simplified.com/>

'Create anything you can imagine with AI'.
This is the slogan of this AI tool.

With [Simplified](https://simplified.com/), you can write, design, create, plan, and publish all your content in one place.

This tool is ideal for bloggers or small businesses looking to efficiently create content without the need to switch between multiple apps or platforms... boosting your productivity to the next level.

Simplified can assist you with various tasks like social media posts, blog ideas, email writing... pretty much anything you need to write.

For creating a blog post, you can design images and graphics, and then utilise AI to assist with writing the content.

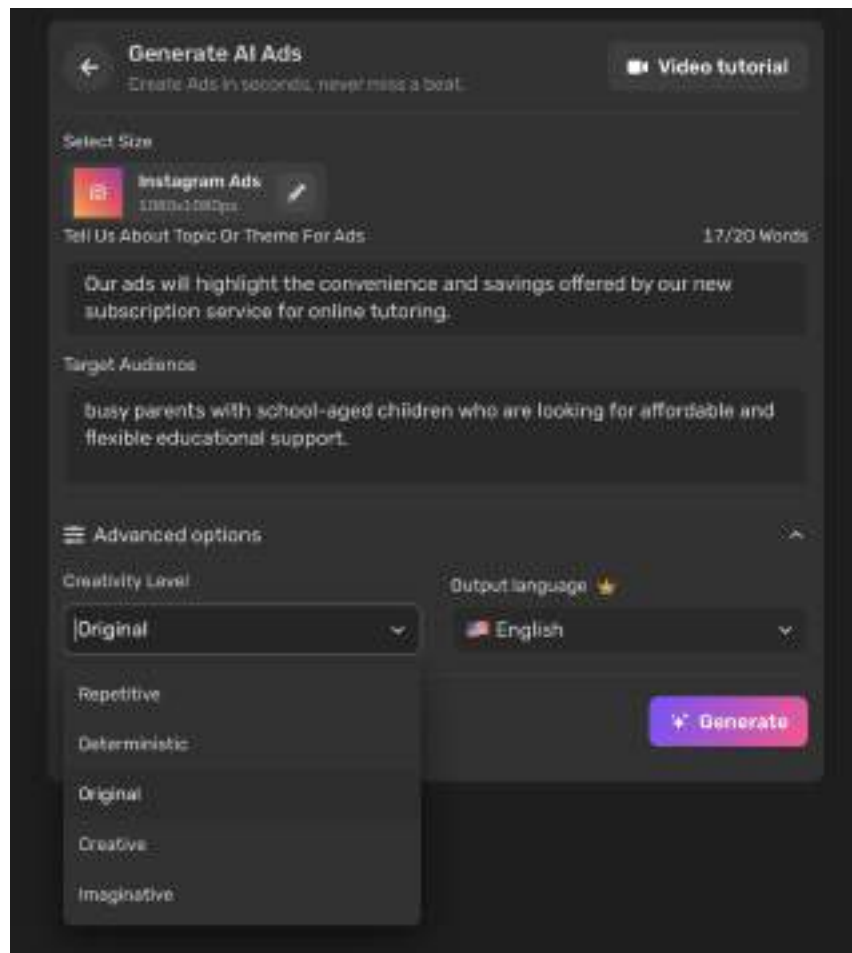

Their templates are well-crafted, easy to customise, and available in various sizes suitable for platforms like Instagram, LinkedIn, Facebook, Pinterest, YouTube, and more.

[Simplified](https://simplified.com/) offers AI features for both writing and design.

So let's have a look at what they have to offer!

I. **AI Writer** 🖋️

With their AI content generator, you can craft persuasive copy for Facebook ads, product descriptions, emails, landing pages, YouTube descriptions, and more.

How to use it:

1. Access the **AI Writer** from your *Dashboard*.
2. Choose between *Write with AI* or *Explore Templates*.
3. Select your language and creativity level, complete the prompt, click *Generate*, and choose your preferred content.

The AI Writer can be used for both creating content and optimising existing content.

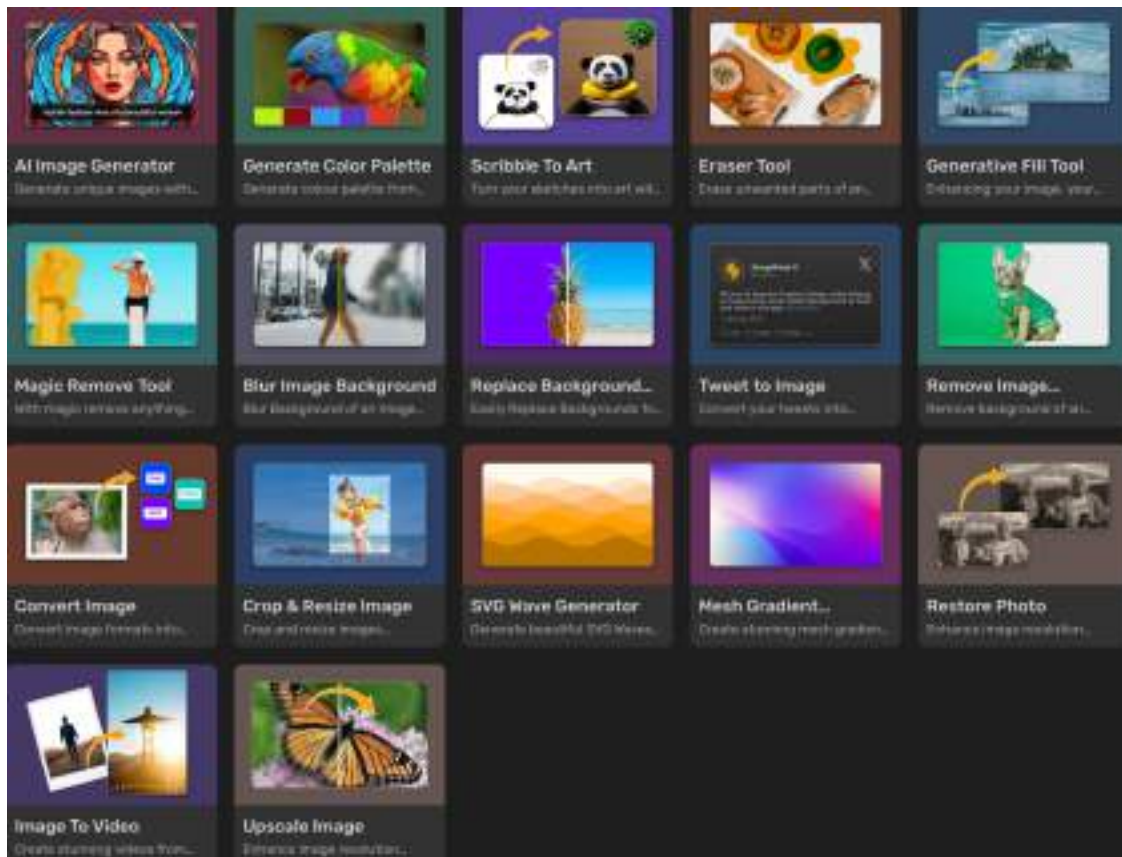

You can generate content in over 30 languages!

II. **AI Design** 🎨

Similar to Canva, you can personalise their templates to design posters, brochures, flyers, business cards, or create your own from scratch.

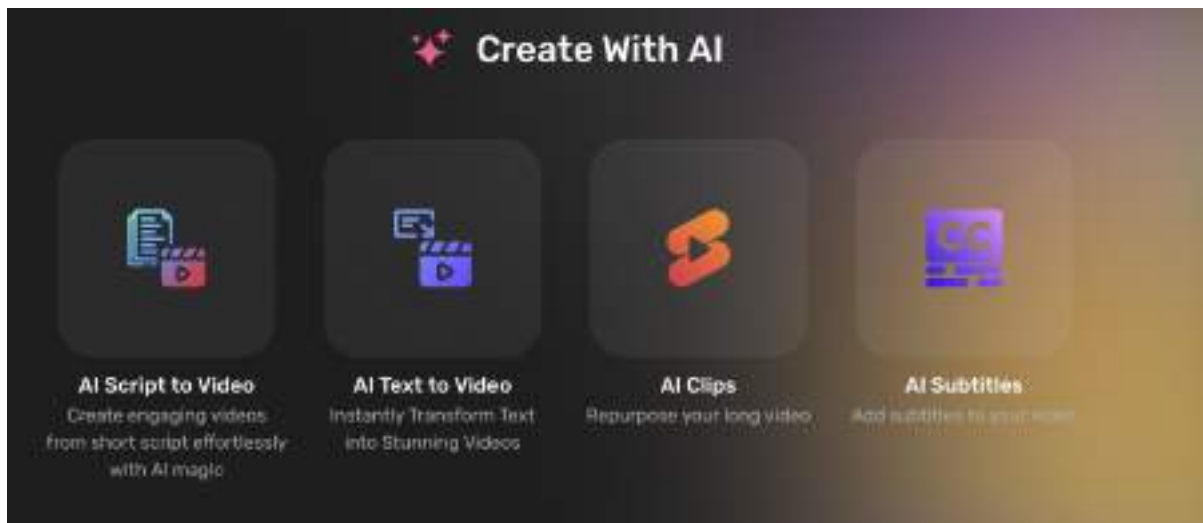

Use cases:

- Generate images;
- Resize designs for Facebook, Instagram and other social media platforms;
- Crop images with pre-determined ratios and clipping shapes;
- Animate elements;
- Remove background;
- Use their stock library for stunning visuals.

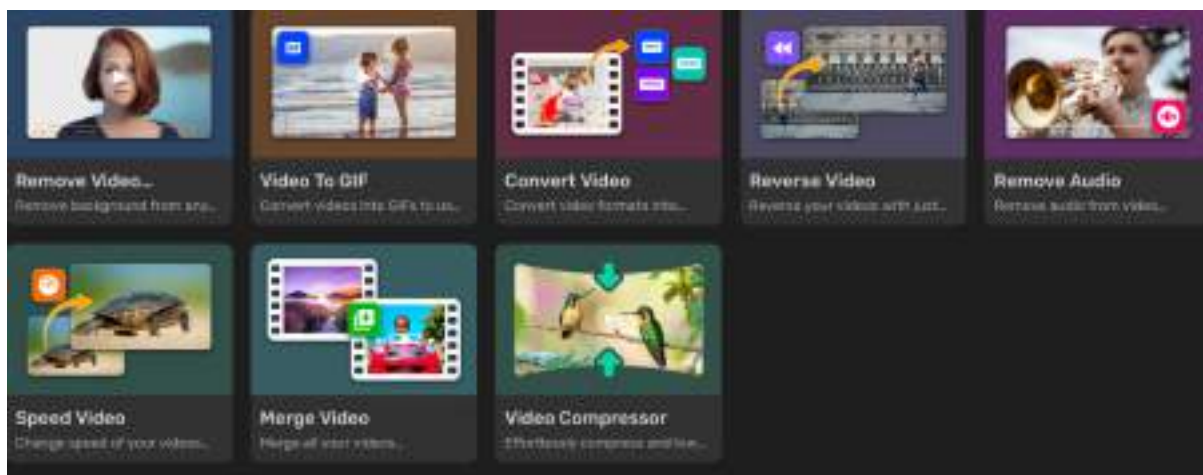

III. AI Video 🤖

Quickly create viral content with AI! 🤖

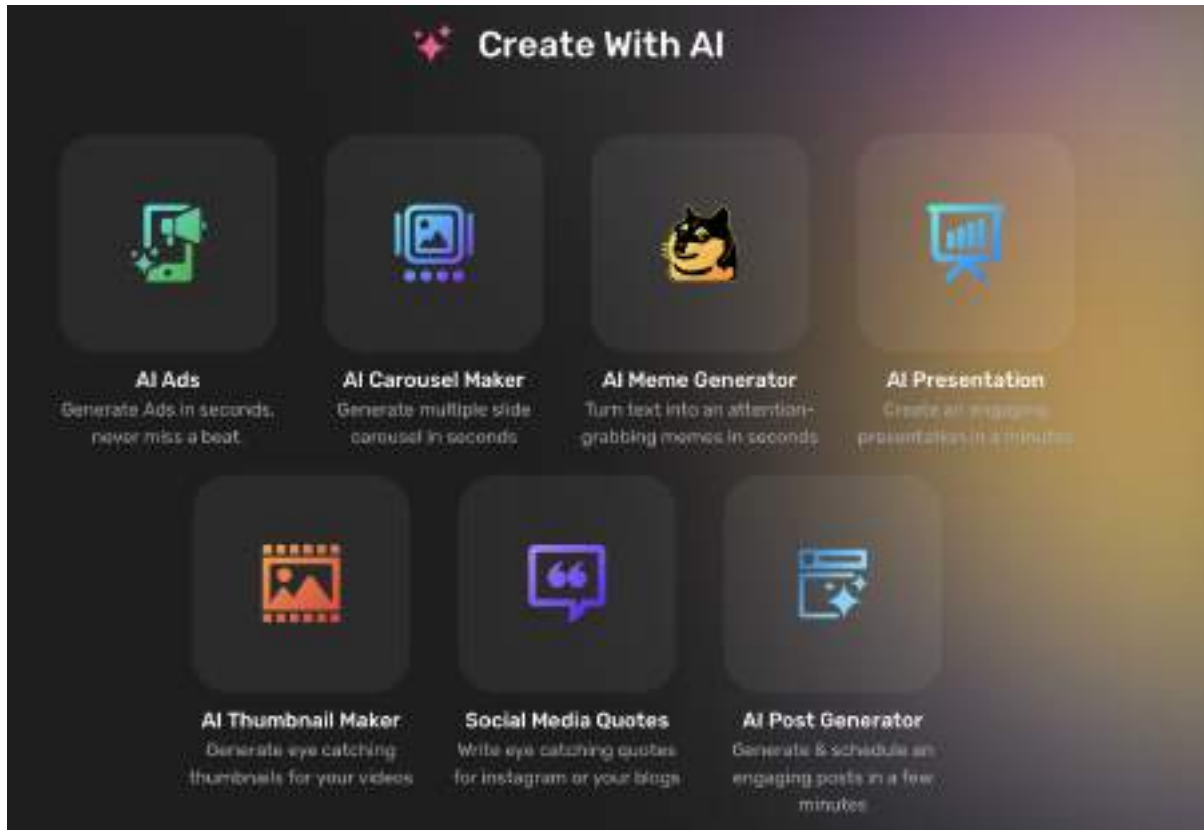

- ✓ Simplified offers **trendy captions** ready for use, or you can customise them to match your brand's colour, font, and style.
- ✓ You can easily repurpose your content with their **text-based clip creator**. Cut clips from a video and edit as you like to create new content.
- ✓ Create stunning videos for your audience with **PRO transition effects and animations** that make your videos pop.
- ✓ Add **background music, songs and sound effects** from their free stock library.
- ✓ Generate AI **text-to-speech** in 20+ languages.

IV. Social Media AI

Integrate your social media channels, create and customise your designs and schedule your posts for optimised productivity. 🤖

- ✓ Connect and manage multiple social media accounts;
- ✓ Organise, plan and schedule your posts from one platform;
- ✓ Create and edit image, video and text posts;
- ✓ Collaborate with your team in real time: tag, comment and assign work.

Now let's talk pricing 💰

If you're a creator looking for essential AI features, this is the right tool for you. They offer a **Free Forever** plan that does an excellent job.

When it comes to their subscription plans, it's a bit different from the usual AI tools. This means you have to pay a subscription for each category, or simply choose the one that suits you best and helps you the most.

You can pay separately for the AI Writer, Graphic Design, Video Editor, or Social Media AI.

Their Pro plans start from around \$11 per month.

For more advanced features, their Business plan varies between \$18 and \$29 per month.

🔄 Alternatives to [Simplified](#) include [HyperWrite](#), [Canva](#), and [Copy AI](#).
What do you think about this tool? Are you going to use it?

15. Automate your video content in 3 simple steps

- **AI Tool:** D-ID
- **Category:** video generation and AI avatars
- **What it helps you with:** automating your short form video content
- **Link to website:** <https://www.d-id.com>

If you're looking for ways to automate your short form video content, this AI tool is for you!

D-ID is a video generator that allows you to create and personalise your own talking avatar.

They offer a variety of presenters, providing a human-like experience for your audience.

Curious about how to bring your ideas to life, all while saving time and resources? 🕒

I'm going to show you how to automate this process in three simple steps:

1. Come up with ideas! 💡

We're going to use ChatGPT to brainstorm some ideas. For that, I'm going to use the following prompt:

PROMPT:

My primary goal with my content is to [describe your goal].

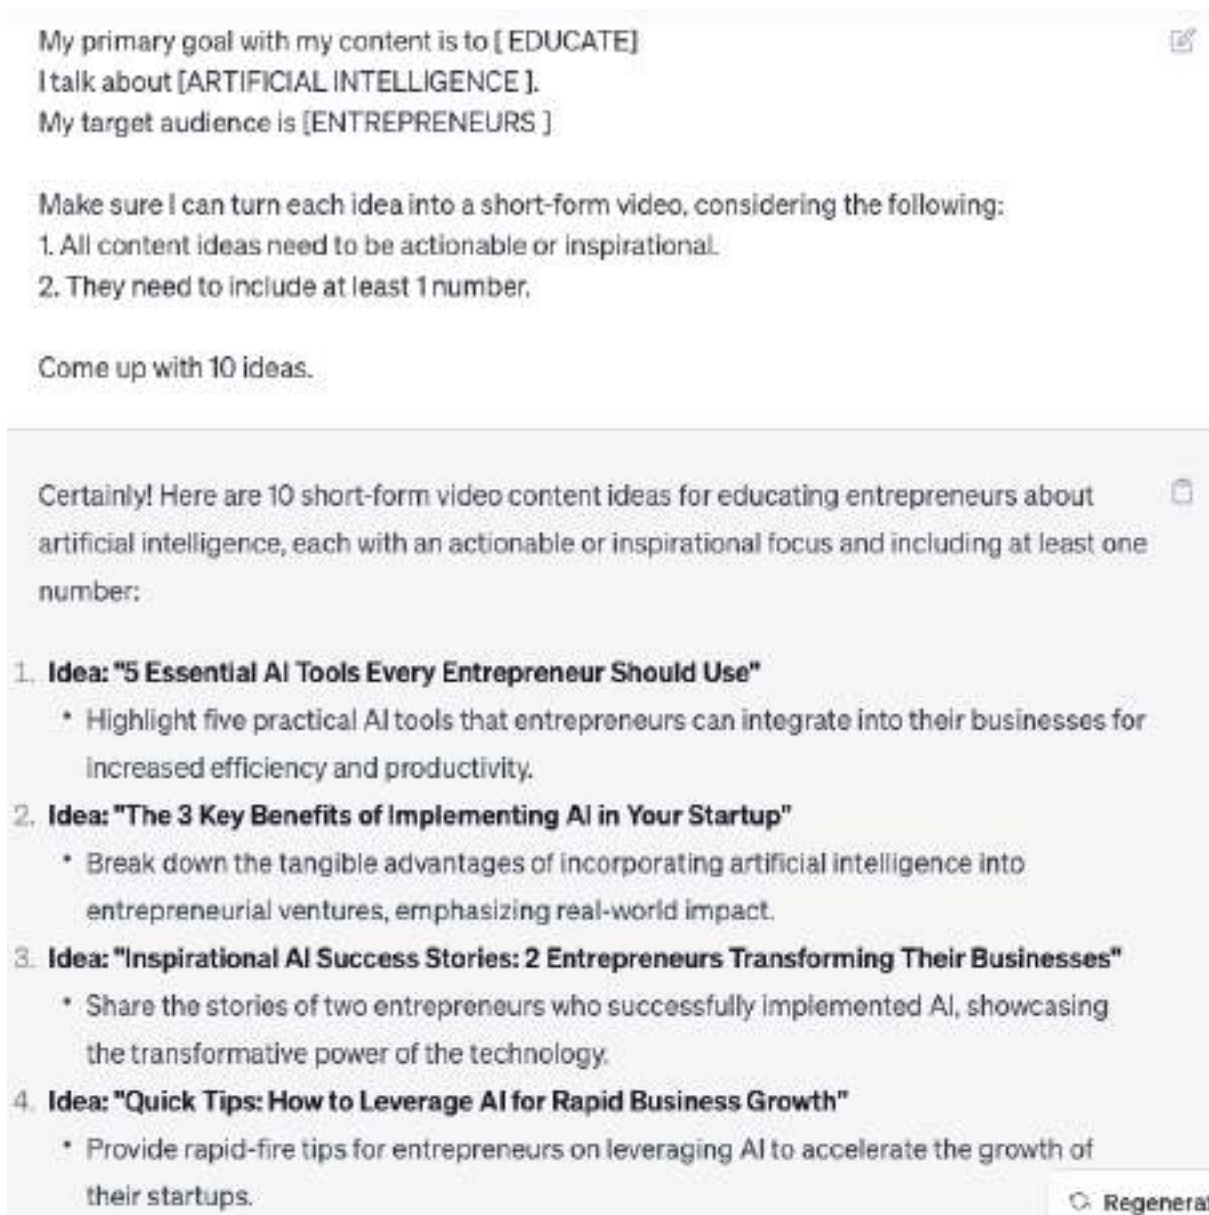

I talk about [topic].

My target audience is [target audience].

Make sure I can turn each idea into a short-form video, considering the following:

- 1. All content ideas need to be actionable or inspirational.*
- 2. They need to include at least 1 number.*

Come up with 10 ideas.

The screenshot shows a ChatGPT interface. The user's prompt is: "My primary goal with my content is to [EDUCATE] I talk about [ARTIFICIAL INTELLIGENCE]. My target audience is [ENTREPRENEURS] Make sure I can turn each idea into a short-form video, considering the following: 1. All content ideas need to be actionable or inspirational. 2. They need to include at least 1 number. Come up with 10 ideas." The AI's response is: "Certainly! Here are 10 short-form video content ideas for educating entrepreneurs about artificial intelligence, each with an actionable or inspirational focus and including at least one number: 1. Idea: '5 Essential AI Tools Every Entrepreneur Should Use' * Highlight five practical AI tools that entrepreneurs can integrate into their businesses for increased efficiency and productivity. 2. Idea: 'The 3 Key Benefits of Implementing AI in Your Startup' * Break down the tangible advantages of incorporating artificial intelligence into entrepreneurial ventures, emphasizing real-world impact. 3. Idea: 'Inspirational AI Success Stories: 2 Entrepreneurs Transforming Their Businesses' * Share the stories of two entrepreneurs who successfully implemented AI, showcasing the transformative power of the technology. 4. Idea: 'Quick Tips: How to Leverage AI for Rapid Business Growth' * Provide rapid-fire tips for entrepreneurs on leveraging AI to accelerate the growth of their startups." A "Regenerate" button is visible at the bottom right of the response.

My primary goal with my content is to [EDUCATE]
I talk about [ARTIFICIAL INTELLIGENCE].
My target audience is [ENTREPRENEURS]

Make sure I can turn each idea into a short-form video, considering the following:

1. All content ideas need to be actionable or inspirational.
2. They need to include at least 1 number.

Come up with 10 ideas.

Certainly! Here are 10 short-form video content ideas for educating entrepreneurs about artificial intelligence, each with an actionable or inspirational focus and including at least one number:

1. **Idea: "5 Essential AI Tools Every Entrepreneur Should Use"**
 - * Highlight five practical AI tools that entrepreneurs can integrate into their businesses for increased efficiency and productivity.
2. **Idea: "The 3 Key Benefits of Implementing AI in Your Startup"**
 - * Break down the tangible advantages of incorporating artificial intelligence into entrepreneurial ventures, emphasizing real-world impact.
3. **Idea: "Inspirational AI Success Stories: 2 Entrepreneurs Transforming Their Businesses"**
 - * Share the stories of two entrepreneurs who successfully implemented AI, showcasing the transformative power of the technology.
4. **Idea: "Quick Tips: How to Leverage AI for Rapid Business Growth"**
 - * Provide rapid-fire tips for entrepreneurs on leveraging AI to accelerate the growth of their startups.

ChatGPT provided me with 10 ideas. Now, I just need to pick one and move on to the next step and create the script for the video.

2. Generate your script! 📖

Now, let's create an engaging script!

PROMPT:

Write a script about [write the idea you selected] for an educational and informative 1-minute video.

Format the script as follows:

- Hook;*
- Peak interest by talking about the results they will get;*
- Discuss solution;*
- Discuss how to apply the solution;*
- Call to action.*

The hook should start with one of the following lines:

- Here's an [topic] secret nobody seems to know about*
- Ever wondered how [type of people] are able to generate [result]?*

Total script should be a maximum of 120 words with extremely conversational tone and casual word choice.

Hook: Ever wondered how top entrepreneurs are able to generate a 20% boost in productivity?

Peak Interest: Imagine having more time, better efficiency, and increased profits. That's the power of AI in your business!

Discuss Solution: There are three key ways AI can help: First, automated task management. Second, intelligent data analysis. And third, personalized customer interactions.

Apply the Solution: Start by implementing AI tools for daily tasks to save time. Use AI for analyzing big data to make informed decisions. Finally, utilize AI for customizing customer experiences, enhancing satisfaction and loyalty.

Call to Action: Start using AI today and see your business work smarter and faster!

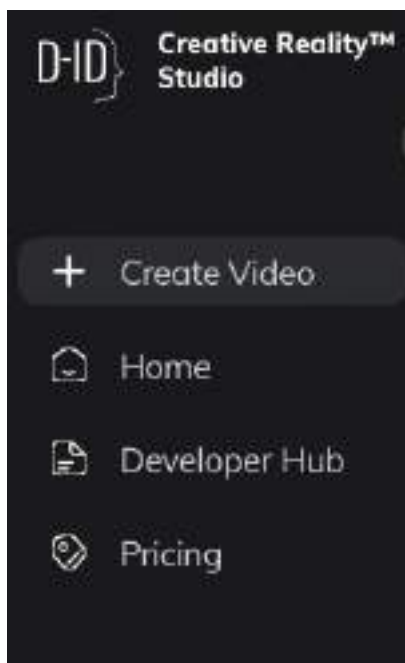

You can tweak and adjust the script to make it more actionable or informative, depending on the purpose of your video.

3. Create your avatar!

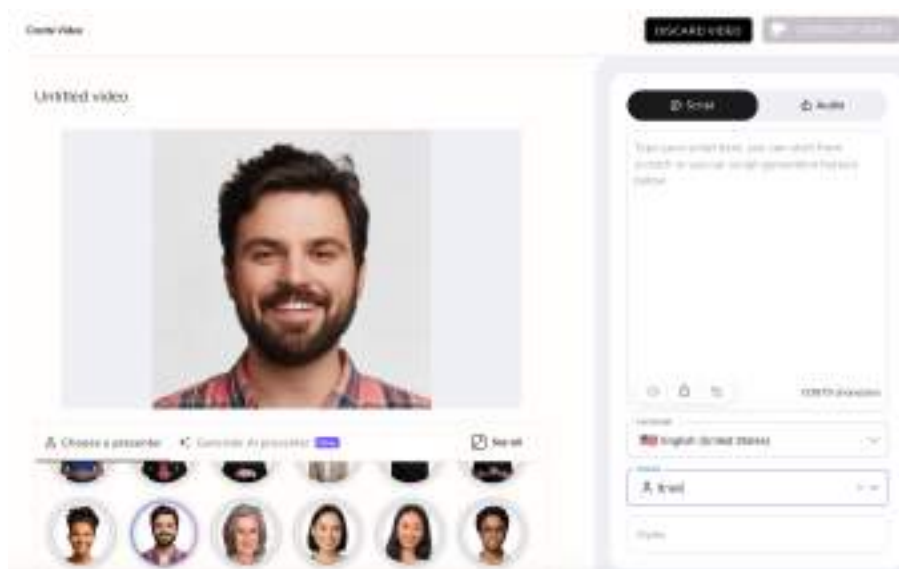

Next step is to go to [D-ID](#) and create your avatar.

