

Opportunities of Multimodal AIs

For Architects & Interior Designers

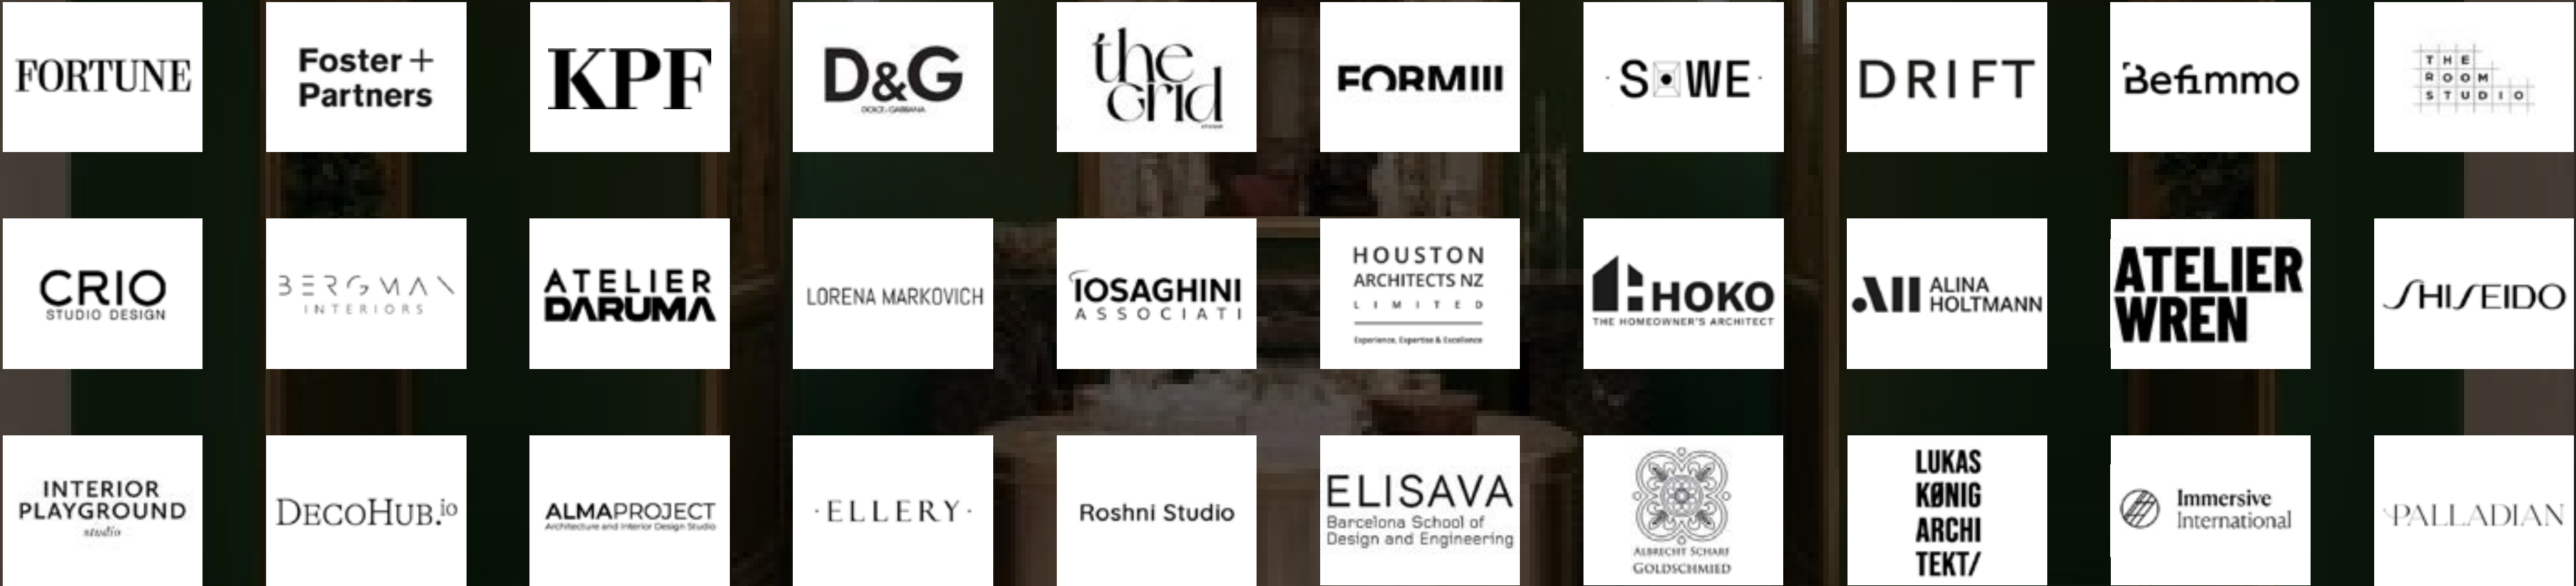

2025

AI hub

AI hub

Our Clients

Proudly working with over *50 top Architectural and Interior Design* practices globally

AI hub

AI Hub is a *human lead ecosystem* of AI enabled designers who drive the next revolution in the Architecture & Interior Design industry.

AI Hub *School*

- Public & private trainings
- Learning platform

AI Hub *Studio*

- Architecture & Interior design services
- Immersive experience & spatial experience design

AI Hub *Platform*

- An architecture and Interior design focused cutting edge AI platform

AI Hub *Accelerator*

- Business growth programme enabled with AI for creative companies.

AI hub
School

AI Hub School

AI Hub has trained over **2,000**
Architects and Interior Designers
globally.

“ *The workshop exceeded my expectations! AI Hub showcased AI’s full potential in design, saving me countless hours. It will definitely transform how I approach projects.*

Naz Ricketts | Interior Designer

”

2025

PRIVATE TRAINING STRUCTURE

+ 8 Hours total	+ In-person or remote
+ Full conceptual design	+ 3D to render
+ Sketch to render	+ Render modification
+ Render enhancement	+ Material palette design
+ Custom style tuning	+ Working on real projects

Including in the package:

- + 1 Hour of consultation after workshop

Explore the **most practical** courses in your niche!

Architecture & Interior | Fashion Design | Film Making | Marketing | Creative Direction |
Product Design | Graphic Design | Web Design | Photography

Creative Self-Portraits with AI

A course by Amir Hossein Noori

With AI, you can direct stunning self-portraits or appear alongside your favourite celebrities, all without any previous experience

BUY FOR £50 £39.90

Intro to AI Creative Direction

A course by Hugo Barbera

An intense shortcourse on Creative Direction with Midjourney!

WATCH FOR FREE

Midjourney for Designers

A course by Amir Hossein Noori

A compelling shortcourse on becoming a pro with Midjourney as a Designer!

WATCH FOR FREE

AI Advanced Workflows For Architects & Interior Designers

A course by Amir Hossein Noori

An AI Materclass in realising the most sophisticated architectural concepts via Midjourney and Stable Diffusion.

BUY FOR £120 £79.90

Mastering AI Fashion Editorial Photography

A course by Hugo Barbera

A Masterclass on Fashion Editorial Photography that could get you on magazines like Vogue!

BUY FOR £120 £79.90

Creative Coding using ChatGPT

A course by Joshua Vermillion

Creating Dynamic Art via Creative Coding with Chat GPT's Powerful LLM

WATCH FOR FREE

Architectural Storytelling with Midjourney

A course by Joshua Vermillion

An AI masterclass on designing and curating extraordinary spatial concepts to tell the most sophisticated stories from architecture and place-making

BUY FOR £120 £79.90

The AI for Architects; rules of engagement

A course by Ismail Seleit

Gain control over your architectural AI workflow with Stable Diffusion.

WATCH FOR FREE

Reprogramming Creativity; AI Design Without Limits

A course by Ismail Seleit

An intense masterclass on mastering Stable Diffusion as an Architect!

BUY FOR £120 £79.90

Creative Direction with AI: Mood Board Innovation

A course by Ricardo Orts

An advanced course to master how to use AI to create moodboards and direct your creation process to impress clients.

WATCH FOR FREE

Creative Direction with AI: Ad campaign

A course by Ricardo Orts

A masterclass on running a complete ad campaign using AI tools Like Midjourney, Runway and Magnific!

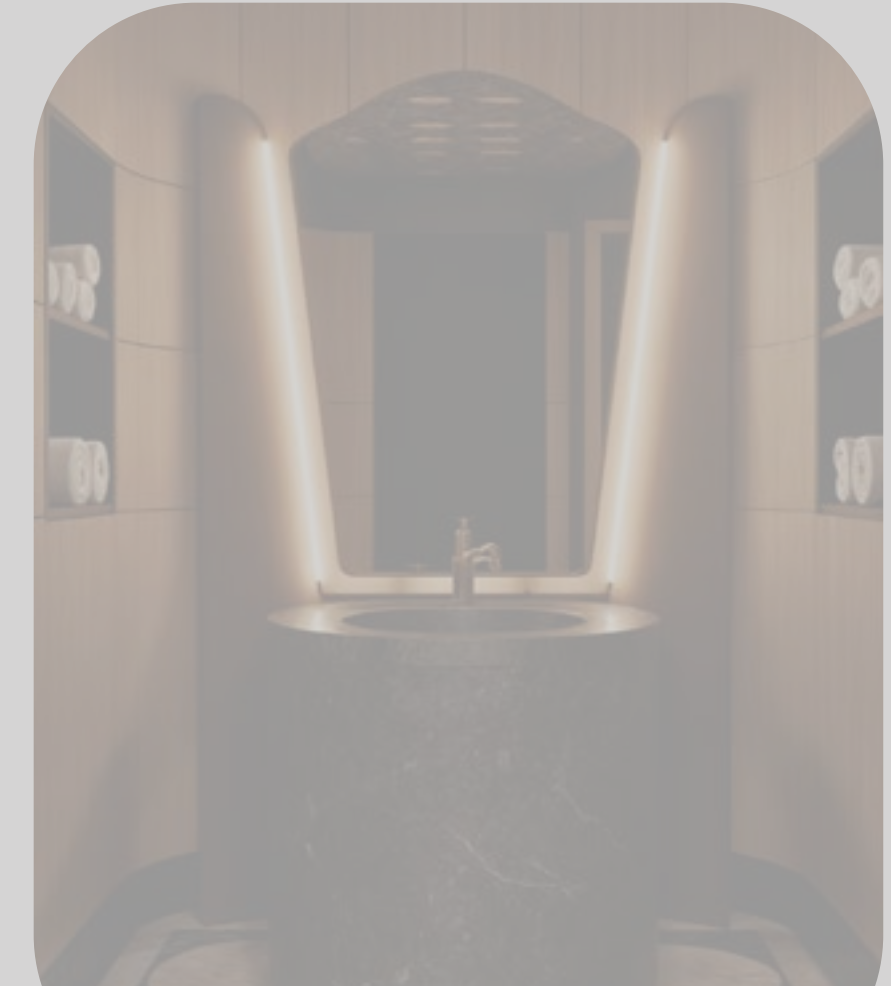

BUY FOR £120 £79.90

AI hub
Accelerator

AI Hub Accelerator

AI is a powerful technology,
helping humans focus on the most
important aspect of projects.

AI Hub growth team ensures your
company harnesses the full potential of
AI, driving innovation and maximising
impact and financial growth.

Culture Embedding

AI-driven change can be challenging, but our *transformation specialist* focuses on what matters most: *supporting the people on the ground* to ensure a smooth and successful transition.

Let's start your transformation journey together.

Chapter 01

Flux Kontext

3D to Render

Prompt

straight timber flooring. a high-end render of a well lit kitchen with soft glow and subtle grain and texture. morning light. marble back in kitchen. straight linear parquet flooring boards. bowl of fruits on the kitchen island. royal green cabinet colour. modern english kitchen.

2025

Output

AI hub

3D to Render

Prompt

Turn this raw 3D model of into a high-end render visual. Do not change any details and keep the geometry consistent. dim lighting. evening lights. Blurred moving person in the scene.

2025

Output

AI hub

3D to Render

Prompt

High-end render of a bathroom with luxury bathtub in marble. Marble details. high-end timber shelves. Washed out render style.

2025

Output

AI hub

Render view generation

Prompt

chnage the view angle
to side angle view

Output

Render view generation

Prompt

Change the view to
flat view elevation
facing the arched
windows

Output

Render view generation

Prompt

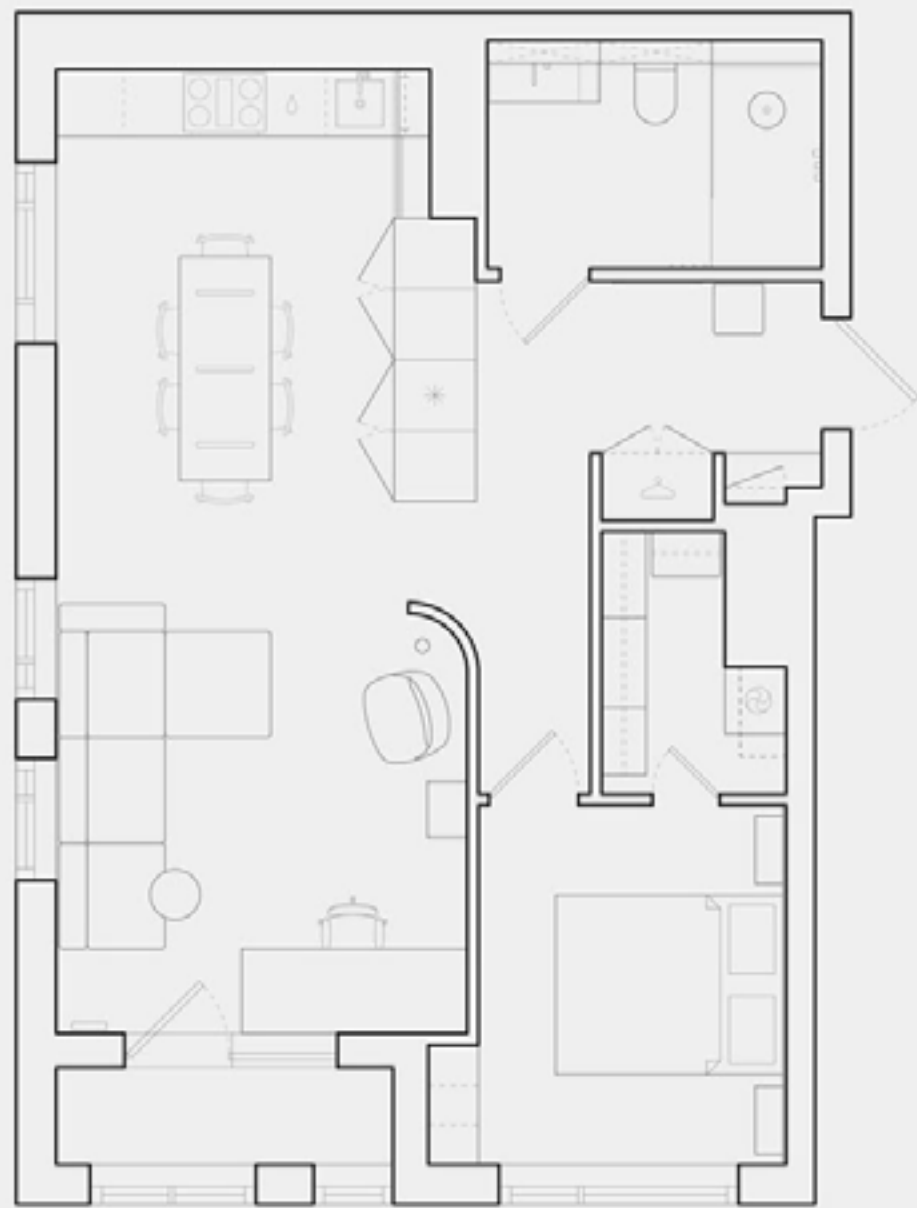

Remove all furniture

Output

Floorplan Retexture

Prompt

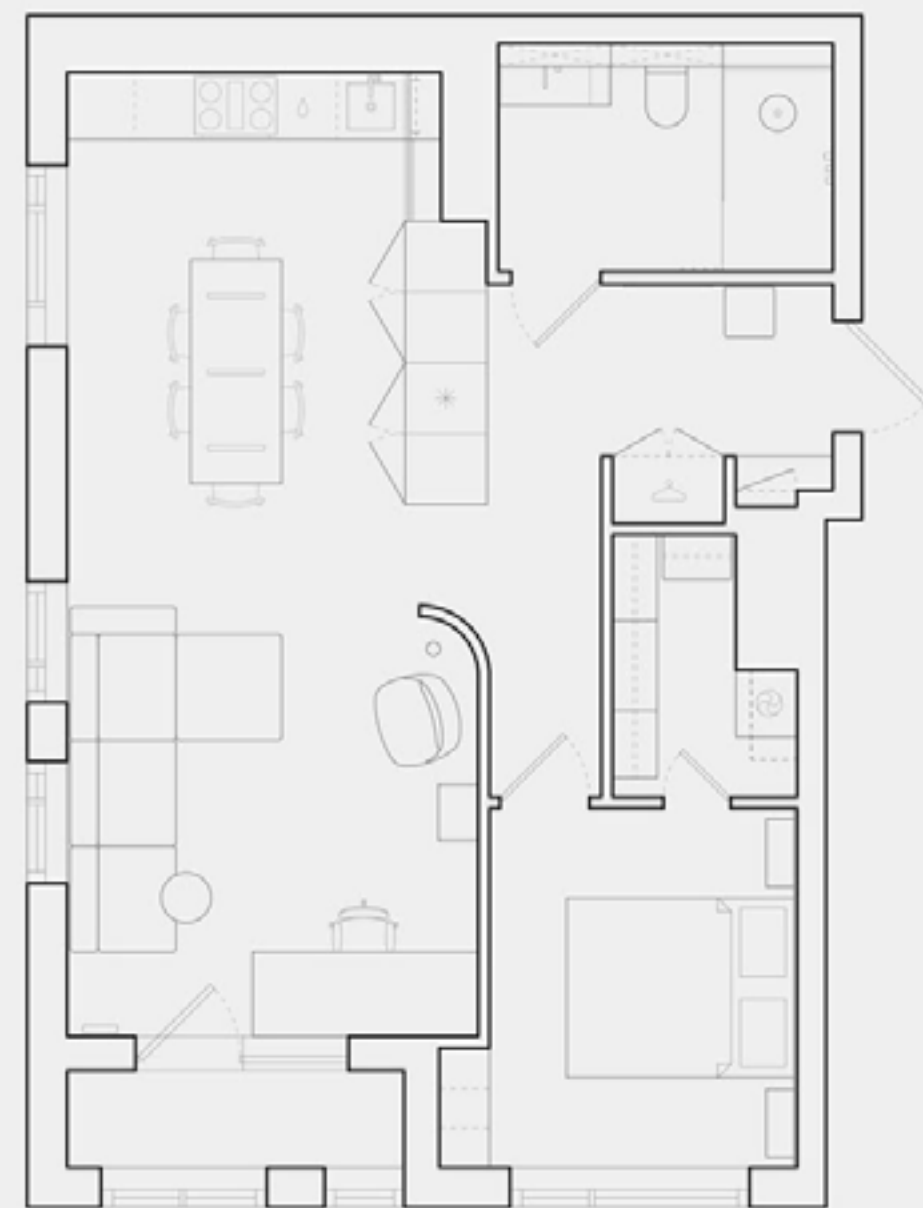

Ultra realistic style
floorplan drawing.

Output

Floorplan Retexture

Prompt

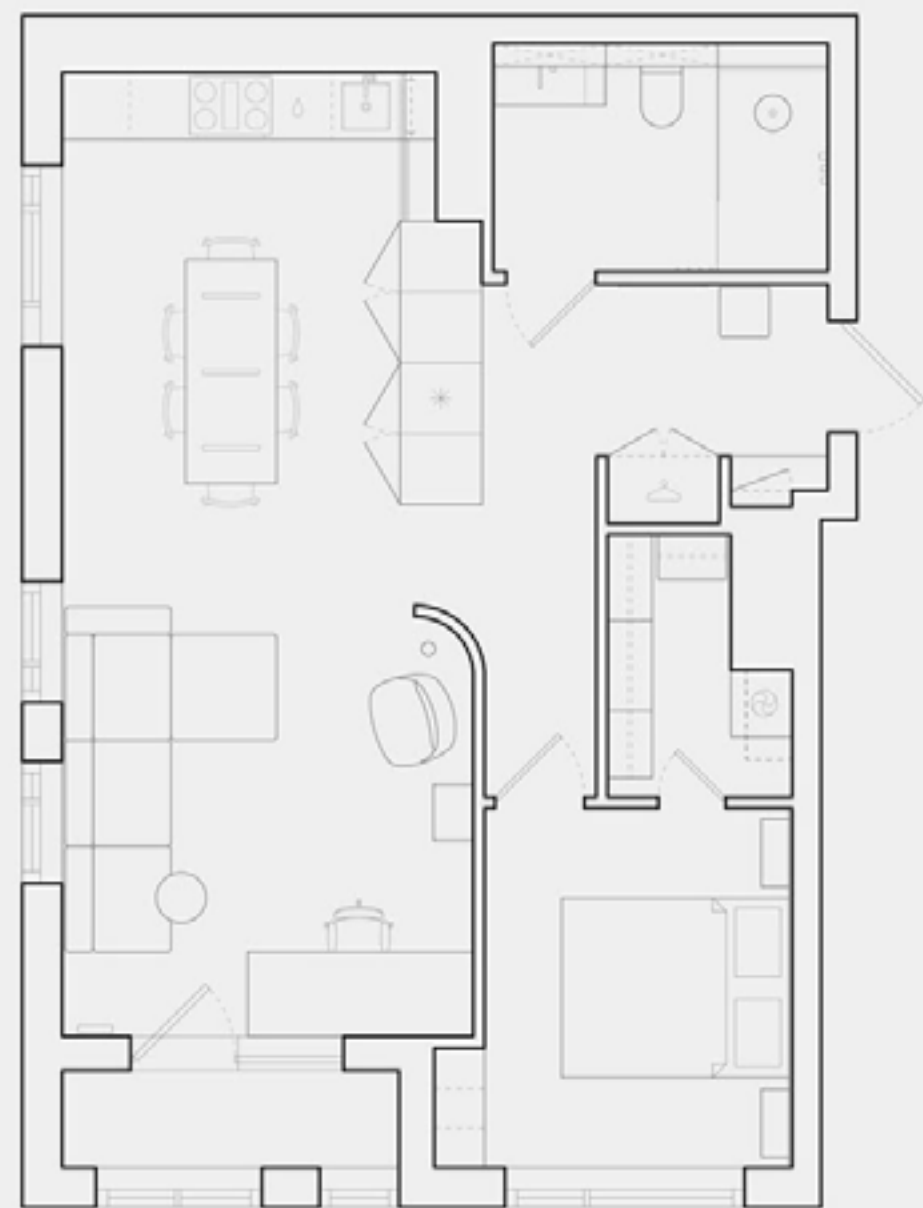

A physical miniature model of the floorplan on table lying on table. Studio photography. Studio lighting. Hand picking details. No zoom. Person touching the model. White platform. Real style. Real miniature furniture. Minimalist. Impressive miniature models.