Here's how to create your video:

1. In the **Creative Reality Studio**, click on the **+Create Video** button;

2. Choose a presenter (you also have the option *Generate AI presenter*);

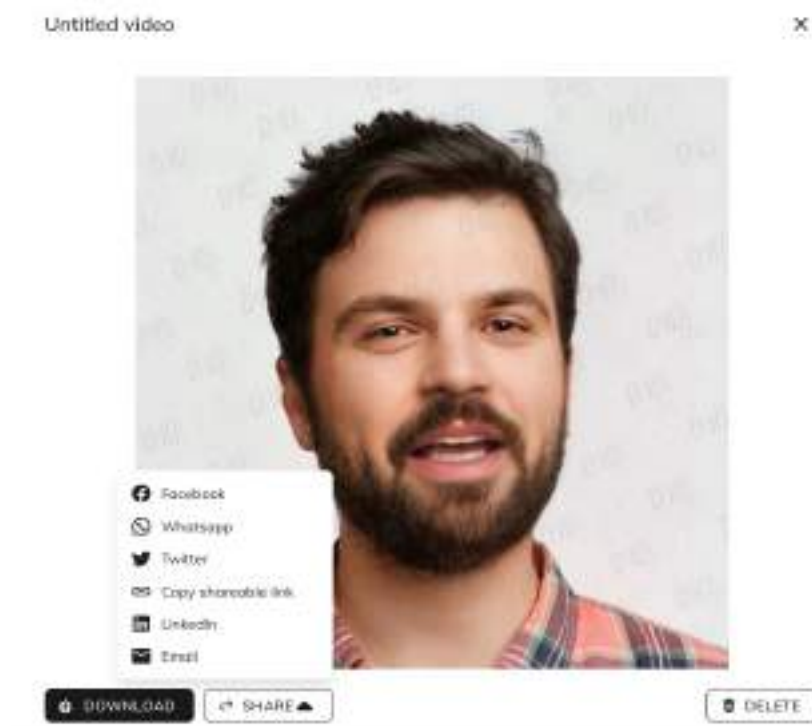

3. Add your script (you can copy-paste your text and even upload your own audio);
4. Pick the language for your avatar (available in over 100 languages);
5. Choose a voice (with 14 voices you can access for free and additional PRO voices);

6. Generate and download your video!

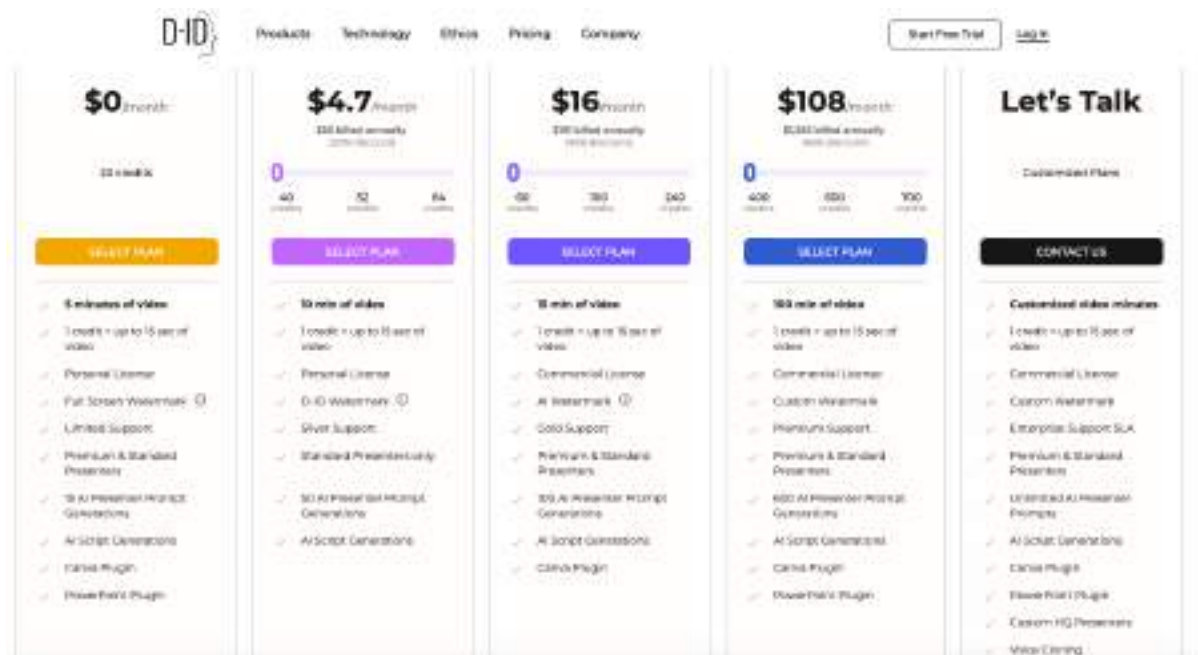

It's as simple as that!

[D-ID](#) offers a free trial allowing you to create a 5-minute video (20 credits). Each credit covers about 15 seconds of video.

In my video using the ChatGPT script, I only used 3 credits.

They offer monthly and annual subscription plans with additional features worth exploring.

Now, let's get back to our video...

A cool thing is that D-ID has a Canva plugin, so you can quickly adjust and improve your video.

For further editing, you can also use [CapCut](#) to add captions.

And now you have an avatar that does all the talking, saving you from the hassle of filming yourself or spending money on expensive equipment.

BONUS SECTION 🎁

Here are **two FREE AI tools** for your content:

I. [synclabs](#)

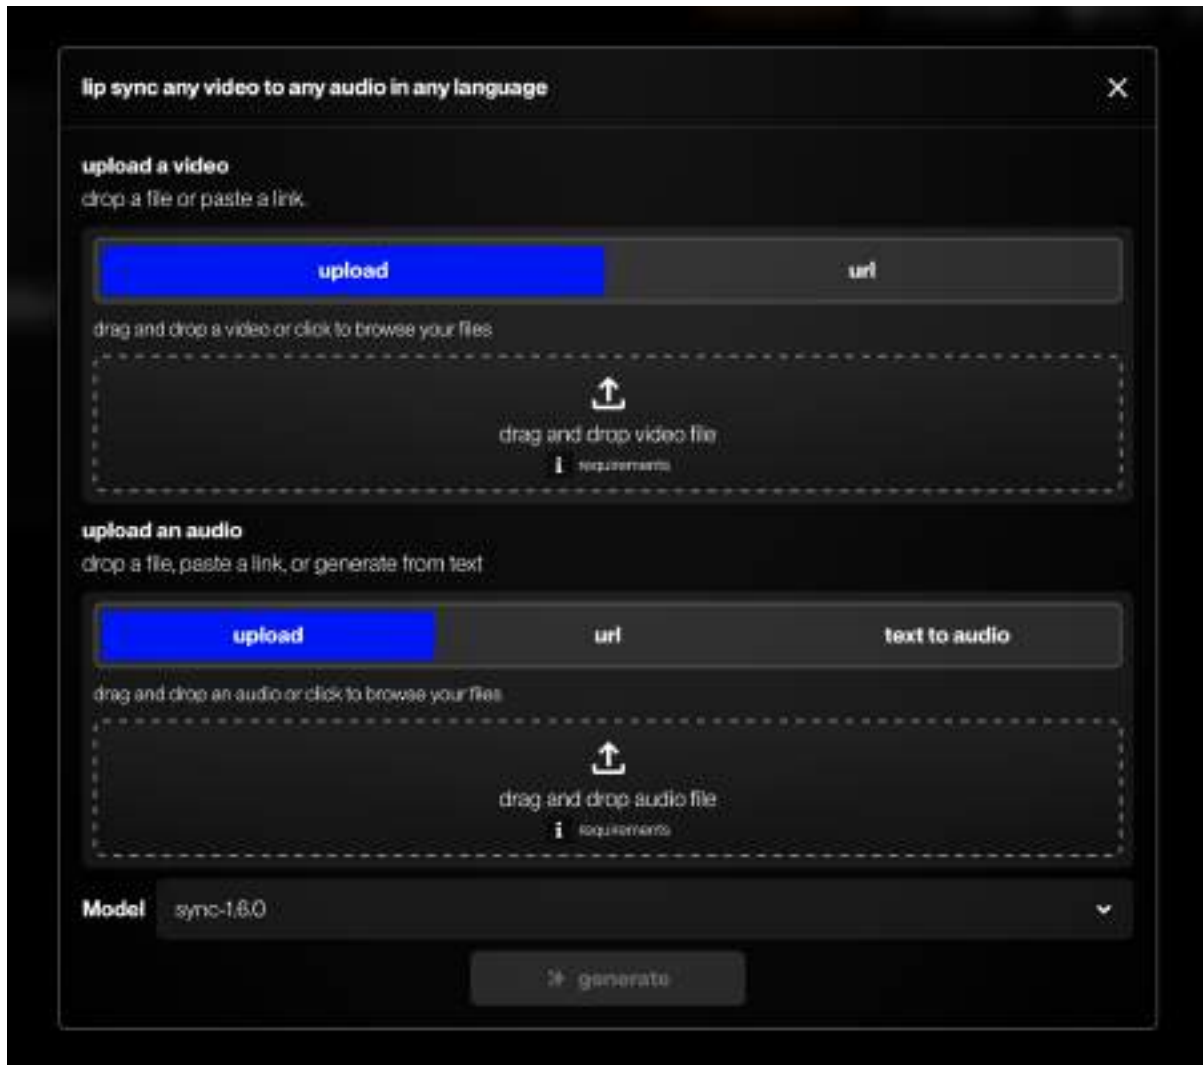

With this AI tool, you can **sync video to audio** in any language.

You can use it for movies, podcasts, games or animations.

Their interface is very user-friendly:

1. Simply upload a file or paste a link;
2. Upload an audio file or create one from text;

3. Hit *Generate*.

You can give it a try for **FREE** and enjoy 7500 credits. Subscriptions start at \$19 per month.

II. [klap](#)

Similar to Opus Clip, this tool helps you generate TikTok videos, Reels and Shorts from YouTube videos.

Simply follow these steps:

1. Paste the YouTube link or drop a file;

2. Choose your desired video settings: *Edit shorts*, *Crop*, *Add Captions*, or *Add Emojis*;
3. Select duration (maximum 1 minute or auto);
4. Click *Generate*.

New video

Klap will edit this video:

BEST AI PROJECT MANAGERS

What do you want Klap AI to do?

☒ Edit shorts ☐ Crop ☐ Add Captions ☐ Add Emojis

▼ Language: English ▲

Original: English Translation: No translation

Duration: ☒ Max. 1 minute ☐ Auto

ⓘ Klap works best with [speech-based videos](#)

Generate

In just a few minutes, your Shorts will be ready to go, complete with a virality score and the option to edit them.

Of course, you can give it a try for free, and subscriptions start at \$29 per month.

16. Create AI Avatar and duplicate yourself

- **AI Tool:** HeyGen
- **Category:** video generation and AI avatars
- **What it helps you with:** create an AI avatar for your content
- **Link to website:** <https://heygen.com>

Ever heard of [HeyGen](https://heygen.com)? It's one of the most popular AI video generators and is mostly known for its realistic AI avatars.

However, now I'm going to show you 3 features that are absolutely mind blowing (*and not many people know about*)!

1. Make an AI clone of yourself;
2. Instantly change the language that you're speaking in;
3. Talking photo generation.

Let's start from the beginning!

HeyGen offers hundreds of AI avatars, voices and templates for various use cases, such as product marketing, content marketing, sales outreach, etc.

How to use HeyGen to create a video:

1. Click "Create Video" at the top right.
2. Choose an avatar, for example "Briana".

3. Add your script: you can choose **Text Script** or **Audio Script**.
4. Adjust speed and pitch.
5. Click "Play" to preview.
6. "Submit" to publish.

It's as simple as that.

Now, let's delve into the mind-blowing features I teased you about!

#1 Make an AI clone of yourself 🤖

To create your own AI avatar with HeyGen, you'll need a professional camera shooting at 4K resolution, a greenscreen, and good lighting (*follow the recording guidelines explained [in this video](#)*).

After you finish recording, email the footage to the HeyGen team for review.

Upon approval, you can use your custom avatar on any video you create using HeyGen.

Once you've created your AI avatar, you can make it speak using the Voice Cloning feature!

It supports eight languages: English, German, Polish, Spanish, Italian, French, Portuguese, and Hindi.

To clone your voice, go to the "Voice" menu, click "Clone Voice," and follow two simple steps: "Record Consent" and "Record Voice."

The process takes about two minutes.

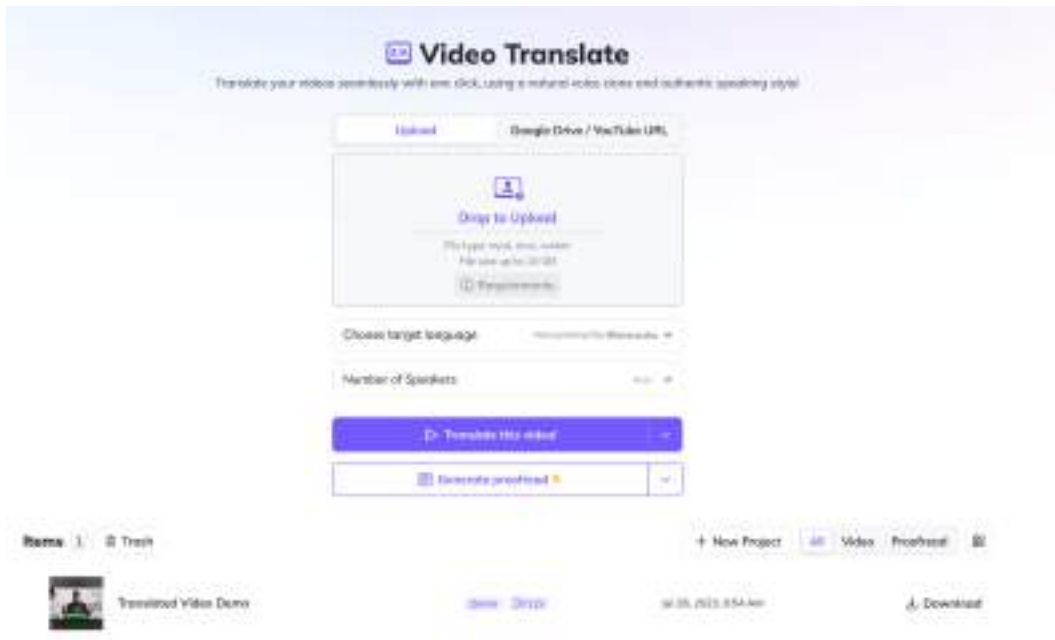

I believe this feature really sets them apart from other AI video generators. ✨

#2. Record in one language, translate in 40+ languages 🌐

You can record in over 40 languages, such as Arabic, Indonesian, Polish, Tamil, etc.

All you have to do is upload your video or paste a Google Drive / YouTube video URL, choose the language in which you want to translate your video, and select the number of speakers.

Then select "Translate your video" and "Download" it.

This feature sets you up for unlimited content creation and can help you reach a wider audience.

#3 Talking Photo 📸🗣️

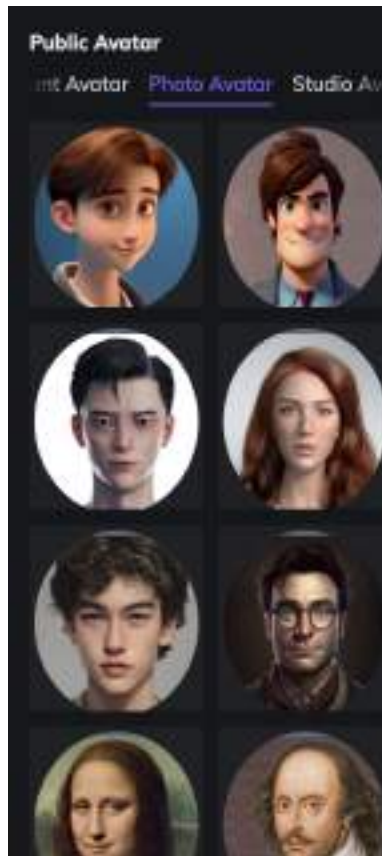

HeyGen's TalkingPhoto feature lets you animate any photo and add a human voice in over 100 languages and accents.

Just provide a script, and HeyGen will bring your image to life!

On the HeyGen dashboard, select “Make a TalkingPhoto Video”.

Then choose one of the next options:

1. Generate a TalkingPhoto by describing your ideal avatar.
2. Upload a TalkingPhoto by selecting a photo from your computer.
3. Selecting one of the existing TalkingPhotos from HeyGen.

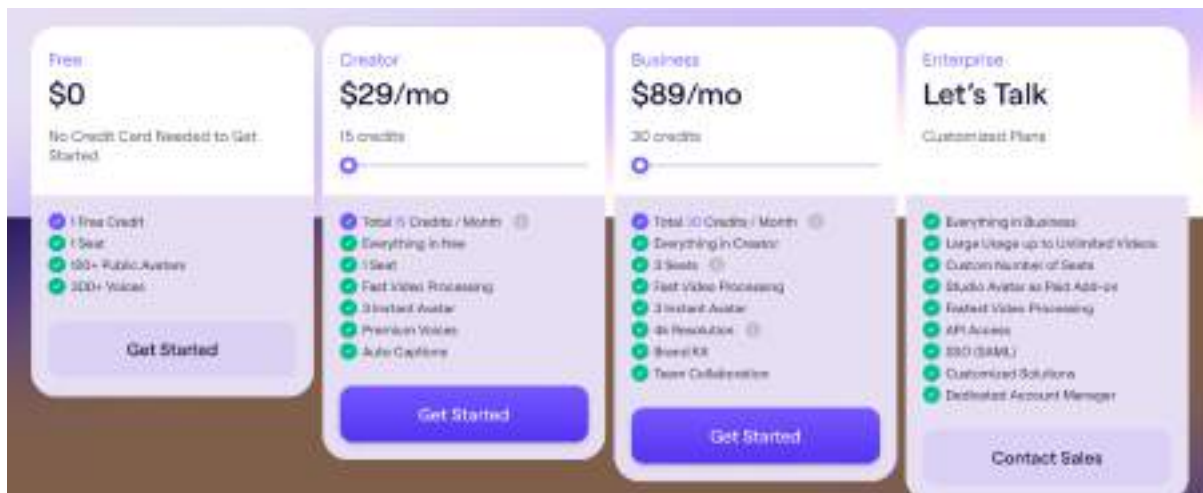

In no time, you can transform Mona Lisa into a dynamic talking photo with accurate lip-syncing and a real human voice.

Integrations

- ✓ ChatGPT Plugin;
- ✓ Canva App;
- ✓ Zapier;
- ✓ and more.

This way, you can easily automate your tasks and boost your productivity. 🚀

Pricing:

[HeyGen](#) offers a **FREE TRIAL** with limited features. You get one free credit for videos up to 1 minute long and access to over 120 public avatars.

You can also convert web content into videos using a URL. It's completely free to try out and see if you like it.

17. Create AI designs in seconds!

- **AI Tool:** Galileo AI
- **Category:** video generation and AI avatars
- **What it helps you with:** create AI designs in seconds
- **Link to website:** <https://www.usegalileo.ai/explore>

Looking for an AI tool for user interface design?

You're in the right place. 🎨 😎

Whether you're working on a mobile app or a website, [Galileo AI](https://www.usegalileo.ai) can help you create stunning designs in a matter of seconds.

🔥 How to get started:

First, go to the **Explore** section to gather some inspiration for your next design. You can scroll through and find a lot of interesting ideas and designs made by the community, both for mobile and web.

After that, you can dive into creating your own design. 🤖

You have two options for this:

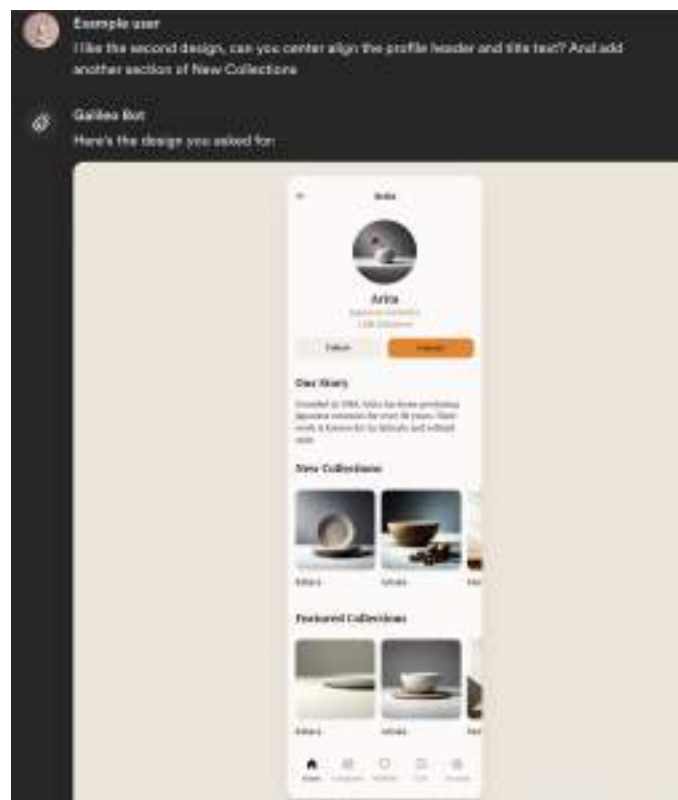

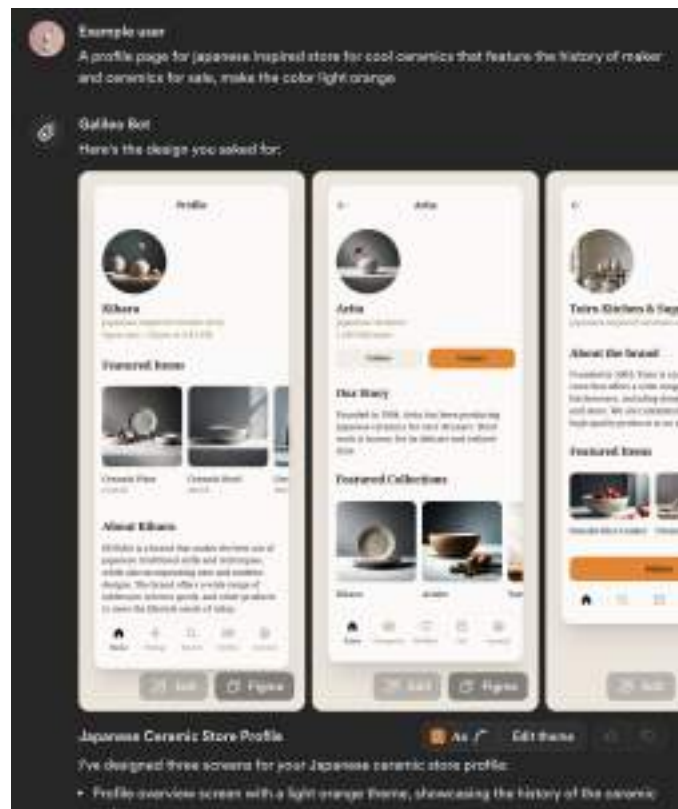

Text-to-UI

1. Choose either **Mobile** or **Web**, depending on your project.
2. Describe your design.

Profile page of an album on a music app, including a header with the album cover, title, artist name, and a tracklist.

Rental app listing page for Barbie's Malibu house, highlighting unique amenities.

Search tab in a music app displaying a search bar at the top, followed by a grid view of music categories.

They also offer a **Prompt Guide** to help you get better results with Galileo AI. I'll leave the link to that in the first comment.

3. Make it **Public** or **Private**.

4. **Generate** your design!

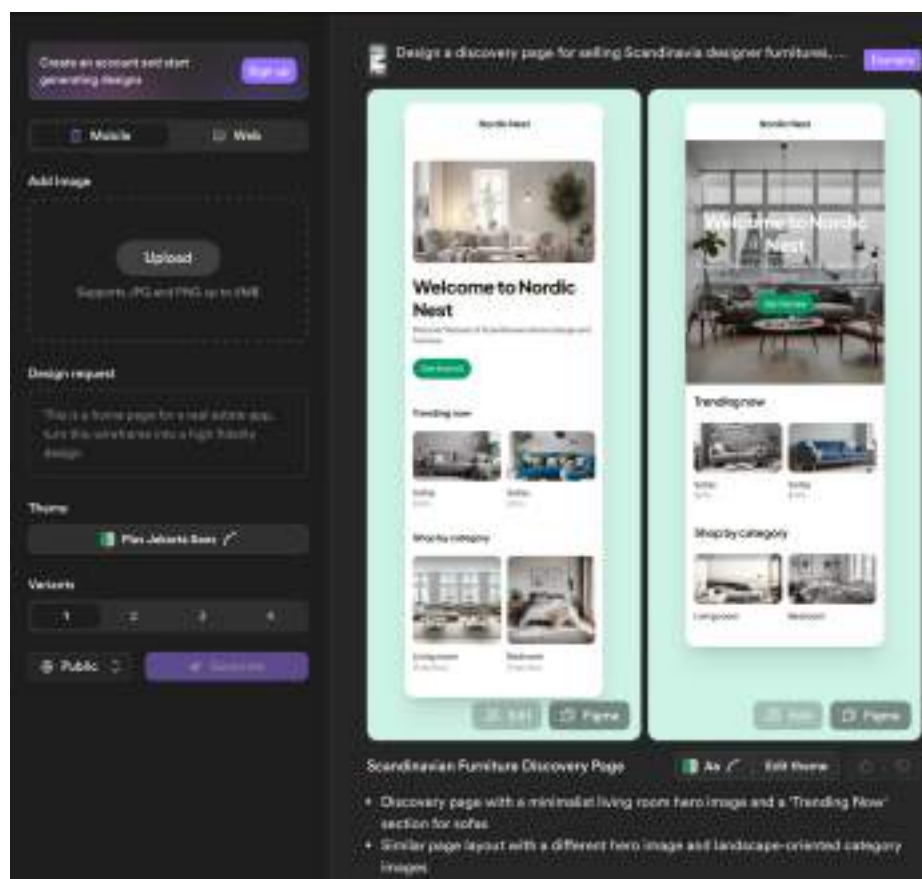

Image-to-UI

1. Choose either **Mobile** or **Web** depending on your project.

2. Upload an image (*supports JPG and PNG up to 5MB*).

3. Give a request (=prompt).

Example: *This is a homepage for a real estate app, turn this wireframe into a high fidelity design.*

4. Select a theme (*colors and font*).

5. Choose the number of variants you want to generate (1-4).

6. Make your design **Public** or **Private**.

7. And click **Generate**.

The best part? 😊

You can start for FREE!

Each user gets **150 free credits** and can export up to **3 designs to Figma**. With 150 credits, you can generate up to 15 designs.

The Standard plan is \$19 per month, offering 1,200 credits/month, allowing you to generate up to 120 screens. **The Pro plan is \$39 per month**, offering 3,000 credits/month, allowing you to generate up to 300 screens.

Ready to generate designs at lightning speed?
Galileo generates beautiful and functional interface designs tailored to your needs.
Find a plan that's right for you.

Standard	Pro	Enterprise
\$19 / month	\$39 / month Recommended	Contact us
For personal projects, offering extensive commercial use	For professionals who want to keep their designs private	For organisations and teams that need a custom and secure solution
Get started	Get started	Contact
✓ 1200 credits / month → 60 design generations and edits ✓ General Commercial Terms ✓ Mobile UI generation ✓ Web UI generation ✓ Unlimited Figma exports	✓ Private mode Generations stay private and are only visible to you ✓ 3000 credits / month → 300 design generations and edits ✓ General Commercial Terms ✓ Mobile UI generation ✓ Web UI generation ✓ Unlimited Figma exports	✓ Unlimited generations + everything else from Pro ✓ Fastest possible generation speed ✓ Advanced data privacy and private mode ✓ Priority support

💡 Other alternatives to Galileo AI are **Uizard** and **Khroma**.

CHAPTER 4

Get Professional Texts Without Hiring Writers

1. Simplify your writing

- **AI Tool:** Hypotenuse
- **Category:** AI writing
- **What it helps you with:**
write SEO texts and
branded texts
- **Link to website:**
[https://www.hypotenuse.a
i](https://www.hypotenuse.ai)

In the fast-paced world of online content, it's important to keep your audience interested and engaged, which can be quite challenging sometimes.

[Hypotenuse](#), an AI tool designed to simplify writing and content creation, provides a solution to this challenge.

As you explore Hypotenuse's features, you'll see how *Content Detective* makes research easier, *Hypo Doc* simplifies the analysis of long documents, and the *AI Image Generator* sparks your creativity.

But there's more and I'll guide you through each of its features, so you can make the most of [Hypotenuse](#) and take your content creation to the next level.

After all, in this dynamic digital world, staying ahead is not just an option; it's the key to success!