Output

Floorplan Retexture

Prompt

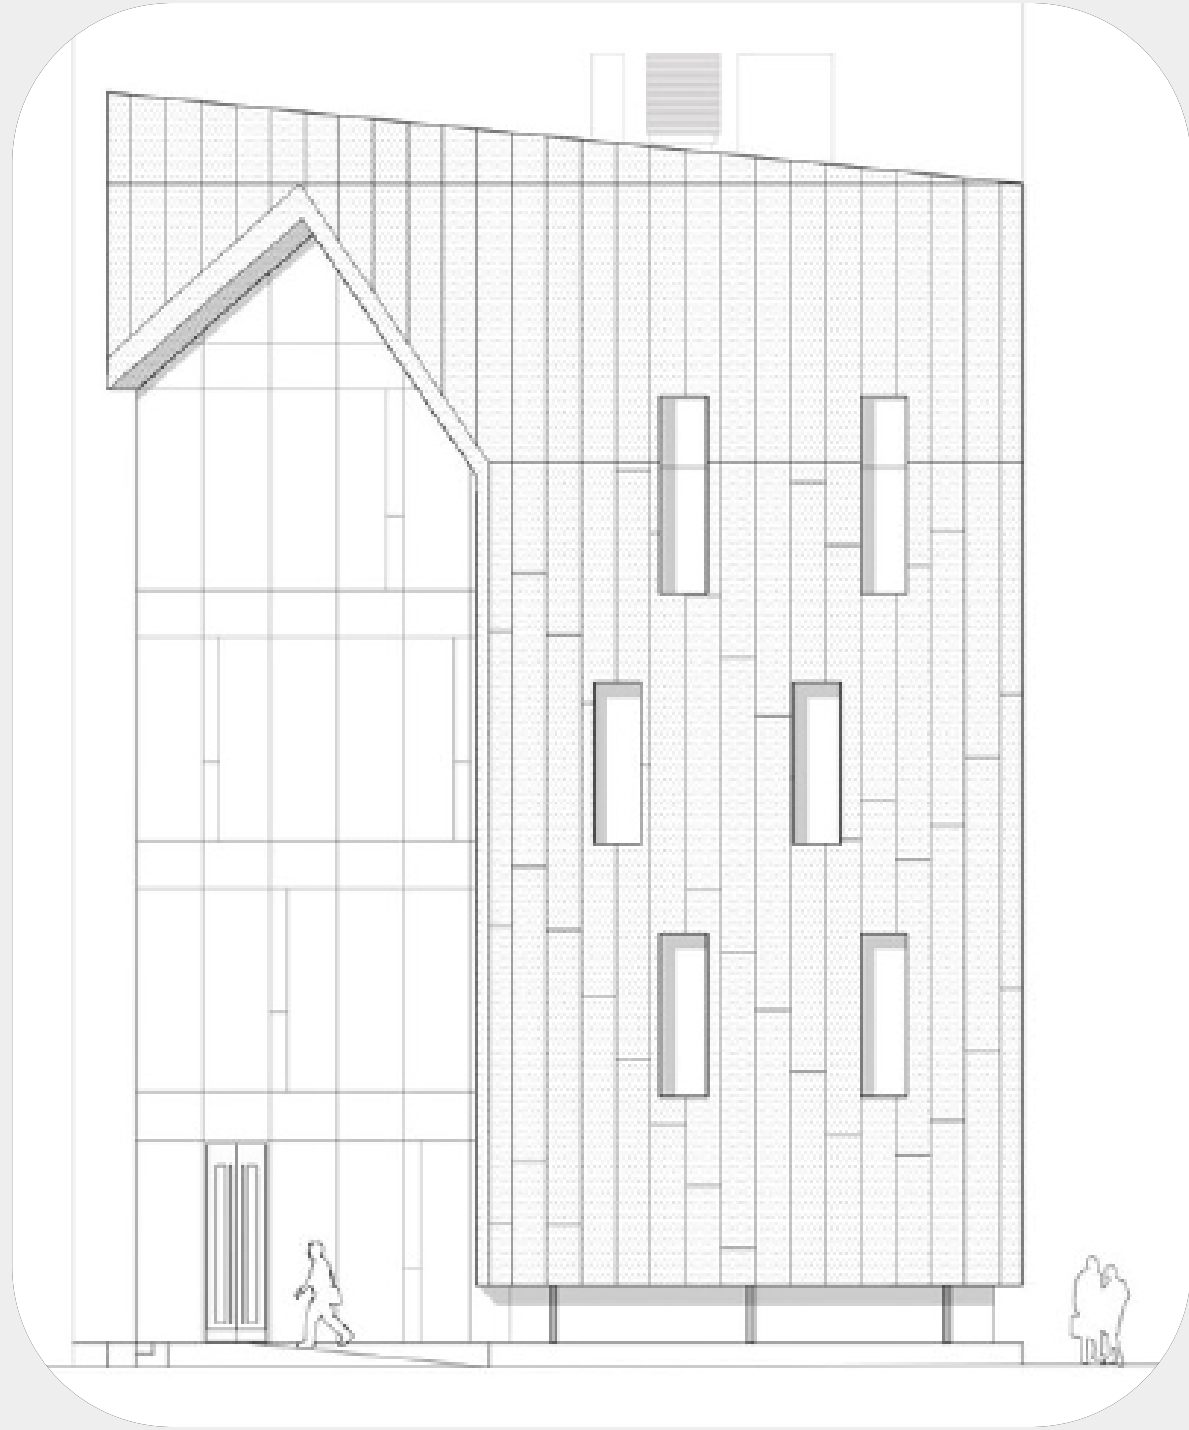

Hologram 3d style of the model presented at high-tech futuristic event. People looking at the hologram which is projected in front of them.

Output

CAD to3D

Prompt

Render this drawing in textured style. Don't change any details of the drawing. make it look like a photoshoped elevation drawing. The materials are [specify materials], and the mood is [describe mood]

2025

Output

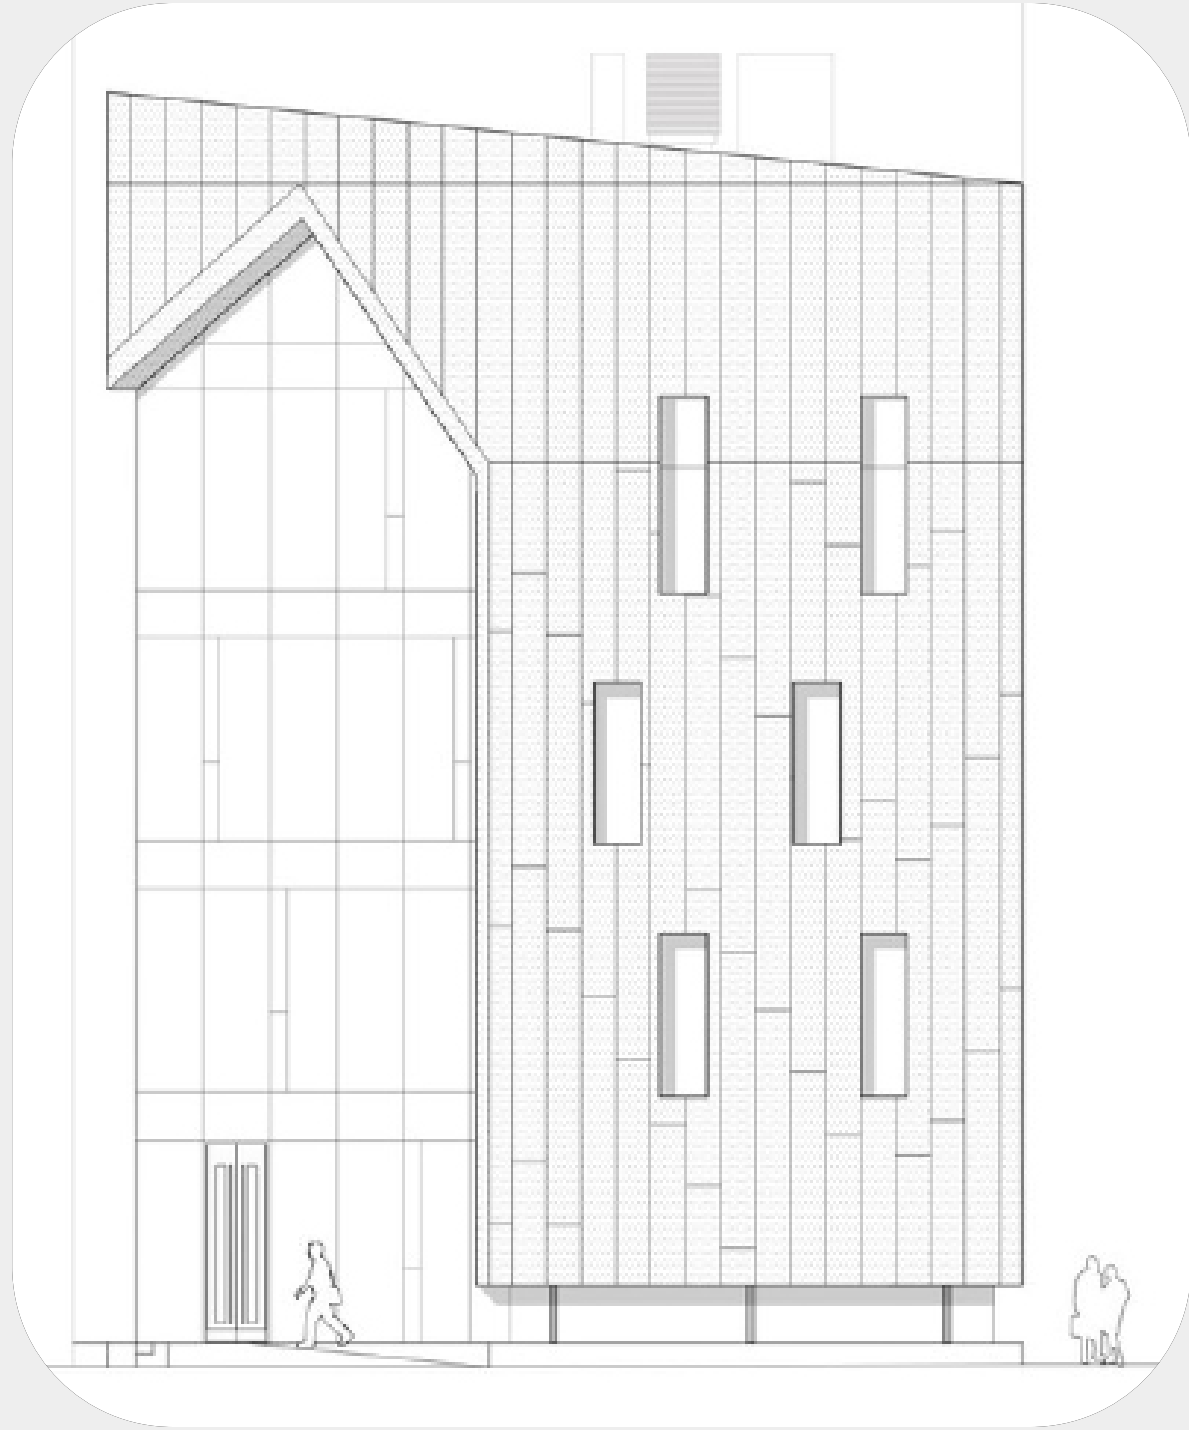

* The accuracy of the results depend on multiple factors, including the complexity of the input image and the angle.

AI hub

CAD to3D

Prompt

Render this drawing in textured style. Don't change any details of the drawing. make it look like a photoshoped elevation drawing. The materials are [specify materials], and the mood is [describe mood]

2025

Output

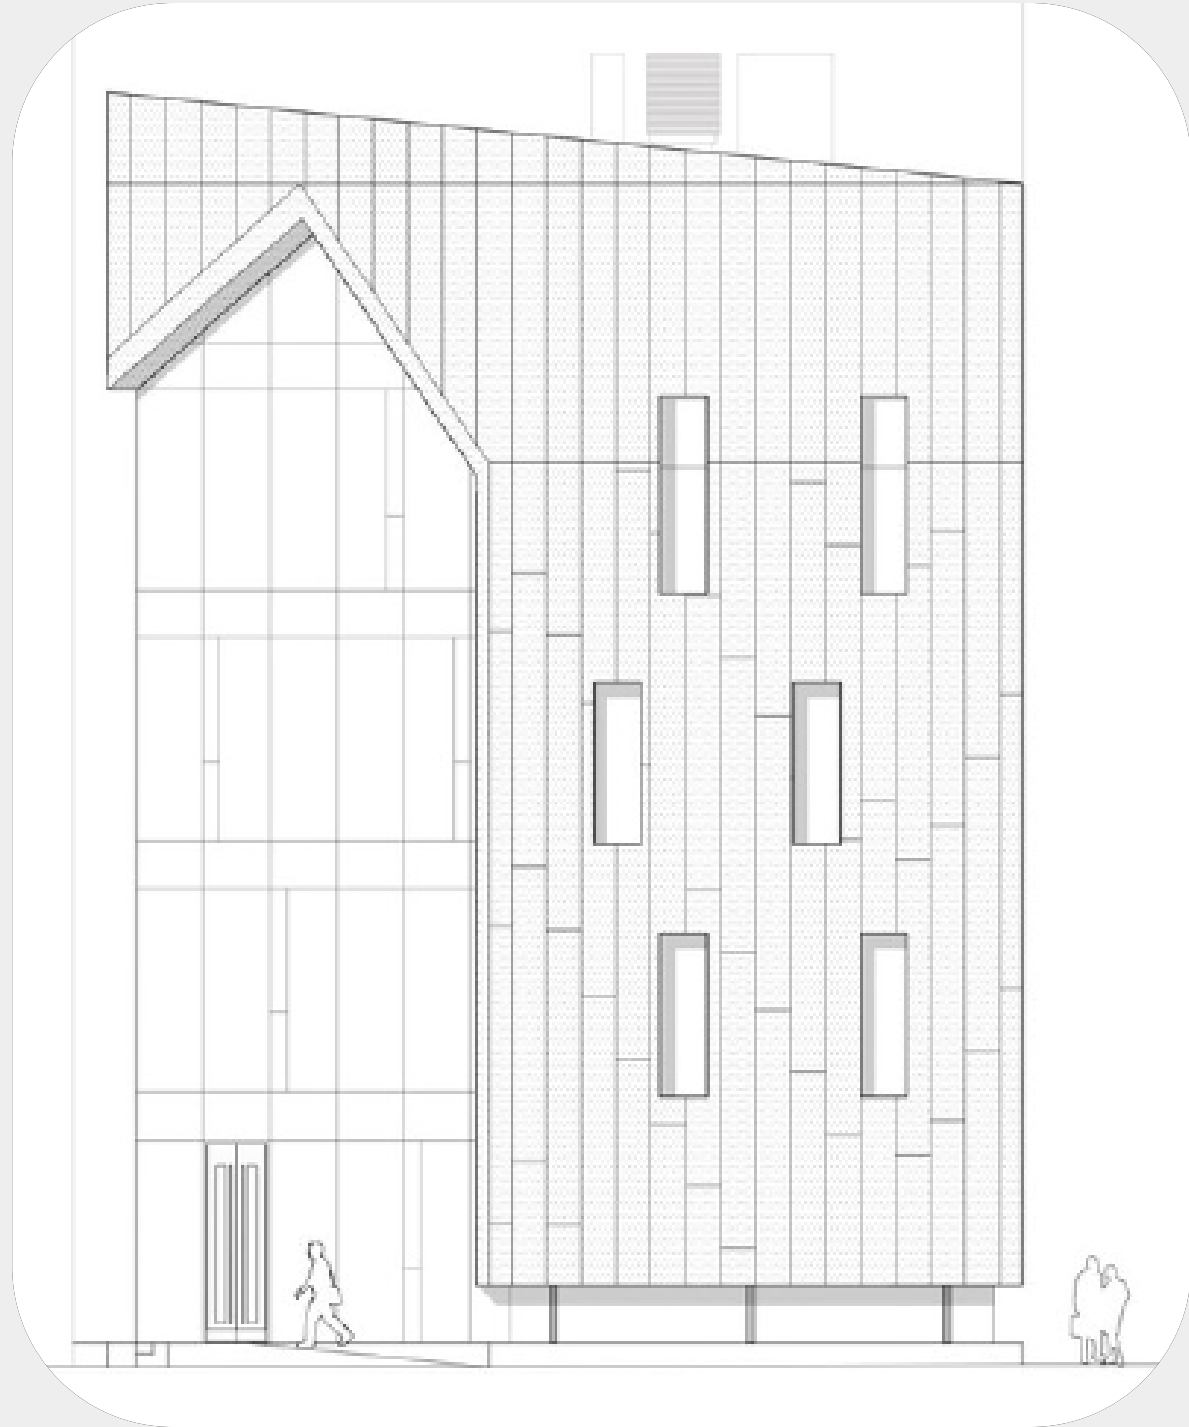

* The accuracy of the results depend on multiple factors, including the complexity of the input image and the angle.

AI hub

CAD to3D

Prompt

Render this drawing in textured style. Don't change any details of the drawing. make it look like a photoshoped elevation drawing. The materials are [specify materials], and the mood is [describe mood]

2025

Output

* The accuracy of the results depend on multiple factors, including the complexity of the input image and the angle.

AI hub

Chapter 02

Chat GPT

3D to CAD

Prompt

Create 2D flat elevation CAD drawing of this view.
There must be no sense of depth in the 2D cad drawing and no perspective lines are allowed.

Output

* The accuracy of the results depend on multiple factors, including the complexity of the input image and the angle.

PNG

Portable Network Graphic

PNG is a raster graphic data storage format that uses lossless compression algorithm to Deflate. PNG was created as a free format to replace GIF. PNG supports three main types of raster images: grayscale image, a color indexed image and the color image. PNG format store...

[more info](#)

DXF

Autocad Drawing Exchange

This format is used for exchanging graphics data between SAPR programs. It was initially created for AutoCAD in 1982. It contains information regarding vector graphics in binary or ASCII. It's used as an open alternative to the closed DWG format.

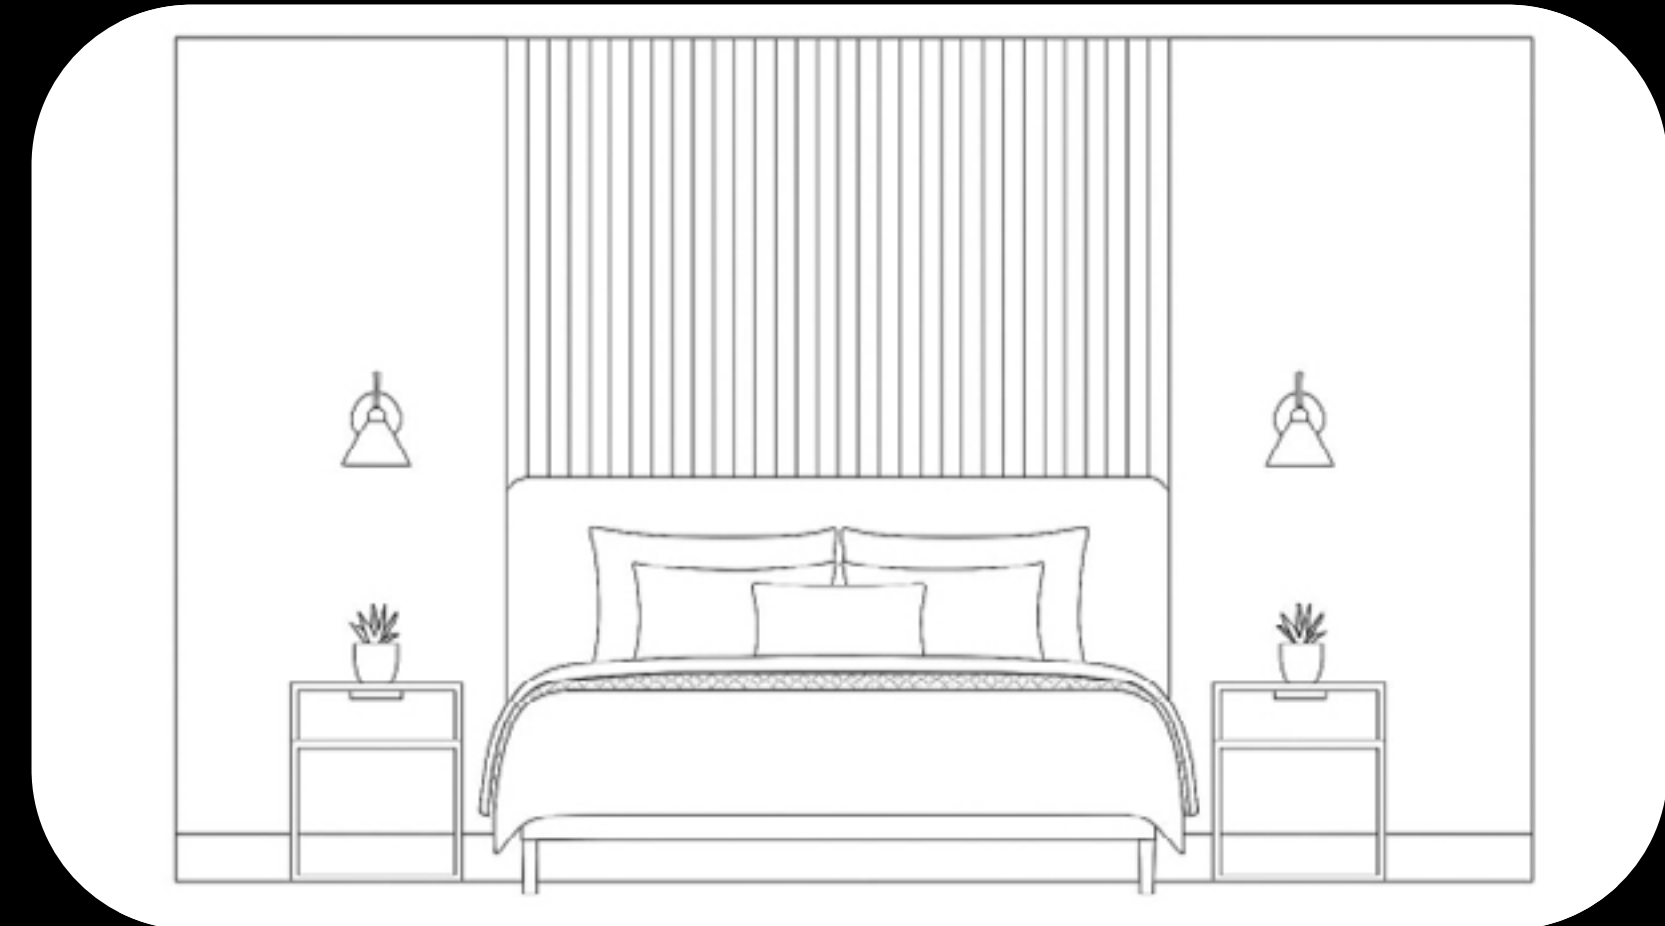

3D to CAD

Prompt

Create 2D flat elevation CAD drawing of the wall behind the bed, with the view facing the bed front. There must be no sense of depth in the 2D cad drawing and no perspective lines are allowed.