Let's have a closer look inside all the functionalities of this amazing content creation tool! 🚀

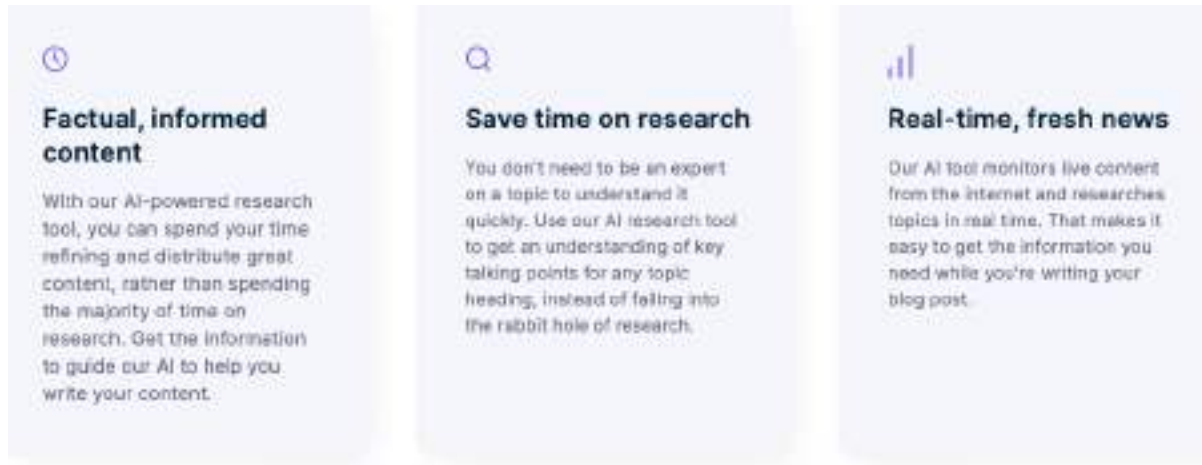

- **CONTENT DETECTIVE**

Content Detective conducts real-time internet research on your behalf. It provides key insights and sources, allowing you to create an initial working draft based on the gathered information, significantly reducing research time.

How to use it:

- Step 1: Provide a topic or keyword.
- Step 2: Hypotenuse analyses the web and extracts key talking points and reliable sources.
- Step 3: Use these insights to kickstart your content creation process.

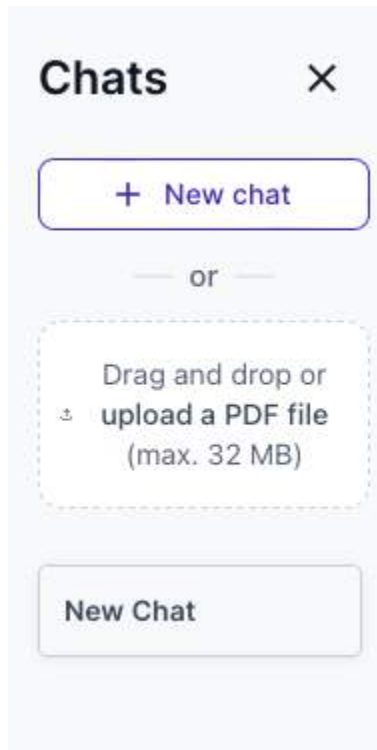

- **HYPO DOC**

Upload a PDF, and AI will provide answers and information based on the document's content.

How to use it:

- Step 1: Upload your PDF.
- Step 2: Ask Hypotenuse anything about it, from generating a LinkedIn post to extracting key insights.
- Step 3: Hypotenuse instantly provides insights based on your queries.

- **AI IMAGE GENERATOR**

Describe the image you need, and the AI generates a customised image to meet your specific requirements, saving time typically spent searching for suitable images. However, it may require a good prompt and some testing to get the desired image.

How to use it:

- Step 1: Describe the context for your image.
- Step 2: Choose a *Type, Aesthetic, Mood and lighting, Artist or style*, and an *Aspect ratio & Size*
- Step 3: Hypotenuse generates stunning, unique images tailored to your requirements.

• AI BATCH GENERATOR

The bulk content generator provided by Hypotenuse AI enables users to easily create high-quality, SEO-optimised content in large quantities, from product descriptions to Instagram captions. It supports importing data via CSV or Shopify.

How to use it:

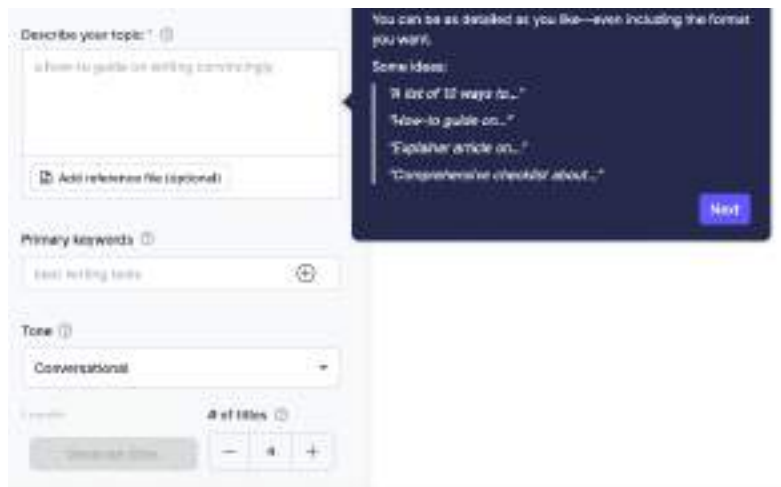

- Step 1: Import your data via CSV or Shopify.
- Step 2: Choose the language and tone for your content.
- Step 3: Hypotenuse generates high-quality content in bulk, optimised for SEO.

• AI ARTICLE & BLOG WRITER

It guides you through the process of writing, starting with creating a title, developing a thorough outline, and ultimately producing a full article.

How to use it:

- Step 1: Describe your topic and add SEO keywords.
- Step 2: Hypotenuse generates catchy article titles and detailed outlines.
- Step 3: Create content drafts and edit them.

• AI PRODUCT DESCRIPTION GENERATOR

You can upload product images and add attributes or an original description, and the AI generates new and unique copy.

How to use it:

- Step 1: Upload product images and attributes.
- Step 2: Hypotenuse generates SEO-friendly product descriptions.
- Step 3: Edit and organise the content.

The screenshot shows a web interface for generating product descriptions. On the left, there is a button labeled 'Upload image' with a cloud icon and the text '(Optional)' with a help icon. To the right of this is a form with several fields: 'Product title' with a red asterisk, a text input field, 'Brand' with a text input field, 'Product features' with a red asterisk and a help icon, a text input field containing 'For summer', '100% acry', and an 'Add' button. Below this is a link for 'Advanced options' with an upward arrow. At the bottom is 'SEO Keywords' with a help icon, a text input field, and an 'Add' button. To the right of the form are two buttons: a blue 'Generate' button and a grey 'Mark as Done' button.

- **SLOGAN GENERATOR**

The slogan generator helps create unique and attention-grabbing headlines and slogans tailored to your business and target audience.

How to use it:

- Step 1: Describe your product or service and add keywords.
- Step 2: Hypotenuse suggests engaging slogans and taglines.
- Step 3: Choose the one that resonates with your brand.

The Slogan Generator interface features a title 'Slogan Generator' in bold black text, followed by the instruction 'Add details below to generate a slogan with AI.' Below this are two text input fields: 'Name or type of product' and 'Primary keywords'. A blue button labeled 'Generate slogans' is positioned at the bottom of the form.

- **INSTAGRAM CAPTION GENERATOR**

Easily create engaging captions for your social media posts, just by providing brand and audience details for context.

How to use it:

- Step 1: Add brand and audience details.
- Step 2: Hypotenuse generates catchy Instagram captions.
- Step 3: Choose your favourite or edit them for a personalised touch.

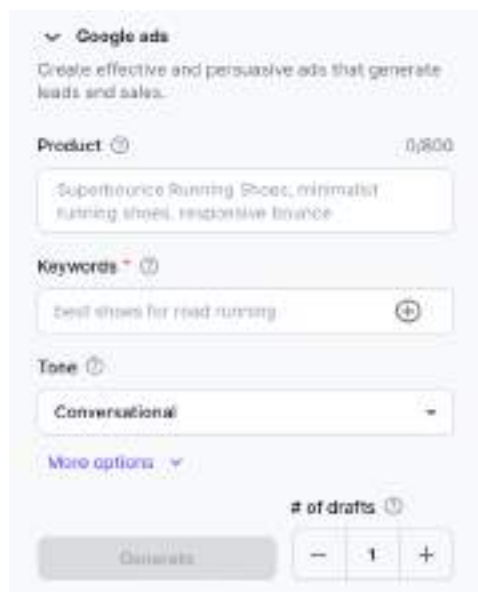

The Instagram captions generator interface is titled 'Instagram captions' with a sub-instruction: 'Write scroll-stopping captions that encourages people to stop, look, and like.' It includes several input fields: 'What is your post about?' (0/500) with the example 'foxy floral blue maxi dress'; 'Keywords *' (0/100) with the example 'Luxco specializes in airy, wedding-ready'; 'Tone' (0/100) with a dropdown menu set to 'Conversational'; 'Target audience' (0/200) with the example 'spring wedding guests'; and 'Brand' (0/200) which is currently empty. A 'More options' link is also visible.

• GOOGLE ADS & FACEBOOK ADS GENERATOR

Describe the topic and desired keywords, and the AI generates compelling ad copy.

How to use it:

- Step 1: Describe your topic and keywords.
- Step 2: Hypotenuse generates ad headlines and descriptions.
- Step 3: Choose the variations that suit your campaign goals.

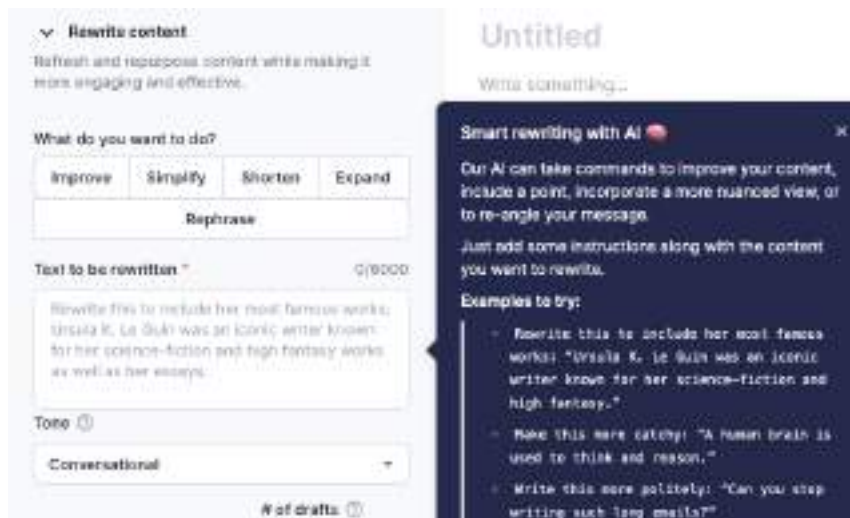

The screenshot shows a web interface for a Google Ads generator. At the top, it says "Google ads" with a dropdown arrow and a description: "Create effective and persuasive ads that generate leads and sales." Below this are three input fields: "Product" with a value of "Supertorque Running Shoes, minimalist running shoes, responsive bounce", "Keywords" with a value of "best shoes for road running", and "Tone" with a value of "Conversational". There is a "More options" link with a dropdown arrow. At the bottom, there is a "Generate" button and a "# of drafts" section with a minus, 1, and plus button.

• AI PARAPHRASING TOOL

Is your content a little too formal or rigid? Give it a more casual, friendly tone using this rephrasing AI tool.

How to use it:

- Step 1: Paste your content.
- Step 2: Choose a tone for rewriting.
- Step 3: Hypotenuse rephrases content to enhance its clarity.

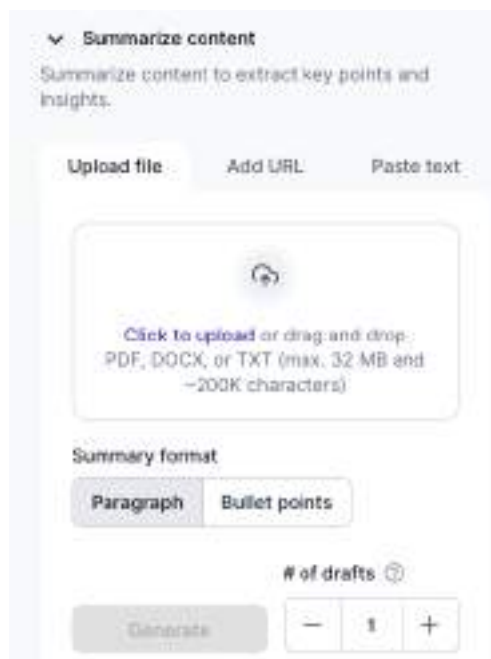

- **AI SUMMARISING TOOL**

You can create summaries for paragraphs, articles, documents, and even videos. You have the choice to make your summary in either a paragraph or bullet point format.

How to use it:

- Step 1: Add your content.
- Step 2: Choose between paragraph or bullet-point summaries.
- Step 3: Hypotenuse generates concise summaries.

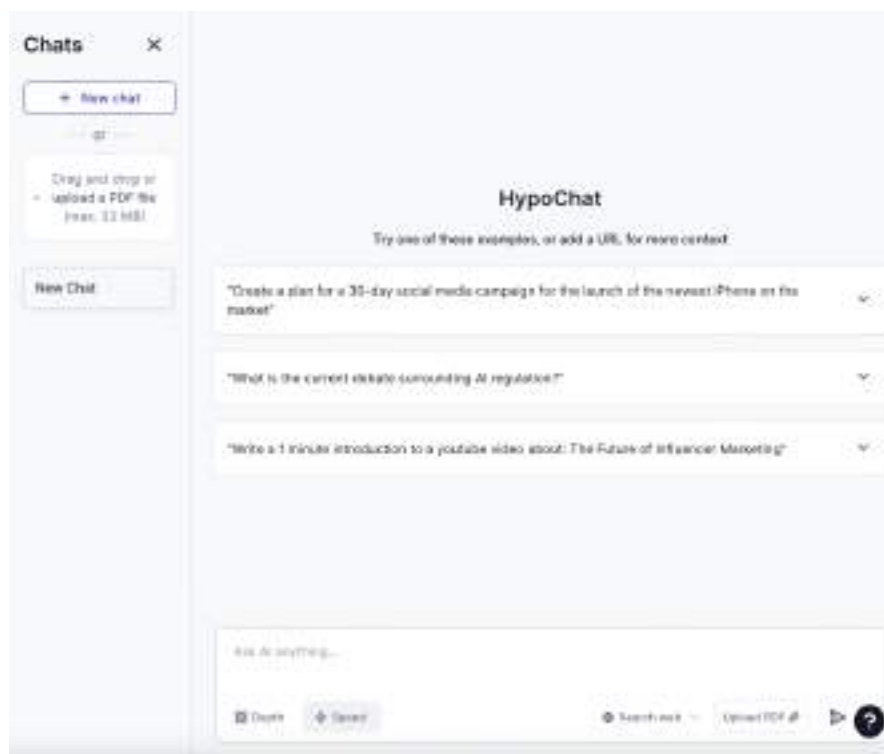

- **HYPOCHAT**

HypoChat is designed to assist in generating business copy and fact-based content from various sources, such as links, documents, or the internet.

How to use it:

- Step 1: *Ask AI anything...*
- Step 2: Extract information from the web, summarise documents, and generate content with ease.

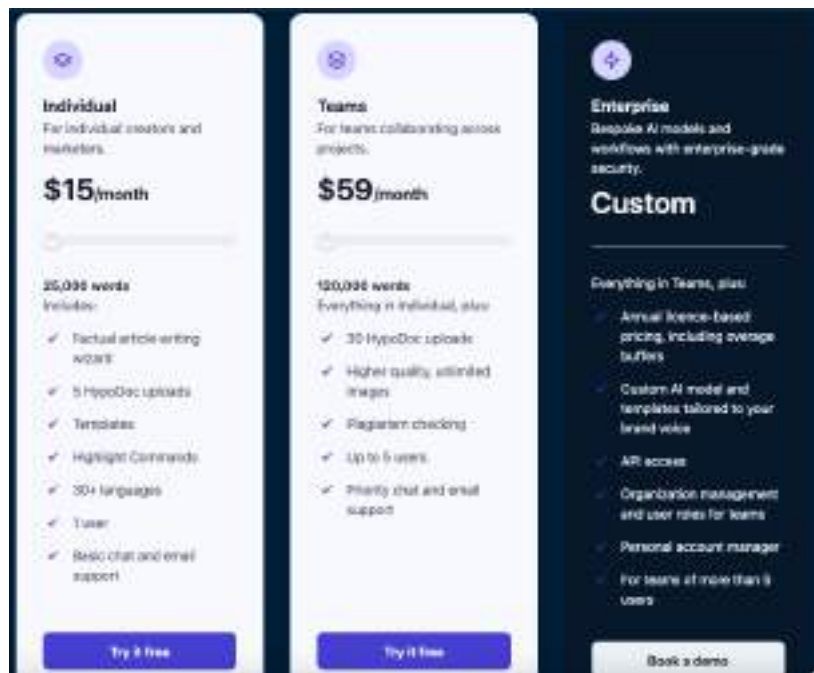

And here's the best part!

It seamlessly integrates with Shopify, APIs, and WordPress.

💰 Ok, but what's the price?

The cool thing is that you can try it for free. This trial lets you explore its features to make sure it suits your needs before committing. It's a great way to experience firsthand how it can improve your workflow.

Whether you're a content writer, marketer, or business owner, [Hypotenuse](#) can clearly help you to get an easier experience creating content, improving your SEO, and boosting your online presence.

2. 100 writing tools into one! 🏆

- **AI Tool:** HyperWrite
- **Category:** AI writing
- **What it helps you with:** write and edit your texts, get more ideas, perfect your writing
- **Link to website:** <https://www.hyperwriteai.com/>

In this section: improve your writing and create high-quality content in seconds!

From catchy headlines to persuasive emails, this AI tool called [HyperWrite](https://www.hyperwriteai.com/) empowers you to work efficiently and make the most of your time.

This AI tool helps you with:

-  Writing
-  Communication
-  Research

I. AI Tools inside the AI tool

[HyperWrite](https://www.hyperwriteai.com/) has over **100 AI tools** available to simplify your workflow, such as:

Flexible AutoWrite: Assists in creating engaging content.

Rewrite Content: Rephrases and improves existing content.

AI Speech Writer: Crafts persuasive speeches based on an outline or description.

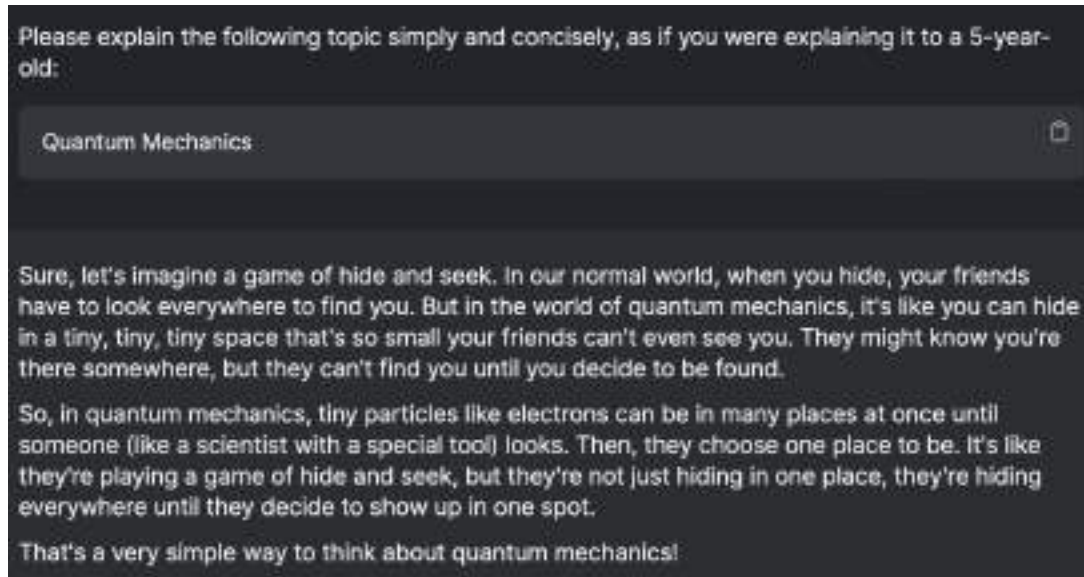

Summarizer: Highlights the main points and key information.

Email Responder: Generates professional replies.

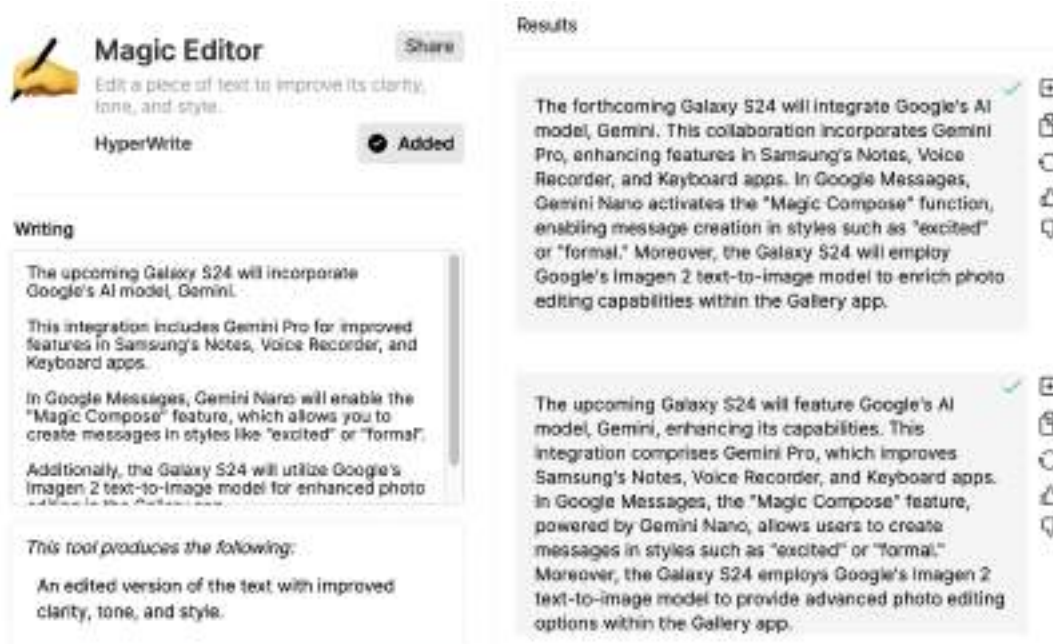

AI Writer: Creates content on any topic and in any format.

Explain Like I'm 5: Breaks down complicated concepts using relatable examples and simple language.

Magic Editor: Improves the clarity, tone and style of your content.

Ask AI: Provides questions to any questions you may have.

Multilingual Email Responder: Generates emails in any language.

Grammar Help: Provides answers to grammar questions.

Job Elevator Pitch: Crafts a compelling elevator pitch for job interviews.

Social Media Ad Copy: Generates compelling social media ad copy for your product.

Tweet Generator: Creates tweet ideas based on a given topic.

TikTok Script Writer: Writes engaging scripts for TikTok.

So yeah, there's quite a lot in there!

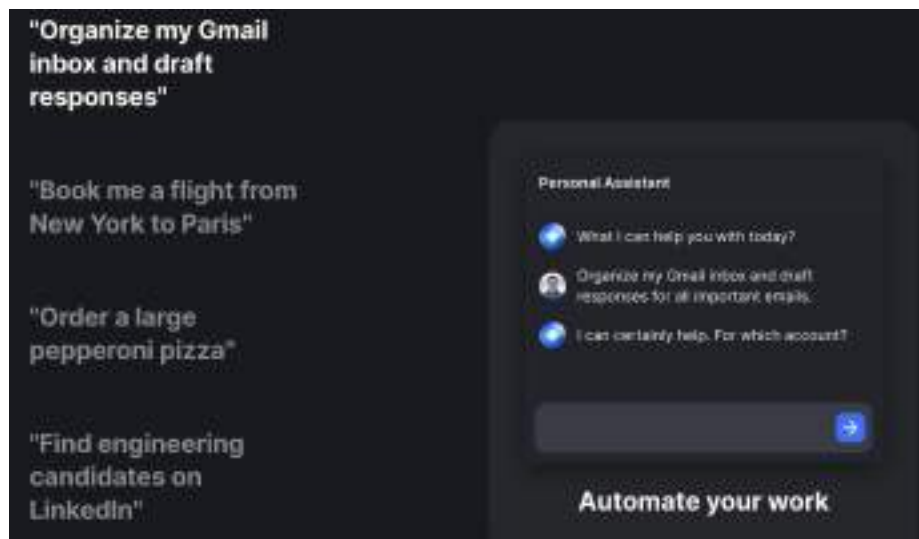

📁 Other features:

- Write like Shakespeare
- Pokemon Fanfiction Generator
- Anniversary Card Maker
- Movie Recommender
- Grocery List Writer

II. Assistant

With HyperWrite Assistant you can automate many parts of your work! 🤖

Their Assistant is a simple **Chrome extension** that uses AI to perform tasks on your behalf, from booking a flight to email management and even ordering food.

Currently handling simple tasks, it's in the early stages of development and may struggle with complex requests.

III. Create New Tool

And here comes the most exciting part: you can even create your own AI tool! 🤖

Similar to creating your own GPT with ChatGPT, you need to provide a name, description and instructions.

For instance, I created an SEO assistant, an expert in writing LinkedIn posts, website copy, email messages, research reports, social media content and marketing content.

The screenshot shows a dark-themed interface for creating a custom GPT. The title 'Overview' is at the top. Below it are four sections: 'Name' with the value 'SearchSmart Bot', 'Description' with the text 'In-depth SEO assistant using comprehensive keyword analysis for time-efficient optimization.', 'Category' with a dropdown menu showing 'Marketing', and 'Instructions' with a text area containing the prompt: 'You're an SEO expert and are able to optimize your copy to rank at the top of google searches and on social media sites. Your areas of extensive expertise are writing LinkedIn posts, website copy, email messages, research reports, social media content, and marketing content.'

Currently in Beta, this feature is still being tested and improved before its final release.

 **You can try it for free!** Start for **FREE** and enjoy monthly credits.

For more complex tasks, you can choose from their **Premium** or **Ultra** subscriptions.

Starter	Premium	Ultra
Free Try it for free	\$19.99/mo Ideal starter plan	\$44.99/mo For professionals and power users
Join for free	Get Premium	Get Ultra
✓ Limited Assistant Credits Create a free account and start exploring with limited monthly credits.	✓ 200 Assistant Credits / Month Each assistant credit is equal to 1 assistant chat message or 10 browser actions. Assistant conversations and workflows use multiple credits. ✓ Unlimited TypeAheads Get personalized writing suggestions as you type with the Hypertime Chrome Extension.	✓ \$60 Assistant Credits / Month Each assistant credit is equal to 1 assistant chat message or 10 browser actions. Assistant conversations and workflows use multiple credits. ✓ Everything in Premium ✓ Priority Support Our team is here to help you out and your messages will be prioritized.

3. Improve your writing process 🚀

- **AI Tool:** Natural Readers
- **Category:** text to speech
- **What it helps you with:** editing your content
- **Link to website:** <https://www.naturalreaders.com>

Feeling tired of your usual writing process? 🤔

How about trying something new and more effective?

Imagine this:

You begin your creative journey the old-fashioned way, writing down your ideas or by drawing inspiration from ChatGPT.

You have the first draft ready...

But here's the twist: The real magic happens during editing!

With [Natural Readers](https://www.naturalreaders.com), you can make your editing process smoother. No more staring at the screen for hours, analysing every word.

You can simply copy and paste your text onto their website, and it turns your words into a voice that sounds remarkably like a real person, with various voices to choose from.

Why does it work so well?

Because it lets you focus entirely on perfecting your writing!

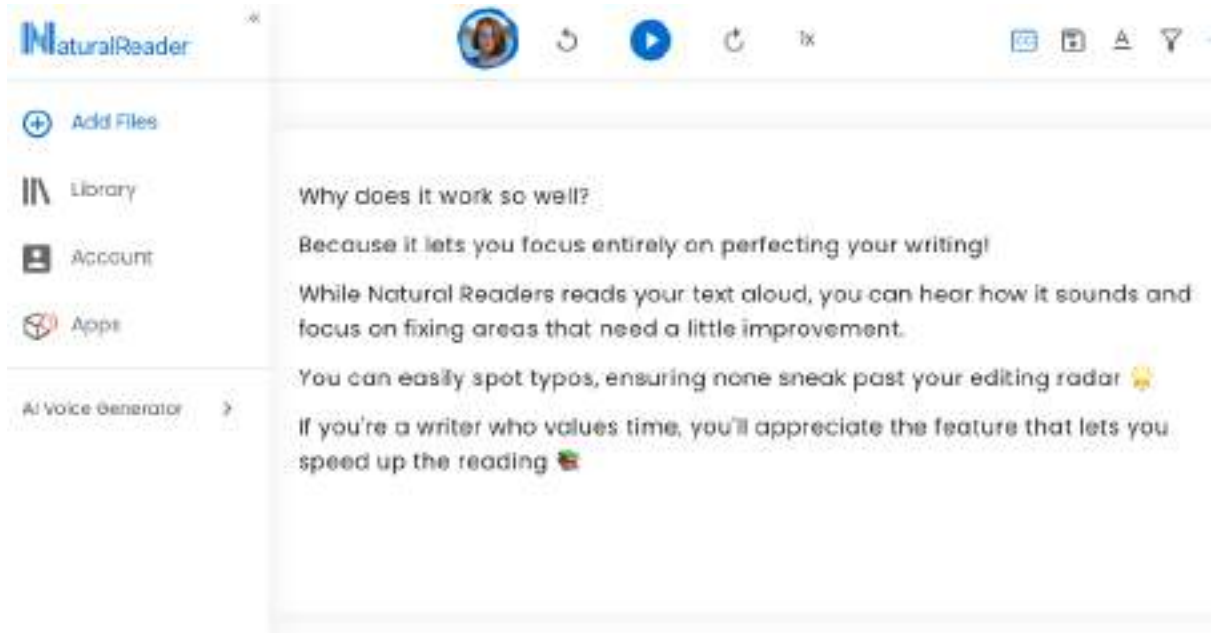

While Natural Readers reads your text aloud, you can hear how it sounds and focus on fixing areas that need a little improvement.

- You can easily spot typos, ensuring none sneak past your editing radar ☀️
- If you're a writer who values time, you'll appreciate the feature that lets you speed up the reading 📖
- You can also take a screenshot of your text, and NaturalReaders will automatically generate the audio.

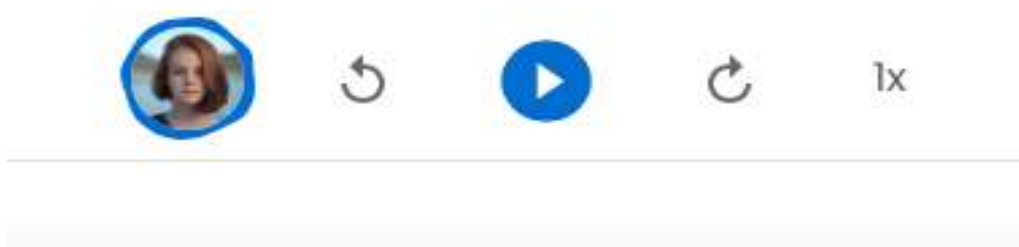

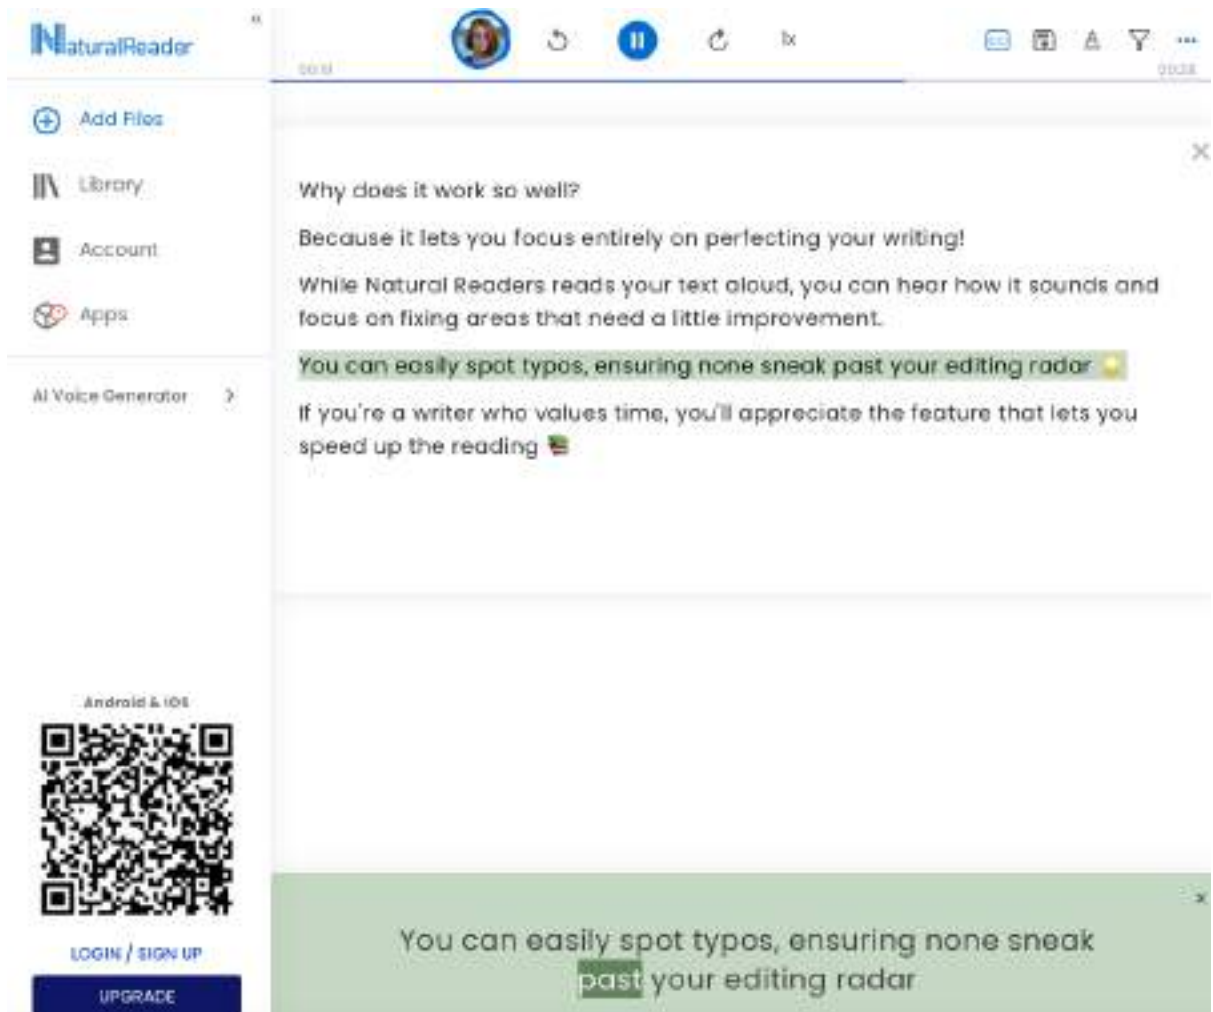

Here are the steps:

1. Copy Text: First, copy the text you want to read.

2. Play Button: Next, click the "Play" button in the NaturalReader window. This will start reading the text aloud. You can also use this button to pause and resume reading.

3. Download Audio: Finally, if you wish to save the audio, you can download it (in order to use this feature, you'll have to upgrade to Plus).

The best part?

People who use the free version can listen to Premium Voices for up to 20 minutes a day and Plus Voices for up to 5 minutes a day.

You can upgrade for access to premium voices or stick with the free plan.

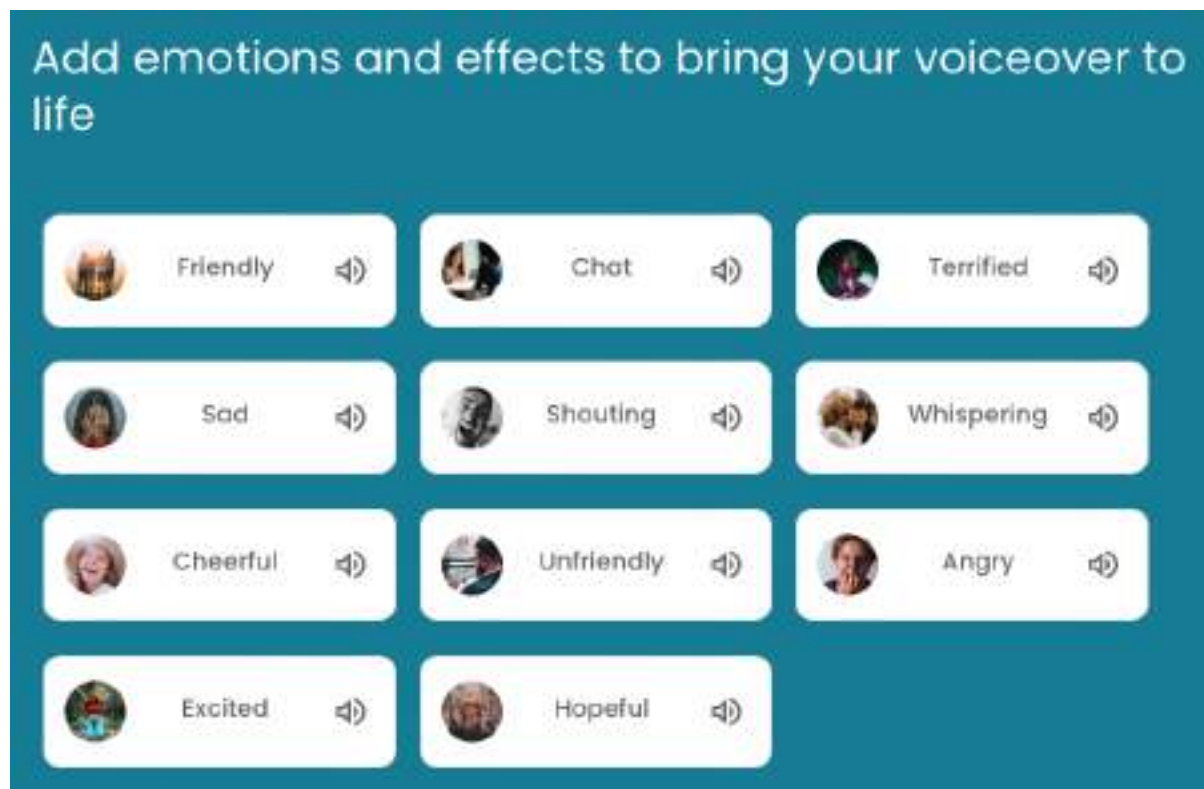

But what if you want to use it to create videos instead?

In case you want to use NaturalReaders **for commercial use**, such as YouTube videos or e-learning, you have to sign up for their AI Voice Generator, an application designed to provide voiceover audio with a commercial licence:

☀️ They have a **Pronunciation Editor** - this feature lets you change how certain words are pronounced.

🚀 With their **Advanced Tune** feature, you can adjust the pitch and volume of words.

🗣️ Additionally, they provide a range of **voice styles**, from sad to cheerful, excited, or angry.

I hope this introduction to [Natural Readers](#) has sparked your curiosity for a more efficient editing experience.

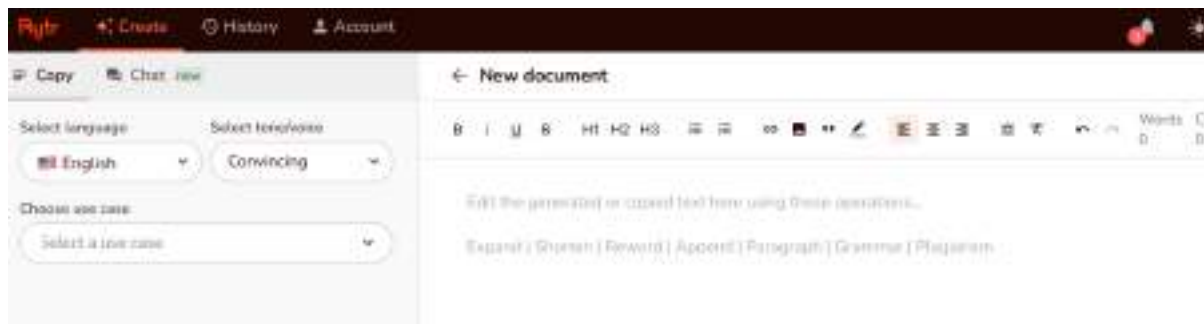

Happy writing and editing!

4. How to save time on your content 🖋️

- **AI Tool:** Rytr
- **Category:** text generation
- **What it helps you with:** writing content and copy
- **Link to website:** <https://rytr.me>

[Rytr](https://rytr.me) is a great AI tool for copywriters, marketers, bloggers, and businesses seeking to simplify content creation.

Whether you're drafting emails, brainstorming blog ideas, or crafting social media ads, this AI tool can be super helpful.

Let's see how it works.

[Rytr](https://rytr.me) looks a lot like Google Docs. To begin, create a new document and then select the AI features you want to use from the menu on the left.

🔧 Here's how it works:

1. Select language 🌐

You can choose from over 30 languages.

2. Tone of voice 🎵

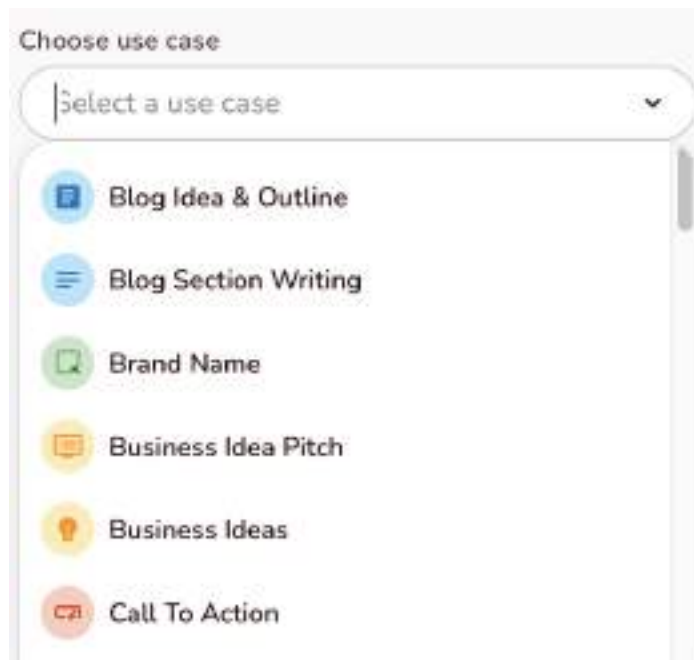

Select from 20+ tones to determine the voice of your content.

3. Use case

Pick your content type from the dropdown list. They support 40+ use cases.

4. Add input 📝

Include keywords, phrases or titles.

5. Generate variations ✨

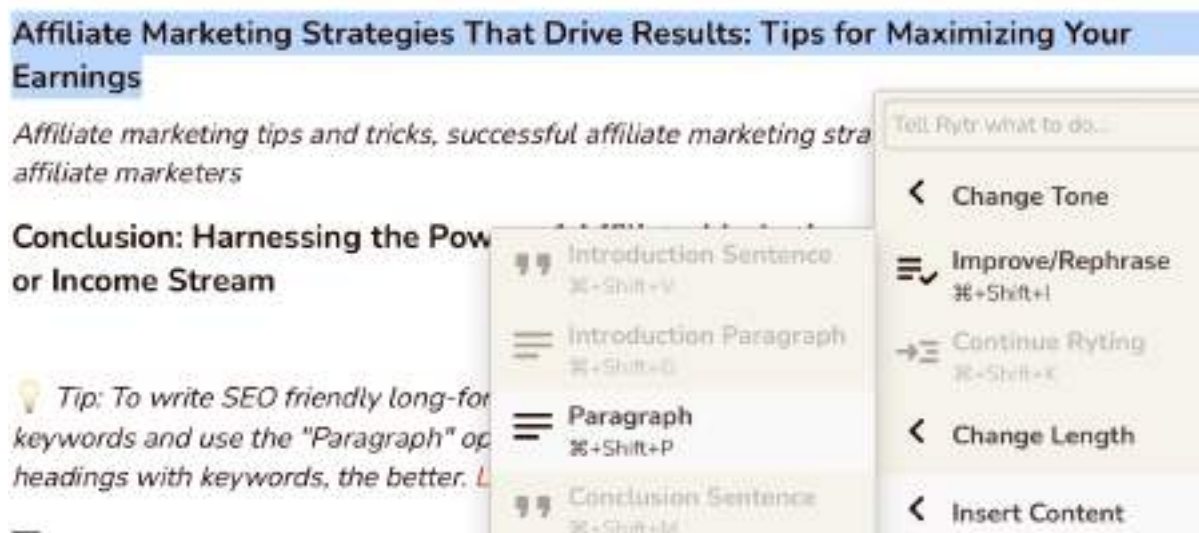

Choose how many variations you want Ryte to generate (1-3) and select the creativity level (e.g., optimal / none / medium / high).

6. Ryte for me 🖱️

Keep generating variations until you achieve the desired outcome.

Let's say you want to generate a **Blog Idea & Outline** on the topic "What is affiliate marketing?". In that case, you would choose the "informative" tone and set the creativity to "optimal".

After generating the content, you have options like "Change Tone", "Improve/Rephrase", "Change Length", or "Insert Content" for further adjustments.

🔍 If you wish to insert new content and add a paragraph, simply select the text.

Here's an example:

Affiliate Marketing Strategies That Drive Results: Tips for Maximizing Your Earnings

Affiliate marketing is a powerful strategy for driving revenue and maximizing earnings. By partnering with brands and promoting their products or services, affiliates can earn commissions based on the sales or leads they generate. To succeed in affiliate marketing, it's essential to implement effective strategies that drive results. Here are some tips for maximizing your earnings through affiliate marketing:

1. **Choose the Right Products:** Select products or services that align with your niche and target audience. Promoting relevant and high-quality products will enhance your credibility and increase the likelihood of conversions.
2. **Create Valuable Content:** Develop engaging content that educates, entertains, or inspires your audience. Whether it's blog posts, videos, social media posts, or email newsletters, compelling content can drive traffic to your affiliate links and boost conversions.
3. **Build Trust with Your Audience:** Establish trust with your audience by being transparent about your affiliate partnerships. Disclose when you are promoting affiliate products and only recommend items that you genuinely believe in.
4. **Optimize Your Affiliate Links:** Make sure your affiliate links are strategically placed within your content to maximize visibility and click-through rates. Consider using call-to-action buttons, banners, or text links to encourage clicks.
5. **Track and Analyze Performance:** Monitor the performance of your affiliate campaigns using tracking tools and analytics data. Identify what strategies are working well and optimize those that are underperforming to maximize your earnings.

By implementing these affiliate marketing strategies effectively, you can drive results and increase your earnings as an affiliate marketer.

Affiliate marketing tips and tricks, successful affiliate marketing strategies, top strategies for affiliate marketers

You can edit and refine the text as needed, such as adding a conclusion sentence, shortening or improving sentences, etc.

Here's what you can do with Rytr:

- **Correct basic grammar mistakes:** This option will fix any grammar errors.
- **Rephrase:** If you're interested in the information but not the way it's presented, this option will rephrase it.

- 
- **Write a paragraph:** This will generate content based on the selected text.
 - **Expand:** This will provide further details on a snippet of content you like.
 - **Shorten:** Opposite of "Expand", this option is ideal for summarising blog ideas or any generated content.
 - **Append:** Useful for academic writing purposes.
 - **Check for plagiarism:** If you're not sure about Rytr's output, you can verify it for plagiarism at any time.

In a nutshell 🥜, **Rytr:**

- ✓ Covers over 40 different use cases, including blog writing, social media advertising, and crafting SEO meta titles;
- ✓ Can write in more than 30 languages;
- ✓ Offers over 20 tones;
- ✓ Includes a built-in feature to check for plagiarism;
- ✓ Can handle SEO tasks;
- ✓ Offers a browser extension for seamless content creation across various online platforms.

💰 **As for pricing:**

You can use [Rytr](#) for FREE, as long as you don't exceed the character limit. If you do, you'll either need to wait until the next month or upgrade to a paid plan.

The character limit for the free version is quite small (10k characters per month), essentially serving as a free trial.

For \$7.5 per month, you can copy unlimited content each month and create one personalised tone of voice.

[Rytr](#) is one of the most affordable AI writing tools available. Therefore, if you're on a tight budget, this tool can be an ideal choice.

5. The best AI tools for readers 📖

- **AI Tool:** multiple
- **Category:** content summarisation
- **What it helps you with:** get book summaries and insights

As entrepreneurs, marketers and service providers, investing in ourselves is always on the top of our list, right?

And what does everyone mention in these cases?
Courses... Mentors... *Books*

Yes, books. That's what we are talking about today.

Because as much as we like reading them, time is still a scarce resource. ⌚

But, what if we could 'download' books into our minds in just minutes?
No, you don't have to wire your brain to a new tool as if it was an episode of Black Mirror!

Yet, with AI we can cut down a big chunk of the time it takes to read a book (and re-read, when we like it).

We can even get summaries so that we can decide if we want to read the whole book or not.

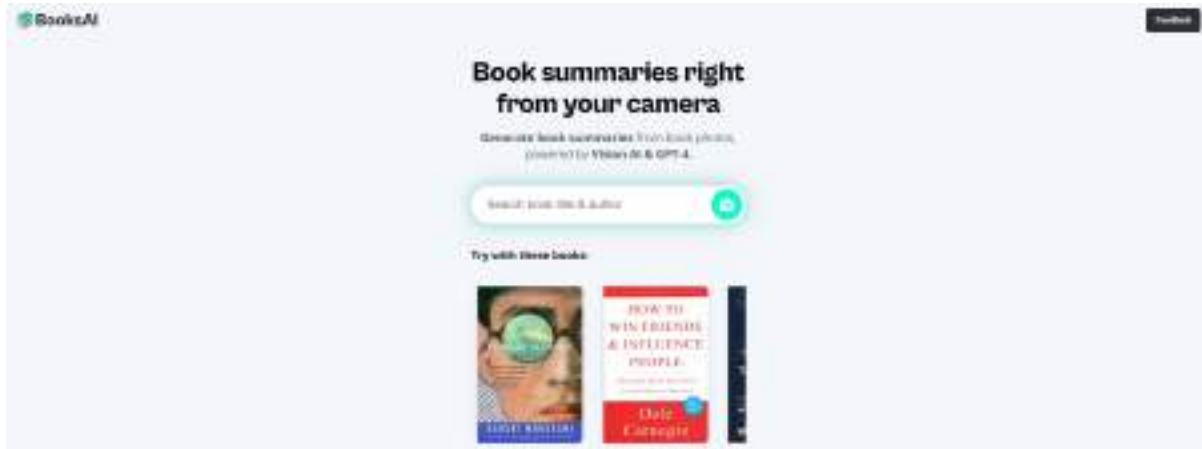

So let's break down 5 ways you can get the knowledge from all the books you want in just minutes with AI 📚

1. Get the book summary just with a photo 📷

You get in the book store, you see a book you have never heard of, but with an interesting title.

Maybe in that case you want to make sure that book is worth your money and can be helpful for your specific needs.

You can use a tool called [BooksAI](#).

You would just have to take a photo and upload it.

Then you can choose if you want to receive a quick summary or a full synopsis. Up to you.

This platform is totally free to use at the moment.

2. Turn a book into easily digestible content 📄

You don't have time to read a whole book, and prefer a 15-minute video or audio instead?

Or maybe a short text that you can read with your morning coffee?

Then [Readshark](#) is what you need.

CEOs, founders, leaders, and sales professionals use this tool to *take the best-selling business and personal development books, and summarise the big ideas into 15 minute videos you can watch with your team, audio you can listen to on the go, and text that you can read while you drink your morning coffee.* (readshark.com)

You can try it for free, before paying for the subscription.

This could be very useful when you haven't read a specific book yet, but also when you have already read it.

But the best thing is that when you grow thanks to a book, you can easily share it with others, and they grow too.

3. Learn about the book content 10x faster

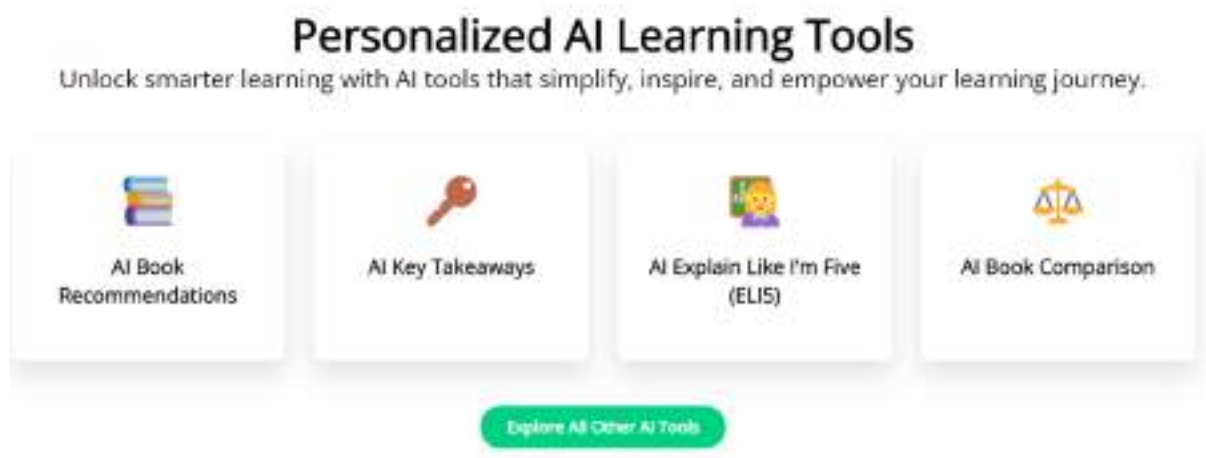

Here are 3 things you can do to learn about the content of a book faster:

1. Ask questions and get answers about a book
2. Get complicated concepts explained like you were a 5 year-old
3. Compare books between each other

Lucky for us, [Learnsmarter.ai](https://learnsmarter.ai) does all these 3 things together.

And you just have to sign up for free to use it!

4. Keep your takeaways in a table July 17

Let's say you have just finished reading an incredible business book, but you don't like taking notes because you don't want to feel like it's high-school again.

It would be very useful to create a slick table with **all takeaways for your specific needs**.

Here is how you can do it:

1. Give this prompt to ChatGPT:

I need your help to break down the key takeaways from the book "[book title]" by [author] and how I can implement those same takeaways to my specific situation.

Here is my situation: [explain what is your problem and what you are struggling with, and what help you need from the book]

Follow these instructions:

- 1. Please present all the key lessons from the book as they apply to my situation in a table format.*
- 2. Please use the following columns:*
 - 1) Key takeaway*
 - 2) Brief Explanation*
 - 3) Where I can find the takeaway in the book*
 - 4) Strategy I need to apply (tailored to my situation)*

5) List of action steps

Thank you!

2. Copy and paste the table into the first cell of a Google Spreadsheet or Excel file (whatever you feel more comfortable with)
3. Adjust the cells to make the file as beautiful as you want (size of the cells, colour, font, etc.)
4. Turn the cell into a PDF file (save it as a PDF format), if you want.

Et voilà! You have a slick table with all the best takeaways, strategies, and action steps from your book.

You can keep it for the future, share it with other people with your same goal, and do whatever you want with it.

5. Find your next book to study with AI

Having fun reading books this way? Then why don't you find the next books to read and enjoy with AI?

You can get *personalised* recommendations with [BooksAbout](#) and [Next Three Books](#).

CHAPTER 5

Get AI to Manage Your Social Media Accounts

1. No time to work on a Youtube Channel? Do this 🎥

- **AI Tool:** multiple
- **Category:** YouTube content creation
- **What it helps you with:** build a successful YouTube channel with less effort

As you probably have already heard, a YouTube channel is a great way to drive free traffic to your offers.

Yet, as an entrepreneur it's difficult to find the time to do it properly.

If you want to leverage YouTube more often and create a new video in 1/10 of the time with AI, then this section is for you.

I am about to give you a **simple and fast step-by-step process** that goes from the very beginning (finding the video idea) to preparing for the next video.

I'll give you all the prompts and tools you need.

On top of that, most of this process will be free of charge!

STEP 1 - IDENTIFY THE TOPIC OF THE VIDEO 📄

First of all, let's find the right topic. How? We analyse what the audience of our competitors say, so that we find out what they want.

We do this in two steps.

First, we use an AI tool called [Export Comments](#). You simply need to copy and paste the link of your competitor's YouTube video and it generates an Excel spreadsheet with the list of the comments.

We do this because under YouTube videos people give opinions, ask for more content, share what they loved most about the video. Hence, it's a great resource.