Output

* The accuracy of the results depend on multiple factors, including the complexity of the input image and the angle.

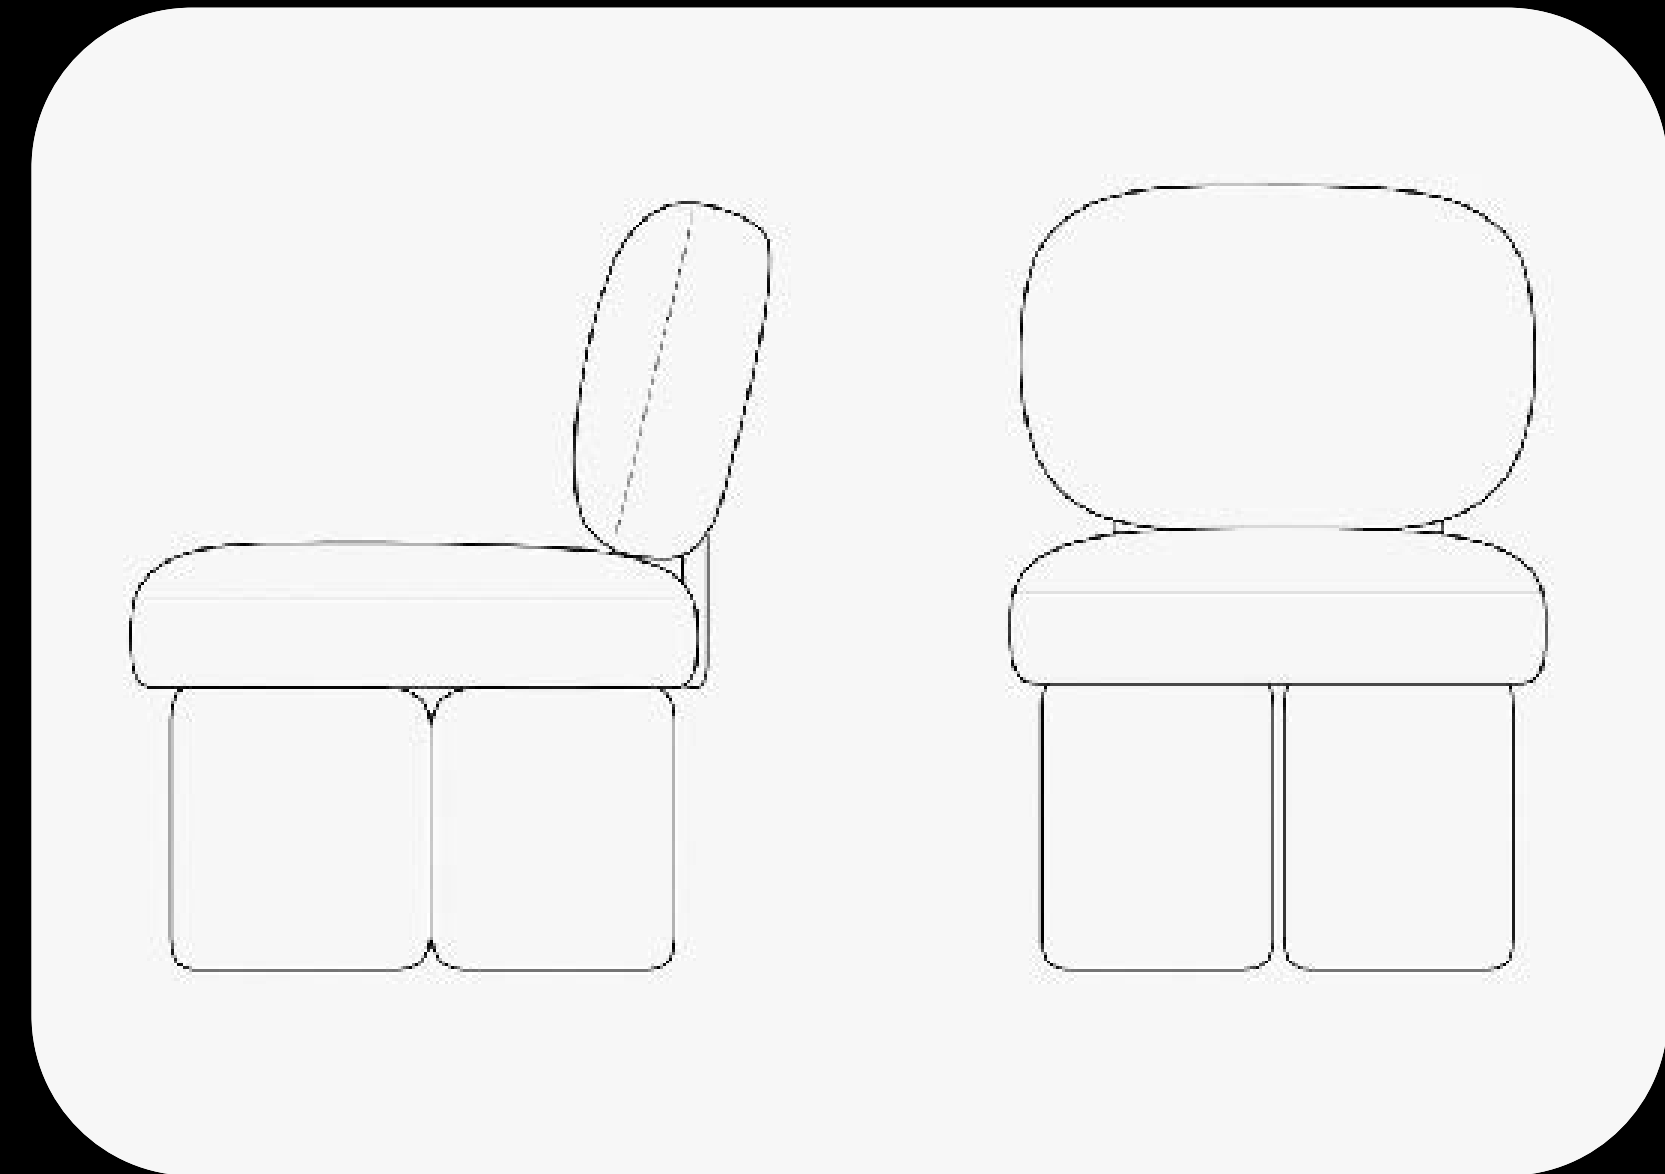

3D to CAD

Prompt

Create 2D flat elevation CAD drawing this chair in side and front view. There must be no sense of depth in the 2D cad drawing and no perspective lines are allowed.

Output

* The accuracy of the results depend on multiple factors, including the complexity of the input image and the angle.

3D to CAD

Prompt

Create 2D axonometric CAD drawing this chair.

2025

Output

AI hub

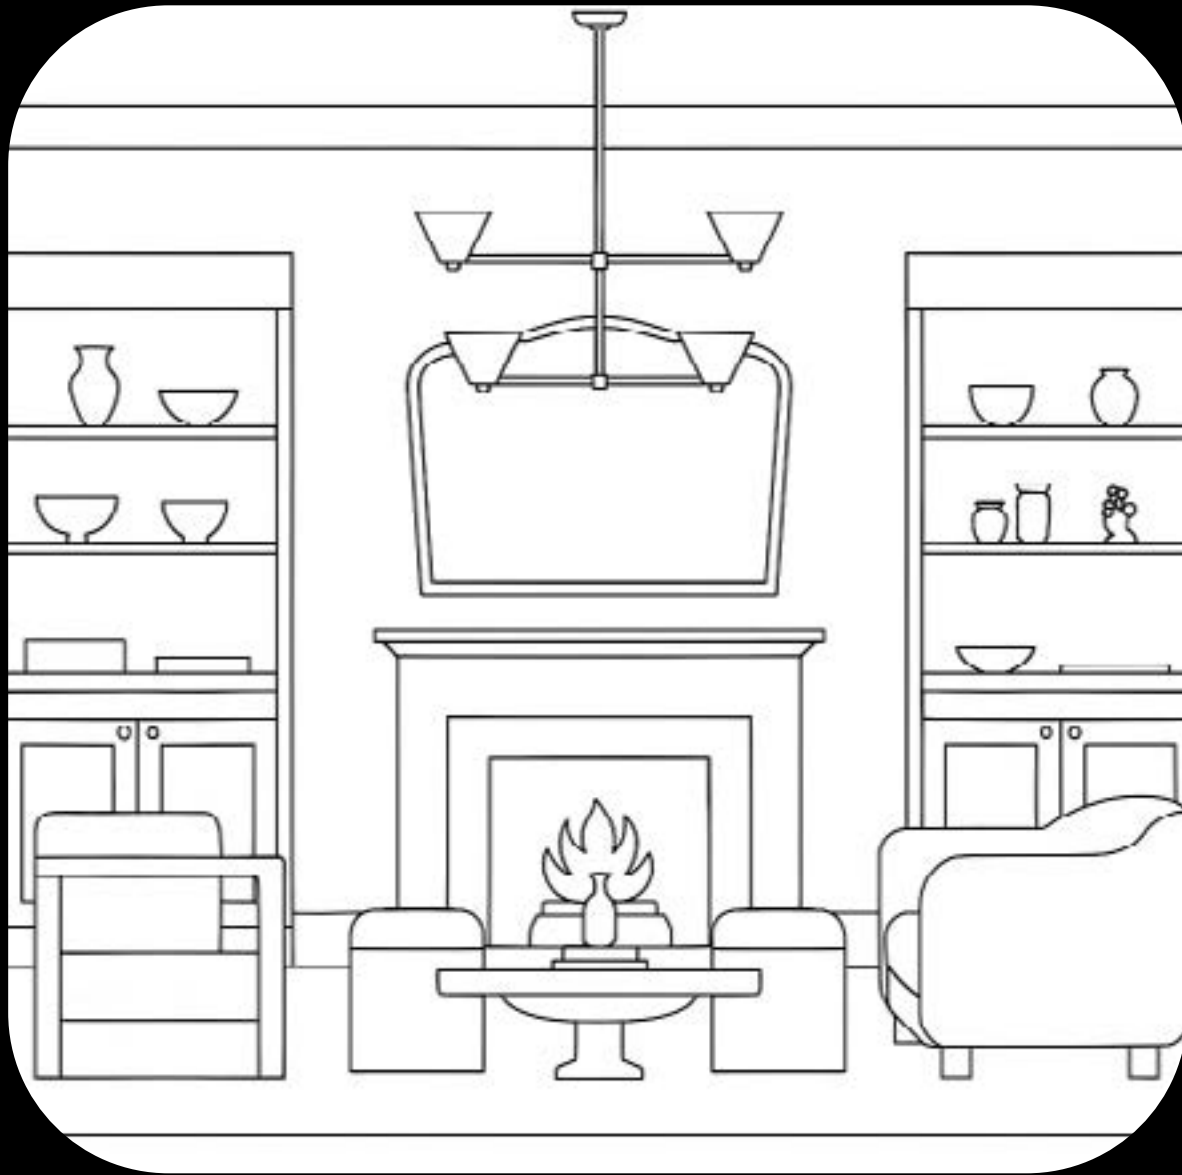

3D to CAD

Prompt

Create 2D flat elevation CAD drawing this view. There must be no sense of depth in the 2D cad drawing and no perspective lines are allowed.

Output

* The accuracy of the results depend on multiple factors, including the complexity of the input image and the angle.

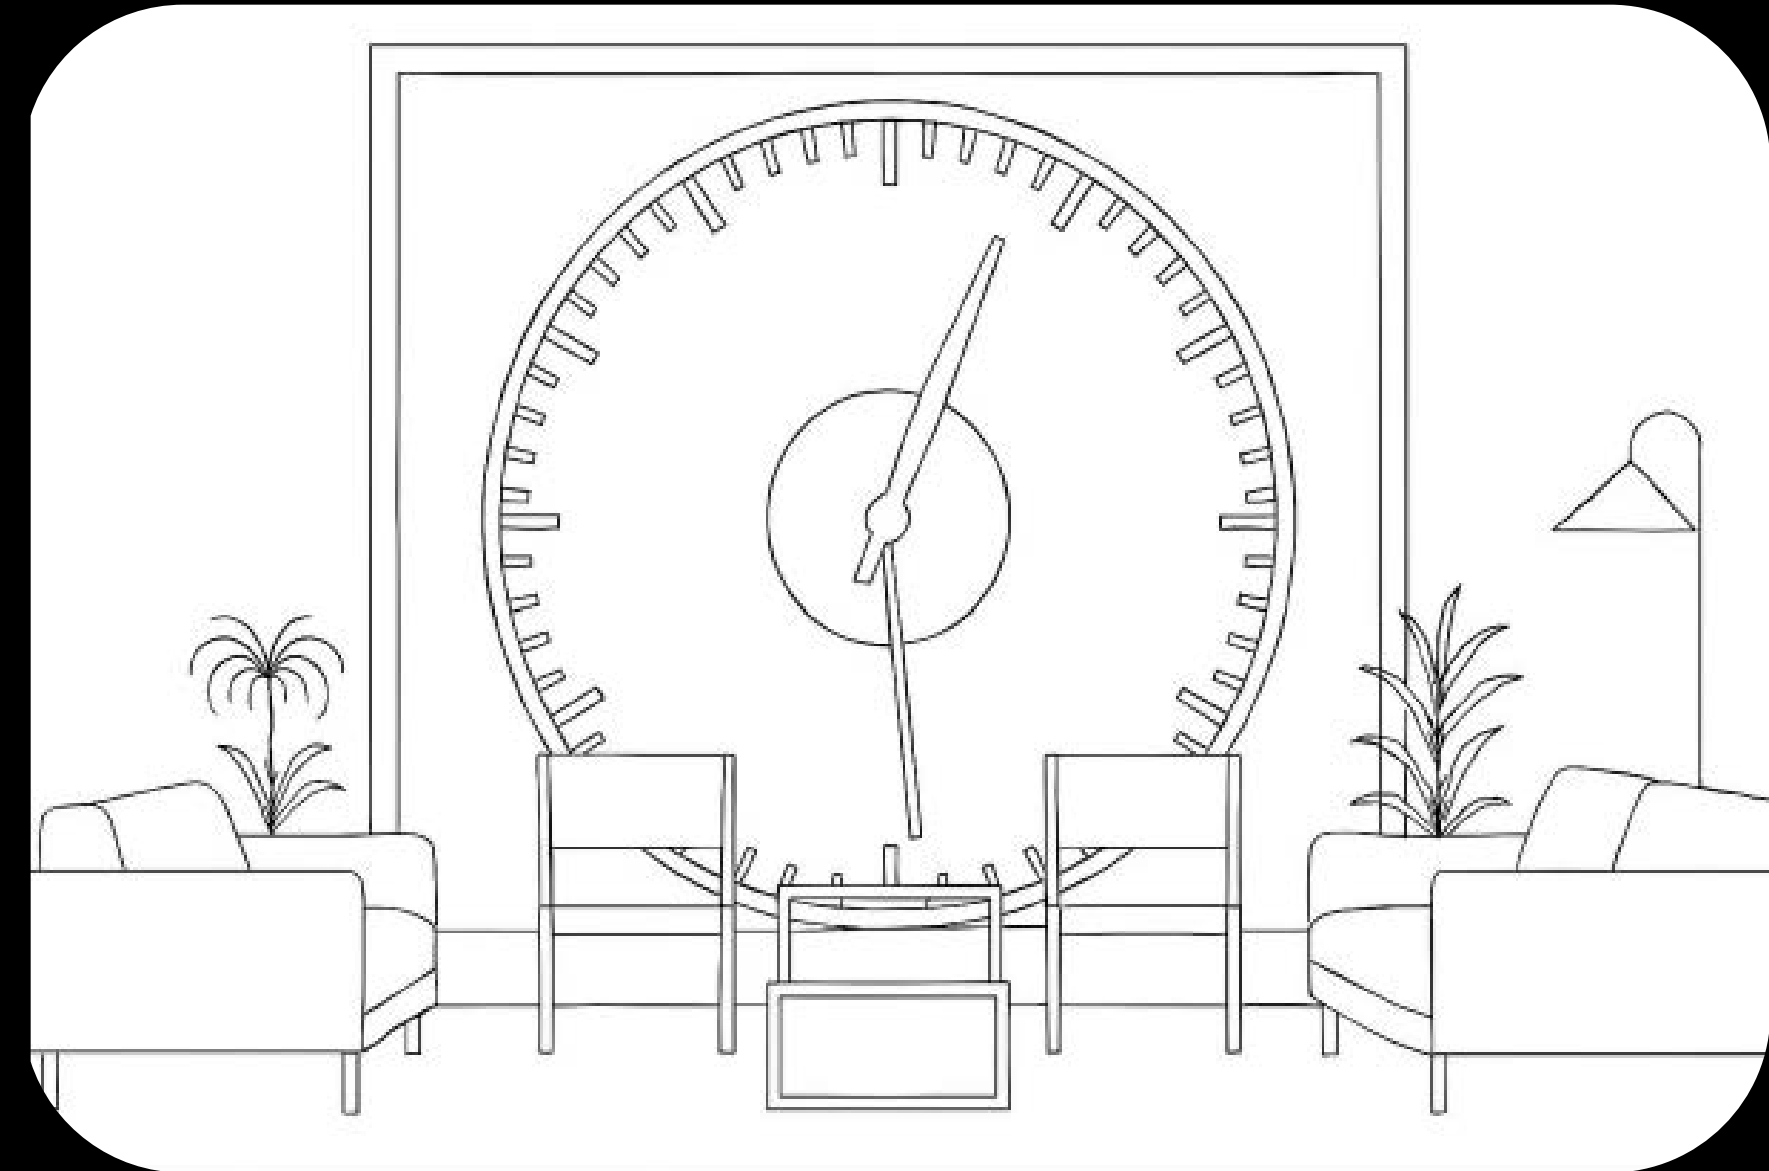

3D to CAD

Prompt

Create 2D flat elevation CAD drawing this view. There must be no sense of depth in the 2D cad drawing and no perspective lines are allowed.

Output

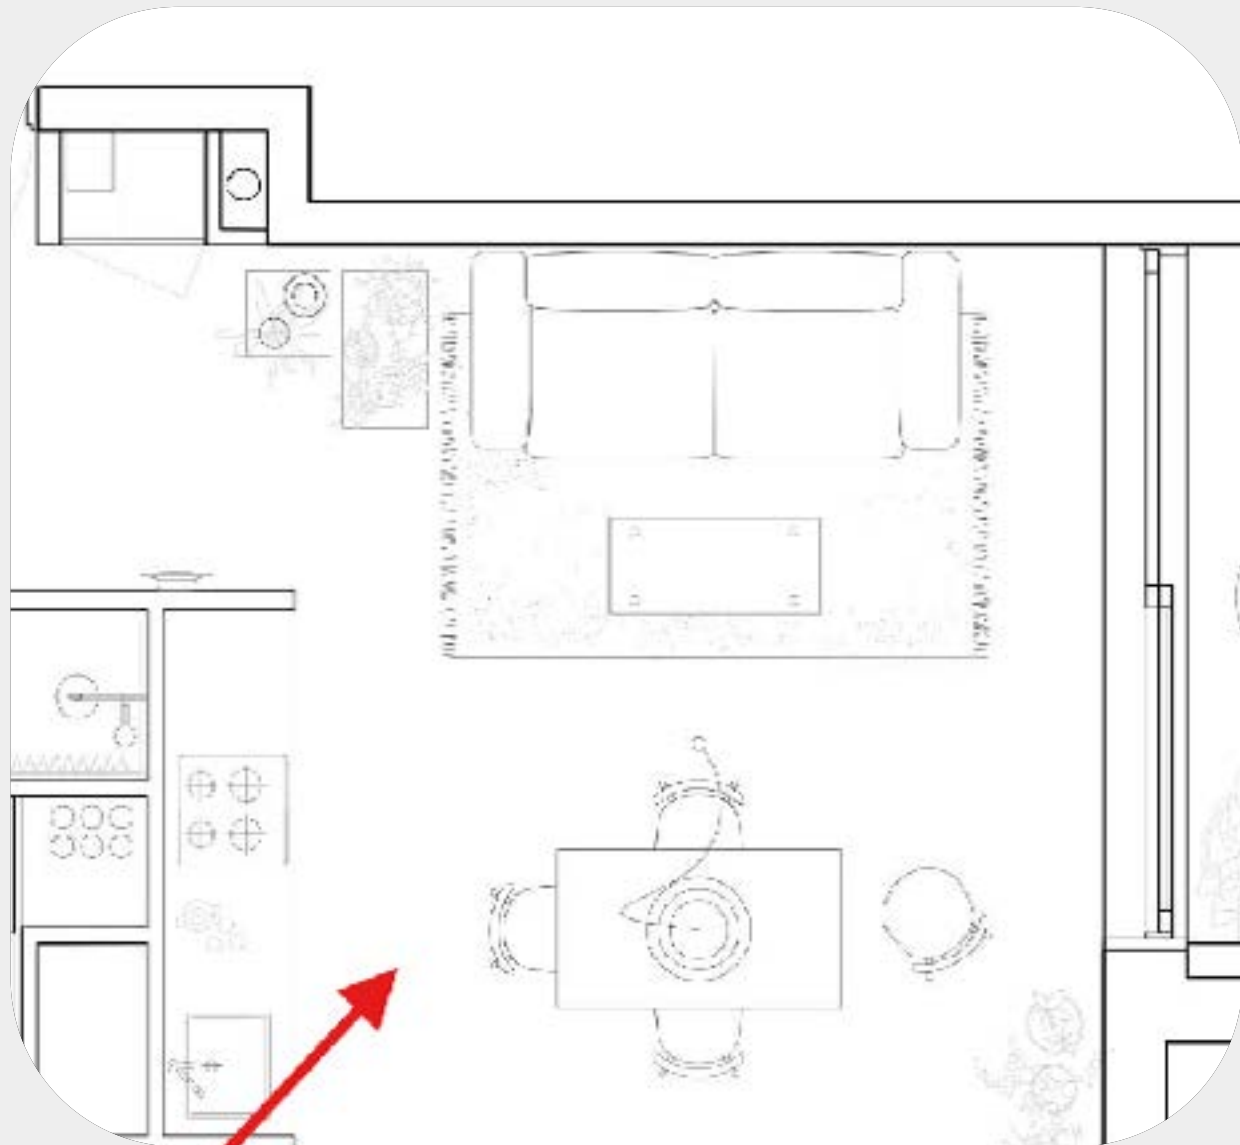

* The accuracy of the results depend on multiple factors, including the complexity of the input image and the angle.

Floorplan to 3D

Step 1: Use o3-mini to describe the scene

Prompt

Imagine you are a human, looking at this space from the red angle. Describe what you see exactly if you were to capture the view in a frame. What would you see from left to right. Describe the position of each object in relation to others.