Then we go to ChatGPT and write this prompt:

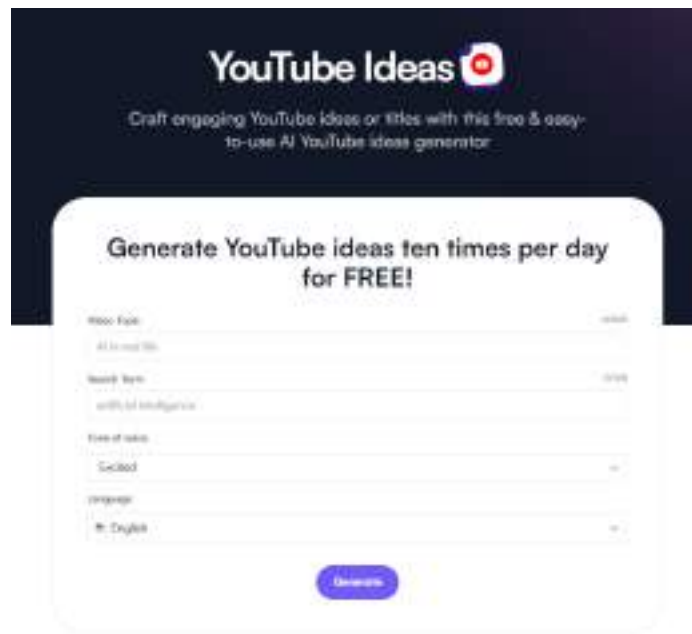

I have a list of comments and reviews. I want you to analyse this list and create a new list with sentences, phrases and topics that people repeat over and over in their comments. List them from most common to not common.

For this step, choose competitor's videos with 100-500 comments, so that it's not too hard for ChatGPT to process the list. Repeat this process with 5-10 videos and you'll have a clear idea of the topics you can talk about. Then make your choice.

STEP 2 - TURN THE TOPIC INTO AN IDEA 💡

Have you chosen your topic? Great! Now we can turn it into a clear video idea. We do this through [the free AI YouTube video idea generator by Writesonic](#).

All you have to do is enter your topic, a search term, tone of voice and language.

STEP 3 - WRITE THE VIDEO SCRIPT

With the topic and video idea in place, it's time to create the video script. And for this we'll use our friend ChatGPT.

Here is a prompt you can use:

Act like an expert YouTube content creator with long experience in [insert your niche] videos.

I want to write a YouTube video script about [topic] to [goal].

Write an engaging and high-converting video script.

Make sure you mention [concepts].

Don't mention [concepts].

The call to action is [your call to action].

Then, as always, you can give it more prompts to increase the quality of the output. Some prompt examples are:

Make it shorter

Make it more engaging

Make it catchier

Make it longer

Rewrite the transition and make it clearer

Once you have a good output, you do the final edits, and you have your YouTube video script.

You just have to shoot your video now (yes, you can deepfake your way out of it... it's up to you, but if you want to connect with your audience my suggestion is to keep this part 'human').

STEP 4 - WRITE A SEO-FRIENDLY TITLE AND DESCRIPTION 🔍

Once you have a draft of your video script, it's time to write a SEO-friendly YouTube title and description.

There are very useful tools you can try for this, like [AISEO YouTube Title Generator](#), but since our aim is to cut the time required, we'll rely on ChatGPT once again.

Keep working in the same chat you used for the video script, and use this prompt:

Now I want to write an effective YouTube title and description for my video. Make sure they are SEO-friendly.

Now you have your video, with title and description.

Before posting it, make sure you do it in the best time for your audience. If you don't know how to do it, ask ChatGPT for instructions:

Give me a step-by-step process to find when is the best time to post my new YouTube video

STEP 5 - EXTRACT COMMENTS TO GET IDEAS FOR THE NEXT VIDEOS ↺

Let's say you repeat this process 10 times. Now you have ten videos, which means you will have a certain amount of comments.

You can use the same AI tool we used before ([Export Comments](#)) to create a spreadsheet with all the topics people talk about under your videos.

This way you have incredible data about your audience and you have free ideas for your next videos. 📊

But wait, there's more!

What if you have a YouTube channel and you're struggling with low traffic and views despite posting content daily, it can be discouraging.

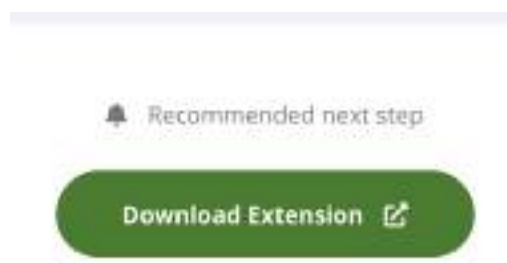

Low growth often leads to a lack of motivation and enthusiasm for creating videos, causing many creators to give up on YouTube early on.

Here's how [TubeBuddy](#) can help you turn things around.

[TubeBuddy](#) can support you with SEO ranking, channel optimisation, data analytics, and also offers AI features such as **Thumbnail Generator** and **YouTube Title Analyzer**.

How to get started:

1. Install [TubeBuddy's browser extension](#).

2. Sign in with your YouTube account.
3. TubeBuddy will then connect to your YouTube channel dashboard.

Now, let's dive into its features!

1. SEO and Ranking

- Easily track your video rankings;
- Optimise your videos' tags, descriptions and titles to increase visibility in search results;
- Discover and analyse keyword ideas;
- Organise your YouTube tags in one place with Tag Management;
- Boost your Click-Through Rate (CTR) with AI-based recommendations;
- Use Insta-Suggest to discover long-tail tags for your YouTube videos.

2. Channel Optimisation

- Use the Video Scheduling feature to plan and automatically publish your videos in advance;
- Access the Video Topic Planner to keep your content ideas organised;
- Remove or hide videos in advance with Sunset Video;
- Use their Channel Valuation option to assess your channel's actual value and identify issues like broken links or unoptimised titles;
- Check out their Demonetization Audit to prevent demonetization by YouTube;
- Gain valuable audience insights to better understand your audience;
- Backup all your videos with the Channel Backup feature;

3. Video & Thumbnail 🧑‍🎤 📺

- Use their Auto Translator to translate your videos into over 40 languages;
- Access the Thumbnail Generator to create engaging thumbnails;
- Optimise your video thumbnails by conducting A/B tests;

get game-changing AI insights with our A/B Testing tool

Eliminate the guesswork of creating a winning thumbnail and title with our advanced A/B testing features. Easily compare different versions of thumbnails and titles to ensure the one you use will get you the best results.

- Use the Emoji Picker to add engaging emojis to your titles, tags and descriptions.

A key benefit is that TubeBuddy also provides tools for effective community management, allowing you to grow your audience engagement.

You can share your videos on multiple social media accounts using the Social Media Share Tracker.

They also offer a Comment Management feature. This is very useful because it helps you with formatting your comments for better audience feedback.

Additionally, you can use their Pick a Winner option which basically transforms your comments section into a lottery, boosting engagement and rewarding your viewers.

With TubeBuddy's Data and Analytics features, you can easily identify critical sections of your videos and get access to actionable recommendations to boost your video's visibility.

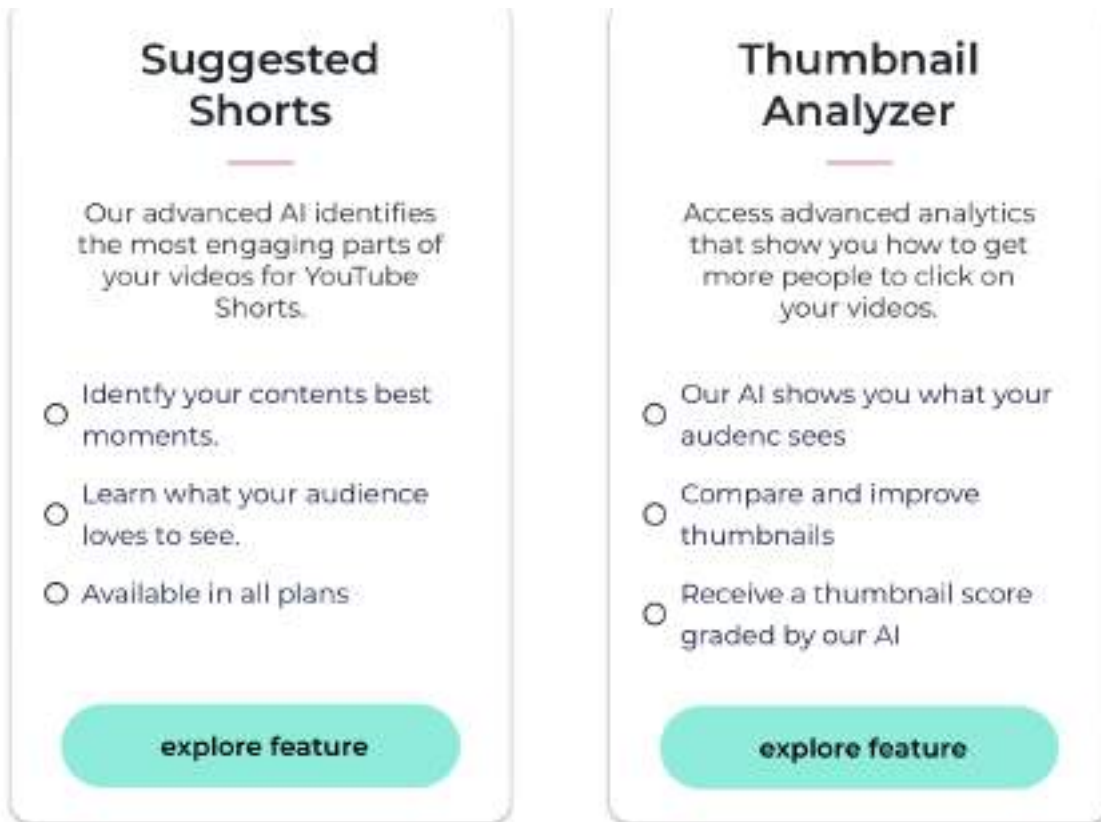

Another standout feature is that you have an option for Bulk Find, Replace, and Append so you can update your video titles and descriptions without doing all the manual work.

Their Bulk editing tools help you edit or update your cards, end screens, and descriptions in bulk.

To sum up,

TubeBuddy is a great option for optimising your videos and creating engagement on your YouTube channel.

But more than just a SEO tool, TubeBuddy offers AI features like **Suggested Shorts**, **YouTube Title Generator**, and **Thumbnail Analyzer**, which can help creators manage, grow and optimise their YouTube channel effectively.

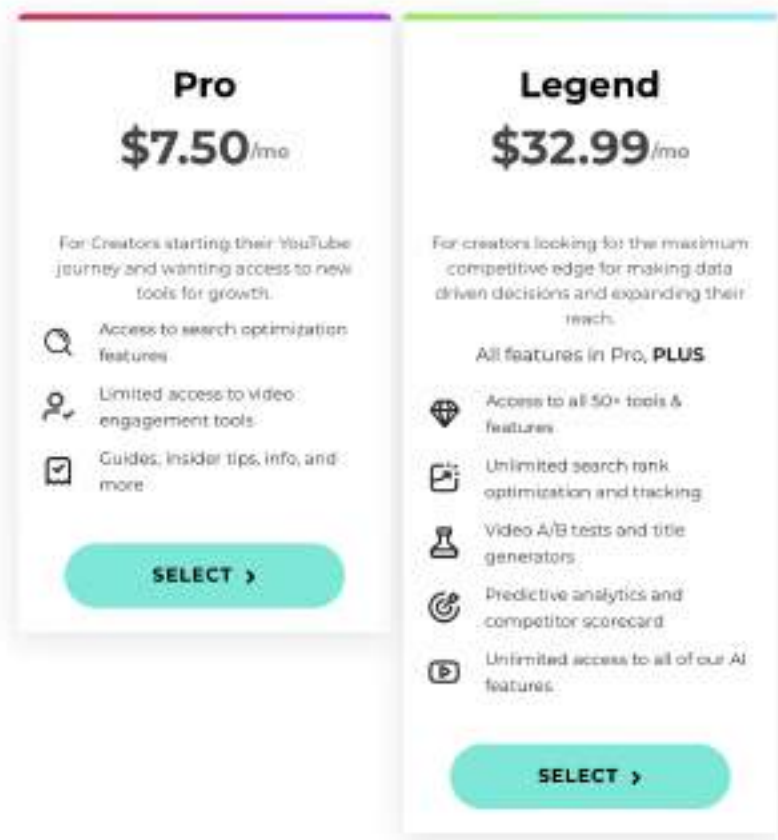

A disadvantage is that it only allows one YouTube channel per subscription.

Similar tools to TubeBuddy are **VidIQ** and **Tubics**.

💰 **Let's also consider the price...**

Their pricing plans include two options: [Pro and Legend](#).

If you're just starting your YouTube channel, consider the **Pro Plan at \$7.5 per month**. With this plan, you'll have access to search optimization features and limited access to video engagement tools.

However, if you already have a bigger YouTube audience, **the Legend plan, priced at \$32.99/month**, might be a better option. This plan offers unlimited access to all AI features, predictive analytics, and a competitor scorecard.

2. Here are 3 AI tools that make you viral on all social media platforms!

- **AI Tool:** multiple
- **Category:** social media management
- **What it helps you with:** go viral on all social media platforms

The 3 AI tools we're going to talk about in this section will make you viral on all social media platforms! 

And the best part is that you can start using them for FREE.

#1. Submagic

This AI tool helps you create viral shorts with a single click!

Just upload your video and amazing looking captions that you can customise will be added in seconds.

But that's not all! You can effortlessly add B-rolls, transitions, sound effects and auto-zoom.

Here's a breakdown of how to do this:

1. Upload your video.
2. Choose the **style** of your subtitles.

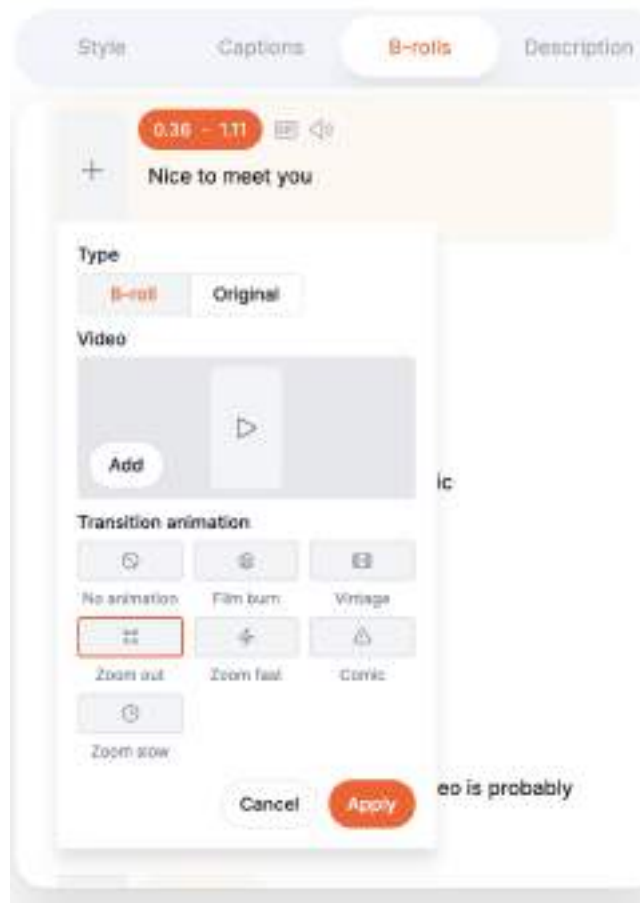

Feel free to borrow themes from your favourite creators! 

3. Auto-cut silent parts.

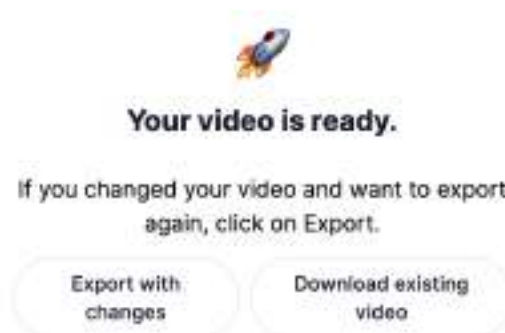

4. Add auto-zooms and B-rolls.

5. Use the option **Description and hashtags generated by AI.**

Doing this makes your life easier by using your transcript to create your description and hashtags.

6. Export your video!

You can now stop wasting hours editing your videos and just use [Submagic](https://submagic.ai) to create a viral short in seconds.

Now, about pricing \$

With a **FREE TRIAL** available, you can start using it right away!

#2. Postwise

This AI tool can write viral tweets and threads for you!

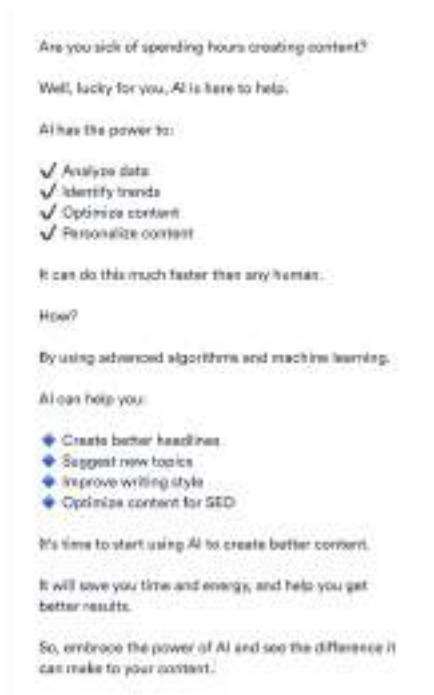

👉 Here's how:

1. Connect your X (Twitter) or LinkedIn account.
2. Use the **AI Writer** to write an engaging post.

For example, if you type *"AI and the future of technology"*, you'll receive three options to choose from.

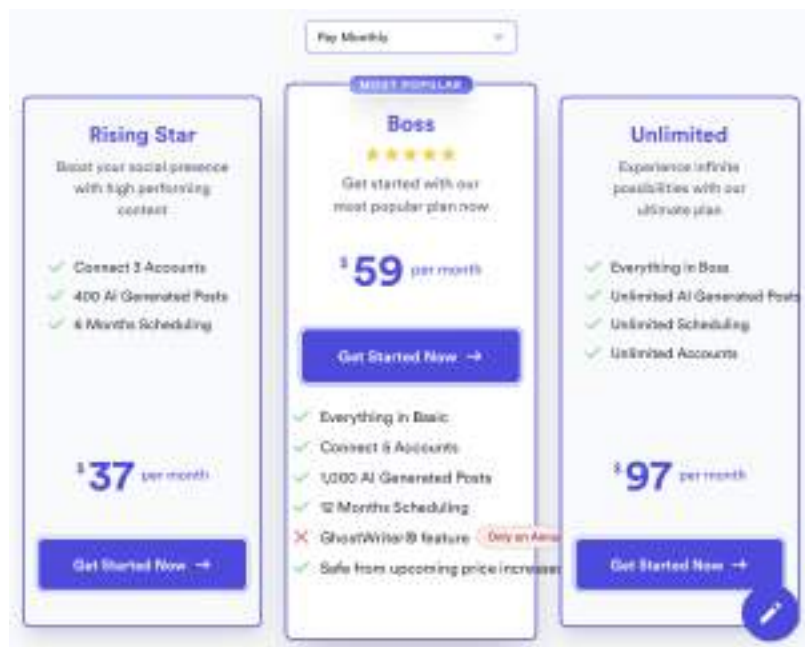

Or use their **Ghost Writer** for a series of ready-to-use posts aligned with your saved preferences.

Now you can schedule your posts!

You can begin using and experimenting with it at **NO COST**, but if you plan incorporating it in your business strategy, you can upgrade to a paid plan.

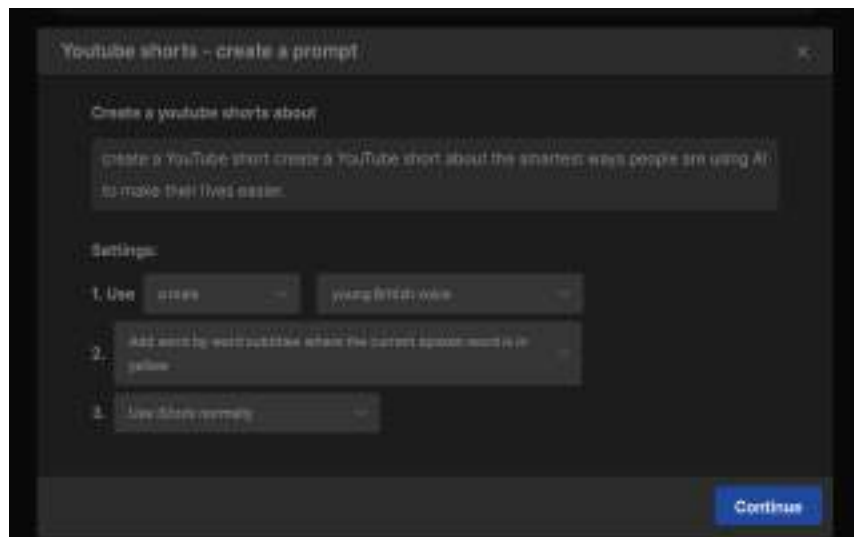

#3. InVideo.io 📺🚀

There are hundreds of **text-to-video** AI tools out there, but this one can generate engaging YouTube videos with just the push of a button.

👉 **Let's create one together, shall we?**

1. Go to invideo.io.
2. Give invideo the topic of the video you want to create.

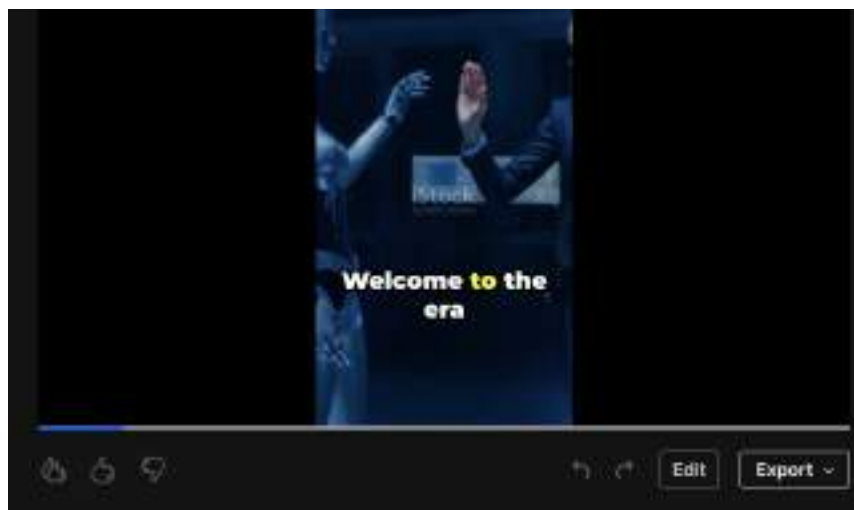

PROMPT: *Create a YouTube short about the smartest ways people are using AI to make their lives easier.*

You can then edit the video on the spot by telling invideo.io what you want to add to the video or change.

For example, you can add subtitles, change the voiceover to a female, or add an image of a robot in the video.

3. Generate video!

4. Tweak it!

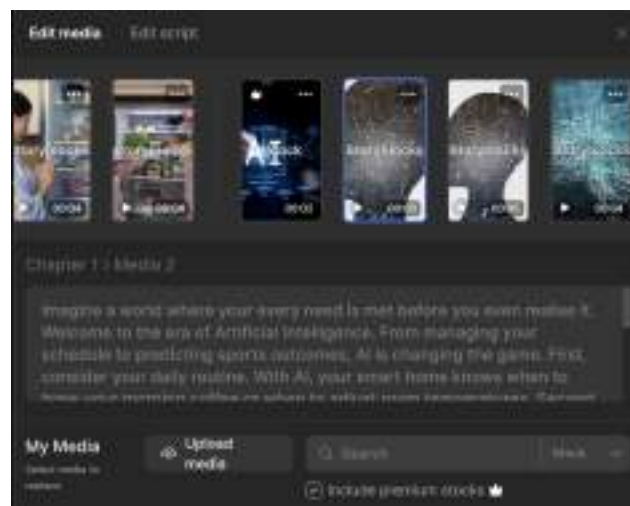

Delete the second scene. It's not really relevant.

Make this scene half as long. It's too wordy.

Change current stock to a video drone shot of a forest.

🔧 If anything needs adjusting, you can use their **Manual Editor**.

You can start using this tool for **FREE**, but if you want to publish videos without a watermark, you should upgrade to their paid plan.

3. Manage all social platforms with this AI tool!

- **AI Tool:** Buffer
- **Category:** social media management
- **What it helps you with:** schedule posts across all platforms with ease
- Link to website: <https://buffer.com/ai-assistant>

Now I want to walk you through a management tool that allows you to schedule posts for multiple social media platforms, including Twitter, TikTok, Threads or YouTube.

It's called [Buffer](#).

This will make content management easy and efficient.

It integrates with external tools like Zapier, Pocket, and Twitter management tools.

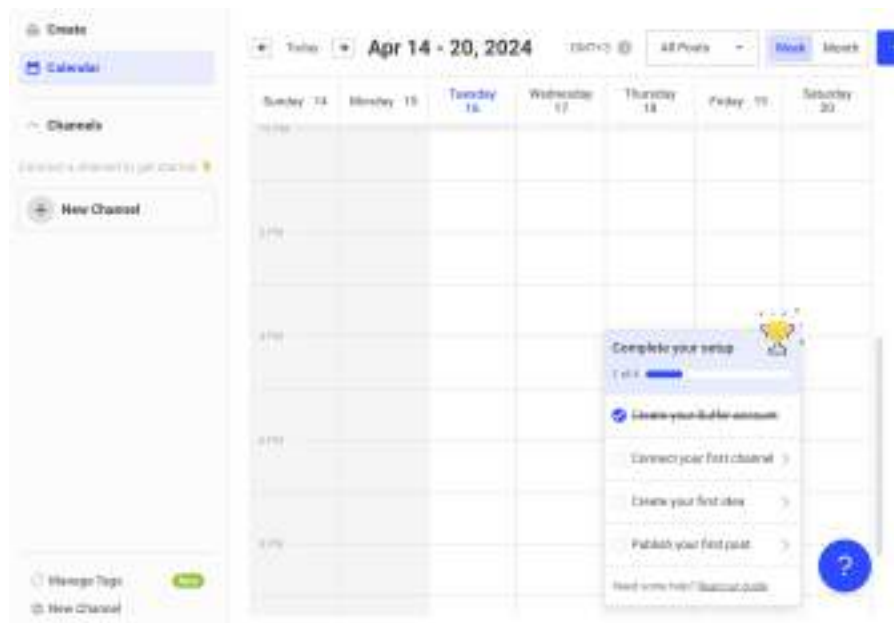

For example, you can save articles from Pocket to your Buffer queue for scheduling and sharing on Twitter. 🥳

🕶️ How to set up your Buffer account:

1. Go to Buffer and sign up.
2. Connect your social media accounts (Twitter/Facebook/LinkedIn/Instagram).
3. Set up your posting schedule and time zone for each social media account.

TOOLS:

- Publishing → Plan and publish all your content from the same dashboard.
- Analytics → Analyse social media performance and create reports.
- Engagement → Navigate your comments and engage with your community.
- Start Page → Build your landing page.
- AI Assistant → Generate ideas and rewrite copy with AI. 🤖

Another cool feature is that Buffer supports **team collaboration**.

Users can assign roles and permissions to team members based on their responsibilities.

Just add a name, the email address, type the name of the channel you want to provide access for, and set access level (full posting access or approval required).

Invite a New User

Name

Email address

What channels should this person have access to?

Admin Access - No ☐

Access Level

Buffer's Team plan offers unlimited users, allowing you to add as many team members as you want.

This platform remains a popular choice for social media scheduling, thanks to its user-friendly interface, integration capabilities, and free resources.

🙄 However, it also has some limitations:

Buffer's limited analytics might not be as detailed as what other tools can offer, which could be a problem for businesses that really need a lot of data and insights.

The free plan only allows access to three channels, 10 scheduled posts per channel, and the ability to create and schedule posts in advance.

💰 Pricing

While the free plan provides limited features, higher-tier plans offer advanced functionalities such as custom schedules, AI assistance, and team collaboration.

The "Essentials" plan starts at \$6 per month for one channel, while the "Team" plan costs \$12 per month for one channel.

They also have an "Agency" option, priced at \$120 for 10 channels.

Free	Essentials	Team
For individuals and businesses getting started with social media.	For professionals who use publishing, analytics & engagement tools.	For teams who want unlimited users, collaboration, and reporting.
Get started	Try free for 14 days	Try free for 14 days
\$0	\$6 / month for 1 channel	\$12 / month for 1 channel
Connect up to 3 channels	Add additional channels for \$6/month Billed monthly	Add additional channels for \$12/month Billed monthly
✓ Planning & publishing tools ✓ Landing page builder ✓ AI Assistant	✓ Free features, plus: ✓ Engagement tools ✓ Analytic reports	✓ Essentials features, plus: ✓ Unlimited team members & clients ✓ Draft collaboration tools

If your goal is to stay consistent, organised and increase your following, Buffer is a great option.

🔄 Other social media management tools are: Hootsuite, Tailwind or SocialPilot.

CHAPTER 6

Cut Your Working Hours In Half With AI

1. Too many tasks? Use these 3 AI tools

- **AI Tool:** multiple
- **Category:** productivity enhancement
- **What it helps you with:** save time and streamline tasks

If you read *The 4-hour Workweek* (of course you did) you know the importance of delegating.