Output

From this red-angle point, from the left you are seeing the sofa in front of a blank wall. underneath the sofa there is a rug. in front of the sofa there is a coffee table and on the right side of the image you see the dining table. the balcony door is in the background on the wall next to the blank wall. we are looking at this space in an angled view

Floorplan to 3D

Step 2: Use 4o-mini to create the scene

Prompt

+

From this red-angle point, from the left you are seeing the sofa in front of a blank wall. underneath the sofa there is a rug. in front of the sofa there is a coffee table and on the right side of the image you see the dining table. the balcony door is in the background on the wall next to the blank wall. we are looking at this space in an angled view

Output

Multiple Views

Prompt

Use this room as base reference for creating other views from other angles. Keep everything in the image the same and create a new view from [write the view]

Output

* The accuracy of the results depend on multiple factors, including the complexity of the input image and the angle.

Multiple Views

Prompt

Use this room as base reference for creating other views from other angles. Keep everything in the image the same and create a new view from [write the view]

2025

Output

* The accuracy of the results depend on multiple factors, including the complexity of the input image and the angle.

AI hub

Multiple Views

Prompt

Use this room as base reference for creating other views from other angles. Keep everything in the image the same and create a new view from [write the view]

2025

Output

* The accuracy of the results depend on multiple factors, including the complexity of the input image and the angle.

AI hub

Raw 3D to render

Prompt

Turn this raw 3D model of the [type of space] into a high-end render visual. The materials include [describe materiality and where they apply]. Do not change any details and keep the geometry consistent.

2025

Output

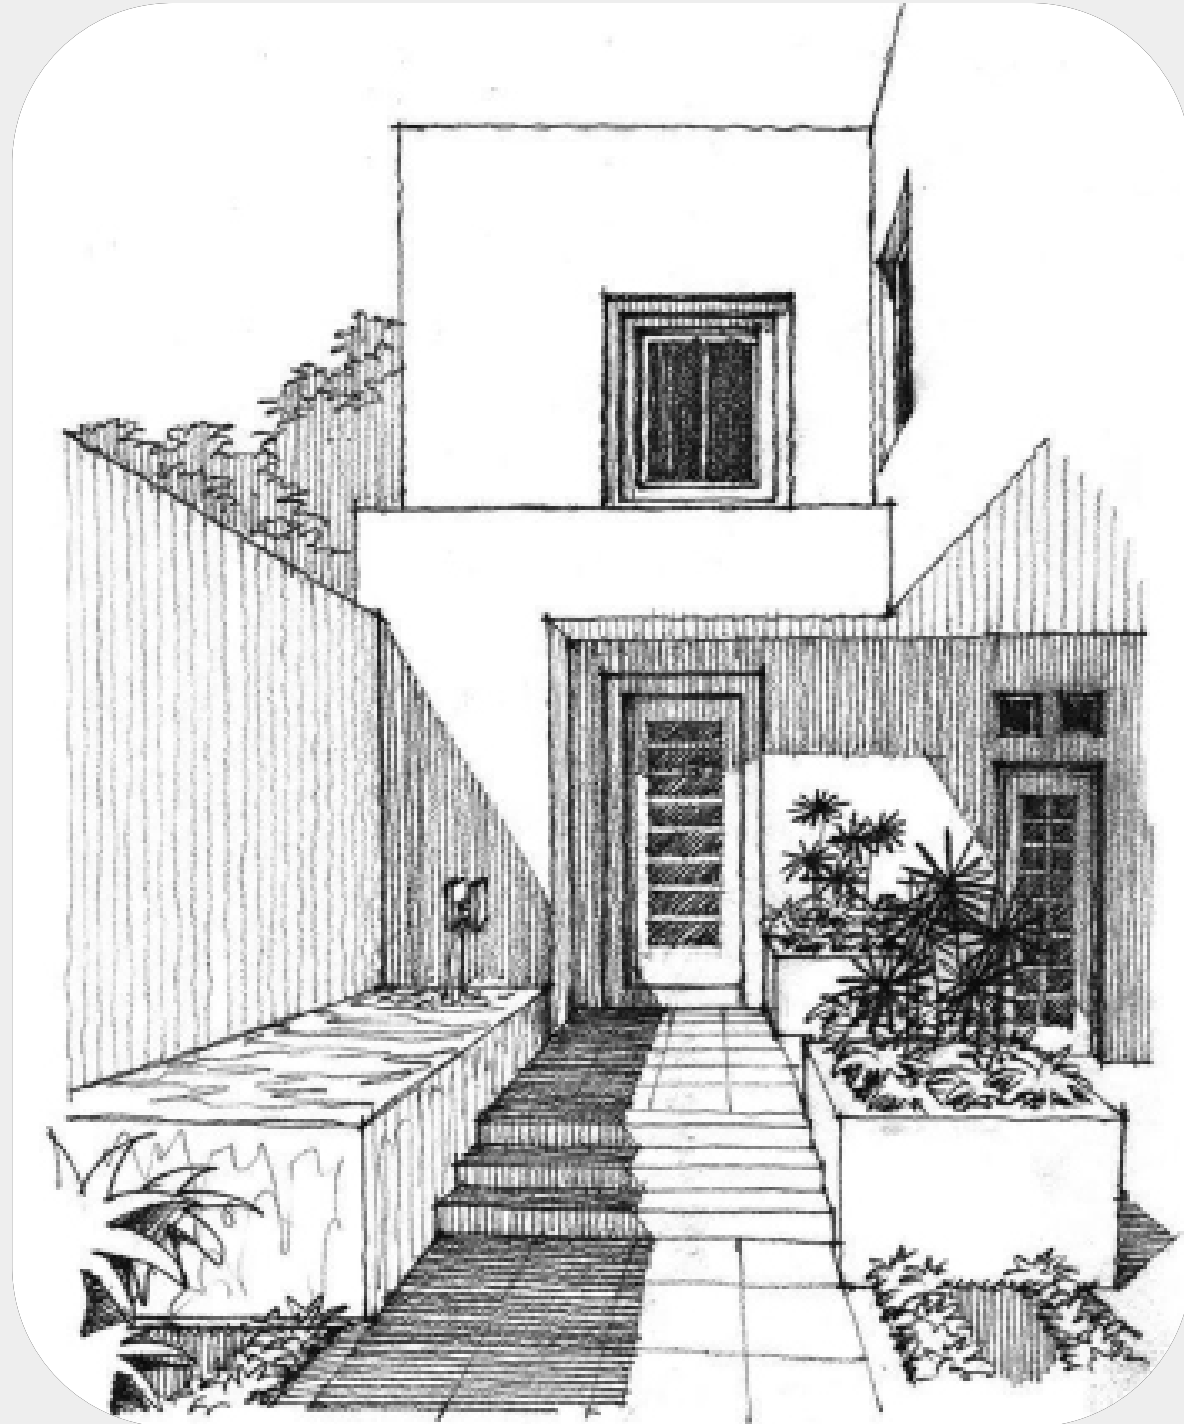

* The accuracy of the results depend on multiple factors, including the complexity of the input image and the angle.

AI hub

Sketch to render

Prompt

Turn this sketch of the [type of space] into a high-end render visual. The materials include [describe materiality and where they apply]. Do not change any details and keep the geometry consistent.