So, if you and your team are already drowning in tasks and you are thinking of delegating more work, here are **4 AI tools that will help you and your assistant automate more tasks**.

1. Convert a document into a presentation

Let's say you need to give a presentation in 15 minutes. You wrote the script, you know exactly what to say... but you forgot to prepare the slides 😬

Don't worry, don't make your assistant go crazy and prepare it on the go. Instead, use the new feature [Tome](#) just added.

If you don't know [Tome](#), it's an AI-powered app that helps users with their storytelling and communication.

How does this new feature work?

You upload the document (up to 25 pages), check the slides are correct, and you have your presentation ready.

You can watch how this feature works here: <https://twitter.com/magicaltome>

2. Streamline tasks on Excel (and spend less time on it)

If you hate doing tasks on Excel or Google Spreadsheet (*I mean, who loves it?*), then you will install this AI tool today.

Numerous AI helps you cut the boring and repetitive tasks on Excel and Google Spreadsheet through various AI functions.

You can extract text, categorise elements, use ChatGPT in cells, teach AI to do repetitive tasks, even get complex formulas explained.

And it's very simple!

On [the.numerous.ai homepage](https://the.numerous.ai/homepage) you can already see the app in action.

3. Get calls transcribed and summarised for you

Having team meetings is not only useful, but necessary for all businesses, especially the remote ones. But sometimes things get lost.

If you want to optimise communication during meetings, you should try [Zoom IQ](#), which started collaborating with OpenAI, and an AI tool called [Krisp](#).

These tools take notes and summarise them all for you.

[Krisp](#) provides you with free unlimited transcriptions, it's Bot-free, and integrates with all communication apps, like Microsoft Teams, Google Meet and even Zoom.

Whatever option you choose, you are covered!

This kind of tools are proof that artificial intelligence is a way to focus your time and energy on the right things, so you can grow faster and faster.

2. Get your emails organised fast ⚡

- **AI Tool:** Shortwave
- **Category:** Productivity and time management
- **What it helps you with:** get your email inbox organised and easy to manage
- **Link to website:** <https://www.shortwave.com>

Looking for ways to simplify inbox management through automation?

If you're feeling overwhelmed by the constant flow of messages and frustrated with the never-ending effort to tidy up your inbox, [Shortwave](https://www.shortwave.com) is the solution you need.

Here's why you'll love it:

- ✓ It helps you prioritise your work by ensuring you never miss important emails;
- ✓ It allows you to easily pin emails or threads to the top of your inbox for quick access;
- ✓ It makes sure you reach peak productivity through its organisation and productivity features.

It's available on iOS, Android, Mac, and Windows.

🚀 How to get started

1. To begin, go to [shortwave.com](https://www.shortwave.com), and select the **"Sign in with Gmail"** option.
2. Allow access to your email, contacts and Google Calendar.
3. You're all set!

Shortwave only works with Gmail or Google Workspace accounts and does not support any other email services.

🎁 What you get:

- **AI-powered search:** analyses your entire email history for the information you need
- **Ghostwriter:** creates personalised drafts using your style
- **Translations:** provides high quality translations for both reading and writing emails
- **Schedule meetings:** suggests available time slots based on your calendar

📁 OTHER ORGANISATION FEATURES

1. Group emails into **bundles**

Bundles are groups of related threads that condense multiple emails into just one compact line in your inbox.

You can customise and configure bundles from **Settings -> Inbox**.

A screenshot of an email settings interface showing a list of labels and their corresponding bundle and delivery settings. The interface has a dark theme. The labels are listed on the left, and the settings are in two columns: 'BUNDLE IN INBOX' and 'DELIVER TO INBOX'. All 'BUNDLE IN INBOX' toggles are turned on, and all 'DELIVER TO INBOX' settings are set to 'Immediately'.

LABEL	BUNDLE IN INBOX	DELIVER TO INBOX
✈️ Travel	☒	Immediately
📅 Calendar	☒	Immediately
📧 Newsletters	☒	Immediately
🛒 Purchases	☒	Immediately
💰 Finance	☒	Immediately
👥 Social	☒	Immediately
🎁 Promotions	☒	Immediately
💬 Forums	☒	Immediately
🚩 Updates	☒	Immediately

The default bundles include emails related to *Travel*, *Calendar*, *Newsletters*, *Purchases*, *Finance*, *Social*, *Promotions*, *Forums* and *Updates*.

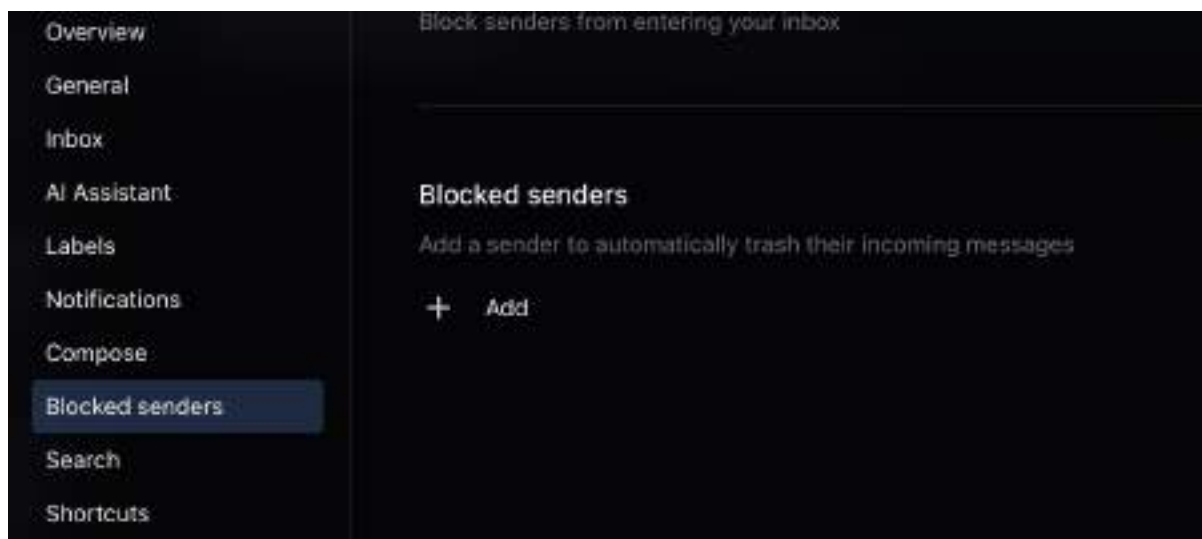

2. Delivery Schedule

Schedule emails or bundles to only show up at certain times.

For example, if you prefer not to see emails related to *Travel* during your workday, you can schedule them not to appear until 5 PM on workdays.

3. Eliminate noise

Stop unwanted or annoying emails by blocking spam senders.

4. Auto-apply labels

Configure labels to automatically apply to specific senders.

And if you want to increase your productivity, here's what you can do:

1. **Turn emails into to-dos** -> check off emails when you're done.
2. **Prioritise your threads** -> organise your threads using **drag & drop** and **add notes**.
3. **Pin & Snooze** -> pin important threads and snooze the ones that you'd think about later.
4. **Keyboard Shortcuts** -> use shortcuts for an accelerated user experience.

Compose & send		
Action	Keys	Description
Compose		Starts a new draft
New thread		Starts a new thread when viewing a search result addressed to the relevant search participants
Reply all		Reply all to focused thread
Reply		Reply to focused thread
Forward		Forwards focused thread
To		Focuses the field to add recipients
cc		Focuses the field to add recipients
Insert into		Moves last sender to first and inserts text (from "lastsendername") (moves to)
Attach a file		Attaches a file to the current draft
Link		Adds a link to your text. If you have a link already selected, you can paste it over highlighted text with .
Discard draft	 	Discards the current draft
Send		Sends your message from the compose box
Scheduled send		Schedule your message to send later from the compose box
Send & done		Sends your message from the compose box and marks thread as done
Undo send		Reverts most recently sent message back into a draft

But wait, there's more...

Here are some more Shortwave features you'll love:

- **Undo send** → this feature allows you to revoke an email shortly after sending it, giving you the chance to correct mistakes or make changes before it reaches the recipient.

- **Calendar integration** → accept or reject invites
- **Granular push controls** → minimise disruptions with personalised alerts
- **Do not disturb** → get push notifications when you want them
- **Light & dark modes** → switch between brighter and darker colour schemes
- **Thread links** → reference your emails from other apps with permanent links
- **Saved searches** → add your favourite senders, labels and searches to your sidebar.
- **Blocked tracking pixels** → get more privacy by detecting and removing the majority of tracking pixels from emails.
- **Multi-account support** → manage and access multiple accounts.
- **Signatures & aliases** → import signatures and send from any of your aliases.

HOW MUCH DOES IT COST?

[Shortwave](#) provides a **FREE** version with essential functions, but it has limited access to older emails (with a searchable email history of up to 90 days).

If you want to access advanced features like AI-assisted search or full email search history, a subscription starts at \$7 per month.

Free

For casual users who just want the basics

Free

[Get started](#)

- ✓ AI executive assistant
- ✓ 30 days searchable email history

[Get started](#)

Everything in Pro, plus...

- ✓ Business features for up to 10 signed-in accounts
- ✓ 5 years AI-assisted search
- ✓ Customizable AI writing prompt
- ✓ Enhanced support

3. The best time-saving AI tools on a budget 💰

- **AI Tool:** multiple
- **Category:** Productivity enhancement
- **What it helps you with:** save time on everyday tasks

Entrepreneurs & marketers: finding yourself with a busy schedule?

If you're looking to streamline your workflow, but are afraid that it may cost too much, this is for you!

We've dug in the caves of AI to find the best AI tools for small/medium business owners that improve workflow.

We had a goal: make these tools affordable.

And these are the tools that will help you save time while not spending hundreds of dollars every month! 💰

🔇 **krisp:** improves your call quality with features like background voice cancellation and noise reduction;

📁 **clay.earth:** automates lead discovery and streamlines contact management;

📅 **reclaim:** optimise your schedule with AI

Let's begin with the first one:

1. [Krisp](#)

Main features:

🔇 AI Voice Clarity

- **Background Voice Cancellation:** removes background voices, such as chatter of other people talking in the same room.
- **Noise Cancellation:** eliminates background noise from both ends of the call.
- **Echo Cancellation:** filters the echoing sounds in the room.

🤖 AI Meeting Assistant

- **Meeting Transcription:** provides automatic meeting transcription.
- **Meeting Notes:** takes meeting notes and summarises discussions.
- **Meeting Audio Recordings:** records meeting audios, which you can then share with colleagues.

 [Krisp](#) integrates with all communication apps, like **Microsoft Teams, Google Meet and Zoom**.

 **Setting up is easy** - just install it and choose it as your microphone and speaker in your communication app's audio settings, and you're ready to use it.

Pricing

You can start using it for **FREE** and you get 60 minutes/day of Noise, Background Voice, Echo Cancellation, Unlimited Transcriptions and 2 Meeting Notes/day.

For additional features such as Unlimited Noise, Meeting Notes, Meeting Recording, and Connect with Bot, you can try their **Pro Plan**, which starts at **\$8/month**.

Free	Pro	Enterprise
For individuals	For professionals and small teams	For enterprises and call centers
\$0 USD	\$8 USD	Let's talk
Free forever	per month / per seat billed annually - \$96	Customized Based on Requirements
Get started	Go unlimited	Contact Sales
Free forever ✓ 60 Minutes / day of Noise, Background Voice, and Echo Cancellation ✓ Unlimited Transcriptions ✓ 2 Meeting Notes / day	All Free features, plus ✓ Unlimited Noise, Background Voice, and Echo Cancellation ✓ Unlimited Meeting Notes ✓ Meeting Recording  ✓ Connect with bot  ✓ HD Noise Cancellation ✓ Centralized user management ✓ Centralized billing	All Pro features, plus ✓ SSO & SCIM ✓ Analytics Dashboard ✓ Premium support ✓ Centralized settings management ✓ Device-based authentication ✓ Custom MSA support ✓ Assisted security reviews

So in this case, depending on the size of your business, you might probably use either the free or the \$8 version.

2. [Clay](#)

Clay is an automation tool that transforms the process of discovering and evaluating individuals and businesses, saving you valuable time and resources.

As a powerful lead finder, Clay helps you discover prospects' work emails and automates Google searches to evaluate company websites, identify keywords, and compile lists.

For instance, it can detect if companies prioritise remote work or mention specific keywords on their websites.

Moreover, users can take notes on each contact, including important details such as their role, company, or contact information.

 **It integrates with social media profiles, contacts, calendars, and more (LinkedIn, Twitter, etc.).**

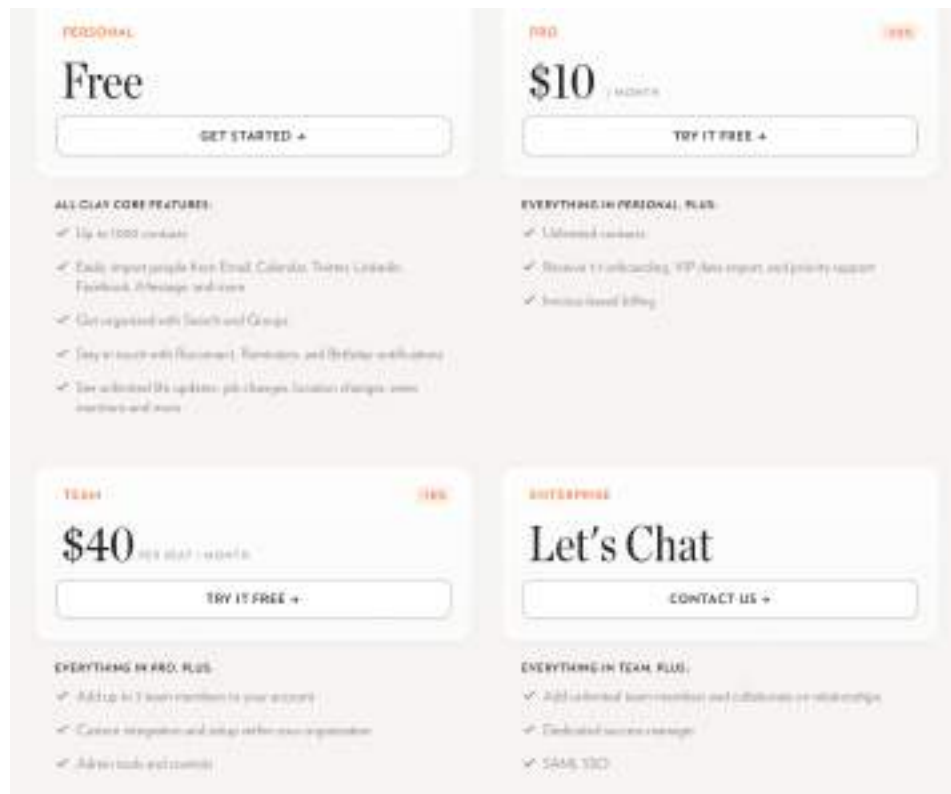

If you have many contacts and interact directly with customers or other professionals, Clay is an excellent tool to manage and organise everything for maintaining these relationships and communications efficiently.

Pricing

You can start using Clay for **FREE** and access all its core features. This includes easily importing contacts from Email, Calendar, Twitter, and more. You can stay organised with search and groups, receive reminders and birthday notifications, and see unlimited updates. Plus, you can add up to 1000 contacts.

For additional features, you can explore **Clay's Pro Plan**, starting at **\$10 per month**.

Clay also provides personalised plans tailored for teams and enterprises.

Most probably, you'll end up using the free or \$10 version.

3. [reclaim.ai](#)

[Reclaim](#) is an AI tool that generates personalised schedules based on your assigned tasks and habits.

Ideal for team coordination and managing multiple projects, Reclaim streamlines scheduling by syncing multiple calendars and speeding up meetings with its **Scheduling Links** feature. This leads to smoother collaborations and allows for buffer time between meetings.

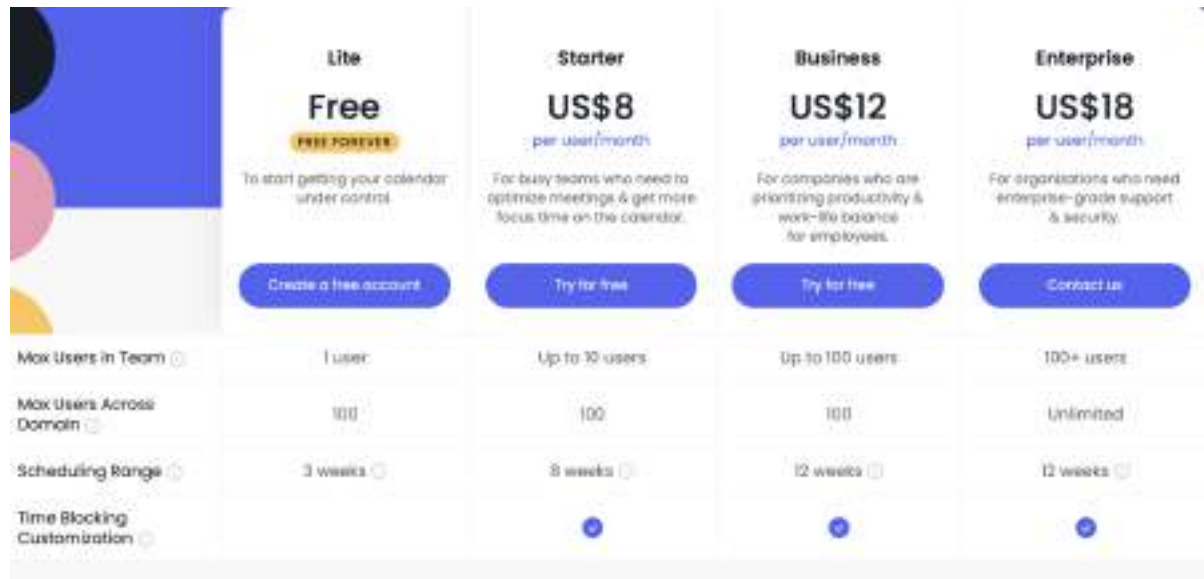

Moreover, this tool is a game-changer for those struggling to balance work and personal life. By syncing with both work and personal calendars, it provides a clear overview of your schedule, enabling you to find more free time and achieve better work-life balance.

 Affordable, intuitive, and designed to protect your time, it integrates with popular tools including **Slack, Asana, ClickUp, Tasks, Jira Software, Todoist, Zoom, Linear, and Raycast.**

In summary, it organises your calendar into flexible free time and protected "defended time", categorising tasks, meetings, and habits for better prioritisation.

💰 Pricing

Best of all, you can get started for **FREE**.

	Lite Free FREE FOREVER	Starter US\$8 per user/month	Business US\$12 per user/month	Enterprise US\$18 per user/month
	To start getting your calendar under control.	For busy teams who need to optimize meetings & get more focus time on the calendar.	For companies who are prioritizing productivity & work-life balance for employees.	For organizations who need enterprise-grade support & security.
	Create a free account	Try for free	Try for free	Contact us
Max Users in Team	1 user	Up to 10 users	Up to 100 users	100+ users
Max Users Across Domain	100	100	100	Unlimited
Scheduling Range	3 weeks	8 weeks	12 weeks	12 weeks
Time Blocking Customization		✓	✓	✓

Small/medium business owners will probably get the best bang for their buck on the free or \$8 version.

4. [Ask your PDF](#)

What if you could compile all the Q&As your customers have, upload it into a PDF, and then have an AI answer any question that's on that document?

That is what [Ask your PDF](#) does:

- 📄 You upload a PDF
- 🤖 The AI becomes an expert in it
- 👤 You can create chats where people ask something and, if it is on the PDF, the machine will answer those inquiries in a conversational and warm manner.

Uploading your Q&As for customer service...

Uploading your SOPs for new hire training...

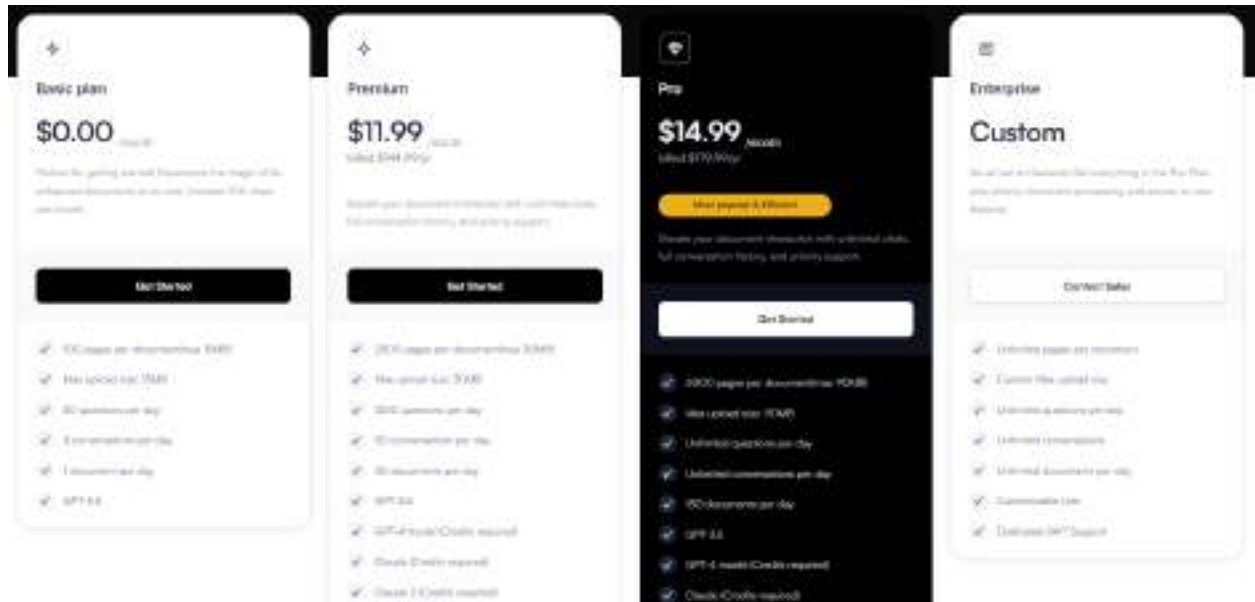

Uploading long industry reports...

Imagine how much time it would save having all the information inside those documents only one question away?

That's the power of [Ask your PDF!](#)

You can also start using it for free!

4. Save time on daily tasks

- **AI Tool:** multiple
- **Category:** Productivity enhancement
- **What it helps you with:** save time on everyday tasks

Let's go through some AI tools that you can look at to outperform your competitors and achieve your September resolutions.

I'm going to break down three September resolutions you might have and give you an AI tool for each of those.

1. IN CASE YOU WANT TO HIRE NEW PEOPLE

Many companies want to expand their team after the summer.

If that's your case you need to use [Manatal](#).

Manatal is an AI recruitment tool designed to streamline the hiring process and source top talent efficiently.

Their platform is super easy to use, in fact even if you're new to recruitment you can navigate this tool effortlessly.

One of the best things about it is the customizable pipeline. Every company has a different hiring process right? So being able to customise your recruitment pipeline is just great if you ask me.

But it doesn't end here.

Because with Manatal you can reach a wide audience by posting job openings on over 2,500 free and premium channels. These include global, local, and specialised platforms like Indeed, LinkedIn, Monster, and more.

Plus, you also have an AI Engine that helps you by suggesting the top candidates for each job role. It automates routine tasks and scores candidates' profiles based on job requirements, making candidate screening more efficient.

Manatal goes full circle, because it helps you keep track of the onboarding process too.

Cool right?

2. CASE YOU WANT TO LAUNCH NEW OFFERS

Come on, I know you have some new offers to launch during autumn.

If you're a launch addict like many entrepreneurs, you might find [Squadhelp's](#)

[AI-powered name generating tool](#).

I know, I know, this tool claims to generate business names.

But with just a couple of tests you can actually see that it works perfectly with names for new products or offers too.

You just need to type in a short description of what you're launching, and you'll get a lot of good inspirations!

3. IN CASE YOU WANT TO OPTIMISE YOUR WORK DAY MORE

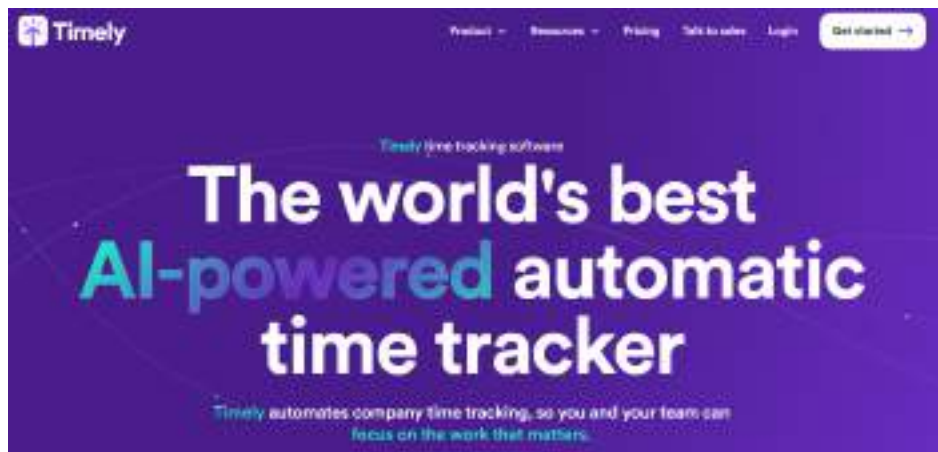

I know who you are.

You're that kind of entrepreneur who tries to optimise your work day.

You want to have good sleep, get some focus music, remove all friction...

You like biohacking because you want to be more productive, that's why you often binge watch videos about productiveness.

Well, if this is you, you'll love [Timely](#).

Timely offers a game-changing solution for business owners looking to streamline time tracking and productivity management.

First off, you get automated time tracking. Timely eliminates the need for manual time tracking methods, like timers and notes. It automatically records time spent across web and desktop apps, including documents, meetings, emails, websites, and video calls. This feature ensures accurate records with zero effort.

When you use Timely, you gain an exact daily breakdown of your activities, offering a nice snapshot of your workday. From documents to video calls, everything is captured automatically, allowing you to focus on the needle movers of your business.

You can even integrate it into your team tasks, because it allows you to track projects in real time, monitor budgets, hours, and activities. This feature is really nice for project management, and it helps with smarter decision-making.

Timely also helps you with tracking every billable detail in your projects, and this helps you make sure no valuable work goes unnoticed.

Timely claims their product will reduce timesheet administration by up to 75%. You'll have to see if it's true for yourself, but it's definitely an interesting tool for your schedule.

5. AI note takers: Otter vs Fireflies 🏆

- **AI Tool:** multiple
- **Category:** note takers and transcribers
- **What it helps you with:** taking notes during calls

Have you ever found yourself in the situation where you're taking notes during a meeting and you keep getting distracted?

As a result you're not fully engaging in the discussion, plus taking notes is so much harder.

Not to mention those times when you can't even attend the meeting at all. And getting up to speed is tough.

If you're already using one of these tools for transcribing and recording calls and meetings...

Congrats!

You're doing a great job by automating your meetings and improving your productivity.

Today we'll compare two of the best AI tools that help you with your meeting notes: [Otter](#) and [Fireflies](#). Hopefully this will help you decide which one is more suitable for you.

🤔 **Otter and Fireflies: what sets them apart?**

- **Otter.ai**

Otter.ai is an **AI transcription tool** designed to generate transcriptions for meetings, interviews and other conversations.

- **Fireflies.ai**

Fireflies.ai is an **AI assistant** for meetings that records, transcribes and provides search functionalities for your voice discussions during meetings.

Now, if you're wondering:

What's the difference between a transcription tool and a meeting assistant?

1. Transcription Tool

A meeting transcription tool, such as Otter.ai, uses AI to automatically record and transcribe spoken discussions into written text.

Advantages:

- ✓ Saves time;
- ✓ Allows you to concentrate on the meeting rather than note-taking;
- ✓ Facilitates easy recall and review of meeting discussions.

Initially, Otter.ai was designed as a voice notes app. Over time, it expanded to include features such as creating summaries of conversations, editing transcriptions, and adding notes in real-time.

2. Meeting Assistant

A meeting assistant is doing more than just transcription; it can help you with different tasks before, during and after the meeting. Besides sending an assistant to your call for task automation, it also offers features like collaborative meeting notes, search functionality, and conversation intelligence.

Advantages:

- ✓ Saves time before and after the meetings;
- ✓ Generates meeting highlights, actions items, and summaries;
- ✓ Eliminates biases in meeting notes.

Fireflies is primarily designed as a meeting assistant for businesses and teams rather than individual users. It records, transcribes, and facilitates search functions for meetings.