2025

Output

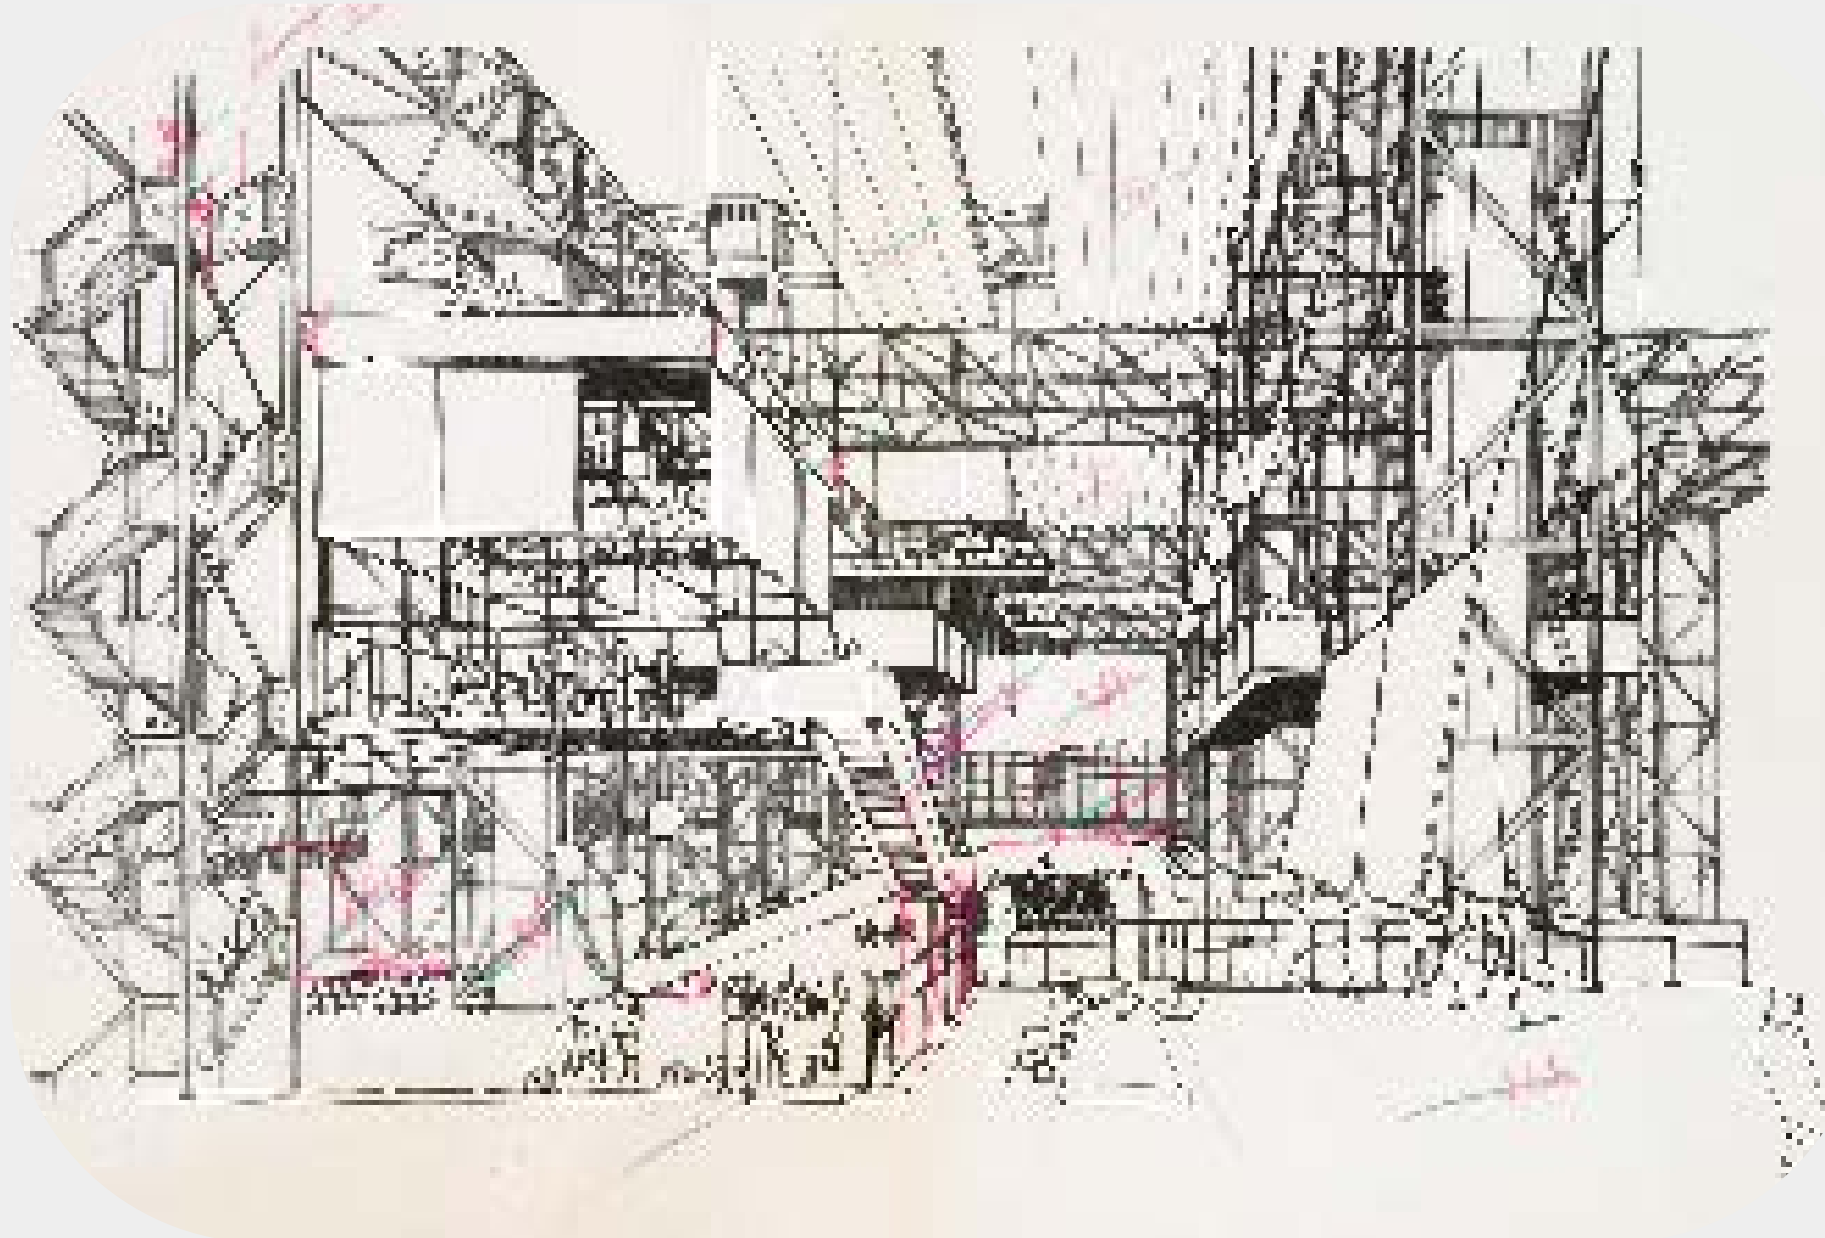

* The accuracy of the results depend on multiple factors, including the complexity of the input image and the angle.

AI hub

Sketch to render

Prompt

Turn this sketch of the [type of space] into a high-end render visual. The materials include [describe materiality and where they apply]. Do not change any details and keep the geometry consistent.

2025

Output

* The accuracy of the results depend on multiple factors, including the complexity of the input image and the angle.

AI hub

Raw 3D sketch style

Prompt

Turn this raw 3D model of the [type of space] into a turn the bathroom render into beautiful loose watercolour sketch with loose lines like the second image.

2025

Output

* The accuracy of the results depend on multiple factors, including the complexity of the input image and the angle.

AI hub

Raw 3D to annotation sketch

Prompt

Turn this raw 3D model of the [type of space] into a sketch with annotations and measurments. Add arrows pointing at [places you'd like to annotate] and write the material names.

Output

* The accuracy of the annotations depend on your descriptive prompt on what exactly should be written. Sometimes AI can figure it by itself, sometimes it can not.

Raw 3D to annotation sketch

Prompt

Replace the left arm chair with the orange chair. Keep everything else in the same place . Do not change anything from the main scene.

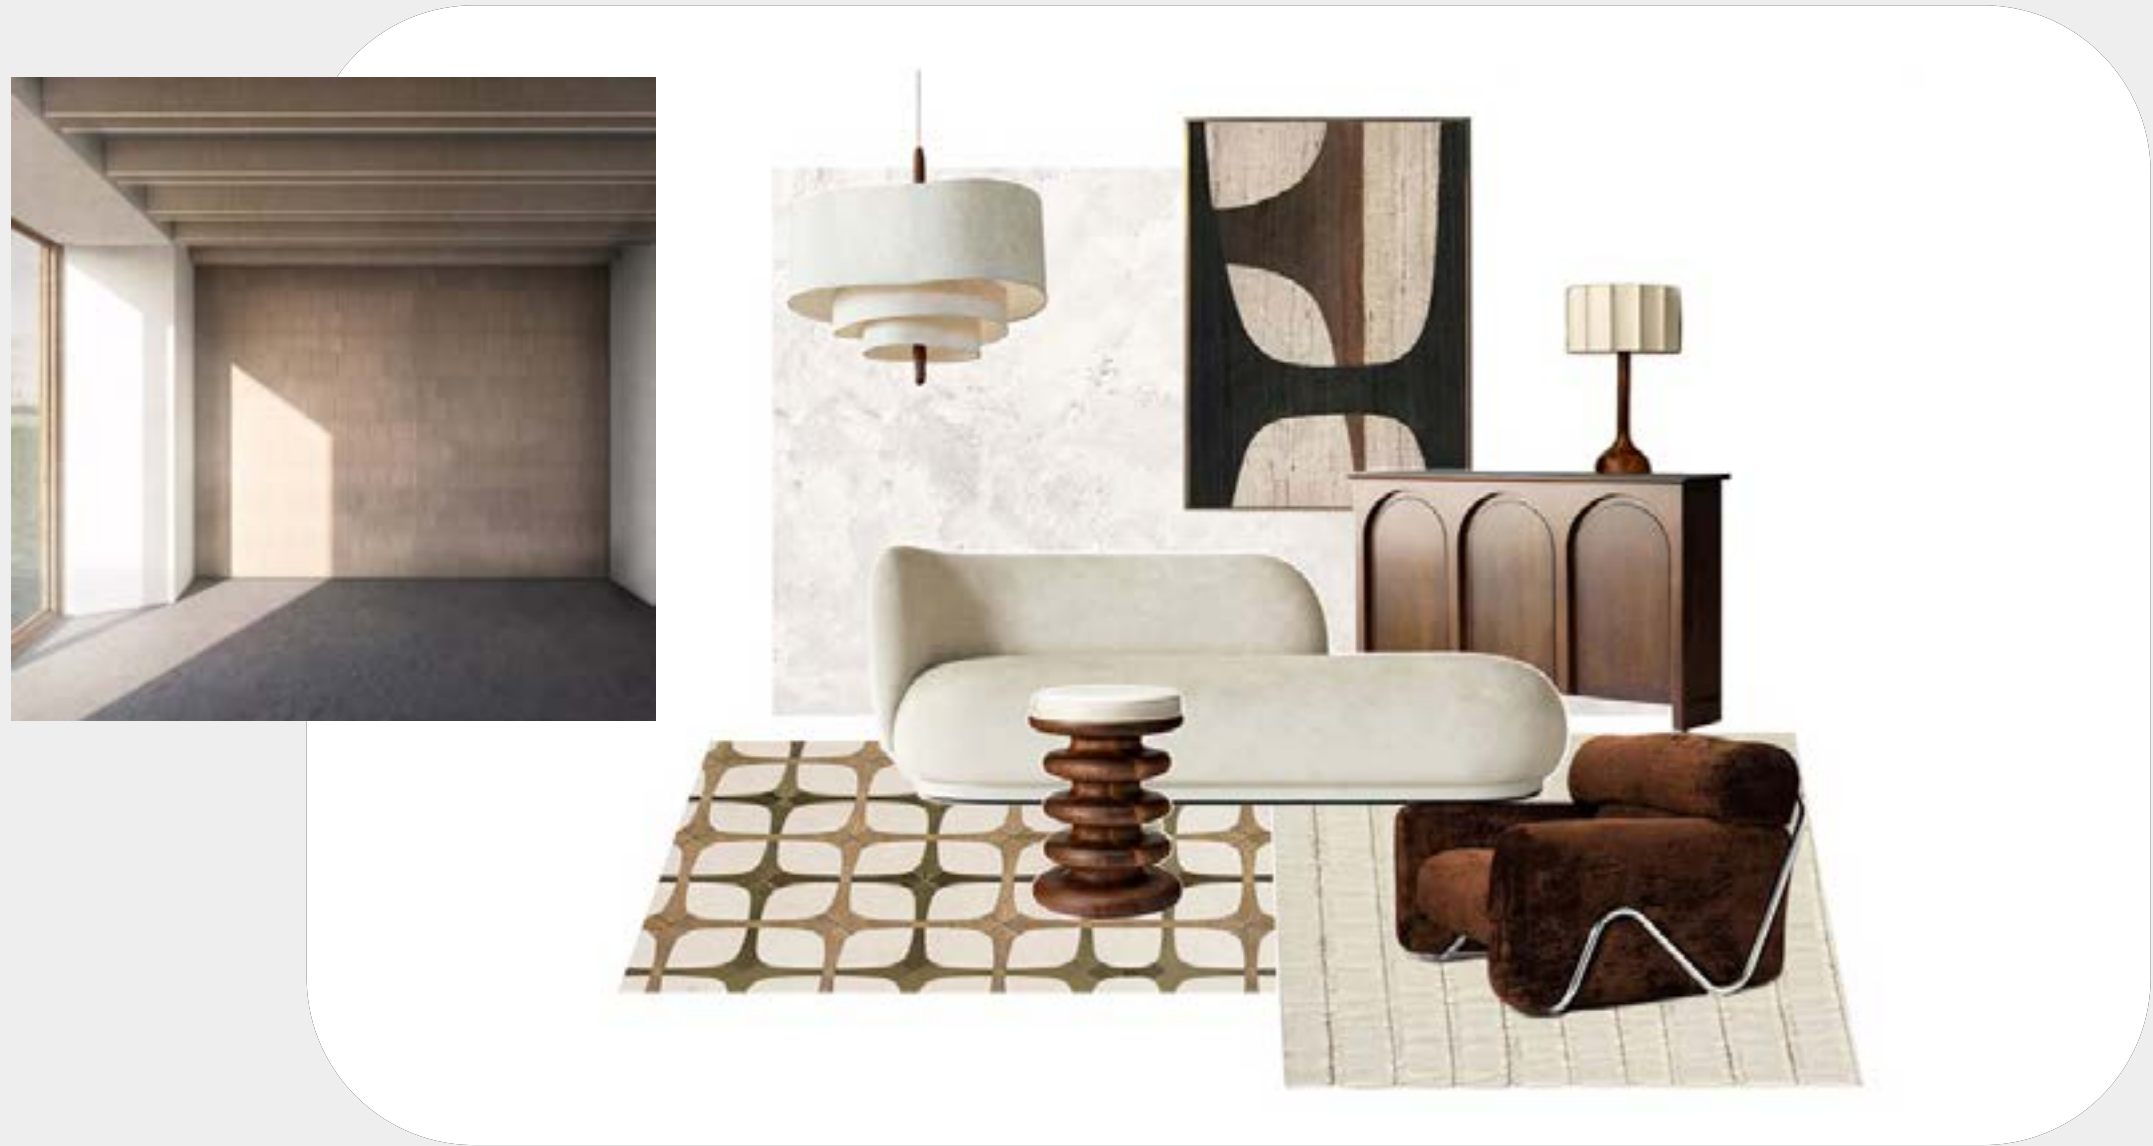

Output

* The accuracy of the results depends on the complexity of the furniture and how well the reference image depicts the shape and geometry.

Moodboard to Render

Prompt

Use the first image as the base for this render and apply the moodboard furniture and items into this space. Do not change any details of the main space and keep the room features exactly in the same position.