Additionally, it integrates with various tools such as dialers, CRMs, and platforms like Slack to provide meeting assistance both before and after the meeting.

Otter  Fireflies

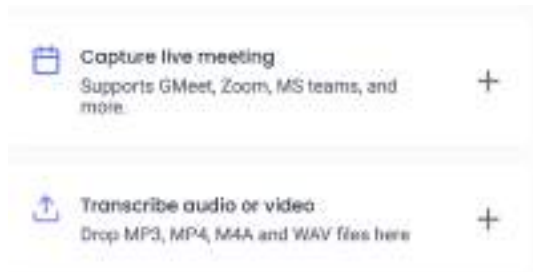

It's time for the final battle....

- ✓ Both of them do an excellent job of accurately transcribing audio from meetings into text.
- ✓ They are simple to get started with, offering an intuitive interface.
- ✓ Both platforms facilitate collaboration by allowing you to invite individuals from either within or outside your organisation.
- ✓ Additionally, they allow you to transcribe audio files that you upload.

Otter:

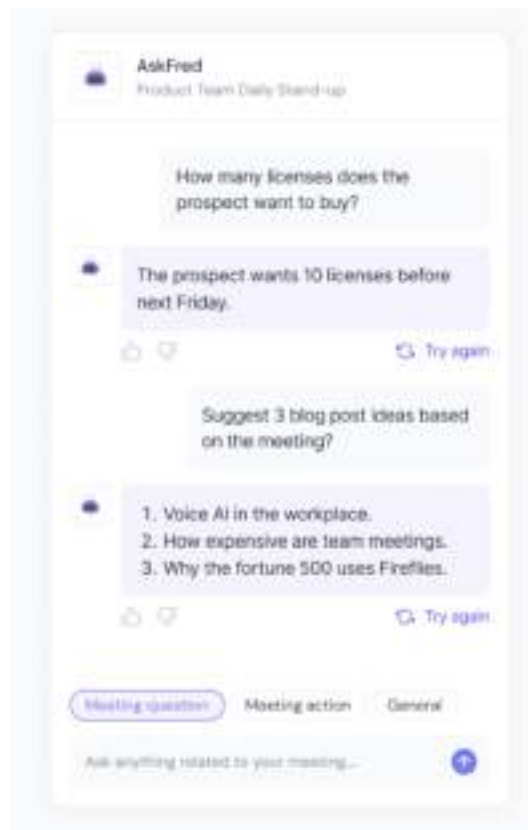

Fireflies:

- ✓ They both offer Chrome extensions for transcribing meetings. However... Fireflies' extension stands out with unique features. The Fireflies Chrome extension includes **AskFred for the Web**, which summarises web pages, articles, YouTube videos, and other content.

AskFred:

Otter Chat:

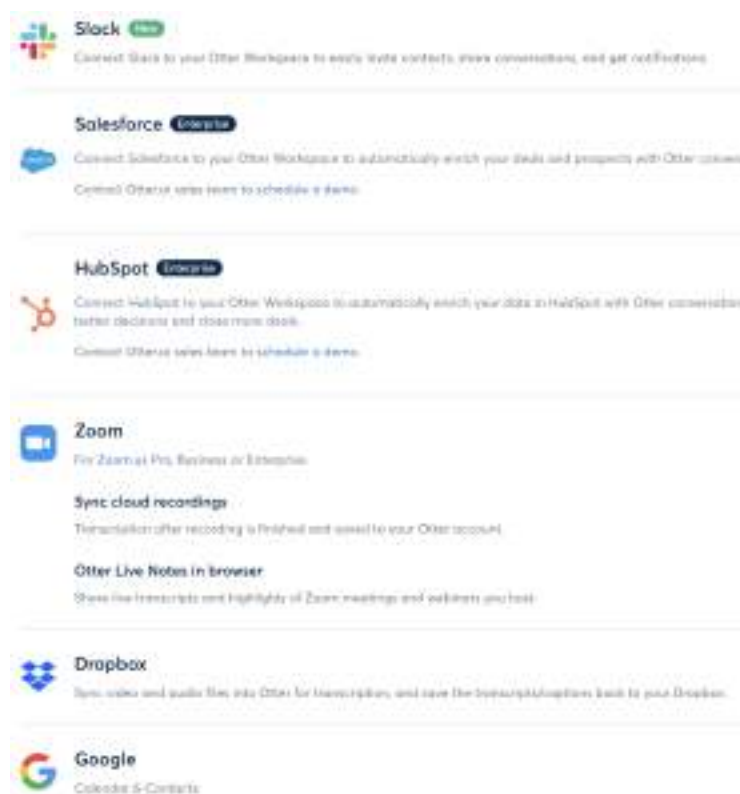

✓ They integrate with various communication and productivity tools.

Otter.ai integrates with platforms like Zoom, Microsoft Teams, Google Meet, and Dropbox, enabling users to sync recordings and transcripts across different applications.

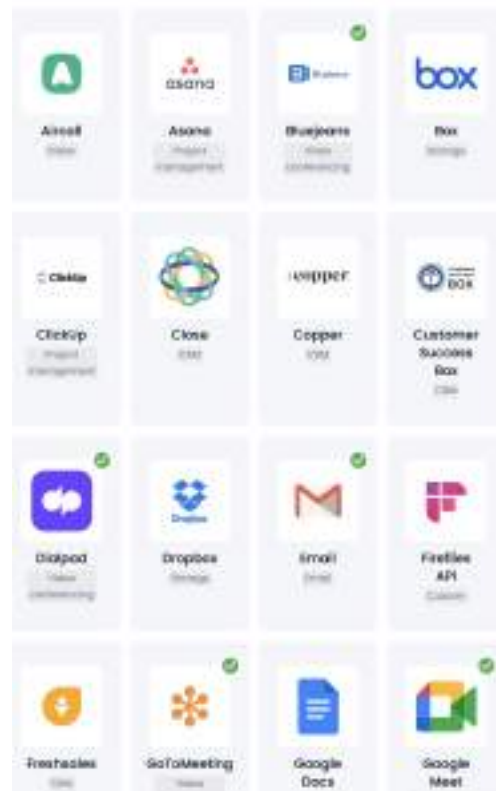

Otter:

 They have a new integration with Slack.

Fireflies integrates with tools such as Zoom, Microsoft Teams, Slack, and Google Calendar, ensuring smooth workflow integration.

Fireflies:

💰 Pricing

Both [Otter](#) and [Fireflies](#) provide affordable subscription options.

They offer **FREE** plans with limited features and also provide customised pricing for enterprises.

Otter.ai's paid plan begins at \$10 per month, with the Business plan priced at \$20 per month.

The Pro plan for Fireflies costs \$10 per user per month, while its Business plan is priced at \$19 per user per month.

🤔 Which one is the best for you?

Otter and Fireflies are both great options, offering accurate transcriptions, collaboration tools and an user-friendly interface.

If you're an individual or a small team needing meeting transcripts, you can choose [Otter.ai](#).

If you want voice-to-text transcripts with extra features like better integration and search options, go for [Fireflies.ai](#).

BONUS SECTION 🎁:

If you need more help with note taking, then maybe you'll be interested in hearing about Obsidian, a note-taking platform that helps you store, manage, and connect your ideas. Like Notion.

Well, with [Smart Chart](#), you will be able to give AI access to your notes and then ask it anything to find relevant information.

For example, you can ask it: *"Based on my notes, what is my priority for this week?"*

And the AI will do all the searching for you, replying in an interactive, conversational manner. It's like having your very own AI assistant to help you explore your notes!

6. Organise your information visually

- **AI Tool:** Albus
- **Category:** visualiser
- **What it helps you with:** explore topics with the help of images and diagrams
- **Link to website:** <https://albus.org/>

Let me walk you through an interesting tool that allows you to explore any topic with AI.

It's called **Albus** - which is not to be mistaken with Albus AI (another interesting AI tool).

Albus is an AI tool that allows you to explore a topic and explain it through text and images, organising all the information visually on a board.

I played with it, and I want to share with you the most interesting functionalities you can find in this beta AI platform, and how you can use them for your business.

Keep in mind, I won't describe all the functionalities, but just the ones that are most interesting for you and your business. If you want to dig in more, you should take some time to explore it further.

1. How to start using Albus

As you can see in [this short video](#), everything starts from the topic or question that you type in the search box at the top of the board.

From there, on the left will appear a colourful menu with subtopics to explore.

What can we write in the search box?

As marketers and business owners, the best thing we can do is write about a problem you have in your company (like 'My team is not cooperating well'), the problem your target audience has, or a topic that is the focus of our method, products or approach (like 'women losing weight through weight training').

This way you can solve your company's problems, find new ideas for your content, and dig into your audience's mind.

When you click on one of the subtopics on the left, a box will appear on the board, and you will find some deeper info about what you asked for.

Now let's see the different ways you can use Albus for your business.

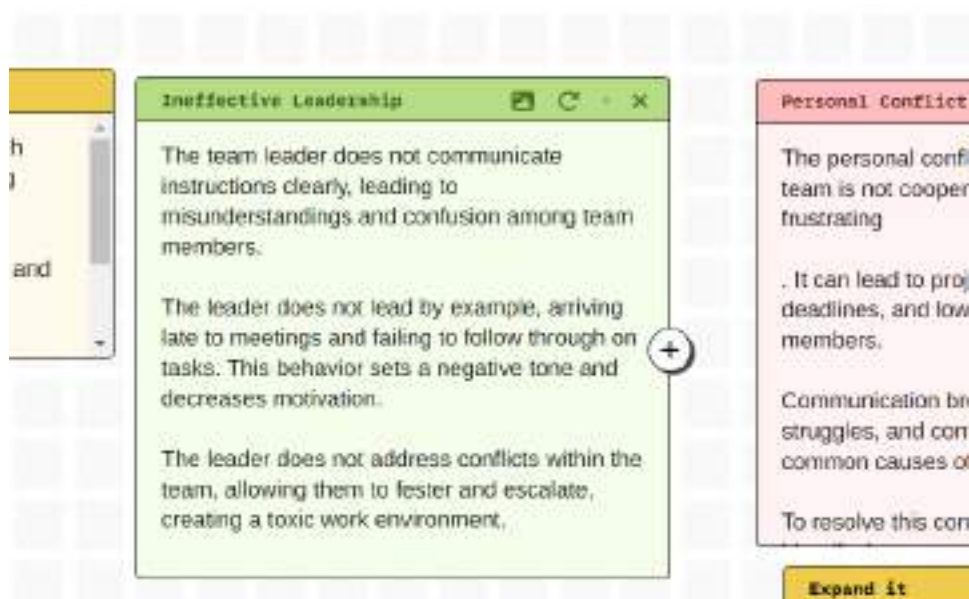

2. Find new perspectives

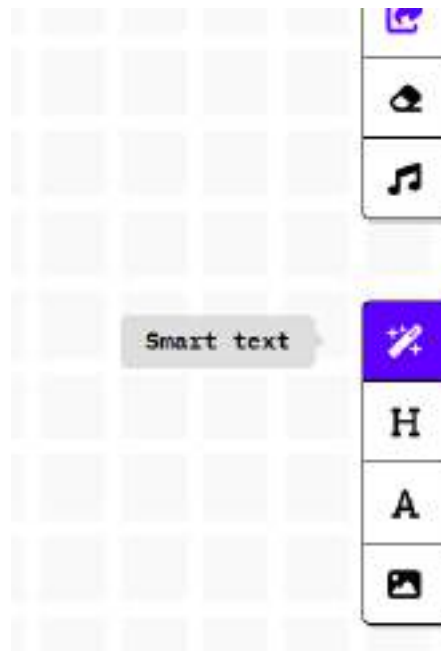

When you play with this tool you will find it does an amazing job giving you new perspectives and angles. And of course, this is great for your copy angles and content topics.

You have many ways to do it:

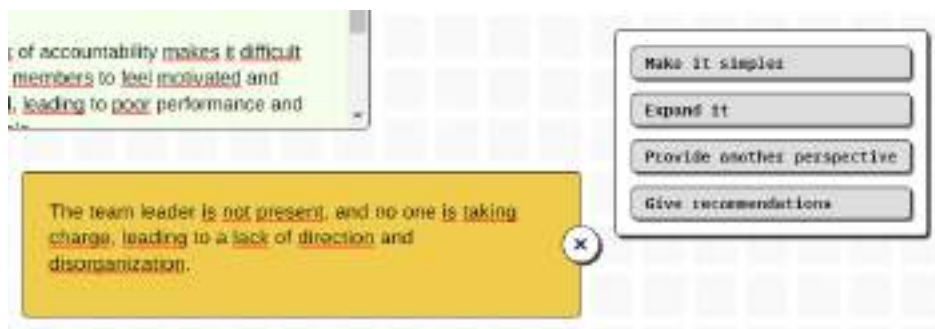

Once a subtopic has been created by AI, click on the '+' that appears on the side of a box. You will have to chance to click on 'Tell me more' options

- Ask a question through the 'Smart text option'. On the right menu, there is an option that allows you to get answers to your questions about that topic. So if you are working with this tool and you think of a question, you can do it easily.

- If you see a good point covered in one of the outputs, you can copy and paste that part in another text element, and ask the tool to expand on that point, make it simpler or provide a new perspective. To create a text box, you just have to click on the 'A' on the right menu.

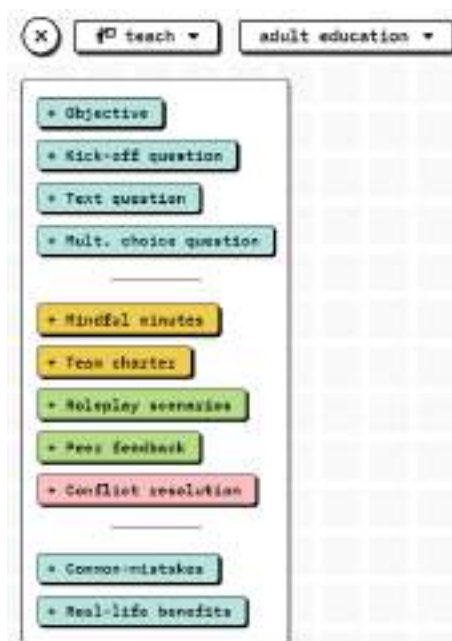

If you are looking for the solution to a problem, these functionalities allow you to find the root of that problem, while if you are looking for ideas for content and copy these new perspectives will help you open your mind.

3. Find out the common mistakes

Whether you are focusing on a problem or on a topic for your copy and content, this function is very useful, because you can find the most common mistakes people make about a certain topic.

On the left menu, you can switch from 'explore' to 'teach'. Once you have done that you can click on 'Common mistakes'. Select 'adult education' in the box that appears at the top.

4. Find more about your audience

As you can see in the picture above, this tool allows you to go deeper into the real-life benefits.

You just need to click on 'Real-life benefits' in the 'teach' menu.

But it doesn't end here. Another trick you can use to get to know your audience and their feelings better is using the 'Expand it' function.

Like I showed you before, you just need to copy a sentence from a previous output, paste it into a new text box, and expand it by clicking on the '+' that appears on the side.

Do it a couple of times and you might find yourself with ideas, phrases and feelings you hadn't thought of.

As you can see, this tool has a lot of potential. And this is just the beta version!

I can't wait to see how they develop it in the future.

7. Implement AI on what you already do

- **AI Tool:** multiple
- **Category:** task streamlining
- **What it helps you with:** get AI to work on the things you already to

Do you know one of the great things about AI?

It can take something we already do regularly and give you ideas to make it work better.

And I'm not just talking about marketing ideas.

In this section you will find a few ways you can use AI to help you improve what you already have and do in your business.

1. The first thing to mention is an AI tool called [Flair Ai](#), and let me tell you, if you have a lot of phone/online conversations with your customers, you need this.

It's based on a simple principle: conversations with customers are insanely valuable for business growth, yet very few people have the time to review them properly and get valuable insights.

That's exactly where Flai Ai comes in.

This tool helps businesses summarise conversations, get an overview of the most frequent topics, and find what needs to be improved in your products, so that you can have more happy customers and grow your revenue faster.

2. The second way AI uses what we already have to help us improve is through our most valuable asset: our teams.

[Glue](#) is a tool that helps people in teams connect better through AI.

How? It identifies who might be isolated and needs some help connecting better, measuring employee engagement.

Let's say two of your employees don't communicate much. This AI-powered tool finds the things these two people have in common, their shared interests will connect them better and make them more cohesive in their work.

And we both know that more cohesive companies grow faster and better.

Even better, Glue gives you measurable results for your budget! 

3. The third thing you can do to use AI to work with what you already have is something that would take a little more work, but in some cases could have a really high ROI.

Let's explain this with a real-life business example.

Job van der Voort, CEO and co-founder of Remote, trained AI for the specific needs of his company.

You see, he runs a platform for businesses of all sizes to hire and pay remote workers from anywhere. This business model involves employing people in dozens of countries. So as a business they need to be able to quickly respond to questions about the regulations in each of those locations.

That's why they trained an AI bot with country-specific expertise and local knowledge.

Their internal ChatGPT is a total wizard at knowing each country's specific laws, and now they don't need to waste hours digging through loads of boring paperwork to find the juicy bits about a particular country's laws anymore. They just type their question into their own internal tool and within seconds, they get a straight-up accurate answer.

Now, I understand this last "trick" is harder to implement, because you will probably need to hire an AI developer. But for many companies it would still be a no brainer for the ROI it generates.

This is exactly how AI is meant to be implemented: to take the tedious tasks off our shoulders and allow us to focus on the needle movers of our businesses.

8. Collaborate better with AI

- **AI Tool:** Albus
- **Category:** team management
- **What it helps you with:** collaborate more easily with your team
- **Link to website:** <https://www.springworks.io/albus/>

In the previous section I walked you through an AI tool called [Albus](#), and now I want to do the same with... well, [Albus](#)! Another Albus! 🤖

Yes, there is [another AI tool called Albus](#), and it can really change the way you and your team work.

So to help you clear the confusion between the two tools and help your team get more productive, today I'll walk you through [Albus](#) by Springworks.

First of all, what does it do for you? Albus allows you and your team to find information easier and faster, cutting all the useless time and convos we have in our teams.

This will help you collaborate and communicate better, and work more seamlessly.

This tool can be implemented in many ways, so let's take a look at it one by one.

1. Add it to Slack

When you add Albus to your Slack workspace it instantly provides personalised answers to your employees' questions. All you have to do is train it about your company's content and documents, which can be stored on platforms Google Drive, Notion, and many others.

First, you add your company documents to Albus, then your team can start asking questions directly in Slack. Albus will search through your company documents and deliver the most relevant answers in real-time.

As more people use Albus, it learns and improves its responses, becoming even more helpful over time.

This way the whole company saves a lot of time, because they can quickly get the information they need without having to search for the answer and wait for a team mate's response.

Albus also provides analytics on how your team is using this chatbot, like what are the frequently asked questions, mostly accessed documents, and so on.

2. Add it to Chrome

Related

Albus is also a Chrome extension! And a very useful one too. In fact it brings the power of GPT-4 into your browser.

Not only can it make your search experience faster, but it can also improve your writing.

When you're searching the web, instead of skimming through multiple websites to find answers, you can simply ask Albus a question, and it will provide you with 10 different references within his answer. Talk about saving time and effort.

Moreover, if you're on a webpage that contains the information you need but you're struggling to locate the juicy stuff, Albus can find the answer you need based on the content of the page.

This Chrome extension also offers the ability to summarise long content within seconds. If you're short on time or overwhelmed by too much information, simply

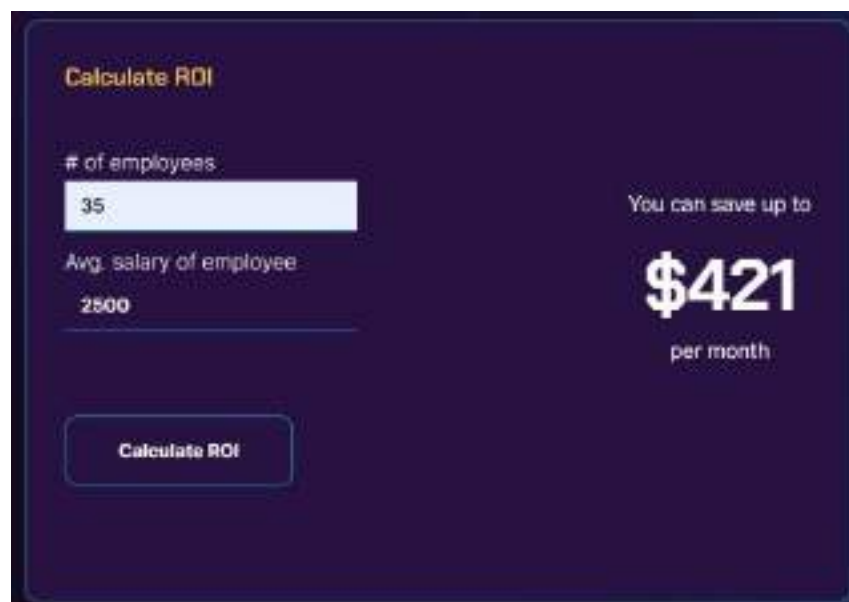

select the content, right-click, and let Albus summarise it for you. You can also ask Albus to paraphrase or regenerate the content using different writing styles.

Need help writing content? Albus got your back! Whether you need a quick reply to a client, help with questionnaires, or personalised writing for various purposes, Albus can generate content based on the context you provide and even adopt specific personas or writing styles.

Lastly, with the Albus Chrome extension you can write a prompt on the go. Let's say you have to write an email reply to your colleague... instead of writing the email in the email box, write a prompt, click on the Albus logo, and see the magic happen.

This tool is amazing, and like all amazing things it doesn't come for free. But the good news is that it's pretty cheap for now. In fact it only costs \$4.99/licence/month, and your team gets 100 questions per month.

[Their pricing page](#) also allows you to get an idea on the ROI you can get thanks to this tool (pretty awesome, right?):

The image shows a dark-themed web interface for an ROI calculator. At the top, it says "Calculate ROI" in orange. Below this, there are two input fields: "# of employees" with the value "35" and "Avg. salary of employee" with the value "2500". To the right of these inputs, it says "You can save up to" followed by a large "\$421" and "per month" below it. At the bottom, there is a button labeled "Calculate ROI".

Input	Value
# of employees	35
Avg. salary of employee	2500

Result: You can save up to **\$421** per month

9. Spend less time on Slack

- **AI Tool:** Spoke
- **Category:** team management
- **What it helps you with:** collaborate more easily with your team
- **Link to website:** <https://www.spoke.ai>

As business owners we're always trying to streamline the business operations and processes as much as possible.

As we've already seen, AI can help quite a lot with that.

Now I want to walk you through an AI tool that is here to revolutionise your productivity game! 🌟

So if you're tired of drowning in endless messages and notifications, and you want to slick up your team's workflow and save valuable time...

Then you'll love [Spoke.ai](https://www.spoke.ai)!

WHAT IS SPOKE.AI?

[Spoke.ai](https://www.spoke.ai) is designed to prioritise and summarise **Slack**'s notifications, bringing them together in one unified inbox.

You can say goodbye to notification chaos!

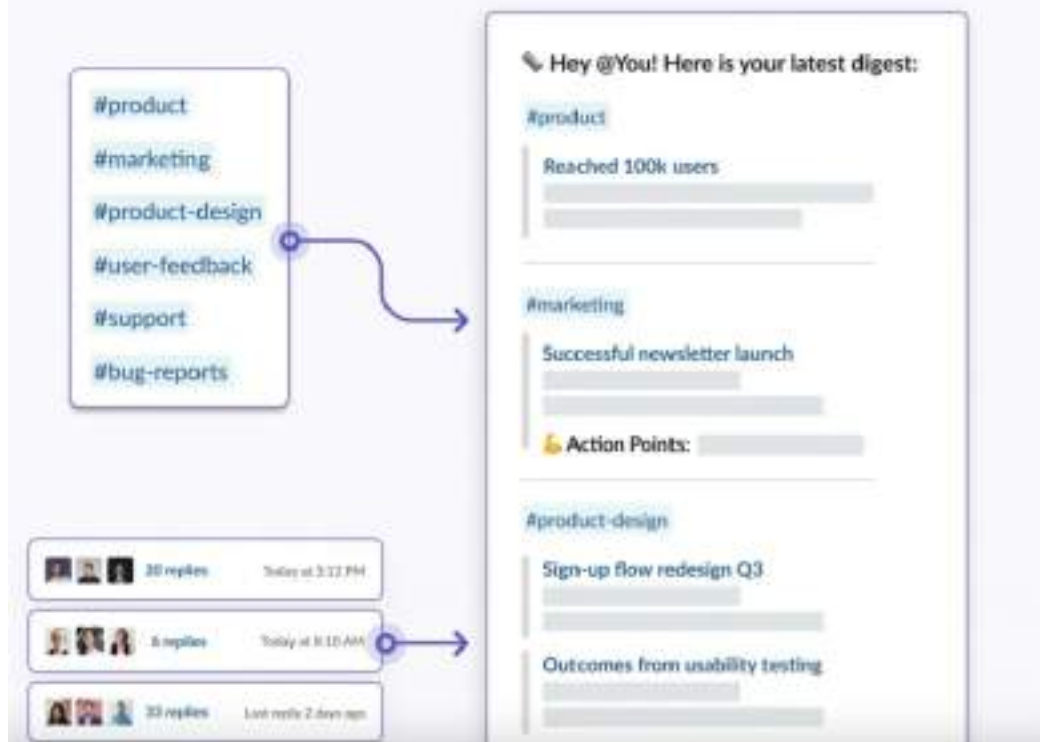

What it does

Boosts team communication;
Helps you stay organised and informed effortlessly;
Prioritises important topics so you can take action efficiently.

This is how it looks like:

AI-Digests provide personalized context

Create AI-Digests of your favorite channels, share with your team and protect focus time – free to use, directly within Slack.

Here's what it brings to the table:

 **Instant Context:** Say goodbye to endless scrolling and searching! Spoke.ai summarises conversations and topics across your channels, saving you valuable time.

 **Never Miss a Notification:** Spoke's unified inbox prioritises and summarises notifications from various tools, ensuring you never overlook an important update.

 **Effortless Follow-Ups:** Spoke.ai helps you track pending conversations and gently nudges for timely replies.

 **No Overload:** Spoke provides comprehensive context without overwhelming you with unnecessary details.

Stop wasting time scrolling through lengthy threads – get the key insights you need in a flash!

“Why should I choose Spoke.ai?”

 **Integration Made Easy:** Spoke.ai seamlessly integrates with popular tools like Slack. They're actively working on expanding their support for additional tools, and you can join their waiting list to stay informed about upcoming integrations.

 **Privacy and Security:** Your data is safeguarded with advanced encryption and strict access controls, so you can trust Spoke.ai with your sensitive information.

 **Customise to Fit Your Team:** You can tailor Spoke.ai to your team's unique needs, from AI algorithms to notification settings.

Instant context for all your busy channels & threads

Summarize on-demand to stay on top of busy channels and long discussions.

What about the price? 💰

Spoke provides "Summarise Slack", a **free** version offering AI-driven summarization. They also offer a "Priority Inbox" feature.

10. 4 ways to get unstuck through AI

- **AI Tool:** multiple
- **Category:** brainstorming
- **What it helps you with:** getting more ideas to improve what you produce

As a marketer, business owner or freelancer, there is a sensation you are probably familiar with.

That feeling of being stuck ☹️

You know when we can't come up with a fresh idea for a product, a campaign, a strategy for a launch...

Or maybe you plateaued in your growth...

Well, fear not, as AI can help you get unstuck in more ways than you may think. In this section, we will explore 4 **powerful ways AI can help you overcome obstacles and achieve your goals easier.**

1. Coming up with a new email strategy

Let's say you have been testing various email strategies but nothing seems to really work.

You have tried everything the gurus said, but still no results.

How do you get unstuck? Try writing a ChatGPT prompt outlined this way:

- Objective of the email strategy
- Context
- Target Market
- Unique Value Proposition of your product or service
- Details of the product or service
- Short list of the guidelines ChatGPT needs to follow for this strategy - like the number of emails, if you want it to write the sequence, etc.

It will take some time to write this kind of prompt, but it's definitely effective to overcome the plateau 📊

2. Improving images

Not sure about one of your pictures and you want to know how to improve it?

[Visual ChatGPT](#) can analyse your pictures and give you practical suggestions for improvements.

Cool, isn't it?

This tool connects ChatGPT and other Visual Foundation Models to allow anyone to send and receive images during chatting - which is something ChatGPT4 doesn't allow you to do, for now.

How does it work?

You just need to upload a picture and you will receive AI-generated insights on how to make that picture more appealing to your target audience (or for whatever need you have).

3. Ask Jeff Bezos some insights about your audience 📖

As you probably already know, Amazon is a great place to find useful information about your audience's feelings and thoughts.

This is an easy and fast way to get unstuck.

So, why not have ChatGPT “take” information from Amazon and give it to you in a fraction of the time? Here's how you do it:

- Identify the number 1 book or audiobook your avatar would read or listen to
- Ask ChatGPT to do a summary of the reviews of that book
- Ask ChatGPT to make a list of the top 10 problems that book helped overcome according to reviewers

4. Use scientific research to find new ideas and angles

When you're feeling stuck during the creation process, I have found diving into scientific research data really dig myself out.

Have you ever noticed there is research on virtually anything?

Yes, it's true... and it is funny - and VERY useful for us.

But since going through all the scientific research is very time consuming, we should take advantage of an AI tool called [Consensus](#).

This is a search engine that uses AI to extract and distil findings directly from scientific research.

With Consensus finding scientific data will be easy like a Google search.

11. Find persuasive data with AI

- **AI Tool:** multiple
- **Category:** research
- **What it helps you with:** streamline the research phase and find new angles

Do you use scientific research for your campaigns?

You read that right, we are talking about *scientific research*.

When you use this kind of data in your marketing and branding, be it on websites, landing pages, or videos, your claims are more credible and persuasive.

Because data is proof that something is true, that's why so many companies use it.

But... finding the right research paper and extracting the data you are looking for can be pretty hard and time-consuming.

Well, not anymore with AI! There are lots of tools that you can use today to streamline this process and use the right data in your marketing 

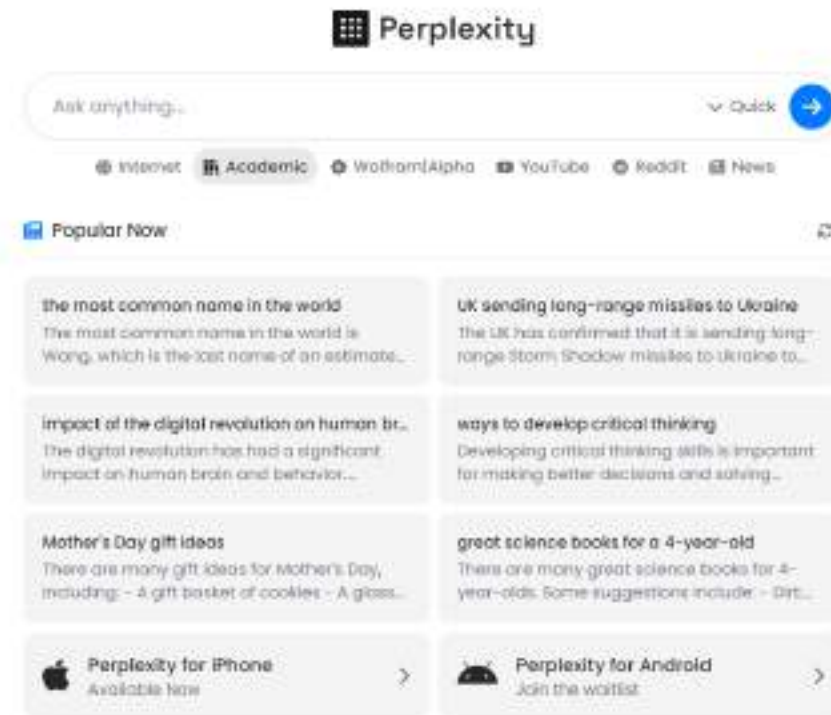

So in this section I am going to break down a process you can use to leverage AI to find the scientific data you need for your next strategy.

1. FIND THE RIGHT PIECE OF RESEARCH

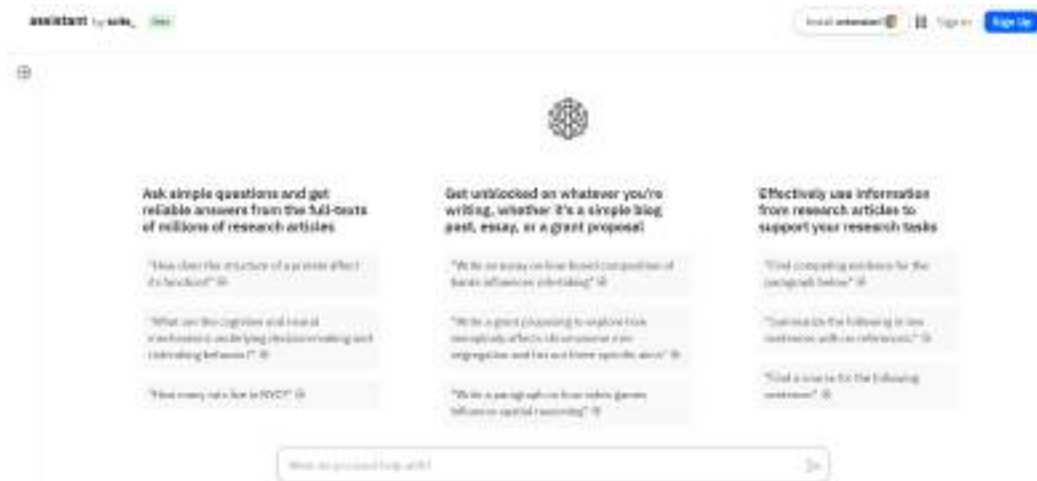

The first step is finding the right piece of research. While Google would help us really slowly with this, AI search tools can help you to get it done in a fraction of the time.

There are 3 AI tools I personally love:

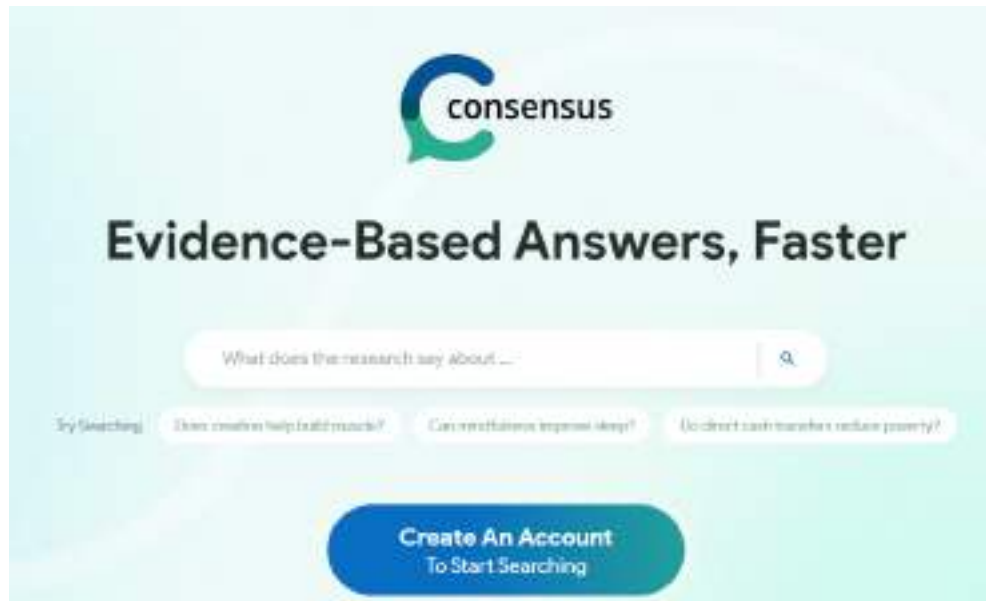

1. [Perplexity AI](#)

2. [Assistant by scite](#)

3. [Consensus](#)

These are the tools that could *possibly* replace Google search, according to experts.

Because they scour the internet and give a condensed summary of what they find in a digestible way, without you having to open dozens of tabs looking for the right information.

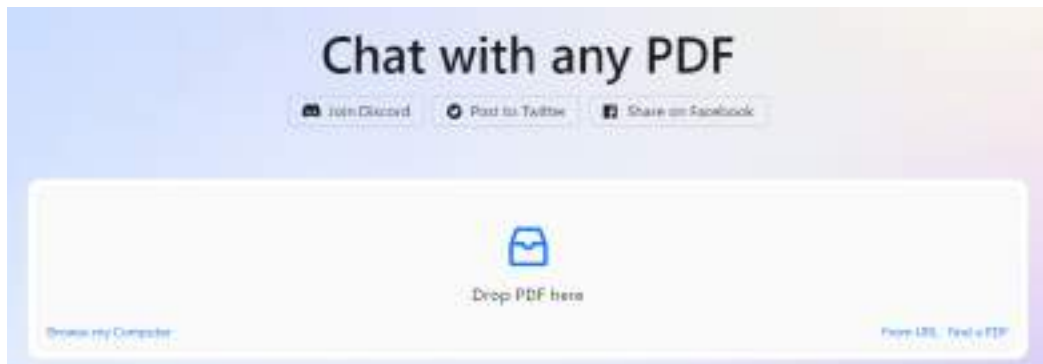

Since there is a lot of research on many topics, at this stage my suggestion would be to use all these tools and get as much information as possible – you can also take a look at the references these tools provide to get more in depth with the data. Then copy and paste the best findings into a Google or Word Document.

2. UNDERSTAND INFORMATION BETTER

Now you have in front of you a document that contains all the information you need. But the problems are:

1. you don't know which is the best data to use
2. the language probably isn't very simple to understand, as most research papers aren't very good at that

So how do we solve this? We turn the Google Doc into a PDF, and use AI tools like [ChatPDF](#) or [Humata](#) to... chat with the file, ask questions and understand the content better.

3. CREATE YOUR MESSAGE 🗣️

The third step is to take the information you gathered from the last two steps, and use ChaGPT to use it in your copy and marketing strategy in an effective way.

Here's a prompt you can use:

*Act like a branding and marketing expert, with decades of experience in the [niche].
I have found this useful piece of research: [insert piece of research].
Write a persuasive [type of copy] using this piece of data.*

If you don't know where to use the data you have found, here's another prompt you can use:

*I have found a piece of research that says [piece of data].
I want to use this data to promote my [type of products]. Where can I use it?*

12. Integrate AI into your browser

- **AI Tool:** Mano
- **Category:** AI Chrome extension
- **What it helps you with:** streamline your activities
- Link to website: <https://www.usemano.com/>

The more the AI world evolves, the more we all get used to speed, and we get lazier.

The fact is that today we can even cut the time of training ChatGPT and switching from tab to tab (from ChatGPT to the working tab).

To do that, all you need is a virtual “hand” that helps you with the tasks that you do on your browser.

This hand is: **Mano**. Pun intended.

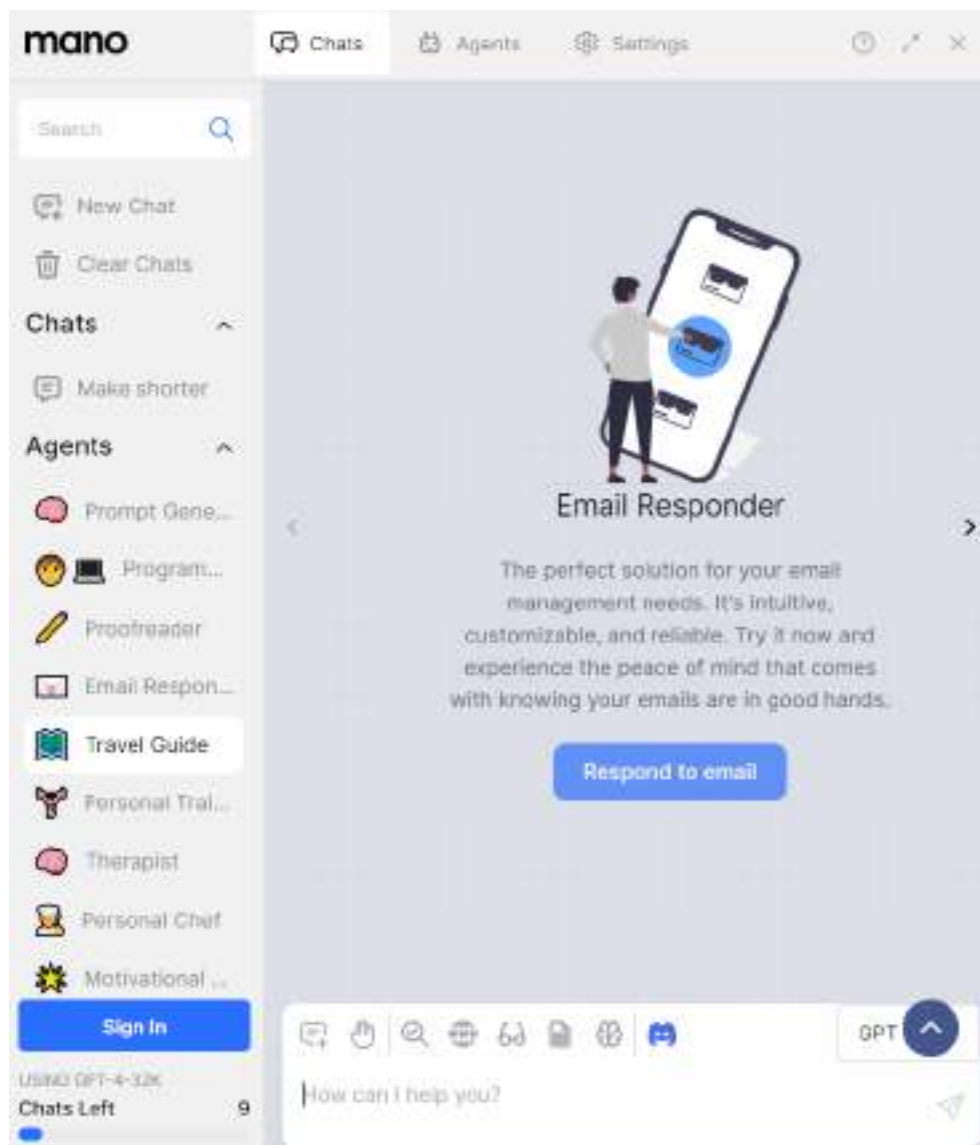

Which is a new AI tool launched in June 2023 by two guys from Amazon.

Curious to know how it works?

1. WHAT IS MANO?

Mano is an [AI Chrome Extension](#) that allows you to always have a ChatGPT-4 assistant on the side while you are working on the internet, responding to emails, reading articles, etc.

With this Chrome Extension on your browser, a hand will pop up on the right side of your screen, and this screen will show up:

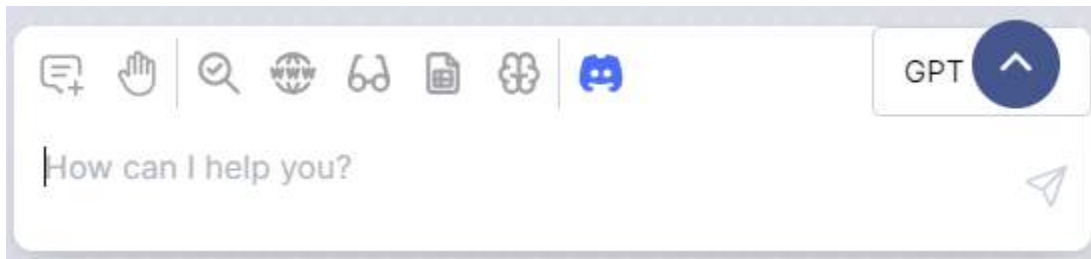

It uses GPT 4, and it can search the web, so it's updated with 2023 data.

This tool has the ability to read your screen, get the context of your request, auto-create prompts and answer your request much faster.

This way you will get high-quality output, and you won't have to copy and paste text into ChatGPT.

2. MANO'S FEATURES

Screen reading: Mano can read your screen. This means that you don't have to copy text and paste it into the OpenAI tab. This also means that it has context about your needs and requests.

A lot of the functions are based on this ability, like summarising.

Disclaimer: Mano doesn't work on all web pages. As I was testing it, I noticed that it works with web articles, blogs, social media platforms and email platforms (funny enough it doesn't work on Mano's website).

Summarise: you can ask Mano to summarise everything there's on the screen, or even just the text that you highlight with your mouse. Many times, 'Summarise' is the first thing that shows up when the Mano logo pops up, meaning that you can get a piece of text summarised with just one click.

Trace: let's say you ask Mano to reply to an email, but you're not sure about how it came up with that output. When you click on the Trace option, Mano shows you everything it did and breaks down the prompts that it created and used to accomplish the request

ChatGPT Agents: you can use and even create ChatGPT agents for you. In a few words, when AI Agents receive a request from you, they break it down into smaller tasks and get everything done by themselves, without you having to write more prompts. With Mano, you can get multiple AI assistants for all your needs: copywriting, programming, email responder, personal chef, therapist and so on.

3. IMPLEMENTATIONS FOR BUSINESS OWNERS AND MARKETERS

So now you might be wondering, 'ok, but how do I use it in my business?'

According to Mano's website, users are saving 73 minutes a day and feeling 3x more productive by not having to switch from tab to tab and by keeping focused on the same context. So unlocking insane focus mode is definitely something Mano helps entrepreneurs do. This is also because understanding articles, guides, reports and so on is much easier and faster.

Then of course, Agents play a big role in saving time. Setting a [new Agent according to your specific needs](#) takes 1, maybe 2 minutes, but helps you save a tonne of time every week. And you don't even have to write new prompts every time.

When you're having a conversation with one Agent, and you want to bring more context, you just have to select the text on the screen and it will automatically add on the chat.

My suggestion is that you get the free Chrome extension, play with it and see if it works for you. Who knows, maybe you will also get the paid option.

For any additional tutorial, check out [Mano's YouTube channel](#).

Final observation: in less than a couple of months this tool evolved a lot, [as you can see here](#), so I think we should really keep an eye on Mano and see what it will be able to do in the next few months.

13. Create your online course with AI!

- **AI Tool:** Eurekaa
- **Category:** online courses
- **What it helps you with:** brainstorm and design online courses
- Link to website: <https://eurekaa.io/>

If you're looking for an AI platform to help you brainstorm and design online courses, you'll love this section. 📖

Instead of spending countless hours behind the screen doing boring course research, you can get results in just a few seconds with [Eurekaa](https://eurekaa.io/). 💡

If you want to save time and create valuable content based on data driven insights and analytics, Eurekaa is the perfect tool to provide you with the information you need.

☀ Here are the main features of this platform:

1. Topic Discovery 🌐

Type in a general topic and explore over **297.000 courses and 600.000 categories**. Their vast database can help you find inspiration and identify the best topics for your course.

2. Fine-tune Your Search 🔍

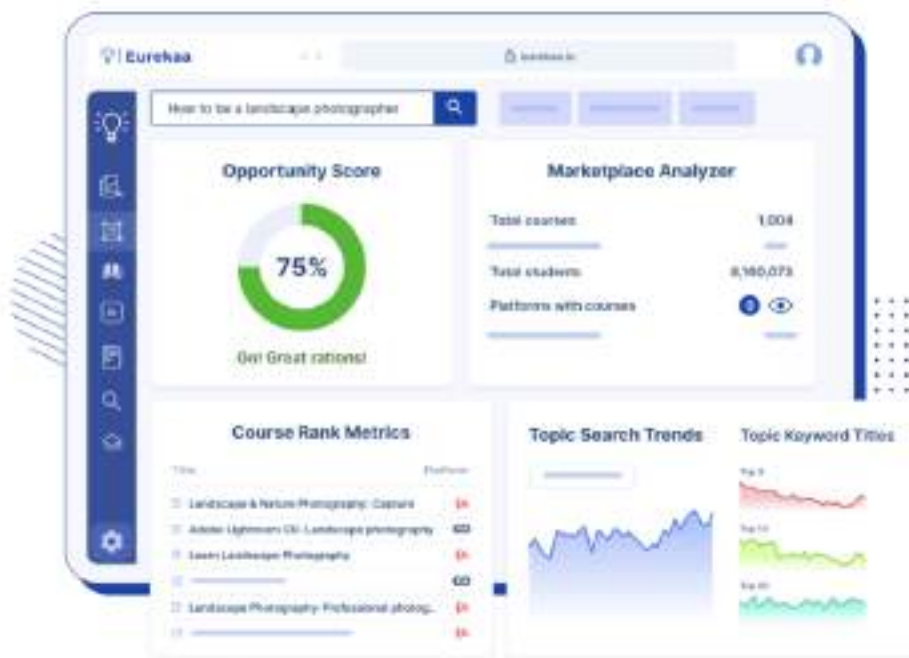

Select the topic, niche, rating, enrollment, or estimated earnings to find exactly what you're looking for.

3. Market Insights 📈

Eurekaa provides detailed market insights, showing the popularity and relevance of your chosen topic. This helps you understand the demand and see how you can expand and refine your ideas to better meet market needs.

4. Opportunity Scoring 🎯

Wondering if your topic of interest will be a hit or miss? Their algorithm combines enrollment data, course availability, and search trend to calculate your topic's success chances.

5. AI Gap Analysis 🤖

With their AI Gap Analysis feature, you can easily identify what's missing in existing courses and what additions could make your content more compelling. This feature helps you spot opportunities to differentiate your course and meet unmet needs.

6. AI Lesson Architect 🛠️

Eureka's AI Lesson Architect can assist you in generating various types of content, including outlines, introductions, descriptions, summaries, and chapters. If you already have some content, the Lesson Architect can automatically structure and format it, saving you even more time and effort.

7. AI-Assisted Idea Editor 🧠

This feature provides you with an AI writer that assists you in developing your ideas. In the editor's modular UI you can drag and sort key ideas easily and toggle between outline, document, and PowerPoint modes.

8. Optimise Your Title 🛠️

Make your content discoverable with their **Title Rank** feature, which provides insights into the search volume and competition for your chosen keywords.

Eurekaa offers courses in multiple languages, including English, Chinese, Dutch, German, Japanese, Portuguese, Romanian, and Russian.

💰 The platform costs **\$7.99 per month (billed annually) for the Researcher subscription**, and **\$12.99 per month for the Creator plan**.

Both plans include the Course Comparison Engine, Topic Viability Scoring, AI Gap Analysis, Platform Research Engine, Book Search Engine, Content Library, and Keyword Planner.

The Creator plan also offers additional AI features such as the **Doc Editor with AI-Assist** and the **AI Lesson Architect**.

They offer a **FREE** trial, so it's definitely worth trying if you're interested in creating online courses or books.

The screenshot displays two pricing plans side-by-side. The 'Researcher' plan is on the left, and the 'Creator' plan is on the right, which is highlighted with a 'MOST POPULAR' badge. Both plans are priced at \$7.99 and \$12.99 respectively, billed annually. Each plan includes a 'Start your trial' button. The 'Researcher' plan focuses on 'Idea validation, market research and content planning' and includes features like Course Comparison Engine, Topic Viability Scoring, (AI) Gap Analysis, Platform Research Engine, Book Search Engine, Content Library, and Keyword Planner (60 credits mth). The 'Creator' plan focuses on 'Plan AND bring your ideas to life; 10x your output with AI' and includes all the features of the Researcher plan plus Doc Editor w/ AI-Assist and (AI) Lesson Architect™.

Plan	Price	Billing	Key Features
Researcher	\$7.99	/mo billed annually	Idea validation, market research and content planning; Course Comparison Engine; Topic Viability Scoring; (AI) Gap Analysis; Platform Research Engine; Book Search Engine; Content Library; Keyword Planner (60 credits mth)
Creator	\$12.99	/mo billed annually	Plan AND bring your ideas to life; 10x your output with AI; Course Comparison Engine; Topic Viability Scoring; (AI) Gap Analysis; Platform Research Engine; Book Search Engine; Content Library / Workspace Tags; Keyword Planner (90 credits mth); Doc Editor w/ AI-Assist; (AI) Lesson Architect™

14. Get everything you need from your videos

- **AI Tool:** transcript.lol
- **Category:** transcript generation
- **What it helps you with:** get all the info you need about a video
- Link to website: <https://transcript.lol/>

This tool allows you to paste the URL of 1500+ platforms, including TikTok, Instagram, LinkedIn, TED Talks, Apple Podcasts, YouTube, and more, and receive the transcript of the content.

And more than offering a transcript, you also get access to some cool AI features!

Here's what you get with transcript.lol:

 **Relevant sections:** Easily find sections where specific topics were discussed.

 **Contextual Q&A:** Receive answers from the transcript, with precise references using their "Ask ChatGPT" feature.

 **Speaker identification:** The AI automatically assigns labels to multiple speakers, so you know who said what.

 **How it works:**

1. Add the public URL of video or audio, OR upload a file.
(The maximum duration for the FREE trial is 30 minutes)
2. Select the output language.
3. Choose whether to make the transcript Private, Public or Unlisted.
4. Select which AI features you want to use (including Summaries, Topics, Blog Posts, LinkedIn Posts, Quizzes, and more.)

AI FEATURES TO GENERATE

▼

Transcribe

I decided to test this tool using one of Darius' YouTube videos: *"How to Effectively Learn AI in 2024 (4-Step Guide for Beginners)"*.

In just around 2 minutes, it generated an accurate transcript.

Next, I explored its AI features: I extracted the "Topics".

And it showed me the exact topics that were discussed in the video: *"AI for Small Businesses", "AI Tools", "Learning AI", "Community for AI Beginners", and "AI Basics: Machine Learning, Deep Learning, LLMs"*.

00:00 - 09:10

AI for Small Businesses

AI Tools

Learning AI

Community for AI Beginners

AI Basics: Machine Learning, Deep Learning, LLMs

Then, I decided to “Generate Tweets”.

And here are the tweets it generated:

Tweet 1: 🚀 Are you a small business owner ready to level up with AI? Discover the 80-20 of AI tools that yield a high ROI on your time. No tech expertise required! #AIforBusiness #SmallBusiness #Entrepreneur

Tweet 2: 🔍 Step 1: Identify the goal of your AI journey. What area of your business do you want to automate with AI? This step is crucial for achieving results. Learn more in this video. #AIJourney #BusinessAutomation #AIforSmallBusiness

Tweet 3: 🧠 Step 2: Understand how AI really works. From machine learning to deep learning, get clear on the basics of artificial intelligence. Watch the video to learn more. #ArtificialIntelligence #MachineLearning #DeepLearning

Tweet 4: ⚙️ Step 3: Find the right AI tool for your business. No need to become a tech expert. Discover easy-to-use AI tools that can save you time and streamline your operations. Watch the video to learn a no-code three-step process. #AITools #NoCodeAI #TimeSavingTools

🤖 I also wanted to try the feature “Generate Blog Post”, and I must say, it did a pretty good job.

Here's some lines it generated:

For small business owners, the thought of diving into the world of AI can be daunting. The good news is, you don't need to be a tech expert to leverage AI for your business. In this blog post, I'll guide you through a four-step process to learn AI effectively and efficiently.

Step 1: Define Your AI Goals

Before diving into the world of AI, it's crucial to identify the specific areas of your business that could benefit from automation and AI integration. Consider the following questions:

- What tasks do you want to automate with AI?
- Do you want to streamline content creation, copywriting, video editing, or other specific areas of your business?

Having a clear understanding of your AI goals will set the foundation for the next steps in your AI journey.

While it did misspell some words, like the name of certain AI tools, it provides a good starting point for a future blog post.

Another AI feature is the ability to create quizzes to engage your audience. From the 9-minute video I selected, it generated a 6-question quiz.

1. What is the 80-20 of AI according to the speaker? (00:01:00 - 00:01:30)

- ☐ Learning how to build an AI robot
- ☐ Understanding machine learning, deep learning, and LLMs
- ☐ Tools that are easy to learn, accessible to everyone, and yield a high ROI on time
- ☐ Becoming a tech nerd

2. What is the first step the speaker suggests for learning AI effectively? (00:01:30 - 00:02:00)

- ☐ Learning how to use AI for small business owners
- ☐ Understanding how AI really works
- ☐ Identifying the goal of your AI journey
- ☐ Becoming a tech expert

3. What are the 3 terms that the speaker suggests understanding to learn AI effectively? (00:02:00 - 00:02:30)

- ☐ Machine learning, deep learning, and LLMs
- ☐ Artificial intelligence, machine learning, and deep learning
- ☐ AI tools, tech expertise, and AI resources
- ☐ Data analysis, pattern recognition, and decision-making

4. According to the speaker, what is the importance of finding the right AI tool? (00:02:30 - 00:03:00)

- ☐ To become a tech expert in AI
- ☐ To build and scale a business effectively
- ☐ To save time while working with Google tools
- ☐ To learn how to work with AI tools and codes

Pricing

Transcript.lol offers both **Personal plans** and **Business plans**.

The **Starter Plan** is priced at **\$10 per month** and allows you to generate **300 minutes** per month. You also get unlimited questions and access to over 1500 services.

The Pro Plan increases the monthly minutes to 800 and costs \$25 per month, while the Elite Plan offers 1800 minutes for \$50 per month.

However, you have the option to try this AI tool for **FREE**.

Starter

Great if you deal with media content occasionally
